FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

IF YOUR MESSAGE TO THE TRADE

is advertised in Hardware and Metal it goes by paid subscription to every wholesale hardware buyer in Canada and over 90% of the retailers. An examination of hardware-store displays, or inquiries in the stores, will convince you that these men invariably prefer to buy goods made familiar in the advertising pages of Canada's only weekly hardware trade paper.

HARDWARE and METAL

"Canada's National Hardware Weekly"

143-153 University Avenue - Toronto, Canada

Montreal Branch, Southam Bldg. Winnipeg Branch, Union Trust Bldg.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

Great Fence Business Ahead

You Are Now Face to Face With the Richest Fence Selling Opportunity of Recent Years

The farmer has been putting off his fence problems till prices could come more within his reach.

Frost prices are down to meet the farmer's ability to pay at the present low prices he gets for his farm products.

Those old fences of his must be in pretty bad shape by this time. Show him the time has come to renew them. This suggests some active emphasizing of Frost Fence.

Remember, you are dealing with wary buyers, especially those who have tried to save money on "cheap" fence. Sell quality Fence–Frost Fence.

Point out the famous Hold-Tight Lock, the extra heavily galvanized wire, and other special features by which Frost Fence stands alone as the least expensive fence the farmer can buy—cheaper to put up and maintain—the neatest, tightest, handsomest fence on the market.

Why not do some active campaigning and run up your sales! Let us cooperate.

Frost Steel and Wire Company, Limited

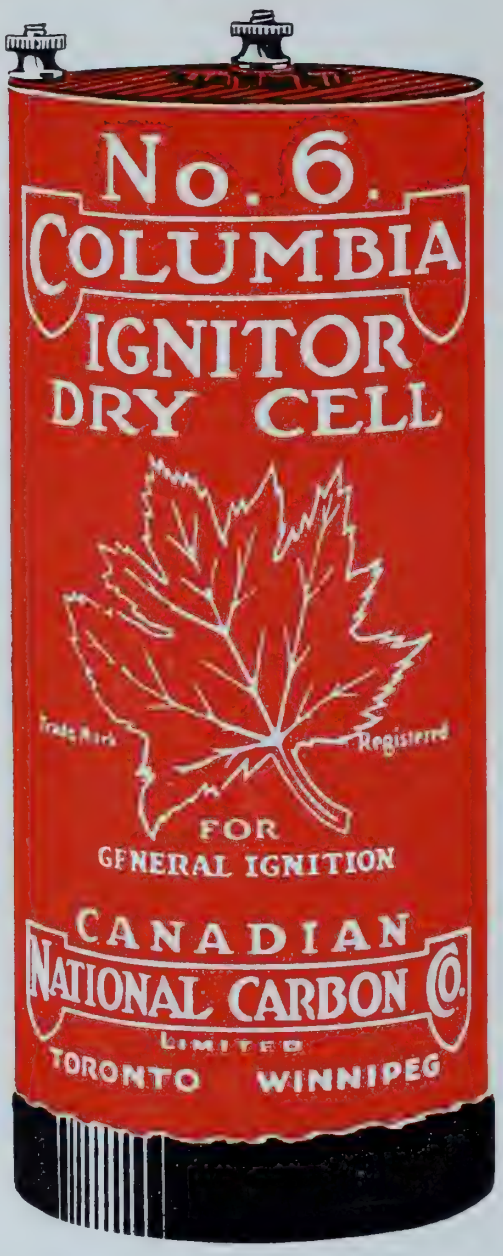
SHER-WILL-LAC

THE SHERWIN-WILLIAMS Varnish Stain of Guaranteed Quality

GUARANTEED by the "Cover the Earth" Trade Mark on the label. And worthy of your recommendation on that account because "Cover the Earth" Paints and Varnishes are accepted everywhere as the best that money can buy.

Back of every dealer who displays Sher-Will-Lac this coming season will be a vigorous campaign of consumer advertising. And in addition Free Sample and Cumulative Discount plans that will make regular displays of Sher-Will-Lac worth the while of every aggressive paint and varnish man.

Write for details of this sales building proposition.



Millions of Columbias Are In Use—

Ringing bells,
Protecting bank vaults,
Calling the police,
Ringing fire alarms,
Buzzing buzzers,
Firing blasts,
Running toys,
Calling Pullman porters,
Ringing burglar alarms,
Lighting tents and outbuildings,
Operating telegraphs and telephones,
Furnishing ignition current for gas engines, tractors, motor boats, and quick starting of Ford cars.

Columbia is the fastest selling dry battery on the market. It has the largest turnover. Columbia advertising is nation-wide and persistent. Columbia Quality is always uniformly high. It is the dry battery that makes the most profit for you and brings your customers back for repeat sales.

The big selling season is ahead of you—make sure that you have an ample stock of Columbia No. 6 Cells and the famous "Hot Shot" types. Order through your Jobber specifying Columbia by name.

144 PAGES OF SEASONABLE HARDWARE INFORMATION

This, the latest issue of "Howland's Bulletin" has been mailed and we hope your copy has reached you. If not, however, and you are in Ontario it will be a pleasure to send one upon request.

In ordering, the "Bulletin" serves as a Guide; suggests seasonable goods that we know will prove dependable, salable articles for the retail hardware merchant. Goods that you can sell with confidence, certain that they will give satisfaction to your customers and bring future business to you.

We take a distinct pride in our Mail Order Service. If you are in need of goods, or merely want information, get in touch with us by mail.

Howland's Bulletin makes it easy to order by mail.

"What I Tell 'em!"

Reg'd 1922
Mr. SMP

By Mr. SMP

All you have to do to make Diamond Ware or Pearl Ware go with a bang is to have a few hard-headed, reason-why selling arguments tucked up your sleeve. Here are some of my selling points for Pearl or Diamond Ware boiled down. This is what I tell 'em about

SMP Diamond or Pearl WARE

1 It's Clean

(a) Just as pure and clean as porcelain or china;

(b) Soap and water will keep it bright;

(c) Dirt cannot cling unseen to its smooth, hard surface;

(d) It cannot absorb grease or odors;

(e) Its surface will not stain or discolor;

(f) It is the most sanitary kitchen-ware made.

2 It is Efficient

(a) For even, perfect cooking, you can't beat Pearl or Diamond Ware;

(b) It heats far quicker and more evenly;

(c) It stays hot and concentrates the heat where it's needed;

(d) It brings out the true food flavor;

(e) Gives food a tender texture.

3 It's Durable

(a) Pearl or Diamond Ware, if properly treated, will last a life-time;

(b) Made only of the finest steel and enamel;

(c) Pearl Ware has two coats of SMP enamel, Diamond Ware has three coats of SMP enamel;

(d) Made from open hearth sheet steel;

(e) Alkali in water or food acids cannot injure Pearl or Diamond Ware;

(f) Scraping with a knife cannot harm it;

(g) You can't burn a hole in Pearl or Diamond Ware;

(h) Safe over the hottest stove or in the hottest oven.

4 It is Economical

(a) Diamond or Pearl Ware saves fuel;

(b) Heats more quickly than any other utensils;

(c) Comes to the boil in half the time;

(d) Concentrates the heat where it is needed to do the work;

(e) Enamel holds heat in;

(f) Saves waste of money in special cleansers;

(g) Will give longer, steadier service;

(h) Brings out the true food flavors from even the cheapest foods;

(i) Saves left-overs without waste, taint, discoloration or loss of flavor;

(j) Saves your time by cooking foods quicker.

5 It is Beautiful

(a) Pretty and attractive in color;

(b) It helps to make a kitchen light and cheerful;

(c) It is more pleasant to work with;

(d) It is a pleasure to cook with such pretty ware;

(e) It is a pleasure to keep such pretty ware clean.

NOTE

We have a few extra copies of this ad. for retail salesmen and jobbers' travellers who want ammunition to really sell Pearl Ware and Diamond Ware.

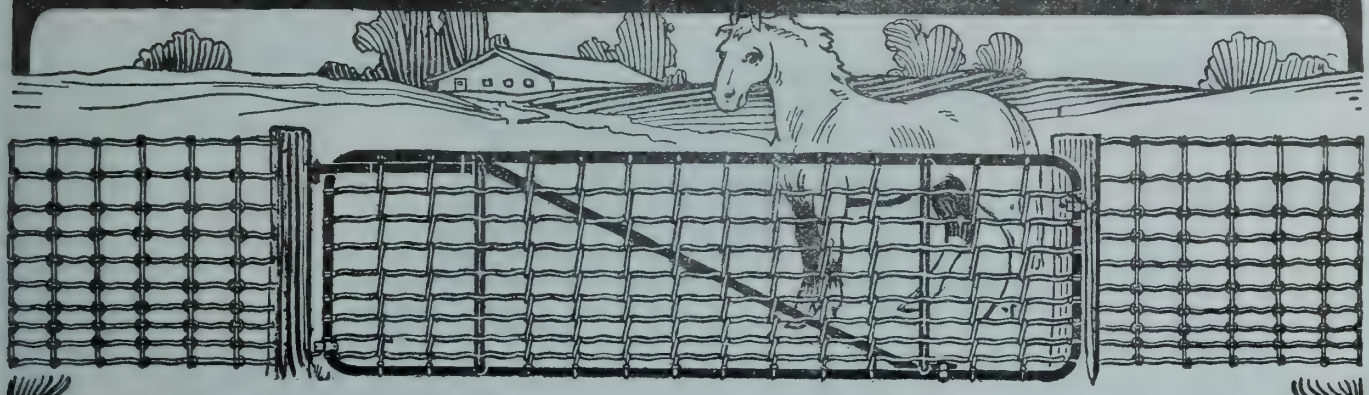
Build Up a Profitable Fence Business!



THE reduction in the prices of Peerless Fence announced recently appeals to the farmer. He has neglected his fences during the last few seasons, waiting for lower prices. With to-day's prices you can sell Fence to the farmer who has been holding off for this reduction.

Peerless Fence prices are on the same level as bar iron. In one case you get a finished product heavily galvanized, in the other simply raw material. Weigh up a roll of Peerless Fence and figure out the price per pound and you will realize that the farmer cannot afford not to buy fence this season. When you can sell quality fence at the price of rough iron you surely are giving the farmer his money's worth.

Peerless Long Span Gates are down in price too. Like Peerless Fences they are built to last—braced like a steel bridge—can't sag or twist—a thousand times better than ordinary gates. Your customers will appreciate the difference.

You should have stock to fill the farmer's orders when he is in town ready to take his fence home. Write for our proposition to Dealers.

Now for Some High Tension Selling!

All over your district there are fences that should have been renewed long ago.

Farmers know well they should be renewed — and they *intend* to renew them—and they *will* renew this year if—

—if you and ourselves get after them strong.

How are they to know they need wait no longer for Frost Fence prices within their reach, unless we do some high tension selling! For our own part we are advertising the great Frost values far and wide and are spending thousands of dollars on our faith in big fence business this season!

The more you boost Frost Fence right now—before the farmer gets busy in the fields—the more you will sell. Right now is the strategic moment for high tension selling.

When you see the farmer come through your door why not speak to him about Frost Fence. Tell him about the famous Frost Holdtight lock, and the many other Frost superiorities. Sell him Frost Fence and its performance will win his good will for your store. Frost fence will stand up longer and save him more money than any other Fence!

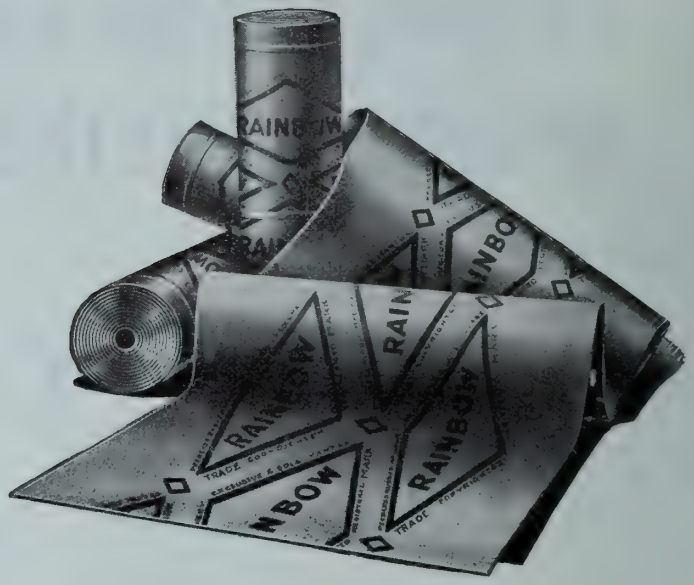
Confidence In RAINBOW PACKING



For over thirty years, Rainbow Red Sheet Packing has justified the confidence of steam engineers everywhere.

They know from experience that a gasket cut from packing bearing the diamond-shaped Rainbow trade mark is their best guarantee of a permanently packed flange.

There's a Rainbow Packing, made in Canada, for every mechanical use.

Your jobber can assist you in ordering a suitable stock to assure your share of the Rainbow trade.

IMPERIAL
Floor Dressing

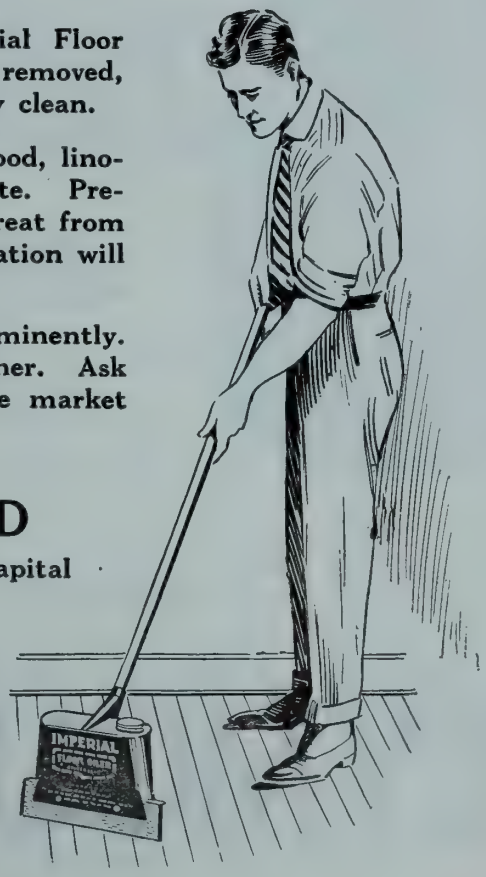
Get the dust with the dirt-

You can't *eliminate* dust entirely, but you *can control* it. Imperial Floor Dressing will keep it where it belongs—on the floor—not floating around to settle on shelves, counters or merchandise.

By holding the dust to the floor with Imperial Floor Dressing, it is easily swept up and completely removed, thereby keeping your store bright and spotlessly clean.

Imperial Floor Dressing cleans and preserves wood, linoleum or oil cloth. It does not gum or evaporate. Prevents checking and cracking. One gallon will treat from 500 to 700 feet of floor surface, and one application will last for weeks.

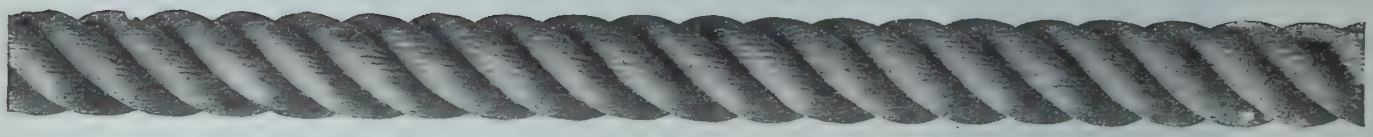
Use Imperial Floor Dressing and display it prominently. You will find both profitable. One sells the other. Ask the Imperial Oil Salesman to explain the large market there is for this product in your territory.



IMPERIAL OIL LIMITED

Canadian Company Canadian Capital
Canadian Workmen

To insure even distribution of Imperial Floor Dressing, use the Imperial Floor Oiler. It does the work quickly, easily and most economically.



Rope Buyers—
It Pays to Handle the Best

Place your Spring order now with your Jobbing Traveler, and say you *must have Plymouth.*

Every wholesale dealer in Canada can supply you with the well-known Plymouth "Ship Brand."

Plymouth Rope will invariably give your customers a little more service than they reasonably expect. It has been doing this for nearly a hundred years; that is why the Plymouth Cordage Company is the largest cordage plant in the world to-day.

The most popular rope sizes for spring shipment are ¼", ½", and ⅞" diameter

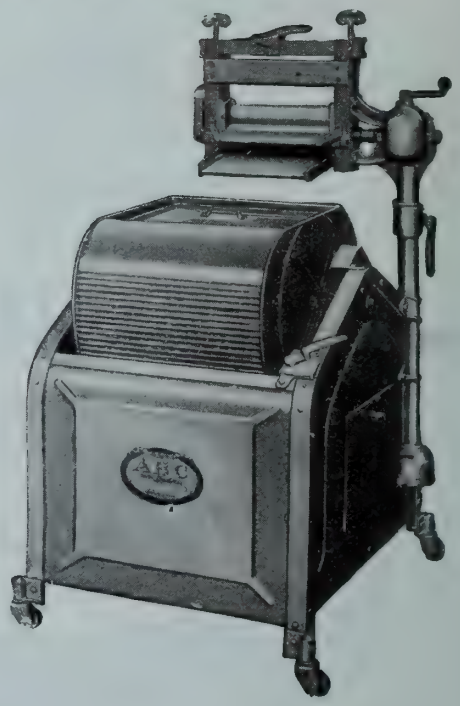
A B C
OSCILLATOR

Retail Price $135

(Except British Columbia and the Maritimes.)



The Washer that Thousands Await!

Dealers allowed a FULL Profit!

Think of all the people in your locality whom you could interest in this A B C Oscillator at $135! Never before has a washer of this type, bearing a famous maker's name, been sold at so remarkably low a price!

This latest addition to the A B C line of washers and ironers is a washer of full-size six-sheet capacity with *heavy tin-lined copper tub.* It has a heavy angle-iron frame, a quiet springless mechanism and a *galvanized* iron cabinet which safely encloses all moving parts, yet permits free access to them.

It is now easier than ever for a dealer to concentrate his efforts upon A B C's. For he has an A B C for every purpose and every purse.

The other A B C's are the "Alco" (dolly-type) washers — single or double-tub models, electric or power-driven; A B C "Super Electric" washers, semi-cabinet or full-cabinet models with galvanized or copper tubs; A B C electric ironers; equipped to be operated by any model A B C electric washer or independently motored, as desired.

Exclusive dealerships; hearty co-operation; liberal discounts. Write for the A B C proposition to-day! Address any of the undersigned.

STAR HACK SAWS

This is No Time to Carry Excess Stock

In these days of careful buying and selling, wise dealers are cutting down their line to only a few brands of hack saws. Many find that they need no more than the Star Saws to satisfy every customer.

Owing to the early appearance of Star blades upon the market and their large distribution in advance of all other hack saws, they are subject to less selling resistance than other brands.

The leadership enjoyed by Star Hack Saws for 38 years makes this the logical brand for you to push.

Star Saws are now sold direct from the factory in Middletown, New York, where they have always been manufactured.

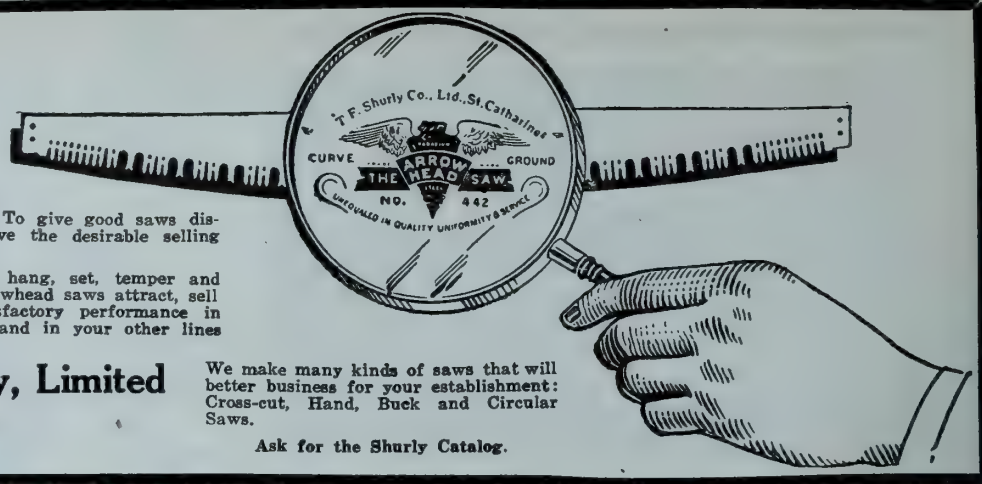
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines

Empty Shelves— and a Prediction

WITH inventories completed, retail hardware merchants find their stocks smaller now than at any time in recent years. Merchants have held back on spring bookings and freely admit that present stocks are totally inadequate for "Spring and Summer" trade.

Reports from retailers in all parts of Canada are such that we predict a pronounced buying movement within the next six weeks. We are entering a period of improved but cautious buying activity. Purchases will be considered more carefully, comparisons will be made more freely than heretofore. Merchants are adopting a "convince me" attitude. Unknown houses and unknown products are going by the boards these days. Merchants are not taking chances on buying any lines where there is an element of doubt as to the standing or reliability of the manufacturer or the product.

Merchants are the "choosers" to-day. The question is not one of where can I secure goods? It is a question of "whose line will I stock?" At the moment of decision, the line consistently advertised in Hardware and Metal—all other things being equal—is the one that stands the best chance of acceptance by the merchant. The 34th Annual Spring Buying and Directory Issue of Hardware and Metal, reaching the trade on March 18th, will be studied closely by over 95% of the most important wholesale and retail hardware buyers across Canada from coast to coast. Thousands of feet of empty shelving will be filled up with lines advertised in the 34th Annual Spring Buying and Directory Number. Reservation should be made immediately.

Retailers' Interests Much Involved

Opening of Parliament This Week Commences Session at Which Strong Objection Will be Launched Against Direct Taxes on Sales or Turnover by Retailers—Features of Present Sales Tax Legislation Which Work Out to Retailer's Detriment—Change Method of Collecting Scale Inspection Fees

By Ottawa Representative of Hardware and Metal

THE SESSION of Parliament which opened on Wednesday of this week will bear constant watching as present indications are that it will be fraught with matters of special interest to the hardware trade. The outstanding feature will be the discussion of the Sales Tax.

Early indications are that retailers generally, including hardware merchants, will offer strenuous opposition to any attempt that may be made to have the government collect taxes direct from retail merchants on their sales or turnover each month. This they claim would be a great injustice to practically every line of retail trade and particularly to hardware merchants and implement dealers.

They point out that to collect a sales tax of one or two per cent. on the sales of barbed wire, binder twine, nails and a large number of other articles upon which there is a very small margin of profit, would be very unfair to the retail dealer, whereas a tax on the sales of some lines of goods where there is a fairly large margin of profit, would not be so bad. However, the cost of collection in either case, if the government should need to have officials chasing around to every village store in Canada, would be enormous.

Retailers Oppose Recommendation

Delegations of manufacturers and others have presented their views to the government and have been urging this system, but a deputation from the Retail Merchants Association of Canada has also waited on the government and pointed out the position the retail dealer would be in. Officers of the Association and other retailers have not been backward in stating their opposition to the manner in which the Act is being administered, and they are now engaged in preparing a number of amendments, having in view the removal of the outstanding objections they have to the Act at the present time. They claim that no system of taxation can be devised which will work out equitably to everybody, but they are adopting the principle that of two evils, the lesser should be chosen. In this case they believe the lesser of the two evils would be that of collecting the tax from the source of supply; that is from the manufacturer and the importer. They recognize that the government must have money to pay the debts created by the war and they fully realize that nearly every channel in which it is possible to apply taxation is already overloaded, and if the Sales Tax proposed will raise the amount required without resting too heavily on any one class in the community it is worth trying out.

Suggested Re-sale Price a Hindrance

There is one unfortunate feature the retailers recognize and that is that on all goods that bear a suggested re-sale price such as certain safety razors, carpet sweepers, and other such lines, the prices on these goods cannot be increased so as to cover the tax, and as the manufacturer and jobber pass the tax on to the retailer, he must absorb it without there being any chance of his adding it to the price of the article.

In this connection, it may be interesting to know that as a result of a large delegation of United States congressmen who visited Canada recently to investigate our Sales Tax system, the President of the United States has endorsed the principle and they are now endeavoring to arrange the details, though the Senate has made some opposition.

Change Collection of Inspection Fees

An attempt will also be made during this session to have a change made in the present system of collecting fees for the inspection of weights and measures. This matter was taken up some time ago but owing to the war it was necessary to suspend action. However, now that the war is over, the matter has been taken up again. An effort is to be made to have the fees abolished and the money necessary for carrying on the department paid out of the funds of the treasury.

An endeavor is also being made to secure for the members of the Automobile Section a refund of the money taken from them when the Luxury Tax was removed, which amounts to approximately one million dollars, and which they consider the government is not justified in holding.

Extend Gold and Silver Marking Act

Steps are also to be taken by the retail merchants to secure, if possible, an extension of the working of the present Gold and Silver Marking Act so as to include, in the duties of inspection, that of prosecuting all false advertisers.

In addition, every effort will be made to have the present Act respecting the Marking of Goods With the Country of Origin, wiped out entirely. This Act has been suspended until the end of the present session of Parliament.

The difficulties brought about by the enforcement of the Marking Act have been fully outlined in previous issues of Hardware and Metal. It is fully expected that the government will follow out the requests made by importers and others and suspend the operation of this Act or amend it drastically so as to be less of a strain upon the business relations between Canada and manufacturers of other countries.

The first session of the fourteenth Parliament of Canada will deal with many problems of direct interest to business men, among which is the indefinite state of certain rulings made by the last Parliament concerning the status of retailers and manufacturers for taxation. This, to retailers, is one of the most important items to be considered and an early ruling is hoped for which will set at rest those who at present do not know to what category they belong.

Need for Quick Turnover of Hardware

Standardization and Concentration of Selling Energy in Hardware Trade Outlined at Course for Retailers—Accumulate Merchandise in Periods of Inflation but Dollars in Deflation Periods—In Difficult Times Dollars Must do More Work, Profit Percentages Should Not Be Increased

AT THE SERIES of lectures delivered in Winnipeg this week by authorities on various topics, many points of interest and value to retail merchants throughout Canada have been brought out. The representative of Hardware and Metal has summarized a number of the important points in the following report.

The consumer must not be asked to pay larger profits to the merchant and retailer just because the latter, through neglect to make his dollars work harder believes the only way for him to remain in business is to add to his percentage of profit, said H. P. Sheets, of Argos, Ind., secretary-treasurer of the National Retail Hardware association, in the course of an address on "The Necessity of Quick Turnover in Business."

Mr. Sheets, with the aid of a chart showing the inflations and deflations in business for the last fifty years or so, showed how those periods occurred at regular intervals. Periods of inflation were always offset by periods of deflation. During the periods of inflation, merchandise should be accumulated, while during deflation periods, dollars should be accumulated. Buying and selling must be kept going, and at certain times and under given conditions the merchants must work harder themselves, and they must also make their dollars work harder, that is, they must attend to quicker and more often repeated turnovers.

It sometimes happens, said Mr. Sheets that a merchant, when things were not going just as he might wish, believes the only means by which he can remain in business is by making the consumer, his customers, pay an increased profit. There was no justification for such a course. The merchant's duty was to see that his dollars were made to work more, to increase his turnover.

Guides to Merchants

Many things must be considered and studied by the merchant if he wished to succeed in business. He must study the movement of his goods by keeping proper records, must avoid over-buying and duplicating his stocks, must not be influenced by friendship for a salesman into purchasing goods he did not require. The merchant should be in a position to know what he actually does require in the matter of stock, by a study of his community. Duplication of certain lines sometimes simply to prevent a competitor from getting hold of a line other than the one generally handled, must be avoided. Another cause of the difficulties certain merchants found themselves in was often the failure to standardize their lines and concentrate upon them.

Mr. Sheets dwelt particularly on the necessity of quick turnover, showing by actual figures how, the dollars would "do more work," by disposing of stock instead of holding it and adding to it when it was unnecessary. The present new conditions called for most careful merchandising, and it was lack of such care and attention to the details of business which caused the failure of so many. Sluggish dollars must be made into active dollars, concluded Mr. Sheets.

POINTERS FOR RETAILERS

Consumers should not be asked to pay larger profits, but retailer's dollars should be made to work harder in these times.

Should study movement of goods and keep proper records to prevent duplication and over-buying.

Failure to standardize lines and concentrate selling energy is a common difficulty.

Importance of store arrangement and advantage of a Spring clean-up and paint-up for all stores outlined.

Use of community halls, rest rooms, and other agencies to encourage common interests suggested as effective offset to mail order inroads.

Remodelling the Store

At the same session Robert C. Line, of Columbus, Mont., spoke on "Remodelling Your Store," pointing out the necessity of making the country store as attractive as possible in order to draw the necessary amount of business.

In dealing with the matter of remodelling stores, Mr. Line emphasized the importance of the attractive physical appearance of the country store. He fully explained, using a number of diagrams and drawings on the blackboard to illustrate his lecture, how the length, breadth and height of the front of a store, and the manner in which the exterior and approaches to the building were arranged, were outstanding features in attracting business. The proper lighting, not only of the showroom or principal room of the store, but also of the show windows and frontage of the store, was worthy of most serious consideration and attention of the country merchant. Attractive, not necessarily expensive, fixtures, showcases where goods can be displayed to proper advantage, should be erected in the store. The lecturer urged all storekeepers to "clean up and paint up" as often as possible to make their place of business look as "spick and span" as possible. Mr. Line dwelt to some extent upon the importance of the proper display of long profit goods and new goods, and also spoke of the necessity of attentive and careful service by either the owners or the staff of the store.

Advertising

What is advertising, how to advertise, what advertising does for the retail merchant, and how a proper advertising campaign should be conducted, were the principal subjects dealt with by Mr. Dunlop. Advertising, he said, was no more nor less than salesmanship. There were many ways to advertise, the billboard, the newspaper, the circular, the poster, the window display, the circular letter, the personal letter and by word of mouth. All advertising, said Mr. Dunlop, was intended to create good-will for the product of service advertised. He then dealt fairly fully with the various methods of advertising. To succeed in his advertising, the merchant must not only know his own goods, but must also know their manufacture and composition and their application to the needs of his customers. In his advertising copy he must tell a story which is closely linked with the customer's everyday life.

Mr. Dunlop went over the various phases which constitute good advertising. Any advertising must be conducted along a proper campaign basis, otherwise the merchant can never get his money's worth out of his advertising.

The writing of advertising copy was also fully explained by the lecturer, and in conclusion he explained the use and advantages of the Dealer Service Bulletin, of which copies were distributed to all those in the hall.

Community Hal's

Community halls and rest rooms, in the towns and villages of Canada, are a prime necessity, if the population and capital of the rural districts are to be built up instead of being retarded as at present, said Alex. Karr, of Fargo, N.D., an expert on community problems, in a brief talk to retail merchants.

Mail order houses are among the prime factors which are sending the small merchant to the wall, declared Mr.

Decimal System for Small Hardware

Hardware Merchants Recommend That All Shipments Contain Either the Original or Duplicate Priced Order Sheet—Bills Should be Paid Promptly and Goods Not Returned Without Shipper's Permission—Disapprove St. Lawrence River Widening Scheme

AMONG THE resolutions adopted at the recent convention of New York State hardware merchants, at Rochester, were a number of interest to Canadian hardwaremen. These are enumerated as follows:—

1. Recommendation "that all shipments of goods contain either the original invoice or else a duplicate priced order sheet, and be plainly marked."

2. Adoption of a code of business ethics stating:

(a) "It is not within the wholesaler's function to quote prices to consumers. All sales to consumers should be made through the legitimate retail merchant.

(b) "Hardware jobbers should not sell to merchants not engaged in the retail hardware business merchandise not intended for regular re-sale purposes.

(c) "Price reductions by manufacturers should be promptly passed to the retail merchant and by him to the public.

(d) "Cash discounts should be taken only within the specified or agreed time.

(e) "Bills should be paid promptly according to specified terms. In no case is the retail merchant justified in delaying his remittance for a longer period, except by special agreement, in which case he should be willing to pay a legitimate interest charge for the accommodation.

(f) "Merchandise shipped on regular order should not be returned without permission from the seller. Such permission should not be requested after the lapse of a reasonable period, and in no case should such return shipment be made 'freight collect.'

(g) "The retailer should accept railroad responsibility for goods delivered by the shipper to the railroad in good order. Deductions should not be made from the invoice to cover damage for which the shipper is not responsible.

(h) "Buyers should not violate the confidence of prospective sellers by divulging price quotations."

3. Disapproval of any action to widen or deepen the St. Lawrence River for use as a ship canal, because the present barge canal across New York State is alleged to serve the same purpose.

4. Indorsement of the "Save the Surface Campaign."

5. Opposition to any "special class legislation in any laws affecting business or commercial propositions."

6. Approval of the decimal system of packing and pricing the small articles of hardware as an aid to uniform selling lists.

7. Definition of "hardware dealer" as "one who has a store or place of business and carries a stock principally of hardware."

8. Disapproval of any commercial transactions being done on the Sabbath.

The washing machine is an important accessory for the Spring housecleaning and now is the time when many of the labor saving arguments applied to washing machines can be used to best advantage. With the approach of warmer weather the electric range also offers outstanding advantages of efficient cooking with minimum heating of the kitchen. For the days immediately following the letting out of the furnace portable heaters are useful. In connection with the Spring cleaning the housewife is in a receptive mood for suggestions that she instal a new set of kitchen utensils. Note how the various lines are grouped in this store display to good advantage.

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, MARCH 11, 1922

THE DEATH OF Senator Milne, President of Burrow, Stewart & Milne, Hamilton, Ont., recalls to mind the number of prominent personages who have had their early training in various branches of the iron and steel industry, many of whom have recently died. In most cases these captains of industry have commenced their careers as iron molders, a trade which requires not only skill, but intelligence and patience. No doubt this early training has constituted the foundation upon which men like Senator Milne have built outstanding careers.

Improvement in Iron and Steel

DISCUSSING iron and steel market conditions with Hardware and Metal recently, Robert Hobson, president, The Steel Company of Canada, Ltd., Hamilton, Ont., pointed out that the standing of the steel stocks was a good barometer of what was likely to develop later in the industry. In this connection it is noteworthy that following an advance in the price of steel by a United States independent mill this week, a better tone was immediately reflected in the steel stocks. This is the first real increase in steel prices which has occurred since 1920, and may therefore be significant. It is hardly likely that these mills have become booked up for some time ahead and then raised the price, as is common practice in ordinary times, because there is yet small volume of business to be had and the tendency has been in the other direction, namely, close competition on prices to secure bookings.

On the other hand, it is known that many iron and steel products have been produced for some time at prices which do little more than cover the producers' cost. Bar iron and steel for instance are back to levels which have not been touched since early in 1916, and producers' costs to-day are much higher than they were at that time. It is therefore apparent that some upturn might be expected. Inventories have been fairly well written off by the mills in both Canada and the United States and production is at about 55 per cent. of capacity.

The wider variation of products being fabricated by the mills recently is taken as a good sign that current requirements are being met and that consumers are well cleaned out of stock. This development has caused some unsettlement of prices and it is possible that a considerable volume of new business is awaiting the stabilization of prices. Buying is still largely for current requirements except in sheets and in pig iron, in which some buying for second quarter delivery is taking place. It is noteworthy that increased buying is being done by automobile and implement manufacturers as well as a number of other representative industries, indicating some improvement of conditions in other fields.

Sane Legislation Wanted

THE SESSION of Parliament which opened this week promises to be a most important one from the standpoint of business men of Canada. The problems of the readjustment period have not all been solved yet by any means. The last two sessions have seen radical revisions in the system of taxation, and many half nurtured schemes put into effect without due consideration. Even yet business is suffering to some extent from the indefinite manner in which many important problems have been dealt with, e.g., the lack of a definite ruling as to what constitutes a retailer and a manufacturer for taxation purposes, the correction of inequalities brought about by the now extinct Luxury Tax, etc. It remains to be seen what steps the new Parliament will take to raise much needed revenue to make up for curtailed receipts from sources which formerly provided the bulk of necessary funds. No taxation is favorable, but with the progress which has been made already, in the establishment of a Sales Tax and the elimination of Business Profits Tax, there should be little difficulty meeting the situation with a minimum of disturbance to business.

Taxation is not the only large question for the new Parliament, however, for as the world settles down to business and as channels for world trade again become opened up Canada must take active steps to secure for her products a place in the foreign markets. Export trade has been described by one hardware manufacturer as the "safety valve" of Canadian industry. It is the knowledge that there are other markets available to supplement the domestic trade, that enables manufacturers to conduct operations on a full time basis throughout the year irrespective of minor fluctuations of sentiment, and only on this basis can business develop with confidence and growing volume. This development of export connections calls for investigation and the providing of authoritative advice by governmental representatives on conditions in the world's markets and methods for securing a share of foreign trade.

Then, too, Canada's position will be gauged largely by the apparent ability of its administrators to intelligently direct the affairs of the country. Big business cannot be conducted without sound business principles, hence a prominent United States financial authority recently stated that the manner in which Canada dealt with its involved railway problem would have a big influence on the ability of this country to secure necessary credits abroad, without which foreign trade, and, to a large extent, domestic trade, is hampered.

It is, therefore, evident that the new Parliament has multifarious problems of an involved nature on its hands. Retail merchants and other business men of Canada stand ready to lend counsel whenever required to assist in an intelligent solution of these problems, and it is hoped that this counsel will be taken advantage of before the machinery of business is thrown out of gear as has happened on some previous occasions.

* * * *

For some years past the principle has been laid down that business success or failure was largely personal—in other words that the individual himself was chiefly responsible for failure to succeed. In 1918 the proportion of failures credited to causes originating within the individual himself rose to its highest point, 86 per cent., while outside influences were credited with causing 14 per cent. The 1919 returns were almost identical with this, 85.9 per cent. In 1920 the proportion due to personal causes fell to 83.1 per cent. In 1921, however, the trader who failed was comparatively speaking "a child of circumstances," only 74.8 per cent. of the 1921 failures being due to cause inherent in the individuals, while 25.2 per cent. were beyond his control. Lack of capital covered slightly over one-third of the failures in both 1920 and 1921.

Cash Basis Steadily Increases Trade

A Recent Saturday's Business of Carter Bros., Picton, Ont., Increased by $66.29 Compared With Same Day a Year Ago—Saved Loss of $629 on One Account by Adherence to Cash Basis —Some Valuable Pointers for Merchants Contemplating a Change

SO MANY merchants being interested in the cash basis of conducting business, as indicated by the large number of recent enquiries which Hardware and Metal has received on the subject, some facts have been secured for the guidance of such merchants who contemplate making this change. These facts are provided by Carter Bros., Picton, Ont., who have adopted a cash system with good results. In the Feb. 11 issue of Hardware and Metal appeared an article setting forth actual figures showing the increases which have taken place in the business of this firm since the cash basis was instituted, and following is the manner in which the change was effected.

"The longer we operate the store on the cash basis the more we are delighted with it," says Mr. Carter, "and our constant reproach is that we did not start it years ago for had we done so we would have been thousands of dollars better off today. As an indication, last August the cash basis saved us on one account alone the sum of $629. There was a big crash of a local business and many merchants lost heavily by it. We collected as soon as our work was completed in August and therefore did not lose a cent.

Regular Busines Increases

"But our regular business is increasing substantially under the cash system and this is what pleases us most, for under present conditions we fully expected a decrease. Take last Saturday afternoon for instance, with weather conditions the same, our sales exceeded those of the corresponding Saturday of a year ago by $66.29.

"In regard to the process of changing from a credit to a cash basis, this firm advise against attempting it unless the merchant is prepared to spend money freely in advertising the change weeks ahead of it taking place. It is suggested that the ads be changed every week but continually emphasizing the facts showing where advantage will accrue to the customer through the contemplated change. It can be pointed out that a store which sells for cash is able to buy for cash thereby being able to take advantage of all cash discounts and eliminating losses from bad debts, costly ledgers, bookkeepers' salaries, account paper, postage on accounts. The store operating on this basis, it can be pointed out, is enabled to sell cheaper than one that has to charge a percentage to cover aforementioned items. In other words the cost of doing business is lowered and if this can be accomplished without curtailing turnover it is the end which is much desired by every business man today for it is the only way in which prices can be made sufficiently attractive to stimulate buying."

Carter Bros. suggest that a week before the change takes place, a circular announcing the fact should be mailed to each customer on the books, to clinch the advertising already done. These customers are then fully prepared for the change and come prepared to pay cash.

In regard to telephone customers, Carter Bros. have encouraged the practice of having such customers ask the price when telephoning for goods. If out-of-town customers and not entitled to delivery the customer then sends the necessary money but if in town the goods are sent c. o. d.

Dealing with the practice of some merchants who claim to be doing a cash business 30 days to make settlement, Mr. Carter points out that this practice is not a cash business at all for it entails the same bookkeeping as would be required for business conducted on a 3 month settlement basis.

Other cases have recently been outlined where hardware merchants have increased business on a cash basis where conditions might seem to question the wisdom of such a move. The predominant idea in all such cases has been to emphasize the giving of lower prices as a result of operating on this system. In certain other cases ill feeling existing among certain customers over the granting of credit, due to some thinking they were being discriminated against, has led to the adoption of the cash system. Even in communities where a large farm trade is done the cash basis has been responsible for an improvement in trade and has brought no objection from this class of buyers.

Another Ontario merchant advertised such a change broadcast and sent letters to those with accounts on the book. In the following two months the business was double that of the same two months in the previous year. All phone orders were sent c. o. d. and it was noteworthy that many such orders were on hand in the store before nine o'clock on the first morning on which the change was introduced. Prices on all lines were reduced approximately 10 per cent. While this merchant reports nearly as many accounts on the books today as formerly, they do not represent small accounts, but those of builders, master plumbers, etc., to whom certain credit is granted. All telephone orders are on a c. o. d. basis.

Returning to the case of Carter Bros. It is noteworthy that Mr. Carter finds business commenced to become more active right from the start of the cash system, at which time a temporary slump might be expected. Further indication of the success of the cash system in that store is found in the fact that sales for a recent three-day period during the Poultry Show were $864.08, which is a very fair amount for a country hardware store. In ordinary times the sales for those three days would not have exceeded $180. Mr. Carter takes an interest in the Poultry Show and uses it as a point of current interest to stimulate buying.

The recent record of business shows that there are constant increases in the number of customers served and also in cash receipts, despite the fact that prices are lower and it requires the sale of a bigger volume of goods, to equal the monetary value of the turnover.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Marshall Wells, B.C., Ltd., Has Taken Over Wood, Vallance & Leggat Ltd., of B. C.

Earlier Rumors Confirmed This Week by B. C. Manager of Marshall Wells, Ltd.—Officials of Wood, Vallance & Leggat, Ltd., Retiring—No Consideration Yet Mentioned

VANCOUVER, B. C.—J. T. Elson, British Columbia, manager of Marshall Wells, B. C. Limited, has confirmed the report outlined in Feb. 25 issue of Hardware and Metal, that his firm has taken over the properties and stock of Wood, Vallance & Leggat, Limited, effective from the first day of March. No consideration has yet been mentioned and will not be until stock-taking is completed by Winnipeg and Portland officials of the Marshall Wells concern whose headquarters are in Duluth. For this purpose O. B. Smith, manager of the sporting goods and cutlery departments and W. D. Livingstone, manager of building hardware of Winnipeg are already at work at the Carrall street plant of Wood Vallance, Ltd.

Premises at present occupied by Marshall Wells on Beatty street will be given up and the entire stock will be moved to the down town plant of the vending company. Mr. Elson announces that the 120 employees of Wood Vallance will be kept but that W. G. Mackenzie, vice-president and general manager, M. H. Leggat, secretary-treasurer, and J. H. Roaf, director, will retire. John Dunsmuir who has been with the firm for the past twelve years will remain with the Marshall Wells Co., during which time he will act for Wood Vallance. He has been one of the popular figures in local hardware circles and is president of the Canadian Credit Men's Trust Association.

Entry of the Marshall Wells firm into the B. C. field on such a large scale is regarded by business men as an indication of the high opinion held by this corporation for the future of business conditions here. Mr. Marshall is expected to arrive in Vancouver on Sunday in connection with the merger.

Improving Hardware Activity in B. C.

Mining, Logging and Lumber Camps Showing Signs of Increasing Activity—Preparing for Annual Spring Trade in Gardening and Other Tools

VANCOUVER, B. C.—Conditions in the British Columbia hardware trade appear to be more favorable. Jobbers are preparing for the annual spring demand for gardening and other outdoor tools especially since the weather shows signs of moderating. It has been the coldest winter here in several years and it has only been within the last week that the thermometer has risen perceptibly accompanied by an occasional shower of rain. Incidentally rain has been scarce during the latter part of the winter and its appearance now is highly acceptable.

Lawnmowers, shovels, spades, hoes, rakes and other seasonable lines are making their appearance in retail stores and some sales have been made for the upper country although rather in disappointing volume. Collections are still on the slow side and some accounts have been giving credit men a deal of trouble. There have been no failures in Vancouver but one or two have been noted in outlying districts of the province during the week.

However, there are indications of good business as soon as mining, logging and lumber camps start out in earnest. Several are already under way and this activity is being felt in certain sections of the trade. There is a feeling of hopeful anticipation that the Railway Commission will give a favorable ruling on the freight rates case to enable coast manufacturers to at least ship to the eastern borders of the province.

Prices show little change this week. For the week-end specials are being offered in some of the larger stores to boost returns from that department. For instance the Dowswell, Lees & Co. Dolly Type washing machine is quoted at $14.95 and eleven inch roller wringer is offered at $5.45. Clothes baskets are off for about forty per cent. to $1.20, $1.35 and $1.55 according to size. Copper bottom wash boilers (No. 9) are selling at $4.95 instead of the regular quotation of $6.50. There are similar reductions in a number of other retail lines.

WESTERN CANADA NOTES

The Star Brass Foundry, Vancouver, has been registered with D. E. Woodruff and Robert Munro as partners.

* * * *

The hardware store of Charles Hood at Elk Point, Alberta, was destroyed by fire. Loss is estimated at about $8,000, partially covered by insurance.

* * * *

The Electric Panel Manufacturing Co. Vancouver, has been incorporated to do business in Vancouver. Capitalization is $10,000.

* * * *

The stock and fixtures of the Stearns Hardware Co., Burns Lake, B. C., have been sold through the Canadian Credit Men's Trust Association to Dittmer & Robb.

* * *

James Bending, western manager of the Ideal Aluminum Products, Ltd., Winnipeg, is on a business trip to Edmonton, Prince Rupert, Vancouver and Victoria.

* * * *

Reston Hardware & Lumber Co., Ltd., Reston, Man., has been formed and incorporated, and has purchased all the real estate, stock and buildings owned in Reston by the Manitoba Hardware & Lumber Co., Ltd. J. E. Harvey, who was employed by the latter-named company as local manager, will remain as manager of the new company's store, and as secretary-treasurer of the company.

* * * *

J. H. Speedie and P. P. Sharp have been appointed joint receivers of the Merritt Mercantile Co., Merritt, B. C., which maintains a large hardware department in connection with its general store. The store had been operated by C. A. Howse and H. G. Starr. The application was made by A. E. Howse of Penticton, father of C. A. who alleges he has an unsatisfied claim of $27,000 against the company.

* * * *

Under the auspices of the Electrical Service League of B. C., a dinner was held in the Hotel Vancouver at which 150 members of the Electrical Contractors and Dealers Association were present. Lawrence W. Davis of Philadelphia, the speaker of the evening dealt with co-operation and organization in the electrical business. W. G. Murrin, assistant general manager of the B. C. Electric Ry. was chairman and M. K. Pike of the Northern Electric Co., also spoke.

Manitoba Hardware Merchants In Convention

Net Cost of Doing Business on 35 Staple Hardware Lines Exceeded Gross Profit—Hardware Merchants Not Holding Up Prices

WINNIPEG.—Twenty-five towns in the province of Manitoba were represented at the convention of members of the hardware section of the Manitoba Retail Merchants' Association. The opening session was a dinner given by the Winnipeg retail hardware dealers in honor of the visiting attendants at the conference. Trade problems are being discussed. Brief addresses on these were given at the dinner, when A. E. Wyatt, of Winnipeg, presided.

Conditions in the trade on both sides of the international boundary were compared by Herbert P. Sheets, secretary of the National Retail Hardware Association of the United States. He said that the trade in each country is faced mainly with the same problems. In neither country is the retail hardware business exacting more than is its due. Mr. Sheets said that in 1921 it had not got even what was coming to it. He referred to the investigation into retail prices which has been instituted by the United States government. A thousand hardware retailers had to submit their selling and buying prices on a specified 35 staple articles from 1913 to the present year. From the tabulations contained in Mr. Sheets' office, he has learned that in the retail hardware lines the net cost of doing business was greater than the gross profits on these 35 staple articles. So Mr. Sheets says that the hardware retailers have not in any sense been holding up the public.

The problems of the trade principally discussed had reference to the competition of mail order houses. Among the speakers were: W. E. N. King, of Neepawa; A. G. Box, of Souris; A. H. F. Stelck, of Dauphin; and C. C. Falconer, of Winnipeg. The community value of an annual campaign to clean up and to paint was advanced by J. L. Paul, of the Brandram-Henderson Company.

Guests at the dinner included: Alex Karr, of Fargo, N. D., and R. C. Line, of Columbus, Montana, who are to be lecturers at the University's short course in merchandising.

MOVE TO NEW STORE

Sandwich, Ont.—The Acme Hardware Co. have recently moved into their new store on Sandwich street. This store is said to have the finest fronts of any hardware store in Western Ontario.

HOLE TORN IN ROOF OF KITCHENER HARDWARE STORE

Kitchener, Ont.—The Hymmen Hardware building had a 20 foot square hole in the roof and their storage floor strewn with bricks and other debris as a result of a high wind blowing down a chimney belonging to the Lippert block next door. Mr. Hymmen stated that had it not been for the fact that the heavy hardware material in the upper floor of the building broke the fall of the bricks, a hole would have been torn in the upper floor with the result that the bricks would have gone right through.

STEWART CO. RESUMES WORK WITH FULL STAFF

Woodstock, Ont.—The James Stewart Mfg., Co., Limited, manufacturers of cook stoves, ranges, heaters, etc., has resumed work with a full staff, after being closed for a period of about seven weeks.

While business has not improved to any great extent, the prospects are brighter, according to the management, and work has been resumed to get stock ready to meet anticipated future demands.

A wide range of chinaware, crockery, enamelware, aluminumware, tinware and other housefurnishing lines is revealed in this view of a section of the Western Hardware Co., Ltd., store in South Edmonton, Alta. This firm pays close attention to lines in most popular demand and sees that a well assorted stock of requirements is placed where customer may see and handle it. Note the four shelf pyramid style display tables which do not hide the stock on the lower shelves. Prices are shown prominently on the goods and there are few customers who wander in and out among these tables who do not find something new in the way of utensils. The shelf hardware stock is shown by means of samples affixed to drawers. Part of the furniture stock is shown at the rear including beds, mattresses, dressers, etc.

Events in the Trade

BUSINESS CHANGES

Alymer, Ont. Edward Miller, hardware, has sold to Patterson Bros.

Markdale, Ont.—J. J. Richardson, hardware has sold to Walter Perkins.

NEW FIRMS

Timmins, Ont. Warren & Finlay have opened a hardware store at 24 Third Ave.

The Metropolitan Hardware is commencing business at 3150 Dundas St., West, Toronto. H. Nemerow, Proprietor.

TO HAVE NEW STORE

R. M. Birce hardware merchant, Essex, Ont., is arranging the plans for a new store which he is to build across from his present location. There will be over one hundred feet of window display space. In the block there will also be another smaller store and offices on the upper floors.

PERSONAL

W. F. Duffield, of the Reading Hardware Co., Reading, Pa., and L. E. Griffiths, of Surplus, Dunn & Co., New York, called on the Montreal hardware trade this week.

W. L. Walker, of the hardware department, of Hudson's Bay Co., Edmonton, Alta., was a visitor in Toronto this week and called upon the Hardware firm of Lyons & Marks.

H. R. Rovison of Rovison & Williams Hardware Co., Windsor, Ont., has recovered after an illness of several months. While Mr. Rovison was not confined to his bed entirely during the past few months he was in ill-health.

Jos. A. Lassaline recently joined the staff of Rovison & Williams Hardware Co., Windsor, Ont. Mr. Lassaline was with this organization previous to six years ago.

Percy E. Paddick has resigned his position with the Rovison-Williams Hardware Company, Windsor, Ont., to take charge of the "Quality Hardware," which will be opened in the near future at the corner of Ottawa street and Hall avenue, Windsor.

Charles Hayden, of Boston, was elected chairman of the Board of the International Nickel Company to succeed the late E. C. Converse. Robert E. Stanley, vice-president and general manager, was chosen president to succeed W. A. Bostwick, who died recently. Britton Osler and J. L. Agnew were elected directors to fill vacancies on the board.

Plans For Toronto Hardwaremen's Meeting

New Constitution of Toronto Retail Hardware and Paint Club to be Discussed After Dinner—Addresses by Members of Toronto Paint and Varnish Club

AS PREVIOUSLY announced in Hardware and Metal, the Toronto Retail Hardware and Paint Club will meet for dinner, business and entertainment in the Board of Trade Dining Hall, top floor Royal Bank Building, corner King and Yonge sts., on Tuesday evening, March 14.

Discussing the forthcoming meeting with President H. N. Joy, Hardware and Metal secured some details which will be of interest to Toronto hardware merchants. The dinner will be served at 6.30 and a charge of $1.00 a plate will be made. In order to arrange for this meeting the executive committee has guaranteed an attendance of 75, but it is expected that there will be double that number present. After dinner the new constitution will be submitted, discussed and acted upon and general business transacted after which the meeting will be addressed by representatives of the Toronto Paint and Varnish Club.

President Joy points out that it is greatly to the interest of every retail hardware and paint dealer in Toronto and its suburbs, to be present at this meeting, and it is hoped that those who are not members of club will join. "It is almost beyond belief that the retail hardware merchants of Toronto have neglected in the years past to organize themselves into an association or club," said Mr. Joy, "and now that this has been consummated, with such a large initial membership, it is earnestly desired that every legitimate retail hardware and paint dealer in this territory will avail himself of the advantages to be derived from membership in the club.

"In Numbers There is Strength"

"At this meeting the speakers have requested that clerks as well as proprietors be present. So dealers, come yourselves and have one or more of your clerks there also. These addresses will be practical and educational alike to all, and will be worth dollars to us just now at the beginning of the 1922 paint campaign.

"Our mailing list is as accurate as we are able to make it, as yet, and every retail hardware and paint dealer on it will get a letter this week. If you do not get one, call up some official of the club and advise him that you will be present, and don't forget your clerk. You will be asked in this letter to fill in and return to our secretary, Victor Mathewson, 688 Danforth Ave., the portion indicated, not later than Saturday the 11th so that ample provision may be made for the dinner. Don't neglect to do this. We are off to a good start. If each does his part the club will flourish."

R. M. INGLIS

Recently appointed general sales-manager of the Ruberoid Co., with head office at Montreal. Mr. Inglis, is a Canadian, with home in Brantford, Ont., but for the past nine years has been in the employ of the above firm at both New York and Chicago offices. He comes to Montreal from the New York office.

INCORPORATION

Electro-Castings, Ltd., head office, Collingwood, capital $40,000, to manufacture electric furnaces for melting of iron, steel, etc., and to manufacture metal castings. Prov. Directors, W. T. Stephens, J. F. Zimmerman, J. Wilson, A. J. Dixon, J. Shipley, A. M. McFaul and F. S. Lewis.

NEW MANAGER HALIFAX DISTRICT, NORTHERN ELECTRIC COMPANY

Arthur L. Brown, of the Toronto office of the Northern Electric Company, Ltd., has been appointed manager of the Halifax branch of the company. Mr. Brown is a most a newcomer in the electrical industry. During the war he was connected with the Imperial Munitions Board and was on the staff of the British Munitions Company, Ltd., under J. D. Hathaway, who was president of that company and is also vice-president of the Northern Electric Company. At the end of the war Mr. Brown was engaged for some time in winding up the affairs of the British Munitions Company, after which he was taken on by the Northern Electric Company and sent to Toronto as assistant district stores manager. A little later he was made district stores manager, which position he held up to the present time, when he leaves for the Maritime Provinces.

LOWER TARIFF ON GALVANIZED FOX NETTING

Summerside, Prince Edward Island.—Creel MacArthur, M.L.A., president, Brace, McKay & Co., Ltd., has returned from a business trip to Montreal, Ottawa, Toronto, Guelph, Hespeler, Galt, and other cities. He was much impressed with the optimistic tone which he says is gradually supplanting the sentiment encouraged by the depression. He reports that many manufacturers have plants running full time and are well booked ahead. While in Toronto Mr. MacArthur had a lengthy interview with President D. B. Hanna, of the Canadian National Railways, in respect to certain railway matters in this province.

Perhaps one of the most important missions of Mr. MacArthur to Ottawa was in connection with the Customs Department, and he had a very satisfactory conference with the Minister of Customs, the Commissioner of Customs and the Chief Assessor, with a view to having more consideration given re the amount for duty purposes in certain commodities, particularly galvanized fox netting, from Great Britain—a line of which Brace, McKay & Co., Ltd., are said to have the distinction of being the largest dealers in America. It is interesting to state that the department recognized the justice of the claim set forth by Mr. MacArthur, and are issuing new regulations promptly which will mean materially lower costs to the numerous ranchers throughout Canada for fox netting.

ONTARIO INCORPORATION

Dominion Putty Co., Ltd., head office, Toronto, capital $40,000 to manufacture and deal in putty, oils, paints, pastes, glass, hardware, brushes, etc. Provisional directors, F. W. Dunn, W. F. Moore, D. MacLulich.

The Death of Senator John Milne

President and Managing-Director of Burrow, Stewart & Milne, Hamilton, Ont., Dies After Sixty-eight Years Association With Metal and Foundry Trade—One of the Founders of the Steel Co. of Canada

THE DEATH of Senator John Milne, president and managing-director of the firm of Burrow, Stewart and Milne, Hamilton, Ont., removes a figure which was for years prominent in the stove and foundry business of this country. Senator Milne had been ill since last October and when complications set in he was too feeble to undergo the necessary operation and his death was therefore not unexpected. He was eighty-five years of age and had been identified with the iron foundry trade since 1854 when he commenced business with Charles Stewart and William Burrow, later forming the present firm. Both of his partners died several years ago.

The late Senator Milne was born in Aberdeen, Scotland in 1838, and after receiving his education in his native parish began to learn the trade of a molder. Before he finished his trade he came with his father, the late John Milne, to Canada and the family settled in Hamilton. Here he continued to work at the molding trade in the foundries of the Gurney Company and shortly after he had completed his apprenticeship he and his friend the late Charles Stewart went to the United States where they both worked for a time. In 1864 they returned to Hamilton and in company with the late William Burrow the firm of Burrow, Stewart and Milne was formed and business begun in a small frame building on Carolina St., North.

LATE SENATOR JOHN MILNE

President and Managing-Director of Burrow, Stewart and Milne, Hamilton, and for many years connected with the metal and foundry trade, whose death is announced.

The business grew under the management of the three men who were all experienced mechanics and it was but a short time until an enlargement was found necessary and new buildings were constructed at Hughson and Cannon Sts., which were occupied in November, 1871. Extensions were made from time to time and in 1898 the firm was reorganized and Mr. Milne was made president.

Mr. Milne had many other important business connections. He was one of the founders of the old Hamilton Steel & Iron Co., which has since developed into the Steel Company of Canada. He was also interested in the shipping interests and for a time served as president of the old Hamilton and Ft. William Steamship Company. This was later merged into the Inland Lines and later into the Canada Steamship Lines in which Mr. Milne had large interests. He always took an active interest in the welfare of the city and more especially in educational matters, having been for years a member of the board of library governors. He was also one of the first commissioners of Hydro in Hamilton. He was a Conservative in politics, having served as president of the Hamilton Conservative Association for nearly 25 years, and was appointed to the Senate during the government of Sir Robert Borden in 1915. He is survived by his wife and two sons, Charles K. and William M.

BANQUET TO WANLESS HARDWARE STAFF

Chatham, Ont.—F. J. Penberthy, general manager of Lowe Bros., Toronto, was the speaker at a banquet given the staff of the Wanless Hardware Company in the Chamber of Commerce. The lecture was illustrated with colored slides, showing exactly the effect of using good paints to paints of inferior quality. The speaker also explained fully how to avoid various difficulties encountered in the use of paint.

Mr. Penberthy explained the making of paints and varnish from the raw materials to the finished product. He also told how the surface should be prepared before the paint was applied, and showed examples of common troubles that arise. With a series of fine colored slides he explained how the troubles could be overcome.

About thirty in all sat down to the banquet and an impromptu song-fest was indulged in, with Ted Phillips at the piano. Ex-mayor Ed. Wanless, acted as chairman and introduced the speaker to those present.

Letters to the Editor

LABELS ON WOOD ALCOHOL

Hardware and Metal,
Toronto.

Will you kindly let us know if there are any special regulations re the kind of label to be used when selling "wood alcohol?" We have been told that there are and thought possibly you could enlighten us.

Yours Truly,
Bowers Bros.,
North Battleford, Sask.

Answer: In order to comply with the law you must affix to all vessels containing wood alcohol a label bearing the words, "Wood Alcohol, Poison." This must be in black letters not less than a ½ of an inch in height. Any person who holds in their possession, sells, exchanges or delivers any wood alcohol contrary to the provisions in this section incurs a penalty of not less than $50.00 and not exceeding $500.00. For your information we would point out that a Toronto hardware firm was fined for using red labels instead of black as called for by the law.

* * * *

BUSINESS PROFITS TAX

Hardware & Metal
Toronto,

I thought when the Sales Tax was increased a year ago that after that we did not need to make out those business statements for the government as it was said the Sales Tax was to take the place of the Business Profits Tax.

Now we are still told to get our forms at the Post Office and fill them out—and form T-1 is practically the same as last year's forms. Please give me advice on this and oblige,

A. C. Clemens.
Milverton, Ont.

Answer: You have no responsibility under the Business Profits Tax, which was discontinued Dec. 31, 1920. This, however, does not alter your responsibility for making an Income Tax return on form T-1 on which you as a merchant are expected to give a profit and loss statement. These forms are not being used for Business Profits Tax, it was a form T-2 which was used for that purpose before it was discontinued entirely. The Sales Tax has no connection with the Income Tax, as the former is not expected to be paid by you as a merchant but passed on to consumers. If your gross income is sufficient to make you responsible for Income Taxation, having in mind the exemption of $1,000 for single men and $2,000 for married men, you are expected to make a return on form T-1.

* * * *

ONE TAX ON SOURCE OF SUPPLY

The following letter (author's name omitted by request) was written to Hardware and Metal by the proprietor of a large Western Canada wholesale and retail hardware firm and raises some interesting points concerning taxation matters:—

Hardware and Metal,
Toronto.

I have just been reading your article in your recent issue of Hardware and Metal re changes suggested in Sales Taxation. I have, of course, read very nearly every article, which you have printed on this subject in the last year or two, as well as numerous other articles in various other publications. I have taken a very keen interest in this particular subject, first—because it affects every one of us as a Canadian citizen, and also our country, more vitally than any other question of taxation today. I am of the opinion that the most economical means that could be adopted would be for the Government to tax every manufacturer, and to advise him to include this tax as a part of his overhead, and let each manufacturer settle with the Government every month. This tax should really be varied, that is to say the tax on luxuries and non-essentials should be a good deal higher than the tax on staple commodities, but in every case it should be collected at the source of supply. Not only would the Government get a great deal more money by this method, but they would get their money promptly every month, and at practically no cost for collection. The manufacturer should not object to this, as he is very highly protected, and has no competition from across the line, and in any event this could also be taken care of by levying a tax, equal to the tax that he would have to pay the Government, or a tax of 50% greater if necessary on all goods imported into Canada. This could automatically be collected by the Customs authorities, the same as it is being done now.

Take The Place of Other Levies

I am of the opinion that if this was properly carried out, the Government could eventually discontinue all other forms of taxation, such as Income Tax, etc. They could save thousands upon thousands, if not millions of dollars per year for collection of these taxes, or at least an attempt to collect these taxes. Then, in my opinion, there should also be a small tax put on the farmer of say a few cents per acre—not a tax that would be a burden but say a tax of probably 10c. an acre on arable land, and 5c. on pasture, or other land that cannot be cultivated. This tax could be collected automatically through the rural municipalities, and would be the farmers' share towards the upkeep of the country on such goods as he would raise on his farm, either for sale, or for his personal use, and on which he would naturally not be paying any tax, as the rest of us are on the manufactured goods that we have to buy in order to live, or to run our business.

The present methods of taxation, and also the methods of collection are an absolute joke. Only a small percentage of the people have to pay these taxes, and are carrying the burden. For instance, last week I received notice at my house of assessment for my taxes for 1919. I was naturally greatly surprised to receive this notice, as I thought these taxes had been paid long ago. Upon looking up my records, I find that they have not been paid, neither had I received any request for payment. It is a very difficult matter in strenuous times, such as we are going through at the present time to have to pay taxes that are two years old. It is just like paying for a dead horse, and another thing that makes you dissatisfied is the fact that there are hundreds of people, yes, thousands of them, that were well off in 1919, and no doubt had this tax been collected promptly at the end of the year, the Government would have collected a great many thousands of dollars, probably millions of dollars. Today the Government cannot collect a cent from these people, as they haven't anything to pay with.

Then take the professional men, such as doctors, lawyers, etc. Very few of these people, as you know, keep a complete set of books—therefore, they do not pay any Income Tax, whereas they are in a better position to pay than many of us who have to pay.

Don't Know Farmer's Income

Then the farmer rarely ever pays any Income Tax, as no one has any means of getting to know what his income is.

I quite agree with some of the jobbers' opinions in this article of yours, as many times the jobber has to absorb this Sales Tax, which affects his net profit very materially. As you know, I am in a position to judge both sides—wholesale and retail, and I know how this works.

The more I discuss this matter, and the more articles I read, the more firmly I am convinced that the above method as outlined to you is the only practical and fair method. Not only would everyone be treated alike, but practically all of the tax would go into the Government's coffers, instead of a large percentage being paid out to-day for the high cost of collection, besides they get the tax promptly at the end of each month, instead of having to wait, as I mentioned above, for two years, and then only getting probably a half or a third of what they should get.

Appreciates Complete Convention Report

Editor, Hardware and Metal, Toronto.

With hundreds of others, I am sure, I have enjoyed reading the addresses delivered at our convention. On account of other duties I only heard portions of same when delivered, and I thoroughly appreciate the privilege and opportunity accorded by your full report, and prompt service, in being able to review the proceedings of the convention at leisure.

A perusal of these addresses will surely indicate to all those who did not attend our sessions, the high plane which our convention in their meetings has attained, and the earnest desire of our executive will be to excel in each succeeding convention.

I might say that Professor Clarke, our visitor from Economics Department of Queen's University, has expressed himself as being deeply impressed with the work of the association, and also expressed a desire to give any assistance in the power of their department in the solving of any commercial problems which we refer to them.

I wish to express on behalf of the association as per resolution, our hearty thanks for the splendid support always given our association in the columns of Hardware and Metal, and in other ways and wish to add my personal thanks for many favors received.

Yours for 1,000 members before 1923 convention.

W. F. MACPHERSON.

Importance of Hardware in Canadian Trade

Totals of Imports and Exports of Hardware Commodities For Year Ending Last January Compared With Two Previous Years—Total Value of Trade About Half That of Same Period a Year Ago

THE SUMMARY of Canadian trade for the year ending January 31, 1922, as compared with the same periods in 1920 and 1921, reveals some interesting facts in so far as hardware lines are concerned. Total imports for the period ending January last of $778 million are only half the value of those of the previous year whereas exports show a slightly better ratio. Exports during the latter period amounted to but three million dollars more than imports. Imports from the U. S. were $537 million compared with $121 million from United Kingdom. Exports to the U. S. were $315 million and to the United Kingdom $296 million.

Hardware lines are dealt with in detail in the following:

IMPORTS TWELVE MONTHS ENDING JANUARY

	1920	1921	1922
Asphaltum and asphalt	$ 432,798	$ 641,984	$ 562,331
Bricks, clays and tiles	2,460,108	4,187,699	2,138,891
Clocks and watches	3,007,003	3,989,143	2,357,962
Coal—Anthracite	31,294,369	37,545,058	39,547,756
Bituminous	27,758,249	66,898,325	43,329,288
Cotton	77,308,202	115,332,953	68,264,552
Earthenware and chinaware	3,237,258	5,821,673	4,866,233
Flax, hemp and jute	14,195,205	17,125,755	7,631,361
Metals—			
Brass	4,456,441	6,247,767	3,389,758
Copper	7,343,010	10,404,997	3,548,801
Gold and silver	628,195	1,135,592	707,930
Iron and steel	147,514,344	213,031,770	94,304,941
Lead	773,074	2,547,451	248,372
Tin	10,616,291	14,845,933	5,965,516
Zinc	822,710	629,039	400,901
Paints, colors and varnish	3,840,803	5,134,208	2,805,428
Petroleum—			
Crude oil	19,587,925	29,311,888	23,089,166
Refined oil	9,792,560	18,684,445	11,983,250
Rubber	14,324,458	19,195,329	7,563,663

NEED FOR QUICK TURNOVER

(Continued from page 36)

Karr. The only way to combat the inroads these establishments are making into the business of the retail merchant is co-operation between the town residents and the country residents, he added. Common opinions, common affections and common interests must exist. The mail order houses threaten to wipe the towns out of existence, declared Mr. Karr. Many carloads of mail order catalogues are distributed.

"Creative Business," was the subject discussed by J. M. Thompson, Winnipeg manager for Beatty Bros., manufacturers of pumps, washing machines, etc. Making comparisons between the manner in which the United States and Germany obtained their markets, Mr. Thompson pointed out that the former was hampered in reaching the markets of the world by its protective tariff, while the German manufacturer had not this to contend with, but was aided by the government in reaching the consumer, inasmuch as he was favored by a reduced rate on the state owned railways for exports, amounting to as much as one-third.

Merchant Must Initiate

There are two kinds of merchants, Mr. Thompson said, one is the imitator and the other the initiator. The former only sells the goods he is asked for, afraid to stock any other while the latter introduces to the community new lines.

Twenty Years Ago

* * *

Following items are reproduced from Hardware and Metal of March 8, 1902:—

* * *

David J. McArthur, president of Colin McArthur & Co., Montreal, is dead. Mr. McArthur was a comparatively young man, having been born in Glasgow, in 1861. When still a young boy he came to Canada with his father, the late Colin McArthur and subsequently went into the business conducted by his father. When the latter died, a few months ago, he became president of the company.

* * *

Directors of the Dominion Iron and Steel Co. have decided to issue new common stock to the amount of $10,000,000 to the shareholders. David Baker has been appointed general manager in succession to A. J. Moxham who recently resigned.

* * *

Bennett & Wright Co., Ltd., Toronto, have completed their contract for plumbing, heating and electric wiring of the new free consumptive hospital at Gravenhurst, Ont. There are over 300 electric lights and 120 hot water boilers installed in the building, and steam is conveyed by over 3,000 feet of piping. (This building was recently destroyed by fire).

* * *

Purdy, Mansell & Co. have contract from the Ontario Government for the heating of the new physical and biological laboratory at the Ontario Agricultural College, Guelph, and the plumbing and heating of the new Collegiate Institute at Cobourg.

* * *

James Cartland & Sons, Ltd., of Birmingham, England, have their representative, W. W. Mitchell, doing Canada at present, showing an extensive line of brass goods.

* * *

Prices are firm owing to the firmness of the iron and steel markets of the United Kingdom and the U. S. So great is the demand abroad that James Ross, manager of the Dominion Iron and Steel Co., Sydney, states that it is not material just now to the success of that industry that the company should either run its blooming mills for the manufacture of steel ingots or the mill for manufacture of steel rails. The company, he says, can find a market for their steel billets faster than they are turned out.

* * *

Owing to the increase of business McCaskill, Dougall & Co. have found it necessary to make a considerable addition to their factory in Montreal.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

TYPE "M. H." ELECTRIC RANGE

The Canadian Westinghouse Co., Ltd. of Hamilton, Ont., are now giving special prominence to their New Type "M. H." Electric Range which is their latest design in electric stoves. This product includes all the latest features of electric ranges, including the various heat units, the removable rack guides, the three-heat, double-pole switches, which

entirely disconnect the heaters from the circuit, the Thermostat embedded in the oven door to indicate the heat in the oven, and many other modern improvements. Locking handles are provided for the oven doors, and upper warming closet can be furnished if desired. There is the usual large sized oven, a broiler, and four heating plates. The standard plug receptacle is also provided for connecting other socket appliances.

"REPEATER" FUSE PLUG

The name of the company, manufacturing this device, the Repeater Six Fuse Plug Company, of Burlington, Ontario, fully describes the purposes of this product. In the "Repeater Six," there are six fuses. The manufacturers describe the device in novel terms. When one fuse blows out, by simply turning the knob to the right, contact is again restored, thus leaving five more fuses for future use. It is inferred, therefore, that this plug will remove many of the annoyances caused by the sudden failure of lighting systems due to defective fuse plugs.

The Repeater Six Fuse Plug Company, of Canada, Limited, announce that they have a new plant at Burlington, Ontario and expect to be in operation shortly at a capacity of 10,000 plugs per day.

"BLUE-NOSE" LEATHER STRIPS

Putting up leather strips for shoe repairing in an assortment display box, is the method adopted by the Logan Tanneries, Ltd., Lyon's Brook, Nova Scotia, in marketing their line of "Blue-Nose Oak" sole leather strips. The cabinet is 3½ feet by 2½ feet, and is six inches deep. This size enables the display of twelve different strips of sole leather in each partitition. These strips are made in special lengths ready to cut to any needed size.

INCOME TAX BOOKLET

The Canadian Debentures Corporation, Ltd., have issued a booklet entitled "Dominion Income Tax Questions and Answers," the work of a tax specialist which simplifies for any individual, company or estate the preparation of the necessary income tax return slip. The booklet should prove of particular interest to business men. Readers of Hardware and metal may secure copies of this booklet by writing to Canadian Debentures Corporation, Limited, 36 King Street, East, Toronto, and asking for booklet No. 37A.

FOLDING CAMP TABLE

One of the recent products manufactured by the Gold Medal Camp Furniture Co., of Racine, Wis., U. S. A., is a compact folding table. According to the manufacturers' description, the particular table not only folds, but "rolls." It is described as a table for the tourist or camper, because of the fact that it is light, and folds compactly, while at the same time, is strong and rigid. The frame is of seasoned hardwood. The top is of imitation

leather and drill stitched at intervals of about 1¼ inches permitting the insertion of slats, which constitute the top of the table. It is appropriate as a card table for either camp or home, measuring 31 x 31 inches, open, and is 28½ inches high.

"TWIN MOTION" FREEZER

This Twin Motion ice cream freezer has recently been introduced by the New Standard Hardware Works Incorporated of Mount Joy, Penn., U. S. A. The Twin Spiral Motion is obtained by having the dasher and the can move in op-

posite directions at the same time. Simultaneously, the makers claim, the peculiar and patented features of the spiral dasher constantly forces the cream from the bottom of the can up through the various openings to the top. This process is for the purpose of assuring thorough mixing.

The ice pail is made of heavy gauge galvanized metal. The cream can and cover are constructed of heavy gauge tin plate. The removable table clamp for fastening the ice pail to the table, is described as another exclusive feature.

LUFKIN SQUARE WITH LEVEL

The "Universal" Try and Mi Square for woodworkers, which was recently brought out by The Lufkin Rule Co., of Canada, Ltd., Windsor, Ontario, is now offered with, as well as without, level glass, known respectively as No. 65L and No. 65.

This square is made with graduated steel blade and movable head. It is in 9 in. and 12 in. lengths.

Including the level, which will serve also as a plumb, the manufacturers claim that the No. 65L in many places makes the handling of two tools unnecessary.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

BLACK oils, both Summer and Winter grades, parrafine, chain pipe wrenches, grindstone fixtures, the Miller's Falls line of tools, Wiss tinners' snips, sleigh bells and wire fencing and gates, provide the price developments on the current hardware markets. The reductions recently noted in wire goods has now extended to practically all grades of wire, as well as wire nails and staples. Wire fencing and gates record another downward revision, varying between seven and ten per cent on these products. Through the issuing of a new price list, revised quotations on the Miller's Falls tools include marked reductions on several lines. The season's new prices on Paris Green represent a decline of almost fifteen per cent. Easier quotations on turpentine also provide a feature in this week's paint markets.

Orders for bar iron and steel are now on the increase, with the volume of inquiry in the steel industry indicating potential recovery. The sheet business also manifests signs of this general improvement. The recent easier tone in primary metals is reflected in copper and brass products, although no actual price developments have been recorded. A quiet situation still prevails in scrap materials, while current interest in the ingot markets is centered on copper and tin, with fluctuations in these metals attracting direct interest as well as affecting the market trend of other finished products.

During the past few days a decided improvement in the movement of seasonable lines is reported. These primarily include house cleaning needs and other early Spring requirements. Wholesalers are generally convinced that this earlier trade represents the commencement of the active period usually evident during the Spring months. Prospects for an early season are receiving attention, seasonable weather being a keen stimulant to trade in this direction. Collections are reported as fair, with recent optimistic expressions regarding the future outlook now being supported by signs of general business recovery.

Montreal Markets

MONTREAL, March 9.—Revisions in prices of wire and wire products feature the hardware markets, wire nails and fence staples now being recorded at lower quotations. Wire nails have been reduced to $3.75 base. Galvanized fence staples will sell for $5.15 per keg, bright at $4.15 per 100 lbs. The base price on plain wire has been lowered to $3.60, and annealed hay wire has new lower prices on the different gauges. Wire fencing shows a reduction of approximately 7 per cent., this being the second revision on this product in recent weeks. Wire gates have also been reduced in price for the spring trade. Another important revision is the announcement of a varied reduction on Miller's Falls tools, some lines showing a substantial price decline, while other tools record a minor change in the downward direction. Sleigh bells are reduced approximately 25 per cent. for Fall trade and horse shoes have new lower quotations. Chain pipe vises and grindstone fixtures also add to the budget of price changes, both lines being quoted at lower figures.

WIRE NAILS REDUCED TO $3.75 BASE

Montreal

Following the easier prices on galvanized wire and wire products last week, the easier tendency is now shown on bright wire, and wire nails are this week reduced from $3.90 to $3.75 base. Jobbing circles report a gradually increasing trade in nails in recent weeks and it is thought that new lower quotations will act as a stimulus in this direction.

FENCE STAPLES SHOW A REDUCTION IN PRICE

Montreal

Both bright and galvanized fence staples have new lower quotations, the reduction being made in these products, in company with other wire and wire products. Following are new quotations;

FENCE STAPLES:

Bright, in 100 lb. kegs	4 15
Do., in 25 and 50 lb. boxes	5 15
Galvanized, in 100 lb. kegs	5 15
Do., in 25 & 50 lb. boxes	6 15

SUBSTANTIAL REDUCTION IN SLEIGH BELL PRICES

Montreal

A reduction of approximately 25 per cent is announced by manufacturers on the various lines of sleigh bells, for next season's business. This price decline applies to both chimes and string bells.

PLAIN WIRE NOW SELLS FOR $3.60 BASE

Montreal

A reduction, corresponding with other wire, is made on the base price of plain wire, and this will now sell for $3.60 base. Bright, annealed and coppered have the usual extras.

LOWER PRICES APPEAR ON HORSE SHOES

Montreal

A reduction is made in the various sizes and styles of horse shoes, and following are revised quotations:

HORSESHOES:— price per keg

Patterns:—		No. 2 larger	No. 1 smaller	Less 20c.
Light iron	0-7	6 90		7 15
Long-heel light iron	3-7	6 90		....
Medium iron	1-8	6 90		7 15
Heavy iron	6-8	6 90		....
Snow	1-6	7 75		7 60
New-Light "XL" steel	1-6	7 35		7 60
Special countersunk	3-4	8 75		....

Packing up to 3 sizes in one keg, 10c. per 100 lbs. extra. More than 3 sizes, 25c., per 100 lbs. extra.

F.O.B., Montreal.

TORONTO

MONTREAL MARKETS

(Continued from page 47)

LOWER PRICES ON FIELD FENCING AND GATES

Montreal.

New quotations are announced on wire fencing and gates, a new list being issued at the first of the month. This makes the second revision in these lines in recent weeks, a change in quotations being made around the middle of February. Fencing is now approximately 7 per cent. lower, while gates are nearly 10 per cent. lower for spring business.

NEW PRICES ON ANNEALED HAY WIRE

Montreal

Annealed hay wire, in the different gauges, has new lower quotations, and following are revised prices; No. 13, $3.80; No. 14, $3.90; No. 15, $4.00.

MILLERS FALLS TOOLS ARE REVISED IN PRICE

Montreal

Through the issuing of a new price list to the trade, revised quotations are announced on the Millers Falls line of tools. There is a reduction of considerable extent on some lines, while other tools show a price decline of minor proportions.

NEW NET QUOTATIONS ON WISS TINNERS' SNIPS

Montreal

Wiss tinners' snips have new lower prices and following are revised quotations on the various sizes;

No. 6½, $3.80, No. 7, $3.15, No. 8, $2.50, No. 9, $2.25, No. 10, $2.05, No. 11, $1.50, No. 12, $1.35, No. 13, $120, per pair

FURTHER REDUCTION IN CHAIN PIPE VISES

Montreal

A further reduction has been made in the quotations on chain pipe vises, these prices showing a previous reduction a few weeks ago. No. 1 is now quoted at $4.00, No. 2 $8.55 each.

GRADUAL IMPROVEMENT IN CORRUGATED SHEET DEMAND

Montreal

Sales of corrugated sheets show a slight improvement from week to week, and dealers anticipate a much improved situation as soon as the weather opens, inquiries indicating that much building and repair work is contemplated when weather permits. Local quotations remain unchanged, with a slight price concession offered for attractive inquiries. Following are list prices and discount for current business;

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 2½ ins. 75c a square extra.

SPRING REQUIREMENTS NOW IN DEMAND

Montreal

Activity in jobbing circles is becoming more pronounced from week to week, and lines that show an improved demand are housecleaning needs, including polishing mops, polishes, pails, mops, brushes, brooms, clothes lines, carpet beaters, etc. Orders now being received are for smaller quantities, but wholesalers are satisfied that repeats will soon follow, and are well pleased that the opening spring business has apparently commenced.

SHEET MARKETS SHOW IMPROVEMENT IN DEMAND

Montreal

There is little or no new development in the local sheet market, prices remaining at revised levels of a few weeks ago. Business in general is still described as being of a limited nature, although a slight improvement is recorded in galvanized sheets during the past week. The month of March, however, is expected to bring about a general improvement in this connection, this being further encouraged by reports from primary centres where slightly increased activities are pronounced. The tone of the market also is little changed although a revision in English sheets in the near future would not be surprising. The situation on the other side, at manufacturing centres, is practically unchanged, but owing to competition and existing levels on these lines, importers anticipate that lower prices will be announced for earlier spring trade. Prevailing quotations are as follows:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 6
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS

EASIER PRICES ON GRINDSTONE FIXTURES

Montreal

Easier prices are now quoted on grindstone fixtures, and the 15 inch will now sell at $6.80, 17 inch $7.20 per dozen.

BUSINESS IN STEEL TRADE OF SPASMODIC NATURE

Montreal

Prevailing business in iron and steel is now described as spasmodic on the local market, this week being somewhat duller than the previous week. There is, however, more interest in general now apparent, and distributors look for a continued improvement as the weeks pass. Base prices on the various lines remain as formerly, these being quoted on smaller purchases, while a further slight concession is offered for attractive inquiries. The same might be said for conditions at the mills, where quotations are nominally unchanged. Following are prevailing prices.

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SLIGHT IMPROVEMENT IN LEAD PRODUCTS MARKET

Montreal

Improvement, both in volume of business and market tone is recorded in the situation of lead and zinc products. Sales have shown a gradual increase from the past quiet weeks, and while there is still room for further improvement, dealers are now more optimistic in their vews of spring trade. A commencement of building operations, it is felt, will bring about the required stimulus for these products. The undertone of the market is on a steadier basis, due to metals on primary markets showing a slight improvement in the past two weeks. Prevailing quotations on most metals are now at a low level, and it is felt that a steady, healthy gain should be made during the following months. Present prices are the following;

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 23
Do., wire, lb.	0 35½
Zinc shets, casks	0 11
Do., broken lots	0 11½

PRACTICALLY NO CHANGE IN BOILER TUBES

Montreal

There is little or no change in the situation on boiler tubes, the movement being described as only fair, and quotations on the various sizes remaining unchanged. Although a revision to lower levels is anticipated in some quarters, there is no indication of such a change in prices on the local market as yet. Following are existing quotations;

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

NO FURTHER CHANGE IN BRASS AND COPPER GOODS

Montreal

Current prices on brass and copper rods, sheets and tubing remain at the revision of last week, when all lines showed a slight reduction. Copper on primary markets, has improved slightly during the past few weeks and this week it reported as having settled on a much steadier basis, for the present at least. Business in these lines is still of a limited nature, although the next few weeks is expected to bring a better buying movement. Following are the quotations at the revision;

BRASS—	Base.
Sheets, base	0 24
Rods, base ½ to 1 in., round	0 22
Tubing, seamless, base	0 30
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 29
Soft sheets, plain, 16 oz., and heavier	0 32
Plain tinned, 16 oz. and heavier	z0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are full sheets and bars. Cut sheets and bars are 5c. per lb. higher.

QUIETNESS STILL EVIDENT IN RANGE BOILER MARKET

Montreal

Little improvement can yet be reported in the movement of range boilers, dealers still stating that the volume of business is limited. It is felt that a revival in building operations is now necessary for an increase in sales of boilers, as dealers orders are for small quantities, required principally for repair work. The situation locally with regard to prices is still unchanged, some firms adopting the new price scale, while others are quoting former net list. With only a fair amount of business, dealers appear little concerned over the variation existing, but are awaiting a more active demand, when it is felt the situation will gradually right itself.

TENDENCY TO IMPROVE IN INGOT METAL MARKETS

Montreal

Changes in the ingot metal markets this week have not been very great, although there is a tendency toward improvement, which, it is hoped, will lead to a steadier situation. The London market is still largely dominated by fluctuations in exchange, and the decline in Sterling tends toward improvement in price.

TIN.—This metal continues irregular with little actual change in price, and there seems little chance of any great change at present. With such heavy stocks hanging over the market, no great improvement, either, can be expected in the immediate future. Local quotation is unchanged at 34 cents.

COPPER.—Copper is firmer both in London and New York, and producers are firmer in their ideas at 13 cents for refinery. London market has advanced about £3 over the low mark, but this is partly due to the decline in exchange. Locally, there is little demand and the market is dull at 16¾ cents for electro, 16½ cents for casting.

SPELTER.—London continues to advance and is the strongest metal there. East St. Louis is also firmer at $4.62½, and it would not be surprising to see the advance go slightly firmer. Local market is quiet at 7 cents.

LEAD.—There is no new feature to this metal, the market being quiet both in London and East St. Louis. Production is just about in line with consumption, and there seems little likelihood of any change in price. The local market is also little changed at 6¾ cents.

ANTIMONY.—Antimony fails to show any improvement, in spite of the fact that prices are at an exceedingly low level. Stocks are still comparatively light, but quite ample for present demand. Chinese is still quoted at 6¾ cents, high grade English at 7¾ cents.

ALUMINUM.—There is little or nothing new in this metal, it remaining very quiet with quotation unchanged at 24 cents.

Toronto Markets

TORONTO, March 9.—Lower prices are announced this week on black oil, both Summer and Winter grades recording a recession of two cents per gallon. A reduction is also noted on parrafine. The easier tone remains in copper products generally, owing to the recent developments in the primary steel markets, but no price revisions have yet been recorded. A quiet situation still prevails in scrap materials, while current interest in the ingot markets centers around copper and tin with fluctuations in these metals attracting direct interest as well as affecting the market trend in other finished products.

Orders for bar iron and steel are on the increase, with general improvement manifest in this phase of the industry. The sheet business is also reported on the road to recovery, more orders of a small nature aggregating better tonnage for distributors. The volume of Spring trading is stated to be coming along in a fairly satisfactory manner, and given the incentive of an early season may provide an opportunity for exceeding the average expectations in this direction.

LOWER PRICES ON BLACK OIL AND PARRAFINE

Toronto

Reductions of two cents per gallon is announced this week on both summer and winter grades of black oil, this revision bringing quotations to 21 and 22 cents per gallon respectively, which prices are subject to the usual discount of 15 per cent.

A downward change has also been recorded on parrafine, this oil showing a drop of three and a half cents per gallon, thus reducing the prevailing level to twenty cents per gallon. These revised quotations are contained in the current market pages.

There has been no further development in either fuel oil, gasoline, or other refined grades of lubricating oils. The slightly firmer tone recently recorded on the primary gasoline markets, still remains, this factor being generally attributed to the seasonal increased demand.

ORDERS FOR BAR IRON AND STEEL ON INCREASE

Toronto

There is little new to record in bar iron and steel although the general improvement is manifest in this phase of industry, as noted in recent reports. Producers, however, still present the claim that bar iron and steel is being sold below cost at the prevailing base price of $2.75, and that every order taken at this level means a loss for either mills or distributors. Competition from American producers is described as very keen in this direction, and it was the meeting of lower prices in southern markets which caused domestic quotations to recede to their present levels. The volume of orders is stated to be on the increase, and while purchasers are still cautious and order in moderate quantities, yet the aggregate is described as reaching a fairly respectable total. Following are the average unchanged local prices:

IRON AND STEEL—	
Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

IMPROVEMENT LOOKED FOR IN SOIL PIPE TRADE

Toronto

While conditions are naturally of a moderate nature in soil pipe and fittings at this time of the year, renewed activity in these products is generally looked for in the near future. With weather conditions showing signs of improvement, preparations are now under way in many quarters for the commencement of moderately extensive building programs, and activity in this direction is naturally expected to reflect on the future demand for soil pipe. Primary market conditions remain unchanged, with the discounts on the domestic centres still showing signs of variation. Following are the average local quotations:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

MODERATE MOVEMENT IN PIPE FITTINGS

Toronto

The current demand for pipe fittings generally shows a fairly moderate number of small orders, which are chiefly of a sorting nature. The total volume however, is described as "nothing remarkable." Improvement is looked for in this direction, especially with any noticeable expansion in future building operations during the spring and summer periods. Following are the general average quotations which remain at the recently revised discounts on these products:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%

SHEET BUSINESS ON ROAD TO IMPROVEMENT

Toronto

While there are no orders of outstanding importance, yet recent weeks have brought out more evidence that the sheet business is on the road towards improvement. More orders are being sold below cost at the prevailing base placed, and while these are mainly for small quantities, yet they result in three things: they indicate better things for future months; aggregate more tonnage, and this latter condition is reflected in more activity among the mills. Sheet and tin plate are now numbered among the most active items in demand in semi-finished steel products. The volume of inquiry has recently been greater, this factor being described by distributors as an indication of potential trade. Quotations are nominally unchanged at the following levels:

BLUE ANNEALED—

10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

BLACK—

18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis
28 gauge	8 00	7 00
26 gauge	7 75	7 25
24 gauge	7 35	6 85
22 gauge	6 90	6 40
18 and 20 gauge	6 75	6 25
Premier and Apollo.		
10¾ oz.	6 00	6 75
U. S. 28 base	5 60	6 35
U. S., 26 gauge	5 30	6 05
22 and 24	5 15	5 90
18 and 20	5 00	5 75
16	4 85	5 60
12 and 14	4 70	5 45

An extra 40c. per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.
An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

PLATES, CANADA—

Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25

PLATES, COKE TIN—

IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 sheets	9 00

PLATES, CHARCOAL TIN—

IX, 20 x 28, 56 sheets	14 00
IXX, 20 x 28, 56 sheets	16 00

PLATES, TERNE—

IC, 14 x 20, 112 sheets	12 00

ADD FIFTEEN GALLON RANGE BOILER TO LIST

Toronto

There is very little variation to record in the range boiler markets, with current trade continuing of a quiet nature at this time of the year. While it is claimed that the recently revised list prices and discounts are not yet general in certain quarters, yet the net prices on these products are practically the same in each instance. The fifteen-gallon size has also been added to the list at a quotation of $14.00. The smaller sizes are said to be practically the only boilers showing any signs of activity. Following is the nominal list, with discounts for standard and extra-heavy weights:

RANGE BOILERS—

5-gallon	$ 13 50
12 to 15 gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

EASIER TONE REMAINS IN COPPER PRODUCTS

Toronto

As outlined in previous market reports, an easier tendency is reflected in the copper and brass product markets due to the price recessions recently evident on the primary metals. With a continuation of this feature, some developments in quotations on sheets, rods and tubing are looked for in certain quarters, but manufacturers and distributors of these products are generally awaiting the definite trend of the basic markets. Local prices are meanwhile remaining at the following unchanged levels:

BRASS—

Sheets, base, per lb.	$ 0 23
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 20

COPPER—

Rods, base, per lb.	0 26
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

SMALL ORDERS PREVAIL IN COMPRESSION GOODS

Toronto

Quotations on compression goods are at present remaining at the recently revised levels. Trade in these products has been chiefly of a sorting character, wtih distributors noting some slight improvement in the number of orders since the completion of inventory period. The total volume, however, is described as small. Prospects for a more extensive construction program generally through the Spring and Summer seasons is looked upon as the forerunner of better activity in compression work, and the sign of a larger volume of business in the near future. Following are current quotations:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	35%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard	43%

Quick opening No. 3633	50%
No. 3623, plain or index handle	34%

BETTER TRADE NOTED IN BOILER TUBES

Toronto

While the current condition of the boiler tube market is described as nothing extraordinary, yet an improvement in the volume of prevailing business has been recorded in some quarters. Boiler tubes are reported to be moving well, in the smaller sizes, with trade quite moderate in the larger sizes. This

betterment has been evident since the recently revised prices on tubes came into effect, but is naturally expected to develop at this time of the year. Quotations are generally unchanged at the following levels:

BOILER TUBES

	Seamless	Lapweld
1 inch	24 75	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	.....
2 inch	24 50	20 00
2¼ inch	27 75	23 00
2½ inch	32 50	23 75
3 inch	40 00	30 00
3¼ inch	50 00	32 50.
3½ inch	52 50	34 25
4 inch	65 00	43 50

LEAD PRODUCT PRICES REFLECT BASIC TRENDS

Toronto

There has been no further change in prices on lead and zinc products, but recent developments on the primary metal markets attract special attention. Tin prices are considerably easier, and a similar trend has recently been apparent in spelter. Lead quotations, however, are holding their own, this metal awaiting an improved foreign inquiry, where current stocks are described as low.

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.		0 12½
Lead waste pipe, list, per lb.		0 13½
Do., over 8 in., list, per lb.		0 14½

Zinc sheets, per lb.	0 09	0 10

IMPROVEMENT EXPECTED IN EAVESTROUGH ORDERS

Toronto.

Improvement in the volume of eavestrough and conductor pipe sales is looked for in the near future by manfacturers and distributors of these products. The advent of Spring weather has stimulated early activity in advancing construction programs, and more extensive developments in the direction of building homes and other erections is generally expected. Quotations on these lines are being maintained at the current discount leve's given as follows:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth: Per 100 ft.

8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

QUIET SITUATION STILL PREVAILS IN SCRAP

Toronto

Cast iron scrap still remains firm and the demand is fairly brisk. Steel scrap, however, is very quiet and shows no signs of immediate development. There is no change in prices, but those quoted are purely nominal.

The copper scrap market is exceedingly dull. There are large stocks held by dealers who will not sell at present values, and these stocks prevent dealers from purchasing other material which comes in the market. Other metals a'so have been dull, the tendency being to await developments in the virgin field. The rubber business is stagnant, and practically no sales have been made recently. Following are average local quotations for fairly large quantities:

SCRAP MATERIALS

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00

INGOT METAL INTEREST CENTERS ON COPPER

Toronto.

Fluctuations in copper and tin continue to supply the feature developments metals have undoubtedly attracted recent attention, as we'l as affecting other market trends. Tin is now quieter with the fluctuations less erratic. In copper a slightly stronger tone again prevails with producers being reluctant to sell at the prevailing low levels. The lead market is described as firm, with the demand continuing steady.

COPPER.—Some sentimental firmness is reported to be entering into the current copper situation and thus serving to halt the marked anxiety to unload which featured recent developments in this metal. This condition has been assisted slightly by the reported likelihood of producers refraining from going back to immediate full capacity production. There is only a moderate demand, and prices on the primary markets are considerably below the levels recorded a few weeks ago. Locally, the quotations remain between 17 and 17½ cents.

TIN.—The recent sharp fluctuations in the London market, coupled with the uncertainties of Sterling exchange, are reported to have dampened a certain degree of trade interest in this metal. Fairly large supplies are said to be available, which has to some extent accounted for recent easier price levels. The local price remains at 35½ cents.

LEAD.—An increased interest in primary lead markets has resulted in a slightly firmer tone in some quarters, own, and prices are nominally unchanged. Quotations on the local market continue at $6.75.

SPELTER.—A little more inquiry for spelter is reported from galvanizers and brass mills, but this condition is of a minor character with general business still being s'ow. A slightly firmer tendency is recorded in southern centres, but local prices continue unchanged at $7.00.

ANTIMONY.—This market has developed further signs of weakness, due to the absence of domestic demand. Local quotations remain at the recently lowered levels of 8 and 9 cents.

ALUMINUM.—Demand for aluminum is described as slowly increasing, but such a movement is so slow that it is hardly noticeable, and certainly is not of sufficient extent to affect prices. The average local figure remains in the neighborhood of 27 cents, with other domestic markets quoting even lower levels.

London Markets

LONDON, March 9.—New lower prices have been issued this week on a number of important lines, including wire nails, fence staples, oiled and annealed wire, horse shoes, turpentine and many sundry hardware commodities.

Current trade in this district is described as seasonably good, with the approach of the Spring weather tending to speed up preparations for renewed activity in trade circles generally. Collections are reported as good.

EXTENSION BIT PRICES TEN PER CENT LOWER

London, Ont.

A reduction has been announced this week on the Millers Falls line of bit extensions, the new prices being approximately 10 pe cent.. lower. The revised quotations follow:

BIT EXTENSIONS

No. 5 x 15", $1.95 each. 18", $2.00. 21", $2.10.

REDUCTION APPEARS IN TURPENTINE PRICES

London, Ont.

Due to the easier tone recorded in the primary turpentine markets, local prices on this product receded to the extent of five cents per gallon during the week. This change now brings quotations to the following levels, with a moderate de-

mand being noted:

TURPENTINE—	Imp. Gal.
1 bl. lots	1 35
2 to 4 bbl. lots	1 34
5 gal. lots	1 50

FIRMNESS MAINTAINED IN LINSEED OIL

London, Ont.

While some fluctuations are occurring on the flax seed markets, yet the primary strength in linseed oil is being generally maintained, and current prices show very little change.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

REDUCTIONS ANNOUNCED ON WIRE NAIL PRICES

London, Ont.

Revised quotations have been announced on wire nails, the extent of the decline being 25 cents per keg. This change is generally attributed to the easier tone in wire and wire product markets. Following are the new prices:

WIRE NAILS

$3.65 base, London.
$3.65 base, Collingwood.
(Freight allowed.)
$3.65 base, Windsor, Walkerville, and Sandwich.
(Carload freight allowed.)

REVISED PRICE LEVELS ON FENCE STAPLES

London, Ont.

A reduction of 25 cents per 100 lbs. has been announced on fence staples. This change follows in conjunction with the recent easier prices on various wire products. Following are the revised quotations:

FENCE STAPLES

Bright, in kegs, $4.15 per 100 lbs.
Do., in 25 lb. boxes, $5.15 per 100 lbs.
Galvanized, in kegs, $5.15 per 100 lbs.
Galvanized in 25 lb. boxes, $6.15.

TWENTY-CENT REDUCTION ANNOUNCED ON WIRE

London, Ont.

Both oiled and annealed wire are now quoted at a reduction of 20 cents per 100 lbs. This change is practically uniform in this line of goods, reflecting the easier trend on the primary wire markets. The new quotations follow:

No. 11 $3.87 per 100 lbs.
No. 12 $3.95 per 100 lbs.

REDUCED PRICES NOTED ON HORSE SHOES

London, Ont.

Lower quotations are now in effect on horse shoes. The revised prices on these products are as follows:

HORSESHOES— Price per keg.	Sizes made larger than Patterns	No. 2 less 20c.	No. 1 smaller
Light iron	0-7	6 90	7 15
Medium iron	1-8	6 90	7 15
Heavy iron	6-8	6 90	....
Snow	1-6	7 15	7 40
New-light "XL" steel	1-6	7 35	7 60
Featherweight "XL" steel	0-4	8 75	all sizes
Special-countersunk	0-4	8 75	....

Packing—Up to 3 sizes in one keg, 10c. per 100 lbs. extra. More than 3 sizes, 25c. per 100 lbs. extra.

F.o.b. Montreal, Belleville, and Hamilton.

CARPENTER TOOL SALES REGISTER IMPROVEMENT

London, Ont.

The sale of carpenters' tools of various kinds is reported to be showing some improvement lately. This is particularly noticeable as regards hand saws, planes, bit braces and screw-drivers. The improved demand is attributed to the recent price lowerings on these products in some quarters.

EASIER PRICE NOTED ON HAND SAW SETS

London

The Taintor line of hand saw sets are also lower in price. The revised quotation on the No. 7, being $15.75 per dozen.

SEASONABLE DEMAND FOR PUTTY NOW RECORDED

London, Ont.

With present prices firm, a good seasonable sale is generally reported for putty. A fair period of activity is looked for in this product. Following are present prices:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

QUOTATIONS SLIGHTLY LOWER ON ALARM TILLS

London, Ont.

A reduction which averages approximately 7½ per cent. has been made on the Tucker make of alarm tills. The No. 533 is now priced at $5.35 each.

Winnipeg Markets

WINNIPEG, March 9.—The number of price changes is relatively smaller this week. While some revisions have been noted in certain eastern quarters, yet these changes have not yet affected the western markets. The tendency towards gradual reductions still remains, but price developments are of a slow nature at present. Current trade is a little brighter this week, with both merchants and distributors anticipating a moderate improvement for Spring business.

EXPECT BETTER DEMAND FOR PIPE FITTINGS

Winnipeg.

The various lines of pipe fittings remain at unchanged quotations, with very little change having been recorded in the primary market conditions. Current sales are described as moderate, with some improvement and a better consuming demand being generally anticipated with the advent of more seasonable weather conditions. Following are prevailing discounts on these products:

PIPE FITTINGS

Malleable, class A, 65% off. Class B & C 70% off.

Union Elbows and Tees, 60% off. Unions, 45% off. Unions, Dart, ¼ to 2", 25 and 10% off. ⅛, 2½ to 4", 20%.

Cast Iron Fittings, Elbows, Tees, Crosses, Saturn Bands, Caps and Lock Nuts, 25% off.

Bushings, 30%off; Plugs, 25% off.

Nipples, closed, short 4" and smaller, 40% and 10%. 4½" and larger, 30 and 10%, Do., Long, 4" and smaller, 50 and 10%; 4½" and larger, 40 and 10%.

STEADY TONE NOTED IN LINSEED OIL PRICES

Winnipeg.

Quotations on linseed oil have remained fairly steady at the recently advanced levels. During the past few weeks no further change has been recorded. The prevailing quotation is $1.20 per gallon for raw, and $1.23 for boiled.

HIGH LEVELS REMAIN ON TURPENTINE MARKETS

Winnipeg

Turpentine quotations still remain at the recently revised levels of $1.55 per gallon in barrel lots. The firm undertone to the primary markets however, is more or less in evidence, and while the strength continues at southern distributing centres, little further revision is looked for.

REVISED LIST PRICES ON AXLE GREASE

Winnipeg

Through the issuing of revised list prices on axle greases, this product is now quoted on easier levels. Following are the new list quotations, which are subject to a discount of ten per cent.:

AXLE GREASE

Diamond	each
48-lb. list	6.45
10-lb. do.	1.30
15 lb. do.	1.75
25 lb. do.	2.65
Mica	
48-lb. List	7.10
12-3 lb. do.	5.05
24-3 lb. do.	9.85.
12-5 lb. do.	8.25
6-5 lb. do.	4.40
10 lb. do.	1.65
15 lb. do.	2.25
25 lb. do.	3.30

Half barrels, 8.35 per 100 lbs.
Barrels, 7.75 per 100 lbs.

EASIER PRICE LEVELS ON FIBRE DOOR MATS

Winnipeg.

A reduction is recorded this week in the quotations on cocoanut fibre door mats. Following are the revised levels on these products:

FIBRE DOOR MATS

No. 1	10.65 per doz.
No. 2	13.40 per doz.
No. 3	17.00 per doz.
No. 4	21.0 per doz.

LOWER QUOTATIONS GIVEN ON FORMALDEHYDE

Winnipeg

Now quotations for the season of 1922, have been announced on Formaldehyde.

FORMALDEHYDE

2 lb. jugs	55 each.
5 lb. jugs	1 30 each
10 lb. jugs	2 40 each
100 lb. kegs	22½ per lb.
200 lb. kegs	21 per lb.
400 lb. kegs	18 per lb.

Hamilton Markets

HAMILTON, Ont.—Gross sales of hardware lines by both manufacturers and jobbers, continue to record a weekly increase in volume. The movement of spring mechandise, in the city and country districts, is now reported to be greater than at any time this year. Small orders continue to prevail in the majority, but there has been such a remarkable increase in the total number of such current orders, that the aggregate shipment is described as reaching a fairly satisfactory figure.

In other specific quarters, trade is reported to be opening up, with the larger percentage of buying in recent days supported with an increase in the volume of inquiry, which is taken to indicate that potential business will soon be apparent.

While some improvement in current trade conditions is naturally looked for at this season of the year, yet it has been stated in various quarters that the present spring business is even a little better than generally anticipated. While many optimistic expressions have often been recently apparent, yet only moderate results were expected in many directions. The varying reports show that business is attaining a gradual but noticeable expansion.

Selling Below Production Cost

There is little new to record in the steel industry, although the general improvement is manifest in this phase of the trade also. Producers, however, still present the claim that bar iron and steel is being sold below cost and that every order taken at the present level, means a loss for both the mills and distributors. Competition from American producers is described as very keen in this direction, and it was the meeting of lower prices on United States markets, which caused domestic quotations to sag to their prevailing high levels.

The seasonal demand for sheets and plates is stated to be coming along in a satisfactory manner. It is generally felt, however, that if manufacturing consumers of these products were more confident regarding the future increased demand for their individual finished lines, or had greater faith in their personal selling ability, combined with the required facilities to locate and supply consuming markets, then a further proportionate increase would naturally be recorded in the prevailing demand for the raw materials.

Recent Price Developments

The recent easier prices on wire and certain wire products have attracted special attention to this development, and the primary causes for the reductions, provide a leading factor in market circles. Such lower quotations originally developed in the American centres, where price shading between the Steel Corporation and independent mills resulted in the general downward movement. Which particular phase of the steel industry will next experience price developments of this nature, is affording speculators a subject for keen attention.

An interesting feature is recorded in the manner of judging prevailing business progress. Owing to the changing trade conditions during recent years, the methods of measuring progress—or otherwise— are stated to have recently been revised in various quarters. Not that yearly records are ignored altogether, but some manufacturers are now adopting the principle of comparison with the previous month only. While keeping before them the available records covering corresponding periods in recent years, yet the fact is also borne in mind that those particular seasons were abnormal circumstances. The opinion has been expressed that in getting back to more moderate standards, any increase, however slight, over the previous month's figures, should be regarded as sufficient evidence of tangible improvement in both primary and immediate surroundings, and should also be treated accordingly.

Pittsburg Markets

PITTSBURG.—On the whole buying of steel products has fallen off somewhat in the past week, this being the first recession since the market began to grow more active, at practically the beginning of January. The decrease is not seen in every line, but it is moderately general. However, the experience is too short to justify any conclusion that the market has turned quiet, for there are naturally ups and downs. According to the best judges a period of 30 days should be allowed to elapse before any definite judgment is formed.

The quieter market just at the moment, sounds a proper note of warning and emphasizes a fact that has already attracted some attention, that the increase in demand during January and February was very rapid indeed, surprisingly rapid even to those of most sanguine temperament.

The magnitude of the increase in demand that has occurred is brought out by comparing ingot production rates. The rate now is about 29,000,000 gross tons a year. Last July, at the low point, it was only 10,000,000 to 11,000,000 tons. It was stated in well posted quarters that the liquidation of stocks of steel in the hands of buyers was practically completed by October 1, and production in October and November, representing last autumn's seasonal demand, was at 23,000,000 tons a year. Then at the end of December the rate was down below 18,000,000 tons, perhaps no more than 16,000,000 tons in the holiday week. Production during the entire year 1921 was approximately 19,500,000 tons. With a rate of 29,000,000 tons the first week in March one can see what a sharp increase has occurred.

Early in January there developed fresh price cutting, competition becoming particularly severe, even for relatively small orders. In some lines it seemed as if there were no order so small that some mill was not willing to cut the "regular" or open market price a trifle in order to get that tonnage. As stocks in the hands of buyers were thoroughly depleted, and such attractive prices were being quoted, it would not be unnatural for buyers to replenish their stocks in a moderate way, to a level that would enable them to conduct their business efficiently and economically. Some of the heavy production of the past few weeks may have been on this account. This is merely deduction or theory, for it should be noted that the mills do not admit that their customers have been stocking at all. According to the statements commonly made by the mills the evidence of their order books is that the steel shipped from day to day has been going immediately into consumption.

Steel Prices. The fact that the price of a given finished steel product is low by any comparison is no criterion that it reached the rebound point. This is exemplified by a comparison between black and galvanized sheets on the one hand and bars, shapes and plates on the other. At the beginning of last December sheets stood at 3.00c. for black and 4.00c. for galvanized, while bars, shapes and plates were 1.50c., with possible concessions on attractive orders.

RE-MODELLING STORE INTERIOR INCREASED HARDWARE SALES 25%

Many hardware merchants have debated the question as to whether or not their store interior could be laid out to better advantage.

In next week's issue of Hardware and Metal, appears an illustrated article showing how Robertson, Foster and Smith, of St. John, N.B., increased business substantially by remodelling their store and installing new equipment.

R. Chestnut & Sons, Fredericton, N.B., have developed half a million dollar turnover with limited store space, by the use of several ideas for saving space.

Every merchant interested in increasing his turnover will find something of value in these as well as in the host of other splendid articles to appear. Don't forget next week's issue (March 18) is the Annual Spring Number.

Educating the Public to Use Paint and Varnish

"Public Opinion" an Important Force When Turned in Right Direction—A Natural Law Which Can Be Applied in Educational Work Along Lines of Using Paint and Varnish—Public Have More Appreciation of Pleasing Appearance Than Convention

By ERNEST T. TRIGG, Chairman U.S. Save the Surface Campaign

SOMEONE once said: "Experience is the Best Teacher." Upon occasion, both appropriately and inappropriately, we repeat this adage. We should be more accurate if we were to say, "Experience is the most convincing Teacher." But even then we would be only partially truthful, for I believe you will agree that there are other very potent educational forces, which, in some cases, in our modern society, are more far-reaching than individual experience.

The effectiveness of experience as a teacher is diminished because of her limitations. Experience may be one-sided and develop in her pupil distorted, unsymmetrical character. She may repeat the same lesson over and over, in spite of our best efforts, and become not only a disagreeable preceptress, but an inefficient one as well. Upon occasion, experience may become laggard and neglect us entirely.

Experience, when she teaches, does so in a most convincing manner. She is convincing because she is realistic; she speaks in concrete terms. And realism and concreteness beget interest and attention.

Public Opinion

Besides experience, there is another great educational force of the most far-reaching influence, which we sometimes call "Public Opinion." Legislatures may deliberate and eventually enunciate a code of behaviour affecting the lives of everyone of us; but unless the law is backed by public opinion, it is impotent—it will not be enforced.

We like to assert that we are "free agents," but our ethical and moral relationships are founded largely upon public opinion. In the case where public opinion eventuates in a condition which is beneficial and pleasurable, the combined effects of public sanction and personal satisfaction constitute an almost invincible force. Experience may teach us that a certain action results in slight physical injury, and we may persist in the practice notwithstanding. But let public opinion express itself, and a very brave or callous heart is needed if we are to run counter to its mandates.

Now it happens that public opinion is pliable. Like glass, it can be slowly bended. Where a sudden shock would have a shattering effect, a slow, persistent pressure will produce almost any desired result. And the rapidity with which the change can be accomplished will be closely proportional to the degree of truth embodied in the force at work.

This natural law applies as fully in the education of paint and varnish consumers as in the education of any other group. There is probably no commodity more universally used than paint and varnish. Everyone is familiar with it, with its appearance and, in a more or less ill-defined way, with its uses. To the esthetic sense, paint is a beautifier, whether it be on house or canvas. To the engineer and scientist, paint and varnish appeal as surface protectors and conservers of wealth.

Like Beauty Better Than Conservation

I suppose I would be justified in saying that on the average, we are not very highly specialized either esthetically or scientifically. But in general, we seem to have a greater inherent appreciation of conservation of property.

For instance, most people, upon seeing a dilapidated building, will remark as to its ugly appearance, rather than as to the condition of the material structure. We are depressed by a gloomy environment. We are uplifted by pleasing surroundings and harmony of color. It is, therefore, quite natural that the consuming public, which has caused the manufacture of paint and varnish to develop into one of our greatest industries, should have placed the emphasis upon the improved appearance of surfaces covered with these products, rather than upon their protection from decay and attrition. It is only recently that serious consideration has been given by the general public to the great value of paints and varnishes as preservative materials.

If our products were to be used for beautifying purposes only—that is if there were no need for surface protection—tones and tints would perhaps be the major consideration involved in the manufacture of these products. But when emphasis is placed upon paints and varnishes as protective films, which are really to serve as a shield between our property and the onslaught of the elements, the question of the ability of these surface coaters to withstand attack becomes one of commanding importance.

High Specialization

The doctor is successful to the degree that he is specific. And the practice of medicine and surgery has become so complex that to be specific means to be a specialist. The conditions under which paint and varnish must stand up are so diverse that the manufacture of them is attended by a similar high specialization. Paint, deserving of the name, has to be made according to prescription. The prescription can be determined only after detailed study, not only of the disintegrating forces to which it will be subject, but also of the surfaces to which it will be applied.

The demand for and requirements of surface coaters are multitudinous. They are required for preserving surfaces of every conceivable type. They must withstand successfully exposure to a legion of destructive agencies.

Probably no other article of public consumption requires so much research and technical skill in manufacture as do modern paints and varnishes. By modern paints and varnishes, I mean those which are purposely made, with precision, for specific purposes of the most exacting nature. For instance, the manufacturer of cement selects his cement-rock, limestone and coal with a view to a standard quality of cement; the iron master gives attention to the character of his ore, fuel and flux purposely to produce a standard quality of steel.

These comparatively simple considerations, complicated in special cases by the introduction of a limited quantity of other ingredients required for special products, constitute about all that the makers of these two important commodities have need to worry about from the standpoint of raw materials.

A Complicated Matter

Let us look for a moment at the paint

(Continued on page 58)

EDITOR'S NOTE

Public opinion has always been regarded as a very important and powerful element. Its value as associated with the paint and varnish industry and means by which the merchant may help to swing this important element to the correct appreciation of paint and varnish, are points dealt with in this interesting article by Ernest Trigg, Chairman U. S. Save the Surface Campaign.

The work of the Educational Bureau in assisting both manufacturers of paint and the consumers who finally use it, is also outlined as an example of what might be attempted on a smaller scale by the hardware merchant.

SERVICE

CONFIDENCE

FAIR DEALING

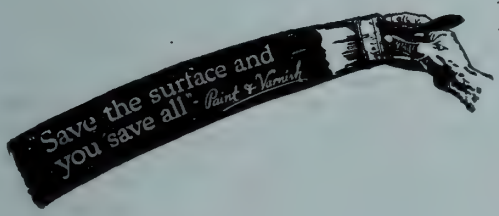
SERENITY

"Serene as a big city at the dead of night."

Serenity in our business life is one of the most necessary conditions to our steady and happy progress.

To have an unruffled faith in the integrity of those with whom you do business; to be able to repose a calm confidence in their standard of trade; to sense that peacefulness which arises out of years of satisfactory dealings.

To know always that you can depend on them for efficient and prompt co-operation in all that makes for, as near as possible, a perfect organization—in other words to have a *clear* mind, free from the bulk of the complaints common to Hardware Merchants and the worries caused from neglect—is to be serene.



Service—real Service, which embodies good goods, intelligent and unusual co-operation between the manufacturer, the retailer and the consumer—is the parent of serenity.

These are some of the thoughts which contribute to the merits of our *exclusive* proposition.

EDUCATING THE PUBLIC

(Continued from page 56)

and varnish industry. There, we have a thousand chemical and earth pigments or colors, oils, resins, thinning liquids and waxes which enter into one or another of the products of this great industry. And each of these must be selected with the greatest care. Furthermore, the properties of each of these many raw materials must be made the subject of extended research in order that it may be used under varying conditions of combination with other ingredients, always in a precise and perfectly effective manner.

Because of these conditions, the outer reaches of possibility in the paint and varnish industry have never even been glimpsed. Through tedious centuries its technique has slowly evolved. More recently this ancient heritage has been builded upon by intrepid spirits, who dared to vision a new era in manufacturing methods. Through the farsightedness of these leaders, surface coaters, made according to specific prescriptions, are now being produced by a number of leading manufacturers.

These manufacturers are always vitally interested in any scientific discovery which has the possibility of throwing light upon one or another of our many difficult problems. As manufacturers, we have shared such information with each other. This has been a necessary step in bringing our technique to a sufficiently advanced point to warrant our later steps toward the education of paint and varnish consumers.

Wide-Spread Demonstration

As a result of this policy, the paint manufacturers organized an Educational Bureau. In their preliminary study, which was made to determine what initial activities of the Bureau would be most conducive to carrying out the work for which it was organized, the members of the Bureau became convinced that a policy should be adopted by which information should be supplied not only to the members of the Association, but to the consuming public as well. The need was early felt for wide-spread demonstrations which would call the attention of the public to the economic, as well as to the aesthetic, value of paint.

One of the earliest activities of the Bureau was in connection with the liquids required in paint manufacture. At intervals, for many years past, the industry has been menaced by shortages of the flax crop. Upon such occasions, not only legitimate and intelligent attempts have been made to utilize other vehicles, but persons who have been actuated by short-sightedness and cupidity, have often taken a temporary profit through the substitution of inferior materials. The close study by the Bureau of this condition with all of its ramifications brought to light at least one important and several promising vehicles, previously unknown. There is, of course, attendant upon the introduction of new materials into the industry, both a promise for greater achievement and, in the hands of unscrupulous "il-dopers," a serious menace, especially when the price of linseed oil is high. In the hands of conscientious paint technologists, these new materials provide not only a reserve for emergencies, but also in some cases superior vehicles for new paint specialties. Further work of this Bureau will be dealt with later.

Paint Trade Notes

CHANGE IN STAFF OF OTTAWA PAINT WORKS, LTD.

E. J. Street, with some years of experience in the paint and varnish trade, has taken over the territory of "North Western Ontario," previously covered by R. D. Virgo for Ottawa Paint Works,

E. J. STREET

Appointed to the territory of North Western Ontario for Ottawa Paint Works, Ltd., succeeding R. D. Virgo

Limited. Mr. Street has been connected with the Ottawa Paint Works for a number of years on the Eastern Ontario Sales staff. In addition to his Canadian experience with the O. P. W., he was previously with the old established firm of Henry Matthews & Co., Ltd., Bristol, England.

WALL PAPER, VARNISH AND PAINT PAY FOR STOLEN LOVE

"Theodore Robinson, a blacksmith of New Kensington, will receive payment for the alienation of the affections of his wife in a novel fashion.

"At the last term of court, Robinson brought suit against Mehle E. Christy, manager of a wall paper store in New Kensington. The jury awarded the blacksmith $2.275. Judge McConnell, before whom the case was tried, cut the verdict to $500. This, Christy refused to pay.

"But the blacksmith was insistent and finally brought suit against the wallpaper store managed by Christy, seeking to recover the $500. Miss Elsie B. Christy, sister of the defendant then came forward and said she was the owner of the store and tried to prove in court her purchase which was consummated in 1917, and that her brother was merely manager. Attorneys for the blacksmith were victorious and the jury in the second suit awarded Robinson the goods described in the Sheriff's statement of claim.

"Robinson will receive 1,202 rolls of wall paper, 10 gallons of varnish, 320 gallons of paint, 24 dozen cans of paper cleaner, and 125 feet display screens of linoleum."

TURPENTINE CAUSES WHITE LEAD POISONING

A new point of view on the subject of white lead poisoning in the painting trade has been given by F. J. Penberthy, vice-president of Lowe Brothers, Toronto, paint manufacturers.

Mr. Penberthy states that poisoning from white lead is an affection greatly misunderstood even by experienced medical men. His own experience is that actual poisoning from white lead is a rare occurrence and that a large proportion of cases so named are in reality the effects of turpentine fumes.

PAINT MEN USE UNIQUE MEANS TO AID UNEMPLOYED

The Christian Council of Atlanta, Ga., an organization that has been accomplishing considerable good in relieving unemployment conditions, has announced that arrangements have been made with leading paint dealers of the city whereby credit will be extended responsible citizens for a period of six months and without interest, if the paint purchased on such credit is used on homes or buildings where employment will be given to men now out of work. The arrangement to extend credit in this way was made with the co-operation and assistance of the Atlanta Paint Club and the action is expected to prove of considerable aid in relieving unemployment in this city.

STEEL CORPORATION MAY CONTROL COAL

New Glasgow, N. S.—According to information in financial circles here, James R. Porter and J. T. Cummings, chief owners of the Mabou coal properties in Inverness county, are considering an offer made them for the acquisition of their holdings by the British Empire Steel Corporation.

Should the British Empire Steel Corporation succeed in acquiring these valuable coal areas it will control practically the entire coal fields in Eastern Canada. It is known that this company's engineers have recently submitted an exhaustive report on the Mabou properties to their organization.

Gentlemen;-

A little over thirty years ago the writer started his career as Painter & Decorator. Realizing that the only way to build a successful business,was to first establish a reputation by giving the public the best workmanship possible coupled with the best products obtainable.

My first selection,as to material was " Elephant Brand White Lead" as I considered it at that time stock that could be recommended to my customers and which I could use also with entire satisfaction.

"Elephant Brand White Lead" was then noted for its intensity of whiteness,covering and lasting qualities,making it the most durable lead on the market. What was true of it thirty years ago can be said of it to-day,and I do not hesitate to pronounce "Elephant Brand White Lead" absolutely the best.

Yours very truly.
W.J. Carson

Weekly Paint Markets

Montreal

MONTREAL, March 9.—Developments in the local paint market this week, while without any actual price changes, are contained in the situation on turpentine and linseed oil. Turpentine, in Southern circles, has been displaying an easier tendency during the past week with quotations easing slowly from day to day. Demand has fallen off to an extent, especially European, with little interest also taken by domestic buyers. No alarm, however, is felt in this movement, as the active season is fast approaching and home consumption will in all probability be sufficient in a few weeks to take care of all receipts. Quotations on the local market are unchanged for the present, but a slight easing, in sympathy with prevailing conditions in the South, would not be surprising within the next week or so. Linseed oil prices are also unchanged, with the seed market continuing to fluctuate from day to day. There has been a slightly easier tendency in the past few days, and oil prices in one quarter were lowered one cent per gallon. This, however, is only considered a temporary movement by local crushers, and the undertone of the market is described as firm. World shortage of seed crop and increasing demand are said to be the two factors not allowing any great recession.

Window glass remains at former lower net prices on the local market, with no definite indications of a revision yet in sight. There is a movement on foot advocating higher prices, but whether this will develop is for the present problematic. White lead in oil, putty, and other paint products are reported with quotations unchanged and increased sales with the approach of the active spring season.

The new season's prices on Paris Green and insecticides are expected within the next few days, but at time of going to press these were not available.

LITTLE CHANGE RECORDED IN LINSEED OIL

Montreal.

Current quotations on linseed oil locally show very litt'e change during the week. One local firm is quoting one cent lower, but the situation is, in general, fairly steady, with increasing demand a factor assisting towards a firm market. Fluctuations continue in the seed market, but the undertone here also is still maintained on a fairly firm basis. During recent weeks there was a reluctance on the part of buyers to place their larger sized orders for oil, the unsteady market and rapid rise being thought questionable. Consuming demand, however, now requires supplies, and paint manufacturers are forced into the market because of the approach of their active season.

There is still the apparent world shortage of seed crop, the underlying factor in to-day's market, and the only relieving element is the shipment of considerable English oil to this side. With this condition, the prediction is still made by local crushers that a steady to firm situation will prevail for some weeks to come. There is always the usual fluctuations, owing to tendencies from a speculative origin, but price changes to any extent in a downward direction can hardly be expected with the necessary seed not available. Following are unchanged local prices;

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	1 08	1 10
3 to 5 barrel lots, per gal...	1 06	1 08

Less barrels, add 10 cents per gallon.

TURPENTINE PRICES UNCHANGED: SLIGHTLY EASIER TONE

Montreal.

There is a slightly easier tone in the turpentine market at primary centres, but prices on the local market are, for the most part, holding unchanged up to the present. A quotation a few cents less than those given below has appeared in a few quarters, but following are most general. Lack of demand is charged with the slight easing of prices in the South, where quotations recorded a gradual slump from day to day during the past week. This movement, while it may last for a week or so, is causing no undue alarm, it being claimed that the underlying situation is still firm. Turpentine stocks are limited, with fresh receipts continuing small, and with a more active demand anticipated in the very near future, there would seem to be every indication of a steady to firm position for this product. Export demand has fallen off to a considerable extent recently, and whether an early improvement will manifest itself in this direction in the near future seems problematic. However, domestic consumption is expected to play an important part in the market in the weeks following.

Locally, the demand is described as being seasonably quiet and sales continue in small quantities for the most part. An improvement here, however, is looked for in the not far distant future, as the month of March usually brings the commencement of the more active period for turpentine, as in other of its allied products. Prevailing quotations locally are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	1 32
2 to 4 barrel lots, per gal.	1 30
Broken lots	1 42

IMPROVED DEMAND FOR WHITE LEAD IN OIL

Montreal

Little or no change can be recorded in the white lead in oil situation, the market continuing fairly firm and prices steady at former levels. Sales of this product are now quite satisfactory, the approach of the painting season increasing the demand each week. Unchanged quotations are $12.00 in 5 ton lots, $12.75 in 1 ton lots, and $13.10 in less quantities.

WIDE RANGE NOTED IN SHELLAC QUOTATIONS

Montreal

There is still a wide range in the quotations appearing on shellac among the different wholesalers and distributors. Some firms increased their quotations a few weeks ago when the market showed a decidedly firmer tendency, while others made no change, and are still quoting at the former lower levels. The undertone of the market in outside centres remains very firm with demand increasing from week to week, and supplies none too ample. Importers, also give no encouragement to the situation, claiming that they can see relief in the near future, shipments of gum shellac continuing to arrive short of orders. The demand on the local market is now fairly active, reasonable quantities being shipped for the earlier dealer paint trade. Following are most general quotations.

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

WINDOW GLASS SITUATION REMAINS UNCHANGED

Montreal

Window glass is still selling at the former net list prices on the local market. Although it was anticipated by some that a revision in an upward direction would be made before now, there is still no definite indication of such a change. One local distributor stated that higher quotations would not be surprising, but it was doubtful whether the new prices, adopted in other domes-

tic markets, would be established here, as while the quotation on some of the smaller cuts had been increased to a satisfactory level, there were some of the larger cuts that had not been priced satisfactory to the local dealers. For the time being, he stated, the older net list would be the selling basis on the local market, with chances of a revision upwards at a little later date.

PARIS GREEN PRICES FOR CURRENT SEASON

Montreal.

The new season's prices for 1922 on paris green have been announced, and show a reduction of 7 cents per lb. all through the list. The following are the revised quotations:

PARIS GREEN	100-lb. lots
½-lb. paper cartons, per lb.	0 52
1-lb. paper cartons, per lb.	0 50
½-lb. tins, per lb.	0 54
1-lb. tins per lb.	0 45
1-lb paper cartons, per lb.	0 43
½-lb. tins, per lb.	0 47
1-lb. tins, per lb.	0 45
25-lb. tins, per lb.	0 41
50 and 100-lb. drums, per lb.	0 39
250-lb. kegs, per lb.	0 37½
600 lb barrels, per lb.	0 37

F.o.b. Montreal, Toronto, Hamilton, London, Ottawa, Quebec, Moncton, St. John's and Halifax. Yarmouth and P.E.I. paints ¼c. per lb. extra.

Toronto

TORONTO, March 9.—The marked reduction of eight cents per gallon in turpentine prices provides the feature developed in the current local paint markets. This change is primarily attributed to easier levels in southern producing centres, combined with efforts to stabilize the local situation. Linseed oil markets also register an easier tendency, due to the fluctuations in flax seed prices. Lower levels on oil have appeared in some quarters, but at the time of going to press were not yet general. The brisk demand for seed has slightly receded. Shellac quotations are considerably firmer, with local prices on a slightly higher basis in general.

RENEWED ACTIVITY IN PAINT AND VARNISH

Toronto.

There was a steady improvement recorded in the paint and varnish circles during the past few weeks and the ratio of consumption is now stated to be along heavier lines. As a general rule, stocks of first hands were smaller this year than previously, and these conditions assist towards a good Spring movement of paint and paint products generally.

There is little doubt in manufacturing and distributing circles that the expectations of making the current year a record-breaking one is in the way of being realized. General conditions throughout the country are said to be showing every indication that some real business is now in the process of materializing. Prices are remaining steady, and little variation is recorded.

DROP OF EIGHT CENTS PER GALLON ON TURPENTINE

Toronto

A reduction of eight cents per gallon has been announced in turpentine prices thus bringing the average quotation down to $1.27 per Imperial gallon in one barrel lots. While the southern markets recorded easier levels also, the change was not to this extent, and local distributors claim that in making the current price, an effort is being advanced to eliminate all trace of variation. A range in prices has been recently noted, it being claimed in some quarters that the previous prices have been high in comparison.

Conditions in the primary turpentine markets attract special attention this week. Due to the lack of demand, prices at southern producing and distributing points showed a marked decline. There is considered to be ample evidence that consumers will probably adhere to the cautious attitude which has characterized buying during recent months. This is due to the fact that the new crop is expected to become available within a few weeks. Present buyers realize that a speculative condition prevails owing to supplies of tanked turpentine being offered, and any influx of new receipts may affect the current price situation. Within the next few weeks, however, an improved demand is generally expected to materialize.

TURPENTINE—	Imp. gal
1 barrel lots	1 27
2 to 4 barrel lots	1 26
5 gallon lots	1 42

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon extra.

SOME EASIER PRICES IN LINSEED OIL

Toronto.

Local prices on linseed oil this week recorded an extensive range. A quotation on oil was received in one quarter at $1.07 for raw and $1.08 for boiled. In other quarters however, the higher levels of $1.15 and $1.18 respectively are still being quoted, with the expression of opinion that an improved demand in the near future will result in evening up quotations.

The undertone to the flax seed markets is stated to have diminished. There has been no wild buying of seed during recent days, such as caused the bullish market of a few weeks ago. The underlying conditions however, are reported to have moderated slightly the resumption of demand.

Linseed oil is easier in sympathy with the declines in the seed market, but quotations in primary centres have been fluctuating more or less practically each day. Trade in cake and meal is described as slightly more active, but with prices rather soft, this condition tends towards maintaining oil quotations. Buyers are generally practising extreme caution, many consumers being of the opinion that oil prices could not long remain at the higher levels recently quoted. Southern markets report that considerable business is being done in English oil, at prices below the current levels for the domestic product.

LINSEED OIL—

	Per Gallon	
	Raw	Boiled
1 to 2 barrel lots	1 07-1 15	1 08-1 18
3 to 4 barrel lots	1 06-1 14	1 07-1 17
6 to 9 barrel lots	04-1 12	1 05-1 15

Less barrels, add 15 cents per gallon.

STEADY IMPROVEMENT IN DEMAND FOR BRUSHES

Toronto

The demand for brushes is reported as steadily improving, and distributors are anticipating a fairly good season for these products. Household brushes of various descriptions are also experiencing improved sales, these being chiefly brushes of a cleaning nature, such as brooms, floor brushes and similiar products. The prospect for a banner season in the paint industry is naturally expected to be reflected in the brush demand, with the paint trade generally taking the bulk of the requirements for dusting brushes, finishing and other brushes of a special nature. The stimulant recently given the household "save the surface" movement, has resulted in better sales for brushes to apply paint, varnishes and similiar allied goods by the individual consumer in both town and country districts.

FIRM TONE RECORDED IN SHELLAC MARKETS

Toronto

Quotations on shellac have continued to show a slightly firmer tone, and in some quarters higher prices have been recorded. The conditions on the primary shellac markets record very little change, but the report that a shipment from Calcutta was damaged by fire, caused a tighter attitude to develop. There is stated to be a moderate demand at present, which is expected to show some improvement during the ensuing months.

SHELLAC	White	Orange
In bbls.	5 10	4 60
Gal. jugs	5 40	4 90

BETTER DEMAND FOR WHITE LEAD IN OIL

Toronto.

There has been little change recorded in the character of the white lead market, although improvement continues to be noted. Producers on white lead in oil describe the demand as irregular, but by comparison with previous records, a material improvement is generally admitted. Prices are remaining steady, with consumers showing more interest, a larger volume of inquiries being reported. As Spring trading approaches, current trade in this product is naturally expected to reflect the improved conditions.

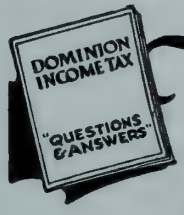
Western Wire & Nail Co.
London, Ontario

Do You Read the Advertisements

THE MAIN thing an advertiser wants to do is to tell you plainly just how and why his goods are worthy of your consideration. You can learn a great deal from that alone, because many things you see advertised are the things you buy and use in your regular daily life. By reading the advertisements you can learn the names and read descriptions of the things that are best and most satisfactory.



Your Income Tax

We have just issued a booklet—
"Dominion Income Tax—Questions and Answers"
which explains in a simple, concise way all Canadian Government Tax requirements.
The booklet is the work of a tax specialist. It simplifies—for any individual, incorporated company or estate—the preparation of the necessary income tax return.

We will be pleased to forward a copy on request.

Barrett Roofings, Cements Industrial Paints etc.

Powerful Advertising for Quality Products

THROUGH 1922—all over Canada—millions of advertisements will point out the economy, the reliability, the superiority of Barrett Roofings, Cements and Specialties.

Such a powerful sales-making force is bound to bring new customers to Barrett dealers everywhere.

But that's only half the story. Barrett Roofings and Specialties stand head and shoulders above any similar goods—once a man buys them he buys again and again. For Barrett customers are always satisfied customers.

The biggest profits are made by dealers who carry a complete stock of Barrett goods. *You* should have every one of these popular, fast-selling products on hand.

Everlastic "Rubber" Roofing
Everlastic Liquid Roofing Cement
Plastic Elastigum Patching Cement
Everjet Elastic Carbon Paint
Everlastic Multi-Shingles

TINKER TOM'S TALKS.

No. 349

"The Summer is over and gone!"

"Surely not!—Why Spring is just approaching", you say.

Well, I mean to say that the Canadian manufacturer or jobber who depends on overseas supplies will be singing the song noted above before he gets what he wants.

The wise ones are ordering Premier Galvanized Steel Sheets now—getting the full price reduction and lining up before the rush—Are you wise?

TINKER TOM.

This Guarantee Protects the User—And You

Factory Guarantee

Every battery bearing the North Star label is guaranteed to give full satisfaction to the consumer. Should a battery prove defective, simply satisfy the merchant from whom purchased. He is authorized to replace it.

Any North Star battery that fails to give full measure of satisfaction to the user is replaced by us without the least trouble. This is one reason why you will find the North Star a good battery to sell.

The Waterproof Battery

An Exclusive Feature of North Star Multiples, is the improved terminals. They insure perfect contact and prevent loose connections.

NEW THERMOS PRICES

on Bottles, Kits, Fillers, Corks etc. is helping increase sales

Thermos spells economy and all your customers are considering economy in their purchases. Supply their need for home use with Thermos Bottles and Kits; for presentation, with popular-priced useful Thermos Bottles and Carafes. Handsome for Prizes, Trophies, Sporting, etc.

This new Model No. 25 made in four sizes is a winner. Sales increasing daily since introduced. Full nickelled, seamless brass case, butler's finish. Order now from your jobber or direct. Fifteen ounce (previously called pint) retails $3.00. Thirty ounce (previously called quart) retails $4.50. Discounts 25 and 10%. Fillers now $1.25 and $2.25. Splendid Window Outfit with any 18-piece order, exclusive of fillers.

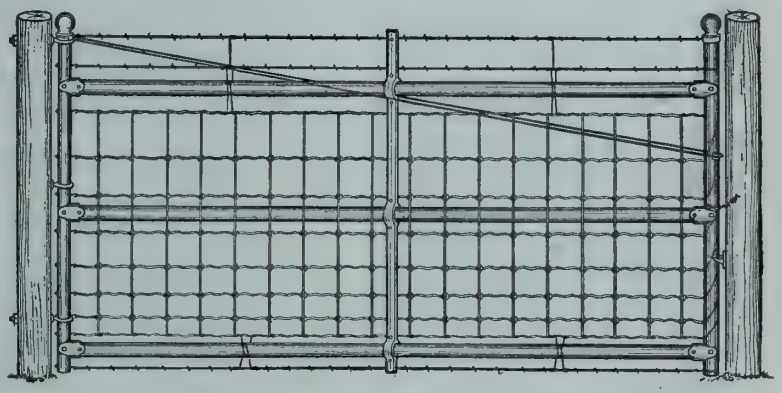
THERMOS BOTTLE COMPANY LIMITED - TORONTO

The Story "In a Nutshell" of Why

CLAY GATES

Meet Canadian Conditions so Effectively and Sell so Well

These gates please your stock and cattle customers because they are plain, common-sense gates—horse high, bull-strong and pig-tight.



Clay Bull Gate

Showing Clay Adjustability

They have all the advantages of good construction. Without going into technical details, we point out that they are strong—high carbon steel tubing; malleable iron castings; two-piece angle iron center brace and heavy brace wire.

These gates are easily and instantly adjustable. They are durable, economical, and fully guaranteed. Before you forget it, write for our catalogue, which explains fully the many good features of these excellent gates.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

IF YOUR MESSAGE TO THE TRADE

is advertised in Hardware and Metal it goes by paid subscription to every wholesale hardware buyer in Canada and over 90% of the retailers. An examination of hardware-store displays, or inquiries in the stores, will convince you that these men invariably prefer to buy goods made familiar in the advertising pages of Canada's only weekly hardware trade paper.

HARDWARE and METAL

"Canada's National Hardware Weekly"

143-153 University Avenue - Toronto, Canada

Montreal Branch, Southam Bldg. Winnipeg Branch, Union Trust Bldg.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

TAPES *and* RULES

What One Cent Does For You in

For one cent per subscriber we will print a message about your house and product on good quality paper, 7¼″ x 10″ in size, address and mail it to prospects selected because of known, definite interest in hardware products. Every copy goes to a paid-in-advance subscriber who reads it as part of his business routine each week.

In other words, the low rates enable you to send a page message about your house or product to every wholesale hardware house in Canada and over 90% of the Canadian hardware retailers, from Atlantic to Pacific, at a weekly cost of about one cent each.

In view of present low stocks, the retailers' "pick-and-choose" style of buying, the keen competition predicted for 1922, and these low advertising rates, it will pay you to get in touch with us.

COMMUNITY PLATE

A new finish

—captivating in its appeal

Special orders of the Grosvenor pattern in *COMMUNITY PLATE* —in the new platinum finish— gained so much favour with discerning women, that it has been decided to offer this beautiful finish to the trade, so that every dealer may take advantage of its greater attractiveness.

The Grosvenor is a master-piece of silverware designing and lends itself so well to the rich softness of the platinum finish that you will find it the first choice of your most discriminating customers.

See this new platinum finish and satisfy yourself that, combined with the beauty of the Grosvenor pattern, it is going to mean a great difference in your sales total this year.

34TH ANNUAL SPRING NUMBER

Hardware and Metal

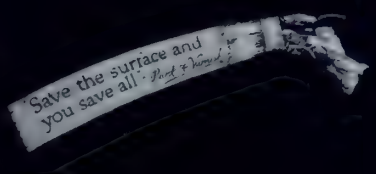
Vol. XXXIV. No. 11 | THE MACLEAN PUBLISHING COMPANY, LIMITED | March 18, 1922
PUBLICATION OFFICE: TORONTO, CANADA

OUR NEW IRON

DESIGNED TO MEET THE PARTICULAR NEED OF THE PRACTICAL PAINTER,

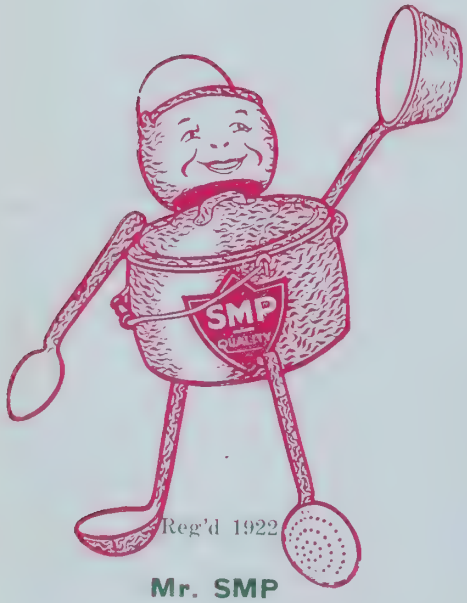
THIS iron has a cover that fits securely but can be removed and replaced quickly and easily. The sides are straight and the handle is flush with the top, making it easy to stack and store. The bail cannot come off as it is attached to the wire rim, which gives strength and rigidity to the can. Altogether, this iron makes a perfectly balanced paint pot, possessing,

Great Strength, Utility and Security.



A Little Talk from Mr. SMP

"Yes! This is a spring number and most of the goods talked about are pretty good **seasonable** lines. But my lines **aren't** seasonable lines. They sell as well in Spring as they do in Fall. Just as speedy in chilly January as in hot July. They are all-year-round lines, and hum-dingers at that. I'm speaking of



Mr. SMP

SMP Diamond or Pearl WARE

"A Face of Porcelain and a Heart of Steel"

Properly handled, Diamond or Pearl Ware can be made the steadiest money makers in the whole housefurnishing section.

In fact, hundreds of Canada's most successful hardware and general store merchants are using Diamond or Pearl Ware—or both—as the profit pivots of their business.

There's **profit for** the dealer in handling Diamond or Pearl Ware—every week—every month of the year.

And profit with rapid turnovers several times a year is what retailers want.

A few Reminders

Diamond and Pearl Ware are being advertised in over 700 of Canada's finest newspapers, magazines and farm journals.

A substantial reduction of 20% on Diamond and Pearl Ware went into effect at the beginning of the year.

Free Cuts

Our set of free cuts is at the disposal of any SMP dealer who cares to use them.

Free price tags are yours for the asking. Also attractive window and counter cards.

Watch "Hardware & Metal" and in a short time you'll read about other splendid helps we are preparing for dealers handling Diamond or Pearl Ware.

Get in touch with your nearest or favorite jobber, corral our traveler when he is next in your vicinity, or write direct to our nearest branch.

If you haven't hooked up to our big drive for Diamond Ware and Pearl Ware you are running your house furnishing business on precedent rather than for profit.

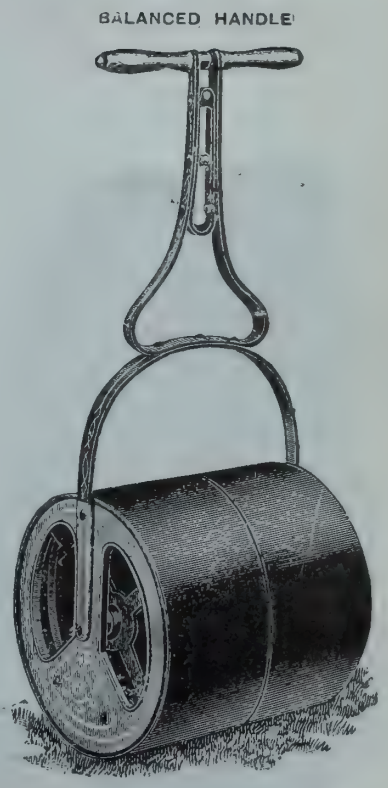
Seasonable Suggestions for Making More Spring and Summer Sales

COMFORT and convenience go hand in hand in making a distinct appeal to your customers, particularly during the Spring and Summer seasons. The wise dealer in towns served by electricity will make a bid for the local electrical appliance trade. **The New Hotpoint Reversible Toaster** will make a decided hit. We can supply you with appliances of all kinds: grills, fans, percolators, irons, toasters, vacuum cleaners, etc.

Don't overlook your Spring house-cleaning stocks. You will be afforded many opportunities to develop business among the housewives. Be sure to carry a good stock of floor waxes, stove, brass and furniture polishes, mops, etc. We have a large range from which to choose. In waxes there are Excello (our own brand), Johnsons, C. & B., Old English, and Linolio. O-Cedar, Liquid Veneer, Red Cross, Glo and Nonolio in furniture polish, Brasso, Putz Cream and Bon Ton for brass and metal. Non-Such Stove Polish and Martin Senour Stove Pipe Enamel, also O-Cedar and Liquid Veneer Mops.



Spring always has its effect on the garden and lawn enthusiast and now is the time to sort up your stocks of lawn and garden tools. We carry complete stocks of lawn rollers, sprinklers, grass clippers, lawn mowers, etc.

The Large Modern Plant of the C. S. G. Co.

1922 Holds Great

CORRUGATED HINGES
No. Sc. 935. 5-inch Strap Hinges

The trade press, the optimism expressed at various conventions throughout the Dominion, the speeches of noted economists, and many other trustworthy indications, forecast a normal, stable condition of good business for the hardware market in 1922. Not only this, but convincing facts have been put forward to show that it is a year which will handsomely reward the effort invested. Commercial men may be expected to reap a profitable harvest pretty much in proportion to the way they sow. It is, therefore, a time for planning ahead, for selecting the stocks of established goods that are readily accepted and sell with the most economical use of your time. C. S. G. products have already proved themselves in this regard. In handling them you have a tried and trusted support.

Canada Steel Goods

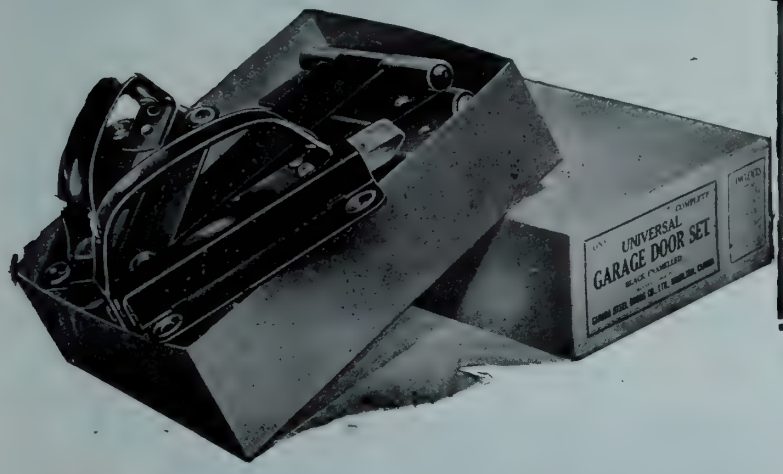
Hamilton

The Universal Garage Door Set

Handsome, useful sets that add to the appearance of any garage and give service in use that delights customers and assures you their continued trade. Packed to reduce selling cost by saving selling time in the handling.

3—Pair 8-inch Extra Heavy Tee Hinges.
1—No. 1056 x 6-inch Wrought Steel Chain Bolt.
1—No. 1056 x 6-inch Wrought Steel Foot Bolt.
1—No. 1240 Wrought Steel Door Latch.

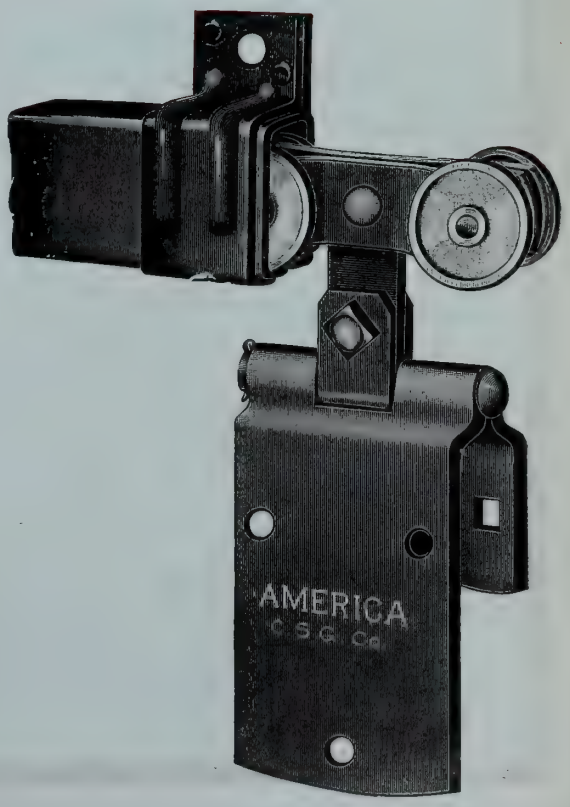
This handsome, easily sold set weighs 10 lbs., and is packed 6 sets to a case. Ask for prices.



Promise for Hardware

The merchant who stocks, displays and sells the dependable, salable products of the Canada Steel Goods Company, Limited, will be sowing good seed in fertile ground. Take Garage Door Sets, for instance: Prominent men in the motor car industry are showing that, although the public believed that the market was overstocked with motor cars, there is actually on hand only a supply about equal to one month's production. As to Hangers and Builders' Hardware: City architects report an increase in the issue of building permits, and in the larger representative Canadian cities the building contemplated exceeds previous years.

1922 is going to be a good year for hardware—suppose you write us for prices and information about your needs.



Company, Limited

Canada

CANADA

RITEWAY

Packed in three, four and five door sets. One set packed complete in box with all necessary parts and screws — ready for erecting.

THE average car owner is entirely at a loss to know what to specify when it comes to ordering fittings for his garage door. He is ready to take the advice of the dealer who can show him a really good garage door. Don't try to sell a careful car owner a garage door set that will not give him efficient service for years. He would be disappointed with a door that is easily wind-swung. The Riteway Garage Door Sets are manufactured to give satisfaction to the most exacting owner. He is the man whose account you are careful to keep.

N. Slater Co.

Hamilton,

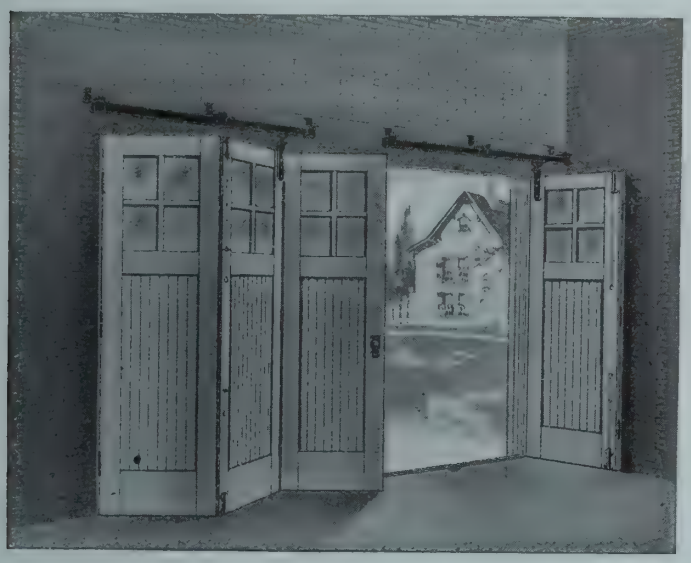
Representatives

N. J. Dineen, Winnipeg
A. T. Chambers Vancouver

BUILDS IN 1922

DOOR SETS

The three-door set covers an opening of nine feet, and the five-door set will cover a fifteen-foot doorway. Convenient for you to handle, and convenient for the car-owner. The doors slide perfectly clear of the opening. The wind can't blow them shut.



Your car-owning customer is a larger buyer than the man who does not own one. His income permits of larger purchases. Be ready to advise him concerning the right way to complete the garage he is building this year. There is only one right way—that is to hang his doors on a Riteway Garage Door Set. Undoubtedly there are going to be many calls for your advice this season — for a great deal of building will be done in 1922. Always carry a set in stock to show the man who wants to know.

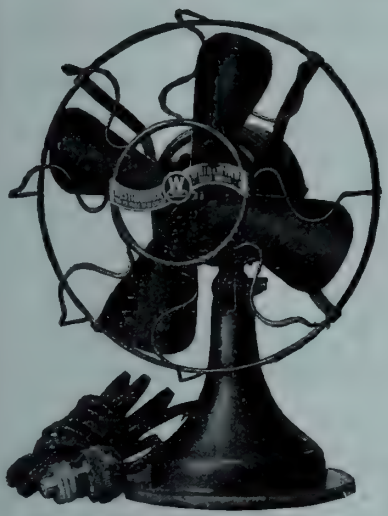
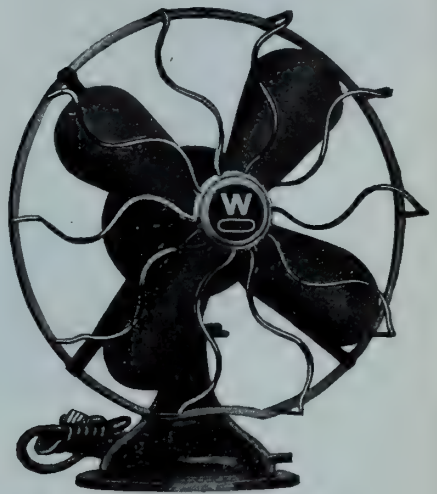
Westinghouse

1922 Electric Fans

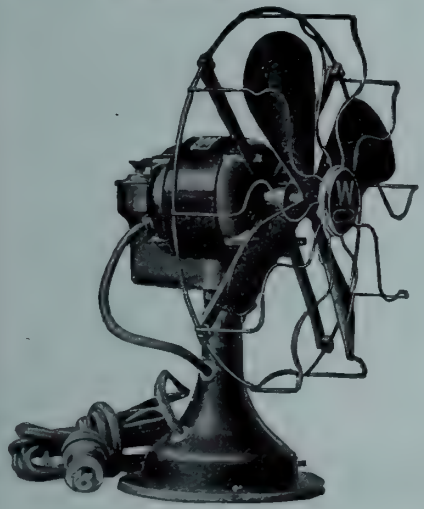


8-inch "Whirlwind" Fan

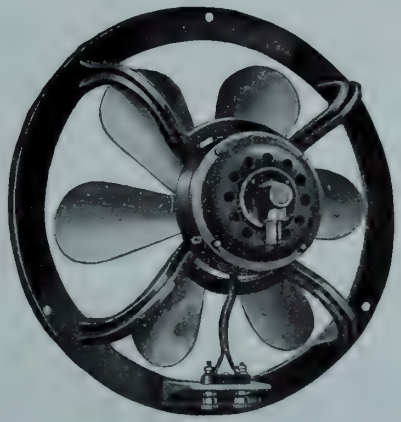
Gyrating Fan



12-inch Desk and Bracket Fan



10-inch Oscillating Fan



12-inch Exhaust Fan

16-inch Desk and Bracket Fan

Westinghouse 1922 fans are designed to meet the demands of the most critical buyer.

The motor is made of the very best materials obtainable. The entire oiling system is automatic, and so arranged that no oil or grease can drip on the furniture. The felt base prevents scratching polished surfaces.

The attractive velvety-black finish of Westinghouse Fans is very practical. It allows the washing of the blades with ordinary soap and water. Shiny brass blades soon become tarnished after washing.

The Westinghouse line of fans is complete:

8-inch "Whirlwind" Desk and Bracket Fans.

10, 12 and 16-inch Oscillating and Non-Oscillating Desk and Bracket Fans.

Gyrating Fans, 56-inch Ceiling Fans, Floor and Counter Column Fans.

12 and 16-inch Exhaust Fans, etc., etc.

ANNOUNCING

A National Advertising Campaign on WISS Shears and Scissors

More than 7,000,000 newspaper readers in United States and Canada will see this general publicity. They will learn why it pays to buy WISS Shears and Scissors—and why to avoid the bargain counter variety.

To give satisfaction, a shear should have smooth adjustment—cutting edges perfectly tempered—blades double-forged and scientifically ground—accurate, large size watch screws. It should be tested and inspected thoroughly at the factory, and should bear the stamp and *guarantee* of a reputable manufacturer.

We are going to explain these points to the public, and suggest that retail dealers tie up to this campaign in the following ways, in order to obtain the greatest benefits.

1. Carry a good assortment of Wiss goods—particularly patterns advertised.
2. Show goods in wall cases or plush counter trays—and display suitable advertising signs in your cutlery department.
3. Set up a Wiss window trim and remind customers you have Wiss goods—also display posters reproducing actual ads.
4. Feature Wiss cutlery in your own advertising.

For information concerning this campaign, Display Cases, Plush Counter Trays, Window Trims, Signs, Newspaper Electros, etc., write to Advertising Department,

The Story of Rope—

The most interesting industrial film ever made, that's what many have said about the "Story of Rope."

Native scenes in the Philippine Jungles, the growing plants, their transformation into fiber, the making of rope and of binder twine.

You are carried from the tropics through the interior of great factories and to the Canadian wheat fields by this intensely interesting film, now available in regular standard or theater prints for circulation in Canada.

Jobbers and dealers may secure the use of this film free for their local picture theater, salesmen's conventions, customers' get-togethers. Footage 3000 feet; program 1 hour.

Ask the Independent Cordage Company,
Toronto, Ontario, for folder showing how
this film is being used elsewhere.

This Display of Kraeuter Pliers Brings Tool Business Into Your Store.

Very often, customers for pliers and nippers do not know the name of the tool they need. Neither are they able to describe it so the clerk behind the counter understands. But it is a simple matter for such customers to select from a display case *just what they want.*

In addition, they often see patterns and styles of pliers they never knew were obtainable.

Men like to deal where the best tools are sold; and if you exhibit these beautifully made Kraeuter Pliers, you are certain to attract the business of men who know and use good tools.

For list of goods in display case and additional information, write for booklet 270.

Every Home has Leaky Utensils

There is a Constant Market

Mendets are a good thing to have in the store—because they don't stay long. It is a fact that they have sold by the millions of boxes; there is a constant, large demand for them. They cost little, take little space in your store, and do not use it long.

The profit is excellent.

This Heinisch Shear and Scissor Display Has Proved It's Value to Many Dealers

By the law of averages, the more persons who see this display of Heinisch Cutlery, the more goods will be sold.

Customers cannot remain unimpressed by the excellent workmanship and perfect finish of Heinisch shears and scissors. They are attracted toward the display case whether they think they need shears or not—and once they are *interested,* the chances are ten-to-one a sale will be made.

A complete line of all staple numbers is on view, and customers have no difficulty in choosing just the scissor or shear they need. Your clerks save time in making sales, and you can show a well assorted line with the minimum investment of capital.

For list of goods, prices, etc., write for Booklet 154.

The World's Most Famous Dry Batteries

Columbias are in use everywhere—ringing doorbells and buzzers, providing ignition for gas engines and tractors, for ignition on Fords when starting, operating burglar alarms, summoning the porter on Pullman cars, for dry battery lighting in closet, cellar, barn and outbuildings.

Columbia Dry Batteries are better for every purpose. More power and longer life are built into Columbias to give the most service to the user. Dealers who handle the better class of merchandise always sell Columbias because they are not only the best dry batteries made, but, persistent advertising for many years has created a popular demand which makes Columbias easy to sell and brings repeat sales.

Canadian National Carbon Co., Limited

YOU CAN ALWAYS DEPEND on an EVEREADY Flashlight

Eveready's light snaps on with a push of your thumb. It takes the terror out of darkness. Lights up treacherous places and makes night travelling safe. Finds keyholes or things dropped on the floor. For outdoors or indoors, whenever a temporary light is needed, Eveready supplies the need with the safest, most convenient and dependable portable light ever made.

Use an Eveready yourself at home and in your store. It will reveal to you many uses that you can suggest to our customers. Suggestions lead to sales—sales bring profits—and profits build up your business.

Eveready Flashlights and Batteries are sold only through the Wholesale trade. Ask your Wholesaler about Eveready Flashlights—the fastest selling Flashlight on the market, because it is not only the best but it is the only Flashlight which is nationally advertised year after year.

CANADIAN NATIONAL CARBON CO.

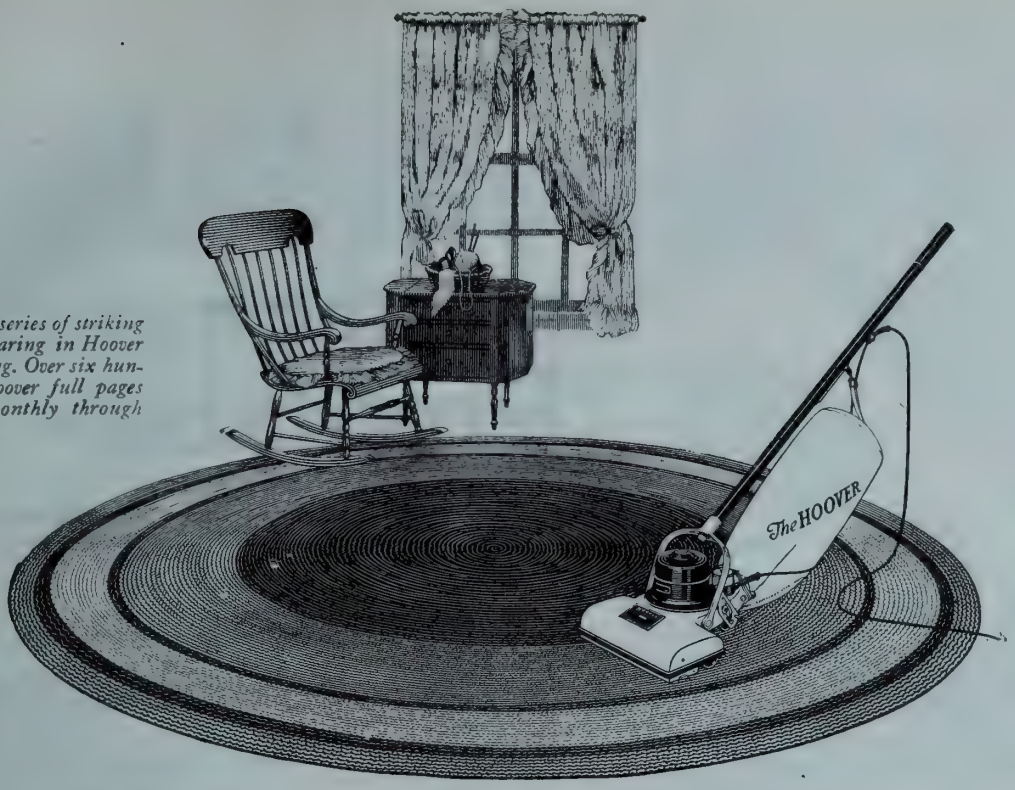
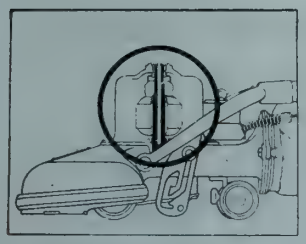
EVEREADY FLASHLIGHTS

—For Safety's Sake

This is one of the series of striking illustrations appearing in Hoover national advertising. Over six hundred thousand Hoover full pages are circulated monthly through leading magazines



We *Guarantee* the Sale of Hoovers on Our Co-operative Plan



Lubrication Made Simple and Safe

(Another Patented Hoover Feature)

COMPLICATED methods of lubrication on electric cleaners cause many troubles. Grease-cups puzzle women and are "messy" to use. Hidden oil-cups are usually neglected. The Hoover is therefore designed to be oiled in only one place, located for convenience and as a reminder, right on top of the motor. Three drops of oil from an oil-can are sufficient for an ordinary week's use. Any excess of oil that may be given drains off into the dust chamber instead of getting on the commutator to cause pitting, of sticking on the carbon brushes to cause sparking, or of soaking the electrical windings to cause shorting. This invention protects Hoover users from troubles occasioned by improper lubrication. Covered by a Hoover patent. Eighteen other patents protect the salient features of electric cleaner construction. Still other applications for patents are pending.

We do not ask the Authorized Hoover Dealer, who accepts our famous Co-operative Plan, to order a large stock of Hoovers.

On the contrary, we endeavor to restrict his first order—as well as the subsequent orders—to a month's supply. For we are strong advocates of the monthly stock turnover idea. We do all in our power to enable our dealers to make *twelve profits a year* on Hoovers.

Furthermore, we relieve the dealer of risk by unequivocally guaranteeing to sell his Hoovers for him.

We agree to secure leads, demonstrate, sell, deliver and service Hoovers for him. All we ask in return is a small space in his store for a demonstration booth, and his hearty co-operation.

He receives the benefit of our years of experience in selling Hoovers for other merchants. We use the same methods, in his store and community, that we are successfully using in so many cities and towns.

Now is an Excellent Time to Become an Authorized Hoover Dealer

While Hoovers are year around sellers, the Spring Housecleaning period always brings many additional prospects into the market.

So you could not ask for a more favorable time to join forces with us.

Send immediately for a Hoover representative!

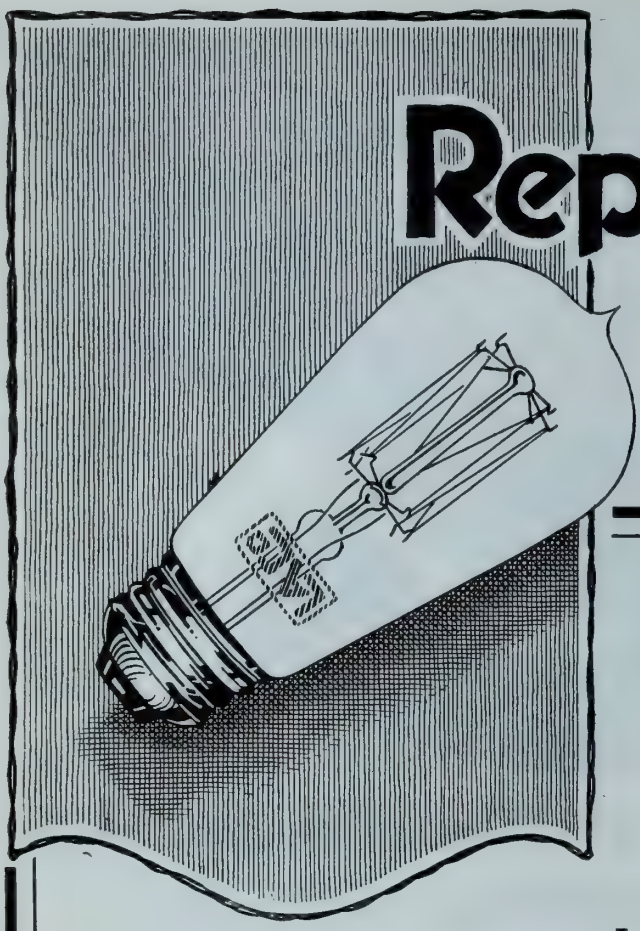
Repeat Sales are the most Profitable—



BECAUSE they cost least in selling-energy—and they sell **other goods** as well.

But repeat sales come only with the **first** sale of **Quality** goods.

Laco Lamp customers are the Store's Customers—because they have bought a first rate article, that gives **better satisfaction** at **lower cost**—from a man **they have proved** "knows his business."

It **pays** to handle this business— and it pays **best** to sell a **Quality** lamp. **Sell**

LACO **LAMPS**

and make your store headquarters for lighting efficiency in your district.

Be a Lighting Expert

and Build **Repeat** Lamp Sales.

It pays to be a **Lighting Specialist.**

With the co-operation of Laco Engineers it is easy for the Dealer to give a specialized service and expert advice for the lighting of any building or any purpose—and this co-operation is at the call of Laco Dealers any time, any place.

Specialize—be an expert lighting man—Sell Laco Lamps!

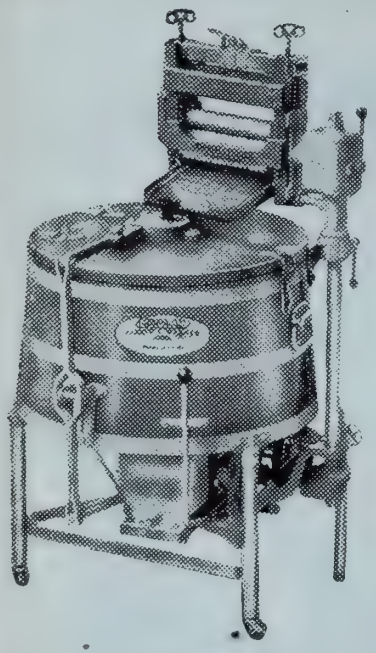
Maxwell Products

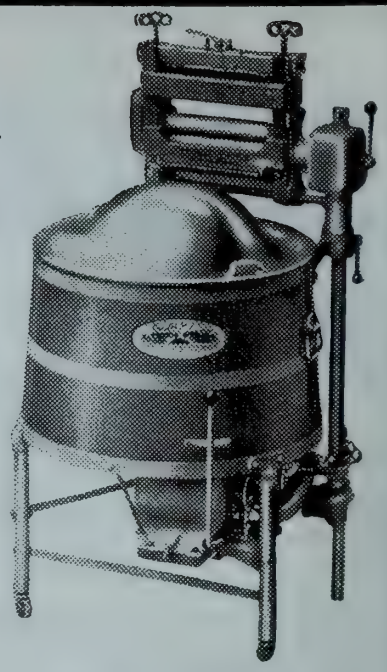
The Standard of Value and Economy in Farm and Home Utensils

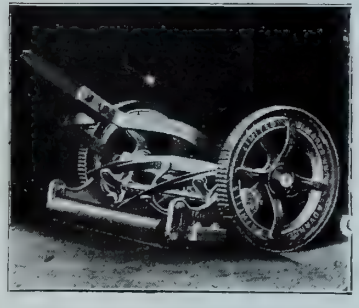


Maxwell Lawn Mowers sell by merit. Obtainable both plain and ball-bearing, with 4 or 5 best quality steel knives and cutting plate. Handsomely finished in colors and aluminum.

The "Minimax" is the newest dolly type Electric Washer and Wringer. It combines all the advanced features of a high-priced machine, but sells at a moderate cost.

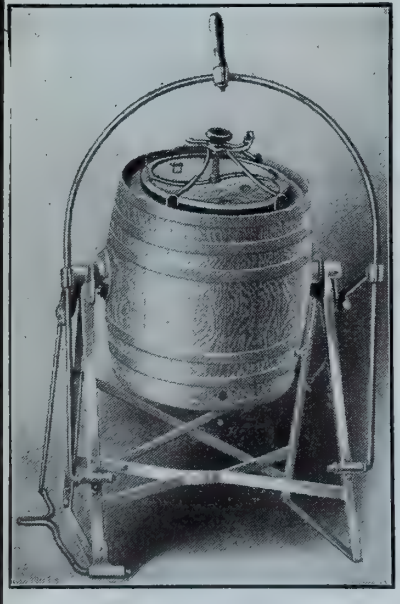
The "Mono-Vac" Electric Washer and Wringer operates on the vacuum system. No effort has been spared in its manufacture to produce a perfect-running and handsome machine.





Maxwell's H & P (Hand and Power) Washer is a light-running machine with cut gears giving minimum of noise and vibration. Designed especially for purchasers who may later on desire to use engine power.

The "Home 65" Food Chopper is an invaluable asset to kitchen equipment. It has four sharp cutting plates, is watertight, and so constructed as to be easily cleaned after use. Made in two sizes, family size and medium.



The "Favorite" Bow Lever Churn is a late improved model. The barrel is of golden-finish oak, with bronze hoops and the frame is of aluminum. Large roller-bearings, smooth action and durable. The adjustable handle provides for left or right-hand operation.

The "Imperial" Clothes Wringer is one of Maxwell's several excellent types. Has covered gears, ball bearings and improved clamp to fit any tub.

HOTPOINT

Women demand guaranteed merchandise. The enviable reputation that all Hotpoint appliances enjoy, enables you to sell them to your most fastidious customers, and to realize, that you are selling merchandise beyond reproach.

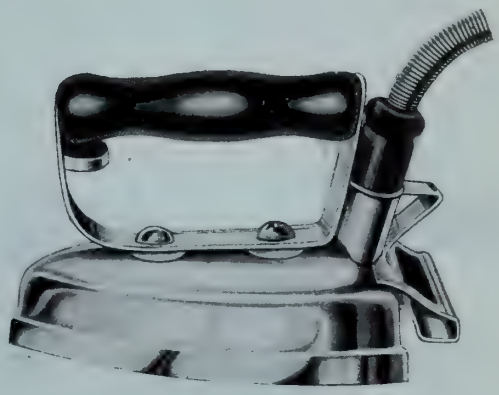
The New Hotpoint Reversible Toaster

Every electrical appliance of the famous Hotpoint line, possesses exclusive features, that enhances its value as a necessary appointment for the modern home.

The latest addition to the line is the new Hotpoint Reversible Toaster. The bread is turned on this device without handling, kept hot, and toasted evenly. Two slices of bread may be toasted at the same time.

The Hotpoint Iron

You have, no doubt, sold in the past, hundreds of irons, and consider additional sales a very commonplace occurrence, but stop a minute, and give a thought to the woman who is purchasing her first electric iron, that iron will be an advertisement for your store. Is it to be a good or bad advertisement? Take no chances, sell her a Hotpoint Iron, the iron with the thumb rest.



To create prestige for your store, sell Hotpoint Electrical Goods.

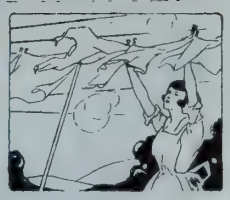
SunnySuds
SUNNYSUDS

Sunnysuds
Electric Washer & Wringer



How Many Families Have Waited Just for This?

How often have people come into your store—sold on an electric washer and wanting one—but unwilling to pay the price that even the best manufacturers were compelled to ask? Those were sales that price prevented.

Not only for these people was the Sunnysuds designed. It was designed for any home that needs a standard size, all metal washer. But it retails for $150.00.

Don't trust your imagination for the details of the Sunnysuds. Nothing essential has been omitted; no part has been "shaved." The cabinet is built of pressed steel, folded and braced to insure absolute rigidity. The six sheet tub is corrugated copper with sediment zone and copper baffle plates. The 4-position reversible wringer is aluminum.

A large number of department stores, appliance dealers, household shops, etc., read the foregoing Sunnysuds advertisements. They sent for literature and ordered samples, unwilling to believe that a satisfactory family size, all metal washer could be made to sell for $150.00. All of them were convinced; many made application for territory; some are now Sunnysuds dealers—and making money! Write for complete information.

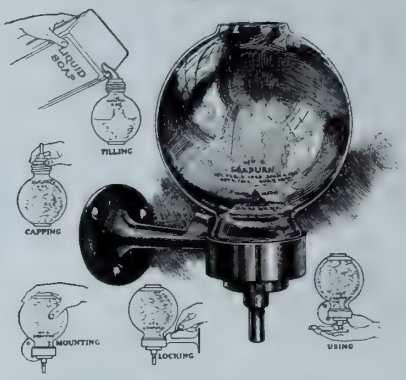
Nail Pullers

Liquid Soap Dispensers



Saw Sets

Up To The Minute

SAWSETS—The No. 1, for hand, band, butcher and fret saws not over 16 gauge, has a sliding anvil, and is designed for the person who wishes to use his own judgment in setting a saw. In the hands of an expert, it cannot be excelled.

The "Special," for the same saws as the No. 1, has a fully indexed, rotatable anvil and can be used with perfect results by anyone, no experience required.

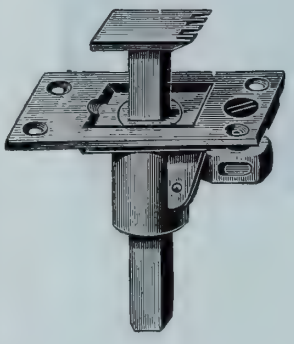
The No. 3 is for cross-cut and circular saws, 14 to 20 gauge.

The No. 4 is for "Champion," "M" and other double-toothed saws, 14 to 20 gauge.

The No. 5 is for timber and board saws, 6 to 14 gauge.

BENCH STOPS—The No. 1 has the unique record of never having had a complaint made against it during the forty years it has been on the market. Strong, durable, quick acting, we would improve it if possible but have never been able to.

Bench Stops



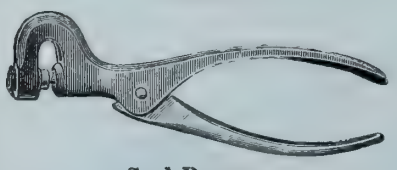
NAIL PULLERS—This is a whale of a seller. We have heard of cheaper ones but never of a better. The shank has a handle and hand guard which prevent injury to the hand. The foot has a double bearing between which is mounted the shank jaw. The double bearing or box joint keeps the jaws from ever spreading. No springs to rust and break. The scientifically designed foot and straight arm pull enable a nail to be drawn out straight with half the effort needed by any other puller. We have found that once a user, always a user, because it is so superior.

PUNCHES—The No. 1 is used to punch out round holes 1/16 to ¼ inch in paper, leather, fibre, very thin sheet metal and other similar materials.

The "Hercules" will punch a ¼-inch hole through No. 18 sheet iron or its equivalent; made in sizes 1/16 to ⅜ inch, inclusive. Used largely by automobile manufacturers and repairers, and by sheet metal workers.

SEAL PRESSES—These are used to impress lead seals by shippers of sealed merchandise, such as dairies, railroads, express companies, etc., and by electrical, gas, meat inspectors, etc., who attach a stamped lead seal to the article inspected. While this is not an article generally handled by hardware men, you will be surprised how much business there is in seal presses just waiting to be picked up. Made in two sizes, No. 1 and "Pocket."

Punches



Seal Presses

SOAPURNS—We make a line of liquid soap dispensers for public and private use and also dispensing valves for a liquid soap system particularly adapted to hotel and factory use. This system consists of a tank, piping, fittings and dispensing valves.

The No. 4, illustrated, is our latest Soapurn and we believe the best dispenser upon the market.

It will pay you to keep Soapurns in mind for they are going to be one of your big sellers some day.

Clean Floors - Clean Goods

You can't have one without the other. Imperial Floor Dressing keeps both clean at all times. It holds the dust to the floor, where it is easily swept up and removed without any of it rising and settling on your goods, your counters or your display shelves.

Imperial Floor Dressing will not gum or evaporate. It prevents cracking and checking, and is a sanitary, efficient preservative of wood, linoleum or oil cloth. One gallon will treat about 700 square feet of floor surface and one application will last for weeks.

Stores, where the floors are treated with Imperial Floor Dressing, always present the spick and span appearance that attracts discriminating customers. Use it and display it. There is a large, profitable market in your territory. Our salesman will be glad to tell you about it.

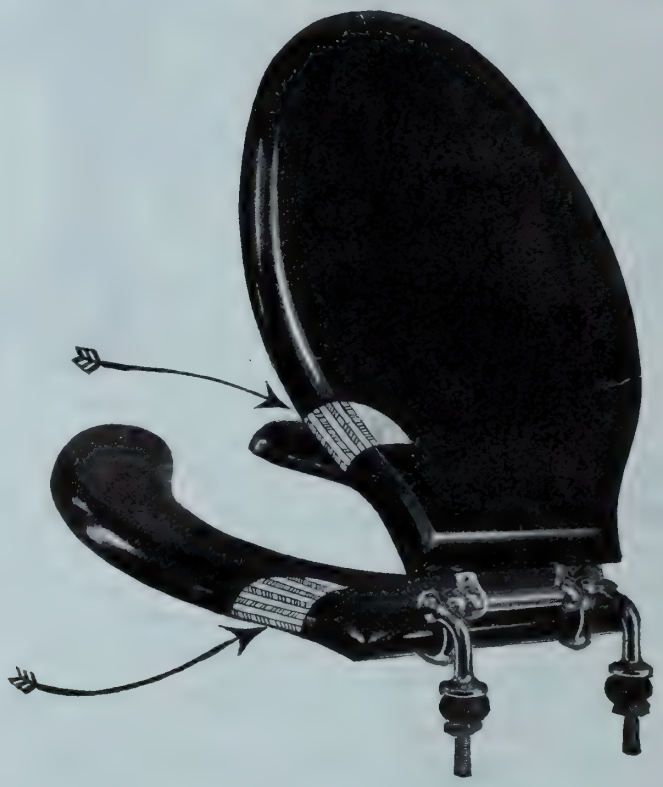
Canadian Veneer Products

Three Ply Veneer Chair Seats. The corners of these reliable seats are rounded; the edges smoothed, sand-papered, and the whole finished with genuine, special, hard-drying seat varnish.



These desirable seats are made up entirely with waterproof cement; they cannot come apart even if exposed to the severest weather. We are the only makers using waterproof cement.

The Everlasting Veneer Toilet Seat

Air-seasoned wood veneer, in 7- and 11-plys, according to the amount of strain and wear required of its respective parts, makes this a substantial seat, unequalled for durability. The veneer is held together by means of our special wood-cement that is proof against extremes of heat, cold and dampness.

For cold, damp basements, schools, factories, or other public places where the closets are subjected to all manner of abuse or rough usage, it is specially recommended. Everlasting Veneer Toilet Seats will never crack, warp or split.

A Message To Every Hardware Merchant

"Merchants are not taking chances on buying any lines where there is an element of doubt as to the standing or reliability of the manufacturer or the product."

This statement, taken from a recent article by Hardware and Metal, should be seriously considered by every hardware dealer. Now that you are filling in your stocks for spring and summer business, "Whose line will I stock?" is the vital question.

Other things being equal, you will invariably make a quicker turnover if your goods are well known, because the buying public has learned to place their confidence in well-advertised, trade-marked goods, in preference to unknown, unmarked merchandise.

The House of Disston has an enviable reputation among the vast army of hand saw users. "When you think of saws, you think of Disston," is not an idle boast—our enormous sales have proven it a well-founded assertion. Disston saws sell themselves, and, what is more important, their reputation and prestige help sell the other items in the Disston line.

A recent happening well illustrates our point. At a leading hardware store on a Saturday evening a man came in and took 20 minutes of the dealer's time to buy a $2.00 article. The next customer came in and said briefly, "I want a Disston saw." The entire transaction in this instance occupied only 2 or 3 minutes of the proprietor's time. When the customer had left, the dealer turned to an observer and said, "I wish that my whole stock were Disstonized."

Now is the time to "Disstonize" **your** stock. It will not only mean more profits for you, but it will tend to increase the greatest asset of any business—the implicit confidence of your customers in the goods you sell; which means repeat orders.

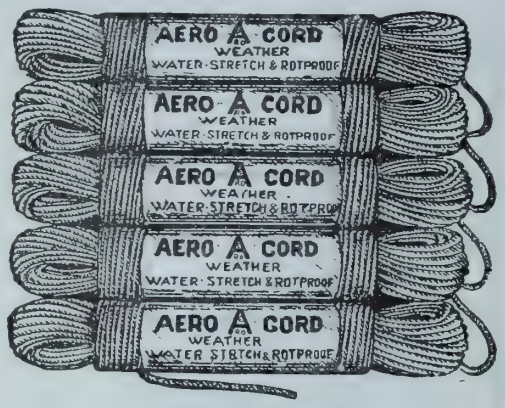
Aero



Sash Cord

Superior Cord

For Use Anywhere

Indoors or out, wherever a braided cordage is required, there you will find profitable sales for Aero Cord. Actual tests under severely trying conditions have proven it best.

Why? Because it excels in tensile strength, in durability, and satisfaction in use. Show your customers that it is the only weather-rot-and-stretch-proof cordage made.

Urge its use for sportsmen and camping parties this coming summer for tow lines, anchor cable, lashings, tent guys, etc.

No. 42—Asst. Little Wonder.

BRIDGEPORT

The Bridgeport Line comprises a very desirable combination of useful, saleable tools for hardware store sales.

The strong, well-designed, efficient nail-pullers, box and crate openers shown here are absolutely reliable, dependable tools that, in service to your customers, reflect credit on you and your business, resulting in permanent trade.

Take the No. 35 Assortment of Reliance Screw Drivers; it is a definite stimulant to sales. This fine driver is packed in a very attractive display rack containing the following drivers: Four 4-inch, four 5-inch and four 6-inch. The rack as shown above is substantially made of hardwood in mission oak finish, with attractive white, violet and gold labels. Displayed in this way they sell " on sight."

The Bridgeport Hardware Mfg. Corporation

Bridgeport, Conn., U.S.A.

20th CENTURY HAMMER and BOX OPENER

An exceptionally handy tool costing no more than a good ordinary hammer. Head won't loosen and handle won't break. Pulls nails straight up. Notice construction. Fine for all "odd jobs."

WAYAGAMACK PURE KRAFT

GLAZED **UNGLAZED**

FINE STRIPE - PLAIN - BROADSTRIPE

According to the old adage,

"A PENNY SAVED IS A PENNY GAINED"

If users of wrapping paper and paper bags always insist on being supplied with

WAYAGAMACK PURE KRAFT

many dollars a year can be saved, for the simple reason that it gives fifty per cent. more service than wrapping papers of an inferior grade and consequently costs less.

Any paper wholesaler will prove the truth of this statement by a practical demonstration. It is unrivalled as a paper for the manufacture of envelopes, notion bags and paper containers of all descriptions. Wayagamack Pure Kraft which means

Strength and Security

can be obtained from all paper wholesalers from Halifax to Vancouver.

BROWN & SHARPE MACHINISTS' TOOLS

Their superiority is known by mechanics the world over—that's why they mean prestige, profit and satisfied customers to the dealer.

B·S
TRADE MARK

A Characteristic of Brown & Sharpe Tools is their High Standard of Quality. It is this recognized excellence that gives the dealers who sell them prestige and satisfied customers — customers whose appreciation of the satisfactory service of these fine tools shows itself in the faith in the store where the tools were bought. It unconsciously persuades them to buy other goods there.

We protect the dealer

In Every Home there is a "Neglected Inch"

IN nearly every room in every home there is a "Neglected Inch" to be filled at a profit to you—that dangerous troublesome inch—the inch between the furniture and the floor. Leave it unfilled or fill it with the wrong kind of casters and what's the result? Torn rugs, marred floors and rickety furniture.

Your community is seeking the right casters for their floors and floor coverings. Can you answer their demand?

The Bassick Company has selected fourteen casters to meet the needs of every household, packaged in a new and distinctive box, nationally advertised and properly priced. These casters are made with Feltoid Wheels that will not mar hardwood floors and brass wheels that protect floor coverings—both in sizes to fit any piece of furniture from the light parlor table to the heavy dining room buffet. Here is a line which, because of its rapid turnover, assures large profits for an initial investment of a few dollars.

If you have not already stocked Bassick Casters get in touch with your jobber or write us for detailed information and the name of our nearest distributor.

STANLEY

Wrought Hardware and

IN A RECENT editorial in this publication the following statement merits consideration:

"Hardware merchants have numerous problems on their hands to-day, such for instance as policies to be followed on a declining market in order to secure maximum business with minimum risk. ...."

(SOLVING TRADE PROBLEMS, February 11, Issue.)

The intelligent merchandising of Stanley Wrought Hardware and Stanley Carpenters' Tools is a big step in the right direction.

Throughout the greater part of a century, Stanley products have been consistently growing in favor among architects, builders, skilled mechanics, master carpenters and the general public in every civilized country throughout the world. Their popularity is based upon Quality, Satisfaction, Results.

ARMCO
TRADE MARK

INGOT IRON
Resists Rust

MADE FROM TRADE MARK ARMCO REG. U.S. PAT. OFF. RESISTS RUST INGOT IRON

Look for this blue and gold label on Washing Machines, Refrigerators, Stoves, Enameled Table tops, and other household utilities.

There is a Type of Store Where Armco Products Are Sold

The man or woman who buys a refrigerator, a stove, or a washing machine made with "Armco" Ingot Iron is of a certain type.

The manufacturer who puts "Armco" Ingot Iron in his product must make a worthy article —must be a certain type of man —or he would use ordinary metal.

Even the merchant, the dealer who sells Armco products, can be classified generally by that very fact, for we know of no poor article made from this iron.

Therefore, the blue and gold Armco triangle carries with it an assurance of quality, of solid worth, wherever it is found.

Prices Reduced Making "Better Business" for Canada

Spring 1922 retail prices for the United States have been announced. We are reducing our spring 1922 Canadian prices to practically the same low figure—the first time in the history of our business that new Canadian and new United States prices have been so nearly on the same low level.

This clean-cut reduction in our prices is our contribution to "Better Business for Canada,"—our slogan.

SOME OF THE NEW PRICES ARE:

6 Tea Spoons	1.75
6 Soup Spoons	3.90
6 Table Spoons	3.50
6 Salad Forks, Individual	5.15
6 Butter Spreaders	4.60
6 Ice Tea Spoons	3.50
Butter Knives, each	.80
Sugar Shells, each	.70
Flat Server, each	2.15
Cold Meat Fork, large, each	1.30
Gravy Ladle, large, each	1.60
6 Medium Knives, Hollow Handle	$10.50
6 Medium Forks	3.50

Our eavetrough is always straight and uniform. It is easy to fit in the job, thus saving time and money. It is made in 8 and 10 foot lengths, with either a square or round bead. We also make curved trough.

We were the first to introduce the round corrugated conductor pipe in Canada and the immense quantity of it used today shows that we set up a high standard. It is made in 8 and 10 foot lengths, with an absolutely tight straight seam, no cracks to solder, and each length is reduced at one end, ensuring an easy fit. Elbows and shoes to match.

The square corrugated pipe shown at the bottom of this page is the handsomest on the market and each building fitted with it becomes a silent salesman, bringing fresh orders from its neighborhood. The sizes are 2⅜ x 3¼ inch and 2¾ x 4¼ inch, and they equal 3 and 4 inches round. Elbows to match, style A and style B.

Our corrugated galvanized iron is made from good evenly coated galvanized sheets and being pressed one corrugation at a time, instead of being rolled, will be found to be perfectly square and will line up uniformly straight, thus ensuring the perfect fitting of laps at ends and sides of sheets.

Rotary Ventilators use wind as a motive power, the whirling head creating a suction impossible in stationary ventilators. Storm proof—no snow or rain can enter.

We carry a large stock of galvanized and black sheets, tin plate, Canada plates, conductor hooks and solder, etc.

We ship while others are thinking about it.

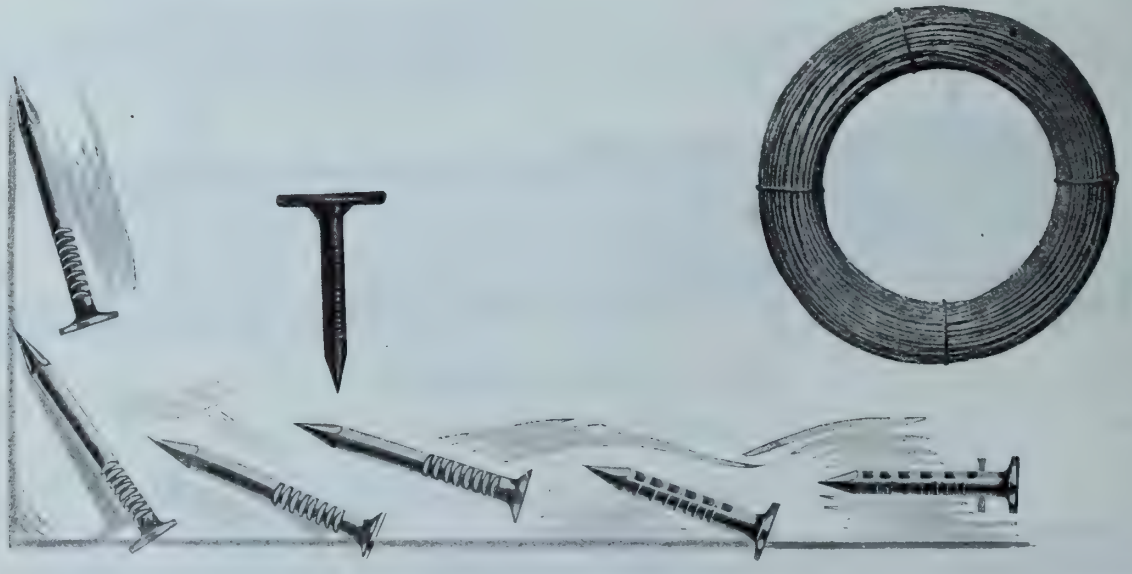
DOMSTEEL WIRE PRODUCTS

Domsteel Wire Products are better because we control every step in the manufacture. A great deal of value to the merchant lies behind our slogan, "From Ore to Finished Product."

This careful manufacturing means perfect goods for the merchant to sell, confident that they will satisfy customers.

Our nails, for instance: Straight, uniform nails of every pattern are made by an organization which has produced two million tons of railroad rails for service under Canada's rigorous climatic conditions and severe transportation requirements.

We manufacture "Domsteel" Felt Roofing Nails and the celebrated Pender Coated Box Nails. Pender Nails have been hailed by box makers for years as the best coated box nail made.



If interested tear out this page and place with letters to be answered.

Domsteel Barb Wire is made in two and four point patterns; sharp, clean-cut and repellant; the wire used is of high-breaking strain; it is made from heavily zinc-coated wire, galvanized by the "hot-dip" process; the barbs are firmly secured, absolutely immovable, and evenly spaced.

This wire, manufactured by Canadians in Canada, is made to withstand the severe requirements of Canada's climate, and will give entire satisfaction under the most rigorous conditions.

Immediate shipment from fresh stocks at Montreal, Sydney, St. John, Fort William and Port Arthur.

Orders for barb wire combined with "Domsteel" wire nails, given special attention.

ENAMELEDWARE

The CLEAN Ware

Of all the much-advertised kitchen wares **Enameledware** is by far the cleanest and cheapest in the end—and out of all makes of **Enameledware** the "DAVIDSON" line is probably the best known and certainly the most reliable.

The Davidson Trade Mark—"The Seal of Durability" is our own personal guarantee of quality, known throughout the trade and respected everywhere since 1860. At the present time there is an extensive advertising campaign running in Newspapers and Farm Journals from coast to coast and already there is a favorable response on the part of the public who, despite inferior attractions, has always recognized the superior utility of Enameledware as a household utensil.

The non-metallic acid stain-proof surface of **Enameledware**—resembling china in its texture—ensures greater cleanliness, less waste and absorbs and retains more heat than any other form of cooking utensil.

Hanson Suggestions For Spring

Hanson's Refrigerators have long since passed the experimental stage. They are now accepted as the acme of refrigeration production in Canada, and are being sold from coast to coast in the Dominion, and are winning recognition in foreign markets.

This splendid record has been founded on the actual merit of the materials and workmanship, which are features of every refrigerator leaving our factory.

There is absolutely no essential lacking which should be found in a modern refrigerator. The No. 207 Style, shown, is a one-piece, porcelain-lined, oak case; merely a sample of a line of refrigerators in interesting variety.

Hanson's Dominion Spring Clothes Pins are the kind that stay on the line.

The "Standard" and "Glass" brands of Washboards are up to the Hanson Standard in every way; strong, durable, and will not warp, split, splinter or fall apart.

We make a varied line of woodenware and invite inquiries at any time for special designs. Write today for quotations.

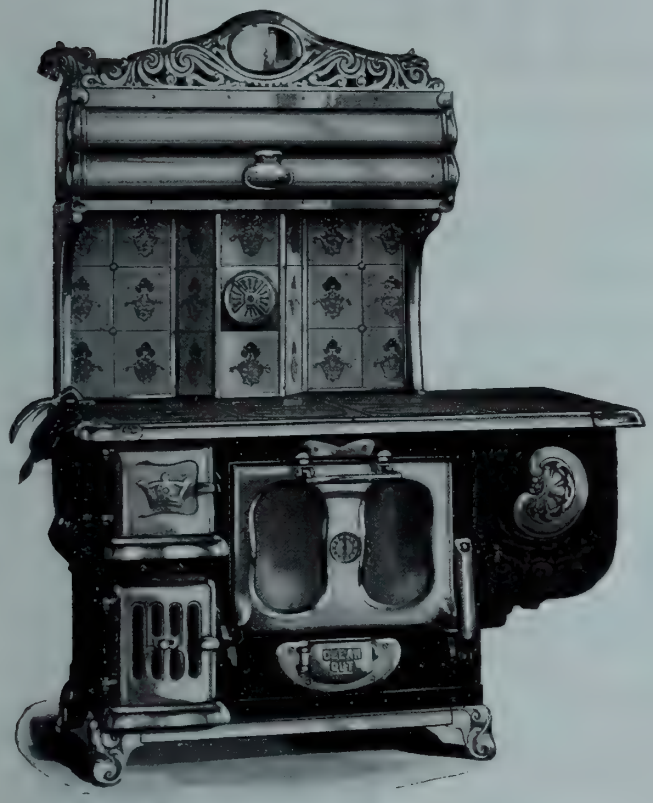
The Pride of the Kitchen

CORONA RANGES



THE "CORONA," as shown in the illustration, possesses every known feature that will lighten kitchen work.

The cast plates are smooth and of uniform thickness. They have the natural velvet finish of pure grey iron.

The design is severely plain, with just a touch of nickel here and there to bring out the strong graceful lines of the stove.

Only those things that are absolutely necessary to give goo service and actual value go into the "Corona" range.

A range that will bake well, be economical in the use of fuel, and last long cannot be made for less money.

THE OVEN:—The oven is 21"x21"x14", large and roomy; bakes quickly, evenly, and with the greatest economy of fuel. The bottom is made of 16-gauge steel and is at the same time strongly braced with heavy supports to prevent warping. Entire surface over top is covered with asbestos millboard.

OVEN DOOR—The oven door on every "Corona" when open, forms a large smooth shelf. The door is controlled by a counterbalanced heavy coil spring.

DUPLEX GRATES:—The duplex grates are different in shape and are built to last—being heavier. They can also be changed in a minute. The old-fashioned grates that slide out or in look good when new, but after they are used they get a little warped, and it is necessary to change them—then the trouble begins.

THE RESERVOIR:—The tanks are made of 14-ounce tinned copper, which will not rust, enclosed in cast-iron casing.

THE BROILER DOOR:—The Broiler Door, or Front Check Damper, can be adjusted readily as desired and remains exactly as it is placed. Can also be dropped down full. A most convenient place to make toast—and at the same time not in the way of the busy housewife.

FRONT SECTION:—The front section of the range can be raised from one to seven inches. Convenient for putting in fuel.

FIRE DOOR:—Large and roomy—8½ inches x 7½ inches.

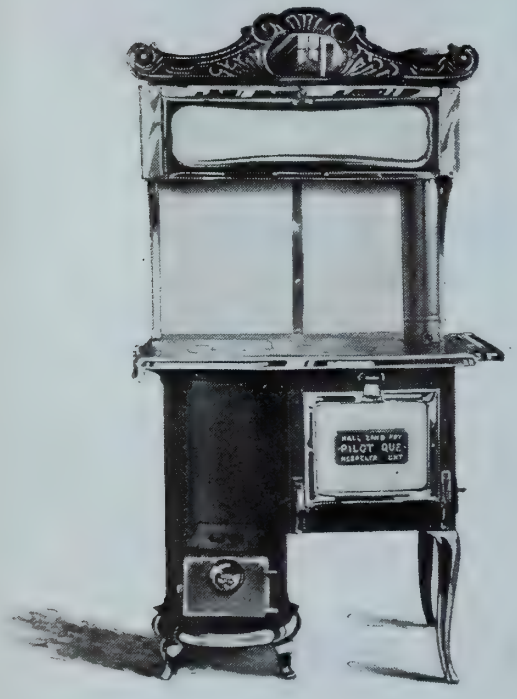
The Right Stoves

We show here some of this handsome line that brings business to the hardware merchant and satisfaction and delight to their customers.

Look over the illustrations: note the handsome, striking appearance of the Alerta. This is apparent to your customers at first glance and makes a favorable first impression that paves the way for you as you point out the various convincing selling points of this and other members of this good line; such as, the Pilot Gem and the Pilot Quebec.

Pilot Alerta

This is made in two sizes; 16" x 20" and 20" x 20" oven so that you can offer your customers a choice in size. It is also supplied with or without reservoir. From the illustration you can easily judge the beauty of this handsome range. Note the bright, attractive, nickel trimming, the white enamel and the mirror in the decorative top.



Pilot Quebec Heaters

Pilot Gem

This is the useful and desirable four-hole, steel, cook-stove No. 8 or No. 9. It has a 14 x 18 inch oven. The grate is the desirable Duplex type. The top is fitted with 8 and 9-inch covers. This splendid cooker is supplied with or without high shelf; and with or without reservoir. Notice the abundance of nice, white enamel and nickel trim—this certainly makes a good first impression.

Pilot Quebec Heater

This is a particularly nice looking Quebec Heater. Very attractive in trim, having considerable nickel and white enamel about it and a decorative top with a mirror. This has a strong appeal to your customers that want a nice-looking and extremely serviceable Quebec Heater with a fine oven that bakes and roasts to perfection.

Pilot Gem

Ranges and Furnaces to Sell PILOT

Pilot Superior Pipeless Furnace

This is undoubtedly the unequalled leader in the pipeless field. It is easy to convince your customers of the merits of the Pilot Superior. The best selling help you can have in selling the Pilot is to let your prospect talk to your last customer. They are always satisfied and ready to "boost" for you.

In the illustration, we have indicated with arrows some of the many convincing selling points that close the sales. The Anti-Clinker, Four-bar, Triangular Grate, to mention just one feature, is a matter of much interest to your prospects. This and many of the others will interest, convince, and bring most customers to the decision to buy.

Altogether, you will find the Pilot Superior a very gratifying pipeless furnace to sell, and a very satisfying furnace for your customers to buy.

Enterprise "MONARCH"

A handsome, reliable and efficient range; a source of pride, comfort and pleasure to any home; a source of good sales, good profits, satisfaction and good-will to any store.

MACDONALD COLLEGE
School of Household Science
Ste. Anne de Bellevue, Que.

The Enterprise Foundry Company,
Sackville, N. B.

Gentlemen:—

Thank you for the catalogue received today and your letter dated April 5th. We are not thinking of buying another Range just at present, but I wanted to have one of your catalogues on file for reference, and also to show it to our students in the Household Furnishing Classes.

I have used your Enterprise Monarch Ranges in several of our Colleges and have always found them most satisfactory. Therefore I have every confidence in recommending them to my students.

Yours very truly,
A. B. JUNIPER,
Dean of Household Science.

Every Enterprise product is honest and sincere all the way through. It has been truthfully said that a generation of comfort and economy is built into each one, whether furnace, stove, or range.

We make a large variety of stoves and ranges and both pipe and pipeless furnaces. We will gladly send literature—write for it now.

ENTERPRISE BLAZER PIPELESS FURNACE

A Remarkable Heating System

This successful Enterprise Pipeless Furnace has made good from the first. Everybody likes it and there are hosts of sales awaiting you at churches, stores, factories and large and small homes. The furnace is right and the profits are exceptionally attractive.

The patterns for two new lines of Enterprise Pipelesses are now being completed. Both will be of the ALL-CAST CONSTRUCTION. One line will sell at a price to equal or beat competition from any source—the other will be medium priced and unsurpassed for quality.

ENTERPRISE can therefore offer you the following unequalled lines of pipeless furnaces—a furnace to suit every purse and every condition.

ENTERPRISE BUNGALOW—very low priced.

ENTERPRISE ALL-CAST Series A—very low priced.

ENTERPRISE ALL-CAST Series B—medium priced.

ENTERPRISE BLAZER—medium priced.

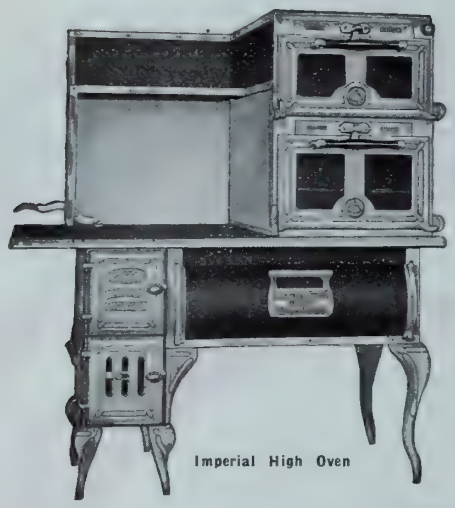
THE GURNEY FOUNDRY CO., Limited
TORONTO - CANADA
Montreal Winnipeg Vancouver



Imperial High Oven

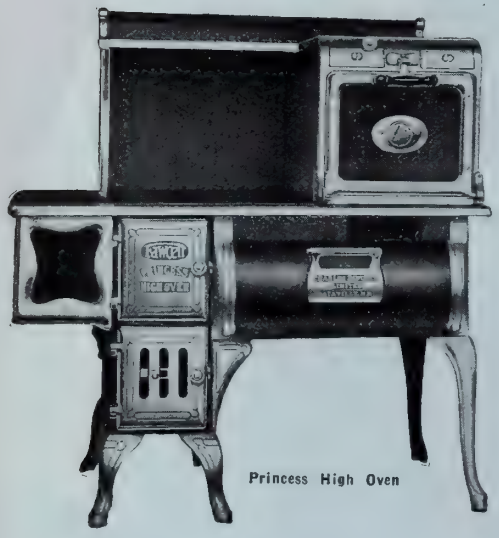
Splendid Steel Ranges

This means that the hardware merchant

Copper Bearing Steel

Imperial High Oven:

This exceptional stove has the sales advantage of two full 20-inch ovens that can both be used at once. The cooking surface can be fitted with either four 8-inch or four 9-inch holes. The fire box can be fitted to burn either coal or wood. A special feature of interest is the natural fire-travel—upward instead of being drawn down around the oven. In this, as in our other high ovens, your prospects are always interested in the elimination of stooping with its back-aches and other ills. The stove itself is made in one size only.



Princess High Oven

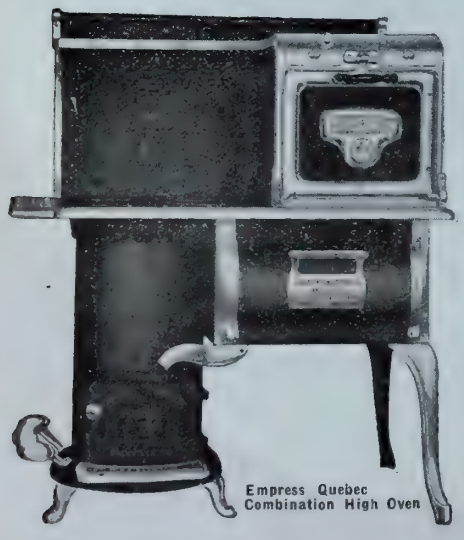
The Imperial, Princess, Victoria

Princess High Oven:

The Princess is a brand new line. In handling these you have an advantage, as nothing like them is offered by others. It offers, for the small family, all the advantages of a high oven range at the price of an ordinary small range. The fire box is fitted for wood or coal; the top can be fitted with either four 8-inch or four 9-inch covers. This attractive, new range is built in only one size with one 17-inch oven.

Fawcett Goods Have Been

We have warehouses at Winnipeg, Calgary,



Empress Quebec Combination High Oven

Empress Quebec Combination High Oven:

This is an interesting new improvement in the Quebec Two-in-One idea. We have put the oven up where you see it in the cut. This is a selling point of value to the merchant. You can point out this excellent 17-inch oven, at standing height. It eliminates stooping and is the logical place for the oven. Four 8-inch or four 9-inch holes are on the cooking top. It works wonderfully well and heats a small house easily as well as doing the cooking.

MANY OTHER STYLES

Ranges with uniform fire boxes have proved extremely popular with the hardware merchants. Copper bearing steel is new, but well tried and proven. The small amount of copper causes quick, even radiation of heat and resists the corrosive action of fire on the steel.

We have Dominion-wide distribution and every facility for prompt service to hardwaremen anywhere in Canada.

Charles Fawcett Ltd.

Sackville, N. B.

If interested tear out this page and place with letters to be answered

With Uniform Fire Box

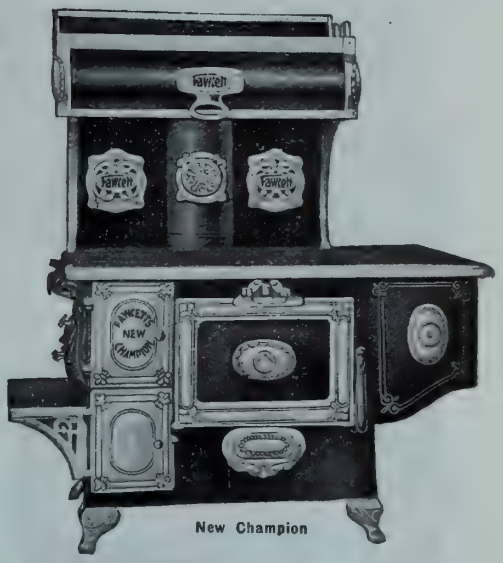
carries only one style of spare parts

Flux-o-tuf Castings

New Champion Range:

This is a steel range of the very highest grade. It is made with 18-inch or 20-inch oven. Either size can be fitted with 8- or 9-inch covers and the fire box fitted for coal or wood burning. The Champion is a heavy, exceptionally well-built range. The material is the best, and the whole range is built on a high-class basis to meet the most exacting requirements.

In selling this exceptional range you have a distinct advantage for this has a built-in reservoir. The heat can be turned directly on the reservoir and water quickly boiled. This is an exclusive feature not found in other ranges.

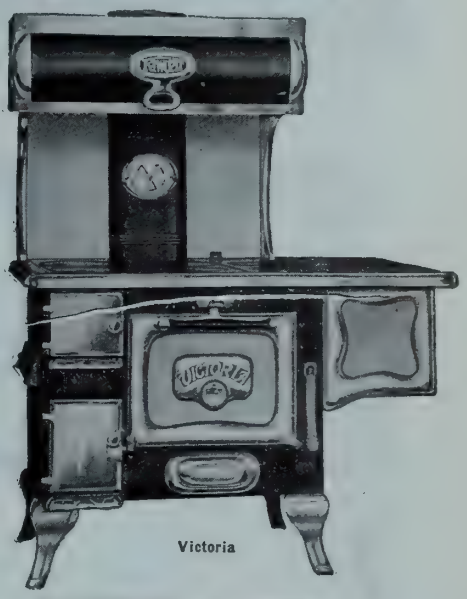


New Champion

and Marvel have Uniform Fire Boxes

Victoria Steel Range:

The Victoria is a light range. It is built so that you can satisfy the demand of the city trade for a small, cheap range that gives first-class service all out of proportion to its low price. It has proved a great favorite wherever introduced. The Victoria steel range is built with 16-inch, 18-inch and 20-inch ovens; 8- or 9-inch covers, and can be fitted to burn coal or wood.



Victoria

On the Market Over 60 Years:
and Vancouver, and a branch at Montreal

Marvel Steel Range:

The Marvel enables you to turn all the inquiries into orders, for the Marvel just meets the requirements of those customers who want a range between the Champion and the Victoria. It supplies a range that is medium in price. It is built with 16-, 18- or 20-inch oven. The covers are supplied in 8- or 9-inch size as desired. The fire box can be fitted for burning coal or wood. The Marvel roasts and bakes in a way that leaves nothing to be desired. A point that helps close the sales is the easy way that the floor beneath can be reached and cleaned.

Marvel

QUICK RADIATION

We have shown here but a few examples of our extensive line. Write us and let us supply details and prices of these or any of our many other ranges. We have other smaller ranges, and some more or less similar, in quality and price, to those shown here, as well as an assortment of cast iron ranges.

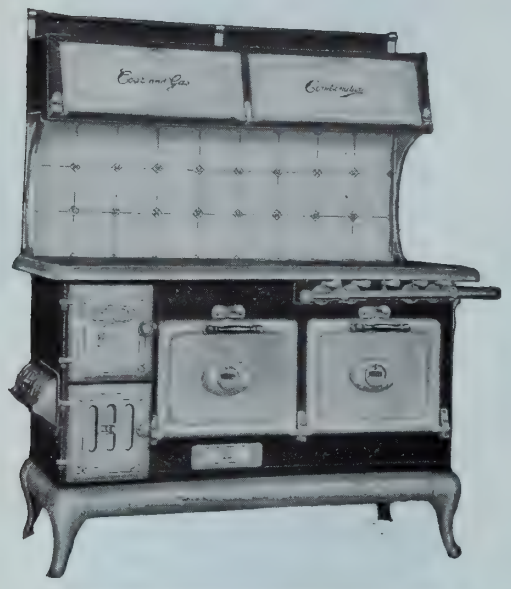
Three Sales Boosters



A Brand New Combination
With Two Full Sized Ovens 16 x 18 x 12

This is entirely new and destined to make lots of money for the merchant who gets in early on the sales. This desirable combination has **two** ovens—not only one oven and a warming closet, but **two fine, big ovens, 16 x 18 x 12,** for cooking and roasting.

The oven nearest the fire box is heated by the fire, and the other oven by gas—the gas top has four burners. The ovens can be used simultaneously or independently, and with only one oven in use the other offers a splendid **additional** warming closet space to the closet above.

The fire box is the large **standard** size. This is uniform with those on the preceding pages, and the merchant has the advantage of carrying **fewer parts.** The top size is 50″ x 24″—no larger than an ordinary coal range fitted with a reservoir, and the construction of the flue ensures perfect efficiency. **This is the only combination of its kind on the market, and the price is little more than a good coal range.**

Cabinet Gas Range
Shelf Swings up to Admit Wash Boilers etc.

This range is equipped with a baking oven and a broiler oven —both at a standing height, and the top is a four hole gas cooking top.

The shelf swings up out of the way to admit high utensils, and not only will this gas range interest your buying prospects by its appearance, but it thoroughly convinces them by its efficiency and features of sensible design and good workmanship.

Where Floor Space is a Consideration

This desirable, satisfactory range offers all the advantages of a cabinet range, yet it does not occupy nearly as much floor space. The top is provided with four full-sized burners and a simmering burner. There is a good-sized baking oven and a good-sized broiling oven. Like our other stoves, ranges and heaters, this comprises excellent material and workmanship, and is up to the standard we have maintained for sixty years.

The Unrivalled Rival Line

Fawcett Rival
The Superior Elevated Radiator Type

This style of furnace is recommended by furnace experts everywhere as superior to any other form of hot air furnaces for burning coal. The ash pit is cast all in one piece, which prevents ashes, smoke, etc., escaping from the bottom of the fire to the air chamber and then to the rooms above, as happens in many furnaces. The **Rival** eliminates dust and ashes in the house. These unrivalled furnaces are made in five sizes for either pipe or pipeless installations—are scientifically constructed and will ensure comfort to your customers.

The Villa Rival
A Handy Portable Furnace

This is a small handy portable type of furnace that meets the demand for a furnace costing little more than a good-sized heating stove. You will get good business in your district for the **Villa Rival**, as it has many advantages over a heating stove. Installed in the cellar it keeps all the mess and dirt connected with a fire out of the house proper—its construction makes it **easy on fuel** and it is unequalled as a heater.

An important feature of all Fawcett Coal Furnaces is the location of the water pan. This is right under the fire door and right up against the hot fire pots. The water evaporates generously—a very important hygienic point, as it assures the relative humidity of the warmed atmosphere essential to health, comfort and economy of fuel. The pan is very accessible—easily pulled out, cleansed, and replaced. **Every item in the construction of Fawcett furnaces is as thoughtfully planned as this water pan.**

We also make wood furnaces in three sizes. These can be adapted to bricked-in pipe installations, galvanized casing for pipe installations or as pipeless furnaces.

The Viking Heater
A Substantial Powerful Heater at a Moderate Cost

This is a fine outstanding example of the Quebec heater idea, and is a mighty good heater to sell. It is one we picked out to illustrate our extensive line of heaters, and each and every one is made with unvarying high quality. **We can supply anything your trade demands in the way of a heating stove.**

Service. We remind our friends again we carry assortments of our com plete line at our branches at **Winnipeg, Calgary** and **Vancouver.** A representative is also located in **Montreal.** You are thereby assured, no matter where you live in Canada, of receiving a service that will satisfy all demands.

BANNER STOVES

A Complete Line

In Banner Stoves and Ranges the dealer is offered a complete line which will enable him to successfully meet all competition.

The Banner Compact Cook

All the good features of the well-known Quebec Heater are included in this model. It is the finest stove of its type on the market. Note the large oven—18 x 15 x 11 inches; the highly polished steel body; the plain bright nickel parts. Oven is equipped with sheet flue construction, thus providing the even temperature of heat required for perfect baking.

The Economy Steel Cook

This handsome range is the most serviceable of low-priced steel cooks. The fire box is very heavy in every part. Equipped with drop oven door, the door of which is nickeled; cast iron reservoir end, large ash pan and large square oven. Wood plate for bottom of fire box supplied when desired. Altogether the Economy will be a prided asset in any kitchen.

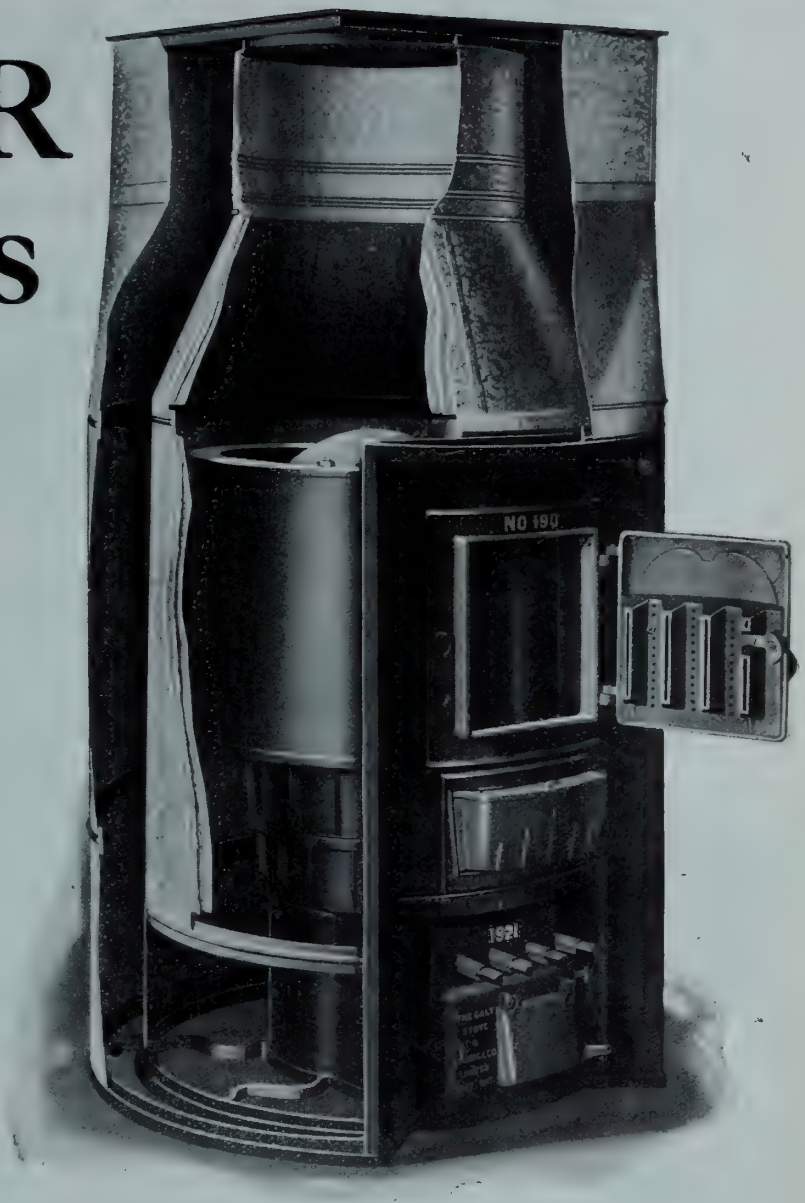
BANNER Furnaces

Concentration of efforts to pushing a good, reliable make of furnace brings a dealer the greatest profit.



The Banner Pipeless

The low cost and ease with which Banner Pipeless Furnaces are installed is causing home-owners in all parts of the country to discard their heating stoves in favor of this system.

Read what one enthusiastic dealer—Geo. Mathewson, Hardware, Limited, Toronto, tells us: "We have had the very best of success. We installed last fall about 20 of the three different sizes of Banner Pipeless Furnaces, some of them in very poorly constructed buildings, but every one gave our customers the best of satisfaction. Every customer is a satisfied customer. The firm that is handling your pipe and pipeless furnaces is handling one of the best furnaces manufactured in Canada."

BANNER STOVES AND FURNACES

Write for full information

The Banner Pipeless Furnace is a complete heating system installed in the basement the same as other furnaces but requiring no pipes to convey the heat to the various rooms. Every furnace is installed under a positive iron-clad guarantee. They offer a wonderful field for expansion and profit. Write us to-day for fuller particulars.

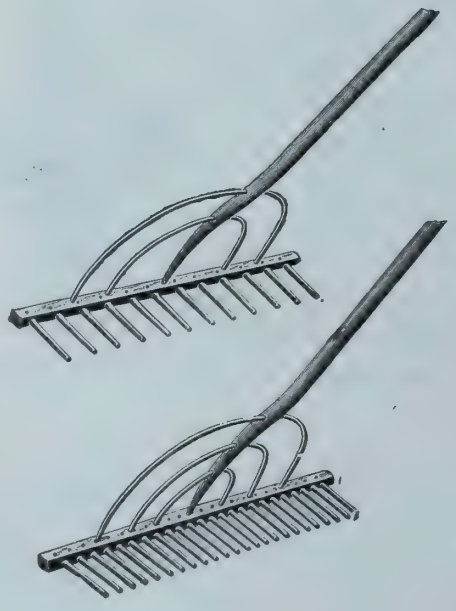
Hay and Lawn Rakes



THE Rakes are all made of the best White Ash and Maple Stock. The teeth have no shoulder, each tooth being pinned in place, which gives the lightest and strongest rake possible.

The Handles all have the improved or Double Bend, which gives a better hanging rake than those having only one bend.

The STEEL TUBE BOW Rakes are made with bows of light, cold rolled steel tubing, ¼ inch in diameter, bent the same shape, and fastened in the same way, as the common wood bows, the weight also being practically the same. They are varnished to prevent rusting and are warranted never to break. Especially desirable for export, as they can be easily set up without breaking the bows.

Made in grades XXX, XX and "Extra." We will be glad to furnish further particulars on request.

Urge your neighbors to try our lawn rakes, and they'll never use a steel rake on their lawns.

DRILL BLOCKS AND CLAMPS No. 278

A recent addition to Starrett sets of drill blocks. These blocks No. 278 are especially made to meet the demand for work requiring V blocks of the highest accuracy. Made of tool steel, with the V's ground central, parallel and square with the ends and sides, and hardened. Set consists of two drill blocks and two clamps. Blocks are 1 1-4 inches square by 1 5-8 inches long. Clamping capacity, 1 inch diameter. Especially recommended for accurate work in connection with drill presses, laying out work, prick punching, milling, grinding, etc. Fully described and illustrated in the new Starrett Catalog No. 22 "MA," on page 214, reproduced above. Copies of this catalog sent on request. Also write for the Starrett booklet—"The Tools Mechanics Buy."

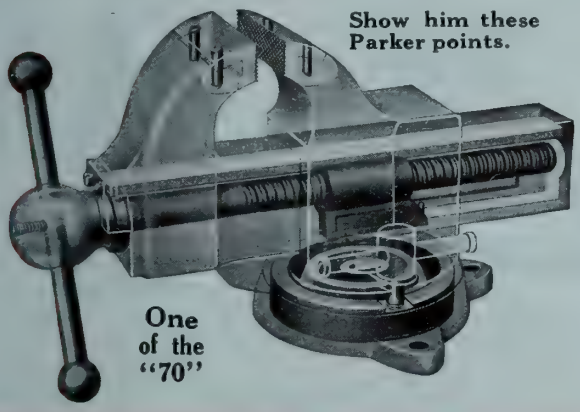
PARKER VISES

For the Man Who Says, "Oh, well, a vise is a vise!"

Too many customers, even shop foremen, have been allowed to think of much of your line as "staples." Take vises. All the customer can do is to rub his hand over it, twirl the handle a little and say "how much?" He can't see what's inside, so he thinks all vises are alike. With the help of the picture you can see through the Parker Superior Vise, and sell your doubting Thomas on quality.

they Grip Like a Grizzly

Show him these Parker points.



One of the "70"

Semi-Steel Castings, Patented Swivel Base, Solid Steel Strengthening Bar, Renewable Milled and Fitted Tool Steel Jaws, Improved Saddle and Solid Under Portion, Set Screw and Spring in Handle, Extra Strong Screw and Nut.

A Spramotor in the Hand is worth Two in the Factory

You wouldn't find a hardwareman so neglectful as to be without a spade or rake in stock—there's too much demand for them.

Yet—there is a garden and farm implement every bit as much in demand, that some hardwaremen don't keep in stock—or don't offer to send away for for their customers—that's the

Spramotor

It isn't a SPRAMOTOR unless we made it

Every grower of fruit and vegetables has a need each year for the Spramotor. The Spramotor way is the only effective way to spray—the farmer has had that told him by his farm papers for years, and he has the word of his fellow farmer to back it.

Every farmer and gardener sprays—more and more each year are spraying the right way—the Spramotor way—and it is up to you, Mr. Hardwareman, to see that you get in on the profit of the Spramotors sold in your district.

We have an attractive agency proposition for the livest men in many districts.

Write to-day.

DOUBLE LIFE FLY SCREENS

All Metal Extension - 12 Sizes - Patent Applied For

The Screen of Merit, Durability and Neat Appearance.

Contrast the Burrowes All Metal Green Enamelled Fly Screen which admits 20 per cent more light, with the old style large rimmed screens that warp, get weather worn, bind, and twist out of shape.

The screen cloth is locked in Double Life frames under heavy pressure then electrically welded together, making the two one. The proper way.

Nails, Tacks, Soldr or Rivets are not used in D. L. Screens.

All Metal Double Life Screens are made to resist weather conditions, first they are dipped in a rubber coat of enamel and baked hard. This makes a splendid base for the finishing coat of a nice shutter green enamel. Nature's color which gives the nicest effect imaginable as both cloth and frame are green.

D. L. Screens do not telescope but are the same height all along. An offset in one half runs in a U groove in the other. They close to half.

The possibility of blood poisoning is eliminated as all wire ends are not only locked but welded, and cemented by the enamel.

For genuine service, neatness and value, D. L. Screens merit the name. They are in keeping with the present pace of progress and advancement.

Manfd. by The BURROWES Mfg. Co. Toronto

A GREAT SELLER

The Best Low Priced Ash Sifter On The Market.

Easy rocker motion. Perfect balance. All weight carried by the pressed steel rockers.

Eliminates dusty, back-breaking shaking or lifting.

The ashes spread freely in the large sifting tray.

The rocking or gravitating motion sifts quickly.

Practically dustproof, as all parts are made to fit tight. With double rims.

Its simplicity appeals to all as the common-sense ash sifter.

In three parts—lid, sifting tray and ash or garbage can, reinforced to stand the rough usage of the garbage man. Size 12 x 18 x 24 in. high. Packed two together,. Patented 1912, 1919 and 1920.

REG. U.S. PAT. OFF. GTD

The Sign of Accuracy

GTD
3-Wheel Pipe Cutter
Can be used as a one wheel cutter.

Pipe Vise

Yes—You Can Buy Your Pipe Tools From G.T.D.

GTD manufactures a **complete** line, and this includes pipe tools as well as screw plates, taps and dies.

The GTD pipe wrench has proved over 47% stronger than United States Government requirements. It has special reinforcement where the greatest strain comes in use, and is second to none for material and finish.

The pipe tool line also includes a combination one and three wheel cutter, and pipe vises in various capacities.

For pipe threading we manufacture assortments of "Little Giant" pipe stocks and dies, and the "Trio," which is a "three sizes in one" die stock. The famous "Little Giant" dies are sold everywhere. They are the best known hand dies in the world.

GTD pipe tools sell easily because the GTD trademark is on them.

Hardware Insurance for Hardwaremen

It is a fact worthy of your closest attention that while other fire insurance companies have been suffering a reduction in premium income, our organization in 1921 increased its premiums by $400,000.00. Our surplus also increased by $155,000.00. Net cash surplus now $2,000,000.00. Our dividends remained as heretofore—50% to Hardwaremen.

The "Why" of the Safety Razor

YOUR customer comes to you sold on the safety razor principle—good, clean shaving without the bother of stropping or honing —wanting this operation done for him—willing to charge his blades to "Convenience."

The sale that builds business is the article that gives a man exactly what he goes after.

With the Brownie Gillette to take care of one class of your trade, and the New Improved Gillette for the man who wants only the best, you can give all your customers what they want—the simplest and best means of shaving.

Neither razor has parts that can wear out or get out of order. Both razors use the same fine Gillette blades you have always known.

The Brownie gave the best shave that was known until the New Improved Gillette was invented. The New Improved Gillette gives the closest, cleanest and most comfortable shave known to modern science.

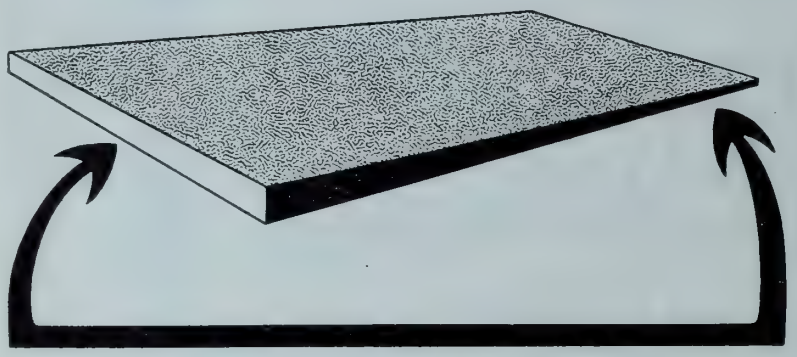
The *Only* Asphalt Shingle That is Tapered



Winthrop Tapered Shingles are the *only* tapered asphalt shingles manufactured. They have three outstanding features that make them a perfect roofing:

1—**They are the big butt shingles — the only asphalt shingle that gives a shadow line, which so improves the appearance of a roof—something architects have long wanted in Asphalt Shingles.**

2—**They are scientifically constructed. They are tapered. Being thicker at one end than the other, the butt of the shingle over-lapping lies flat on the upper part of the shingle in the row below. No rain or snow can accumulate underneath—wind cannot get under them and blow them off.**

3—**Being tapered extra thickness and weight are distributed where extra thickness and weight are needed—in the part exposed to the weather.**

We have obtained a special license to manufacture these shingles under the brand

Brantford

Winthrop Tapered Asphalt Slates

Quality of materials and production methods are of the usual high Brantford Roofing standard.

Brantford Winthrop Tapered Asphalt Slates are made from carefully selected Felt saturated and coated with a special blend of asphalts. Real quarried, crushed slate, in its natural colors (red or green or blue black) is embedded into and encrusted on them while the asphalt is hot. They are unaffected by climate. The colors are permanent, and never need staining. They are highly fire-resistant **and they are tapered.**

Distributed under Brantford **Roofing** trade marks, through Brantford **Roofing** Dealers. Stock carried, information furnished, service rendered by our dealer in your district.

Write for our valuable history of roofing "Shelter." On every page is a photograph of a different kind of a roof, in a different part of the world. It will be mailed free to responsible parties.

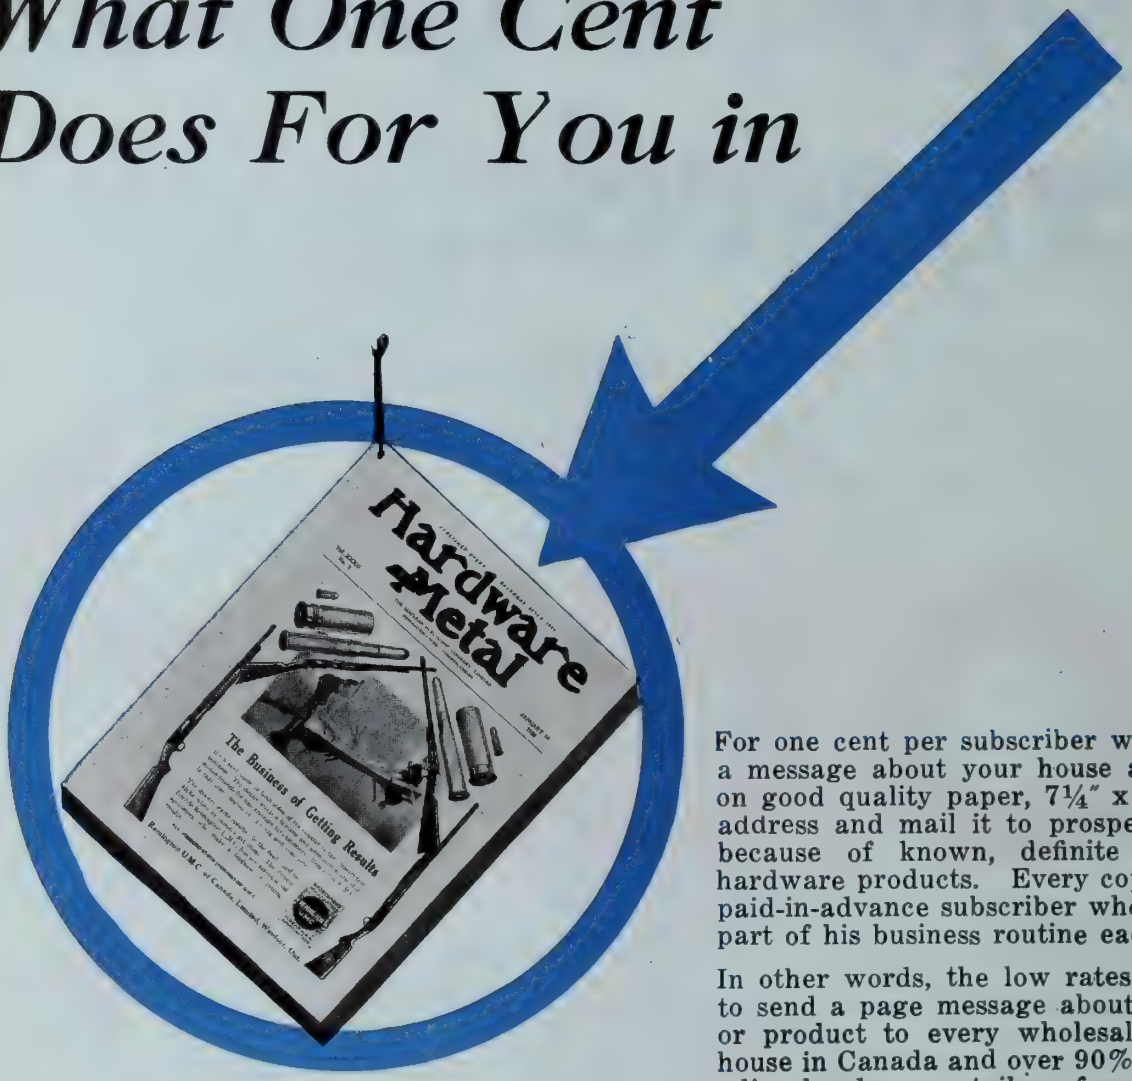
What One Cent Does For You in



For one cent per subscriber we will print a message about your house and product on good quality paper, 7¼″ x 10″ in size, address and mail it to prospects selected because of known, definite interest in hardware products. Every copy goes to a paid-in-advance subscriber who reads it as part of his business routine each week.

In other words, the low rates enable you to send a page message about your house or product to every wholesale hardware house in Canada and over 90% of the Canadian hardware retailers, from Atlantic to Pacific, at a weekly cost of about one cent each.

In view of present low stocks, the retailers' "pick-and-choose" style of buying, the keen competition predicted for 1922, and these low advertising rates, it will pay you to get in touch with us.

DIAMOND DUAL CIRCULATING PUMP FOR FORD CARS. NO. 575

The better performance of the DIAMOND DUAL is the result of scientific construction. Specially constructed stuffing box prevents leakage, provides increased oiling facilities. Screw propeller forces circulation. Lower chamber serves as sediment holder easily cleaned by removing the plug below. Drive belt is of good oak leather, treated.

The DIAMOND DUAL assures the right temperature and a saving of oil and fuel. It is easily installed, no drilling or mechanical change being necessary.

PUMPS 5 GALS. PER MINUTE

Price $5.00

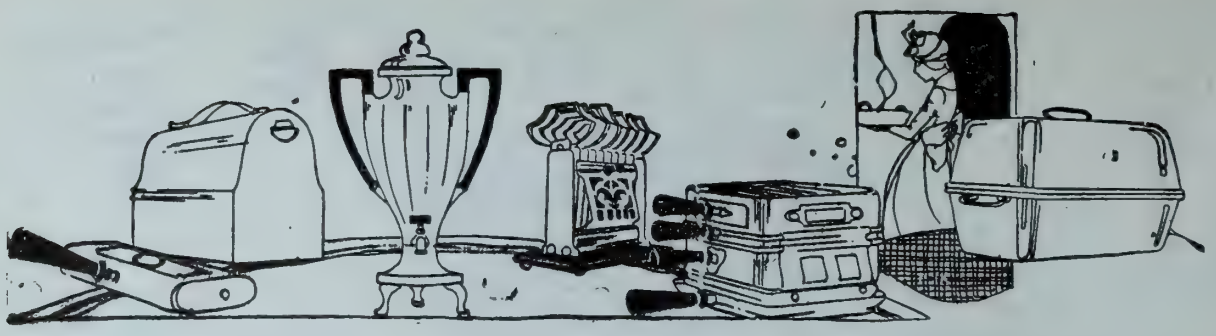
IMPROVED OUTLOOK FOR SPRING

STEADY *improvement in business is looked for during the spring and early summer months by those representing various branches of the hardware trade. This deduction is based on a number of facts. Hardware has undergone an average decline of 24 per cent. during 1921 and whereas at the peak hardware prices were 168 per cent. above pre-war prices, they are now back to a level 85 per cent. above pre-war quotations. This liquidation is thought sufficient to warrant replenishment of retailers' and wholesalers' stocks which for the most part have become much depleted.*

Hardware represents mostly necessary lines for which there is a steady requirement and as such this trade should be about due for renewed buying to replace overworn articles. Fundamental conditions are sound. Canada is the only country beside the U. S. showing a credit balance for 1921 trade. Its agricultural products are increasing in value, thus increasing the farmers' buying power; primary industries and manufacturing plants are showing increased activity; export markets are again being opened up and Canadian money now stands much higher in the world's commerce. Manufacturers report a decrease in production costs due to more efficiency among workers, and there seems to be fair prospect of lower freight rates. Added to this it is apparent the government is now applying itself to the problem of evolving a policy which will help in the readjustment.

From every angle it is evident conditions are much improved over last spring and without any rash predictions, it would seem to be quite reasonable for the retailer to expect steady improvement to follow the continued application of sound merchandising principles. In the following pages are numerous helpful ideas for developing spring and early summer business. These are worth careful reading and preservation for reference.



Industrial Activity Aids Hardware Movement

Reports From all Parts of Canada Indicate That Improvement in Industry is Being Reflected in Hardware Trade—Price Movements Slowing Up—Most Stocks at a Minimum and Necessary Lines Are in Demand—Encouraging Prospects for Residential Building

THE FOLLOWING brief statements which Hardware and Metal has secured from manufacturers in various branches of the industry are for the purpose of assisting retail hardware merchants to size up the situations existing in these branches for themselves and thereby help in framing an intelligent policy. In addition in many cases some helpful suggestions are made for increasing trade in certain lines and these can be applied with good result at this time of year.

Opportunities For Roofing Business

Current trade in prepared roofings and building papers in the opening months of the year did not show any great degree of briskness, but the quiet period was considered only seasonal by manufacturers. Owing to these materials being in the heavier class of hardware goods, and a considerable amount of money is necessarily involved in purchasing, dealers were reluctant to a degree in placing their orders for future deliveries. D. J. Munn, president, Alex. McArthur & Co., Montreal, however, can see no obstacle in the way for trade during the spring and summer months. There is said to be an assurance of a good building year ahead, both in the larger centres and in rural districts. This alone means a demand for roofings, apart from any repair work. For the latter, it was thought that prevailing prices would assist, as present quotations on all roofings were considerably lower than one year ago. Dealing briefly with the market at present, it was pointed out that a firmer tendency is now displayed on raw materials. Rather than have a repetition of the trend of last year, when prices were of a continued downward tendency, it would seem from present indications that the situation would be much steadier. This would place the industry generally on a much healthier basis than was evident during the whole of the past season.

Price Declines on Hardware Slowing Up

"Indications are that Spring trade will reach favourable proportions. Bookings up to the present have not been heavy, but have been all that could be expected," said Geo. C. Davis, manager of Frothingham & Workman, Ltd., wholesale hardware, Montreal. "If railroads and other large corporations could only show an improvement, we could speak with optimism." Dealers had been, and still were reluctant in their purchases, but this was evident in all branches of trade. There was a time when an advantage was given in placing orders well ahead, but at the present time there was no incentive in buying for future as deliveries in almost all commodities could be made in very short notice. As business gradually improves, however, it will again become necessary to fall back on the old methods of purchasing in advance, and it was now a question whether a shortage of active spring wares would not be apparent in the following months.

Mr. Davis spoke of the marked reductions since the opening of the year, these now bringing hardware lines, with few exceptions, down to reasonably low levels. There would still be a declining market on many commodities, but certainly not to the extent in the next twelve months as had been apparent during the past year.

Metal Construction Requirements

A revival in building operations during the coming months, the extent of which looks more promising from week to week, lends encouragement to the outlook for their products, and building materials in general, according to W. E. Ramsay, vice-president and Montreal manager, Pedlar People, Limited. Prospects for increased trade after the usual slackening in activities, experienced in the opening months of the year, must be principally based upon inquiries, and this year a decided improvement is apparent.

Hope for building operations in the industrial field must not be too high this season for the reason that plants were built to capacity during war years, and there is little likelihood of further extension from this quarter. City and town residential construction, and building on the farm, must then be looked to, and from all sections come encouraging reports of contemplated building, to commence with the opening of favorable weather in the early spring months.

Improving Trade in Household Hardware

"In view of the fact that we have made serious reduction in prices of all commodities which we manufacture, and as we are informed that the dealers throughout the country, both wholesale and retail, have allowed their stocks to be reduced to a minimum, we are anticipating a considerable stimulation in demand," said W. M. Gartshore, president McClary Mfg. Co., London, Ont.

"We can readily believe that the public generally, owing to low prices of farm products and unemployment in the city, have much less money to put into circulation. As our commodities are in every day use we are hopeful that there will be a steady increased demand as the season advances, and although we cannot expect anything in the nature of a boom in business, there should be sufficient demand to keep our works fairly well employed."

Industrial Activity Helping Saw Trade

"The sale of saws of all kinds, and saw tools is primarily dependent on the operation of the saw mills and the industries using their product (furniture manufacturers, planing mills, etc.) and the building trade industries. I have talked with many lumbermen within the past few weeks and there is decidedly more optimism lately than a few weeks ago. There is a feeling there will be a healthy home building movement as soon as weather conditions permit," said H. P. Hubbard, general manager E. C. Atkins & Co., Hamilton, Ont.

"Lumber from the manufacturer to the lumber dealer and yard has been shaken down practically to bed rock in price. The lumber manufacturer has been able to make great reductions in his operating expenses and has passed substantial decreases on to his trade, the lumber dealer.

"The probabilities of quite general building seem assured, and therefore, there is going to be a demand for our small goods line, as well as connecting lines of builders' hardware.

"The manufacturers of household furniture are more active and all these things taken together seem to assure us that we are at least on the sure road to normalcy."

Sheet Prices Half Those of 1920

Dealing with the situation in sheet metal, A. T. Enlow, president Dominion Sheet Metal Corporation, Hamilton, Ont., states:

"In a message through your columns at the beginning of this year, we stated that in our estimation the proper tendency in regard to sheets was one of "watching your step" for the first two months in 1922 and this we believe has been vindicated by actual developments.

"You may be interested to know that at the request of a jobber for purposes of inventory valuation, we recently gave him figures as to prices charged him during the latter part of 1920 and comparing this with our prices to-day, we find that the jobber is paying us exactly half what he paid then, and nothing in connection with this fact that we never charged our trade the top price, it certainly should indicate that the jobber and manufacturer to-day is in position to pass on to the trade in general and to the consumer in particular low prices on all articles made from galvanized sheets.

"We believe that Canada's position is the most enviable one among all the nations of the earth to-day and while the writer was recently in Cleveland, he visited a banking acquaintance, president of one of the largest banks there, who commented upon the following facts:

Where Canada Benefits

"United States is in the throes of a bonus discussion while Canada has paid a bonus to her soldiers and practically considers the proposition settled.

"In a long list of countries all over the world, showing the amount they owe to the U. S. as war debts, there was only one country which owed no war debt and that was Canada. Canada was the only prominent country in addition to United States showing a credit balance in regard to exports and imports for 1921.

Farm Products Increasing in Value

"He commented upon the fact that wheat is beginning to rise in price, pork and beef advancing, a stronger tendency in wool and hides and also the fact that the Canadian per capita agricultural production is three times that of the United States and predicted great prosperity for Canada in the ensuing five years.

"Hamilton's grand old man, Mr. Adam Brown, now 96 years old, in a recent address stated that the wheat produced in Canada last year, if put in sacks, would reach twice around the earth at the equator, a wonderfully forceful illustration.

"All these facts point to one conclusion: When prosperity comes back we will see it first and entertain it longest. The wise buyer gets his order in ahead of the rush, and it's well to remember that it doesn't require much of a rush to clean out stocks these days, hence all the more necessity for getting in early now that prices are favorable."

Steady Profit in Kitchen Utensils

A prominent manufacturer of household wares states:

"The big argument in favor of kitchen utensils is that they can be made to show a steady profit every month in the year if the same aggressive methods are used to sell the consumer as manufacturers use to sell the dealer. Properly handled, there is no department of a hardware store that will return such a large gross profit in the year as the household section. We are all in business with the idea of making a profit, and this question of making a profit, incidental to which of course is the question of turnover, prices, aggressive advertising, etc., should be the guiding impulse of the hardware man. There are among kitchen utensils articles that can be sold at a profit during the different months of the year and the sale of which will induce the customer coming into the store to view with interest any other lines of goods displayed."

To Be a Year of "Show Me"

Adam Taylor, secretary-treasurer, Taylor-Forbes Co., Ltd., Guelph, Ont., thinks the spring outlook is bright.

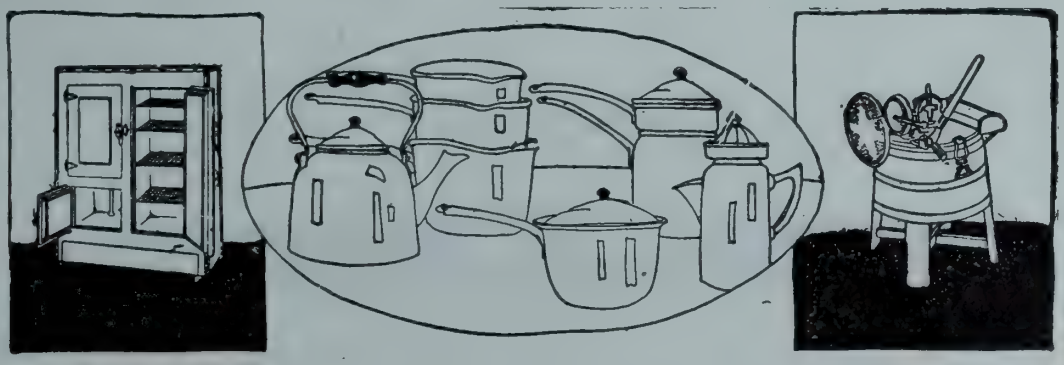
"I believe that 1922 is a year of "Show Me"—a year when every dollar spent must bring its full quota of returns," said Mr. Taylor.

"Some people are looking through smoked glasses and cannot see any silver lining. For my part I do not think they are seeing clearly. I firmly believe that spring will show a great improvement and will continue steady throughout the year. I refuse to join the pessimist's club."

Stimulating Spring Brush Sales

Concerning helpful suggestions as applied to brush trade, C. M. Farringer, sales manager the Boeckh Co., Ltd., Toronto, states:

"There are many ways in which increased business can be secured along the lines of interesting the consumer in brightening up his premises.



"One of the strongest and best methods of doing this is by making good displays of such lines as paint and brushes, both in the windows and in the paint and brush department in the store.

"This should be further strengthened by devoting a good portion of the newspaper space, which is used by the dealer, to paint up and clean up propaganda, and in this connection would say that most manufacturers are quite willing to loan electros suitable for this particular use, and especially is this so as regards brushes.

"Also with dealers who use circulars for sending around the district these could be used to good advantage to push paint up and clean up lines.

"Next to the Christmas season there is no better opportunity for the average hardware dealer to secure extra business than by pushing the paint up and clean up sale. Now is the time to prepare plans and arrange to get the campaign over right at the beginning of the season and not when some competitors have cleaned up half the prospects."

Small Brush Orders But Volume is Good

Concerning the spring outlook in the brush trade, L. W. Simms, president T. S. Simms & Co., Ltd., St. John, N. B., says:

"I have been recently comparing notes with other brush manufacturers and find our conditions are all about the same, namely, that the reticence of buyers to place orders has resulted in lower stocks of brushes throughout the country than has been the case for many years, our market being characterized by hurry calls for small quantities, frequently repeated, but in spite of this, trade has gradually shown an improvement.

"Prices of commodities entering into brushes remain pretty much on the average as they have been for several months back, without much sign of material change one way or the other. Some little while ago, I predicted that there was no likelihood of any change in prices until next summer and the time that has elapsed since then has confirmed this view.

"Our concern has been working on the theory for this spring trade, that a delayed order is very apt to be a lost order and we have, therefore, been exerting every effort to have a well assorted stock, to meet any reasonable demand. We cannot help feeling, from what we see in the way of reticence on the part of very many of the dealers, that not a few sales are likely to be missed on their part this year, through lack of having just that thing the customer wants when he comes in in a hurry for it."

Large Increase in Glass Business

L. Lloyd, manager Ontario Plate Glass, Ltd., Hamilton, Ont., states January sales of this year were doubled as compared with January of last year and February also increased by a substantial margin over February of last year.

"When you consider," states Mr. Lloyd, "that glass has dropped to about half the price prevailing a year ago, we think we have reason to be proud of these conditions. We owe this to three reasons. 1. Advertising. 2. Buying to the utmost of our capacity and thus maintaining a complete stock, and 3. a real bang-up service.

"The recent change in price on window glass, as already published in your columns, is naturally fair, to say the least."

Dealing with the recent commencement of a new process of glass manufacture in Canada, Mr. Lloyd states: "Consider what this means not only to Hamilton but to Canada in general. In buying glass from Belgium there is four thousand miles of transportation to be contended with and as this glass is cylinder blown and generally bowed it naturally follows that the breakage is high. We figure our loss to be anywhere from 20 to 35 per cent. and in some cases it has exceeded this. The Canadian glass is slightly higher in price, but when we consider the quality of the glass and the almost total absence of breakage you can readily appreciate what a benefit this means to our trade."

Spring Brush Trade Opening Well

Dealing with the conditions in the manufacture of brushes, brooms, woodenware, etc., W. G. Meakins, Meakins & Sons, Ltd., Hamilton, Ont., states:

"The spring trade has already opened up with us very nicely and we are comparatively busy.

"You may assure your readers that there will be no change in prices before the end of the season, that is before the first of September, and as far as we can see, there will be no reduction in the prices when the next revision of prices takes place in June and July of this year. There is always an evening-up of prices each summer in the brush business, as on account of the distance we have to bring our supplies, mostly from Manchuria and China, the contracts for the supplies of bristle and hair are made generally in May and June of each year for the following year's business and contracts are let for delivery of the goods during the next fall and winter for the following spring trade. As far as we can see at the present time, there will be more advances in prices than there will be declines when the next adjustment takes place. There have been very little changes in the prices of our raw materials since last June, but if anything, there has been a steady advance in the prices of bristles and the steady advance in sterling exchange brings the prices up still higher.

"There is nothing that the hardware man handles that is so staple as brushes and we are now busy with orders from people that should have ordered previously. We expect for the next three or four months to be very busy with rush orders wanted in a hurry on account of the small stocks that are being held by the hardware men."

Aluminum Materials Firming in Price

Dealing with the aluminum ware industry, W. D. Shambrook, president Duro Aluminum Ltd., Hamilton, Ont., states:

"We are pleased to advise that locally the industry catering to the hardware trade is becoming more active as business appears to be gradually picking up and speaking of our own industry, we are getting quite busy again. We showed an increase of over 50 per cent. for January and February over the corresponding months in 1921, although 1921, of course, was a very bad year. Comparing January and February 1922, our February sales showed an increase of 50 per cent. over January.

"In reference to price developments on aluminum kitchen utensils we feel that there will be no further declines at present as our raw material is stiffening in price and the mill is working day and night. An advance in aluminum ware appears to be more likely than a decline, judging from all present conditions."

Average Advertising Cost 2% of Sales

Survey of Practice Followed by Hardware Merchants in Canada Indicates Range of From 1% to 9% Spent on Various Forms of Advertising — Basing a Budget on Last Year's Turnover — Some Merchants Charge Program Publicity, Donations, etc., to Advertising

THE ENQUIRY made on this page from a Western Canadian hardware firm, opens up a broad question in which all hardware merchants are interested, particularly in view of plans being made at this time for 1922 Spring advertising. In order to give authoritative and up-to-date information on this topic, Hardware and Metal conducted a thorough survey of a number of hardware retail firms, and also secured details of investigations which have been conducted by various agencies.

As result of an investigation conducted by the Harvard School of Business Administration, figures were secured from over 1,000 stores and represent the average cost, being percentages of net sales including all types of advertising, letters, catalogs, newspaper space, etc., as follows:—

	Per cent.
Groceries	.83
Hardware	1.12
Vehicles and implements	1.22
Variety goods	1.52
Shoes	1.65
Dry goods,	1.67
Drugs	1.76
Furniture	2.72
Jewelry	2.85
Clothing	3.16
Department stores	4.01
Mail order houses	7.21

Reports to Hardware and Metal from a number of prominent retailers on methods employed to conduct advertising are as follows:

Base on Last Year's Sales

A large Hamilton firm states "We make an appropriation based on last year's sales, then we divide it into each month and distribute it according to the sales of each month as we go along. If the volume of business is not maintained we continue as usual because under such conditions the business needs more advertising. We charge to advertising all show window expense, showcard expense, all advertising and all salaries connected therewith. Donations are charged to advertising on our government statement but not included in our advertising budget. We think the average hardware store does not do enough advertising. The sales average should not be less than 2% while a larger store should use 2½ to 3% and in case of a new store or an old store starting a campaign it should be raised to at least 5% the first year."

An Ottawa firm reports proportion of advertising to turnover for the fiscal period ending January 31, 1922, as follows:

	Per Cent.
Newspapers	5
Outdoor advertising	2
Programs, gifts, etc., charged to donations	1

It is this firm's intention to adopt a 9% advertising program for this year in the same proportion.

A Guelph retail hardware firm advises that its appropriation for advertising is 1% of gross turnover, and donations, subscriptions, etc., are not included under the heading of advertising.

2% on Gross Turnover is an Average

A St. Thomas, Ont. firm advises that in their opinion most hardware stores figure 2% of previous year's gross turnover for advertising, this amount to cover all forms of advertising.

"Many times during the year a merchant is called upon for ads appearing in local magazines, charity programs, etc.," states this merchant, "which are of no real advertising value, but which should be taken care of under the heading of advertising.

"If a rough estimate of these amounts and other advertising such as circulars, catalogues, bill board posters, novelty advertising were taken, the amount would be about 1/3 of your total advertising which will then leave 2/3 for newspaper advertising. The latter we find is by far the best means of advertising. Gifts to charities, etc., if not in the form of ads. will hardly be charged to advertising but should come under some other head."

Another Ottawa merchant states:—

Spend 3% of Last Year's Turnover

"Our advertising for all purposes including newspapers, programs, church calendars, souvenirs, etc., for 1921 cost us 3-1/3% of our gross turnover.

"Advertising in newspapers only, 2¾%. Up to the present we have never planned a special budget but, however, we have this year decided to spend 3% of last year's turnover on all advertising, regardless of what this year's business will be. We have also decided to cut out programs and church calendar advertising as far as possible.

"All gifts to charities are charged up against donations; others are charged to advertising, especially when we feel they will bring returns."

(Continued on page 180)

Hardware and Metal,
Toronto.

Will you please advise us concerning the following:

1. What is the average percentage cost on gross turnover for newspaper advertising in the hardware business in Canada?

2. Can you state what is the highest average percentage for such publicity in any line including department stores and other lines of business?

J. H. Ashdown Hardware Co., (Retail Dep't.), Winnipeg.

"Fire out Salesman Who Overstocks"

Importance of Using the Power of Suggestion and Grouping Various Hardware Lines—How Children's Trade Can be Cultivated to Good Advantage—Advises to "Fire Out" Salesman Who Suggests Long Time Dating on Big Stock or Extra 5% for Larger Order

A NUMBER of helpful suggestions were given by F. J. Penberthy, Vice-President Lowe Bros., Ltd., Toronto, in addressing the Toronto Retail Hardware and Paint Club. These suggestions dealt with the merchandising of hardware in general, and emphasized the power of suggestion and importance of grouping articles.

"We frequently overlook the children in our plans for selling goods," said Mr. Penberthy. "One of the nicest pieces of salesmanship I ever saw took place in John Caslor's store, recently. A little boy came in and said he wanted a hockey stick. John said "There they are, 15 cents each, don't pick out the best one." The boy kept sorting them over for a long time, evidently looking for the second best when John said to him "take the best one my boy, they are all fifteen cents! John Caslor made a friend of that little fellow, and do you suppose he will go anywhere else to buy anything in the hardware line in future?

"A man started business in Zanesville, Ohio. He is now running one of the largest hardware stores in that district, and he admits he was taught an important lesson by a small boy. His stock was composed largely of empty boxes, neatly arranged on the shelves. A boy came in and asked for a knife. The merchant put a knife on the counter. The boy opened it and asked 'how much?' 'Fifty cents,' said the merchant. The boy said 'I don't believe that will do' and walked out. The boy went across the road to another hardware store and in a little while came out. The first merchant went out to the boy and asked why he didn't buy his knife. The boy said 'it was fifty cents and I only had twenty-five cents.'"

Give Best Value For Money

"There is another lesson in salesmanship," said Mr. Penberthy. "Find out how much the customer has to spend and give him the best you can for that money. Don't overlook the necessity of cultivating the children.

"We must take advantage of every opportunity to make a sale. Suppose a woman comes in and says "I want 7 feet of 28" wire netting. Naturally she will say 'how much?' You will say 3½ cents a foot or about 25 cents. You might say to her, I can give you this black netting for 3½ cents, but it won't last long. I have galvanized at 7 cents that will last forever. By taking just a few minutes to explain that, you have made a fifty cent sale. Nine times out of ten you will be able to make a much bigger sale than was at first apparent. Then there are other lines which can be sold to this customer. You might enquire about tacks, and if she says she has some carpet tacks at home you can tell her she should not use carpet tacks, but a 4 oz. tack that will not allow the netting to sag. There is another sale. Now there is new netting in the door and the customer may need a can of varnish to protect it. Also a brush. Turpentine is needed to clean the brush. Your 25 cent sale has grown to $1.50 or $2.00.

F. J. PENBERTHY

Vice-president and managing director Lowe Bros., Ltd., Toronto who spoke at the first regular meeting of the Toronto Retail Hardware and Paint Club, outlining some methods for group selling of hardware.

Keeping Sales in Right Proportion

"There is hardly a thing asked for in your store but what you can suggest something else and by the power of suggestion you can do the very thing that you need to do this year, that is, to keep your sales in proper proportion to overhead.

"Linoleum varnish suggests the woman is cleaning up the kitchen. She is a prospect for stove pipe enamel, aluminum paint, turpentine, etc.

"There are many hardware concerns that are not going to suffer this year if this plan is followed. There are some which are going to be in a bad financial condition if such plans are not followed. There is a tendency I am going to warn you against, and that is doubling your stocks. You cannot keep your money working if your profit and your stock is on the shelves. If any salesman wants to give you a long time dating on a big stock or an extra 5% for a large volume, fire him out. Make your money work, you must sell the goods before you can pay your bills."

Plan to Hold Clean-Up, Paint-Up Week

Plans Worked Out in Detail for Spring Drive in Toronto in Interests of Clean Up, Paint Up—Retailers to Contribute $750 and Manufacturers Arrange Balance—To be Held May 8-13 Inclusive

"MR. MIHELL touched on the question of a co-operative campaign this spring," said F. J. Penberthy, Vice-president Lowe Bros. Ltd., addressing the Toronto Retail Hardware and Paint Club. "The way things are opening up I believe we will have lots of paint business this spring, but we want two lots. We, in our club, have found the need of you gentlemen and we hope before long to meet twice your number. However, the stream has now commenced flowing and now you are started we want to put before you a plan we have in mind. We want one week to be called Clean-up and Paint-up Week in Toronto. We want to put on a campaign to create a large volume of business for yourselves and for us. The Paint and Varnish Club cannot put on such a campaign because it would look too much like an advertising campaign for manufacturers, but we would like your club to put on such a campaign some week during the month of May. It would be a very elaborate affair.

Profits Widely Distributed

"The first thing that enters your mind is, who will profit? The profits will be distributed all over the world. Australia and India will get a share, the latter for shellac; France for ochre, Belgium for lithopone, Russia for bristles, England for oxides, Japan for gold paint, Africa for varnish gums, Canada for linseed oil, lead, etc. Florists will profit by the sale of shrubs, etc.

Glass manufacturers, wall paper firms, seed firms, painters, carpenters, laborers, etc., all will share the profits. If we put on such a campaign we are sending a little money all over the world. The week would have to have the support of the street-cleaning department. The Fire Prevention League will be asked to have their campaign the same week. We will have the support of the Department of Works; garbage wagons will bear banners and we will have to get the school children interested.

"We have pledged among ourselves at present about $1,500. I think we can raise that to $2,000. There is a proviso that we will contribute providing you can get the hardwaremen to make a contribution. What we want is $5 each from every hardware merchant in Toronto. If we can have that we can put on one of the finest campaigns you ever saw. You will get out of it just what you put in it. Your $5 is wasted unless you get behind it. For it you will get not only the profits, but you get posters, window trims, stickers, all well colored and attractive, buttons for distribution to children, etc. You could not buy for the money we hope to get, the posters, etc. in small quantities.

"A week before this campaign we plan to run quarter pages in the local newspapers each day, the retailers' names only to be put at the bottom of each ad. We will be the first to attempt this movement on such a large scale in Canada, and if we can successfully carry it through this year, it will only be a start of what can be accomplished in the future. Next year we will find the Rotarians, Kiwanians and other clubs will be only too glad to co-operate because, after all, it is a civic proposition. If we spend two-thirds on this campaign you should be willing to spend one-third of the total cost. Manufacturers are spending $40,000 on the 'Save the Surface' campaign, to educate the public to paint. We spent $35,000 last year and didn't ask you for a cent."

"I think your organization will approve my request for $5 each from you for this purpose. You are going to put the campaign on, not us, and if you cannot cash in on this there is something the matter with you, not with the campaign. You will sell paint, varnish, specialties, brushes, nails, hinges, glass, putty, garden tools, polish and many other lines as a result of this campaign."

Mr. Penberthy also outlined a plan whereby the Toronto Retail Hardware and Paint Club will give three prizes of $5, $10 and $15 for the best essays from children in regard to the use of paint, varnish, etc. The contest will close on June 1. Each retailer will receive the essays submitted by children in his district for the purpose of a prospect list to be followed up.

In the ensuing discussion it was decided to hold Clean-up, Paint-up Week in Toronto from May 8 to 13, inclusive.

T. F. MONYPENNY

Vice-president and sales manager Imperial Varnish and Color Co., Toronto, who spoke for the Toronto Paint and Varnish Club at the gathering of the Toronto Retail Hardware and Paint Club emphasizing the necessity of the retailer's co-operation.

Hardware Merchants Pledge Support

First Regular Meeting of Newly Formed Toronto Retail Hardware and Paint Club Will Support Financially Local Campaign for Clean-Up and Paint-Up—Instructive Addresses on Power of Suggestion—New Constitution Adopted

ABOUT sixty Toronto hardware merchants were present for the first regular meeting of the Toronto Retail Hardware and Paint Club, held in the Board of Trade rooms this week. A splendid dinner was enjoyed by all and advantage taken of the social facilities for informal discussions of various matters of interest. Following the dinner President (pro. tem.) H. N. Joy launched into the business of the meeting and the list of officials who have been conducting the affairs of the club since its inaugural meeting was speedily sanctioned to continue in office until the next election. These officers were as follows: President, H. N. Joy; Vice-president, F. R. Jackson; Secretary, V. Mathewson; Treasurer, A. H. Lake; Executive Committee, W. Platt, W. Pritchard, Geo. Mathewson, John Caslor, Harry M. Dow.

The proposed constitution of the club was then read, as outlined herewith. Some discussion took place on certain points, M. Phillips enquiring about the status of the Dominion Hardware Stores for membership, was advised by F. R. Jackson that this organization was an association for advertising purposes and that each merchant's business was distinct. On motion of S. Hobbs, a clause was struck out of the constitution which would have limited voting power to one member of a firm and it was thought this would work hardship in the case of co-partnerships. The selection of a suitable evening brought forth much consideration, Wednesday night being suggested by a number present, who thought that on account of many stores closing Wednesday afternoon there would be a better turnout on Wednesday evening. On the motion of S. Hobbs, seconded by J. Caslor, the original suggestion of Monday night was left for a trial. Messrs. Caslor and Hobbs were also the mover and seconder respectively of the motion to adopt the constitution as outlined.

H. N. JOY

Whose temporary appointment as president of the newly formed Toronto Retail Hardware and Paint Club was confirmed for the year at the first regular meeting of the organization

Call Members by Christian Names

There was some discussion concerning the proposal to call members by their Christian names, Mr. Groom thinking the younger men would hesitate at being so familiar with older members, but on the motion of F. R. Jackson, seconded by C. Macfarlane, it was decided

to include the resolution in the constitution.

In introducing H. E. Mihell to speak on Spring paint campaign plans, Mr. Joy stated that the club was under obligation to the Toronto Paint and Varnish Club for its efforts in organizing city retailers, and he hoped the members would listen attentively to the plans for Spring paint business to be outlined. Mr. Mihell gave some very interesting and helpful suggestions in his address, outlined fully in this issue. F. J. Penberthy, vice-president of Lowe Bros. Co., Toronto, also spoke, outlining a plan for a Clean-up, Paint-up week for Toronto, as dealt with in detail elsewhere. The hardware merchants present pledged to support the movement by contributing $5 each, and gave the Paint and Varnish Club officials assurance that the hardware merchants of Toronto would be responsible for a total contribution of $150. The city will be divided into sections and certain members made responsible for collections in those districts.

Trade Papers Important

G. D. Davis, manager Hardware and Metal, complimented the club on the splendid start which it had made, and drew attention to the success which had attended Clean up, Paint-up campaigns in the United States, where the trade papers had been an important factor. The various branches of the trade, retailers, wholesalers, manufacturers, trade papers, etc., were all inter-dependent and the spirit of friendship which was evident would help achieve important results. The support of Hardware and Metal was pledged for the work of the club.

President H. N. Joy spoke words of appreciation of Hardware and Metal, which he described as "always a good friend of the hardware trade." He drew attention to the space which had been given to help promote the welfare of the new organization, remarking that such co-operation was always given cheerfully.

W. Wrigley spoke of Clean-up, Paint-up campaigns in the U.S., mentioning one case where $25 was subscribed by retailers. He thought the amount asked for locally was therefore small in comparison.

President Joy, in introducing George E. May, president for 1922-23 of the Ontario Retail Hardware Association, spoke briefly of Nelson Mills, his predecessor in this office. Mr. Mills was always regarded thoughtfully and kindly, said Mr. Joy. Mr. May thanked the club for the sentiments expressed concerning Mr. Mills who, he said, fully deserved what had been said of him.

May Get O.R.H.A. Convention in Toronto

"The new Executive of the O. R. H. A." said Mr. May, "is out to render the very best possible service. We want to make 1922 a record year. A meeting is to be held shortly in Toronto to discuss where the next annual meeting is to be held, and I think we can put the 1923 convention over in Toronto in a big way, should this city be approved. This is the first time a Toronto man has been president of the O.R.H.A., and I think we should try and get the annual convention here. I have been advised by Secretary Macpherson that the merchants of Kingston, Ont., are likely to form an organization and we wish than every success. These organizations indicate the trend of the times. One of the greatest benefits is that these organizations keep men from getting narrow in their views."

T. F. Monypenny, vice-president and sales manager Imperial Varnish and Color Co., Toronto, spoke on behalf of the Toronto Paint and Varnish Club,

(Continued on page 134)

Constitution of Toronto Retail Hardware and Paint Club

Name.

The name of this organization shall be the Toronto Retail Hardware and Paint Club.

Object.

To cultivate friendly relations among its members. To advance the interests of the members through the discussion of matters of common import. To co-operate among themselves and with other associations and trades that may have objects in common, in order that their business and interests may be advanced. To promote honesty in competition, trading and advertising, and to correct in a lawful manner any evils that may exist or arise in their business.

Membership

Any merchant engaged in the retail hardware or paint business as bona-fide proprietor, whose business is situated in the City of Toronto or in any of its suburbs, or surrounding towns or villages, or any person who is the manager of such a business where the same is owned by a limited company, may become a member of this club.

Associate Members.

Any member of a co-partnership having the prescribed qualifications or any clerk in the actual employ of such a firm may become an associate member of the club upon being so nominated by the proprietor, partner or manager of the firm with which he is engaged, membership to continue during such engagement.

Editors of hardware and paint journals residing within the territory specified may become honorary associate members.

Officers.

The officers of the club shall be president, vice-president, secretary, treasurer and a committee of five members who with the officers shall be the executive, all of whom shall be elected at the first meeting of the club and annually thereafter at the first regular meeting in the month of January and who shall hold office until their successors are elected. In case of a vacancy in any office such vacancy shall be filled by the executive until the next regular election.

Meetings

Regular meetings of the club shall be held on the second Monday of each month at such hour and place as may be named and selected by the executive.

Special Meetings

Special meetings of the club may be called by the executive when in their judgment it is necessary and must be called by the president upon written request of ten or more members.

Fees.

The annual fees for each member shall be $3.00 and for each associate member $1.00.

Quorum.

A quorum for the transaction of business at a regular or special meeting shall consist of the president or vice-president and ten or more members.

Executive.

Five members of the executive including the president or vice-president shall be necessary for a quorum, meetings of which may be called by the president and must be called by him upon written request of five or more members of the executive.

Funds.

All monies shall be paid to the secretary who shall forthwith turn same over to the treasurer and shall be deposited by him in any bank he may select to the credit of the club. All bills and accounts before being paid shall be approved by the executive of the club shall be paid by cheque signed by treasurer and secretary.

Voting

Each member in good standing or his or their duly accredited representative shall be entitled to one vote on all questions.

Complaints

Any member having a complaint or grievance shall submit same in writing together with proof of complaint to the executive.

Amendments.

This constitution may be amended or altered by submitting the proposed amendment or alteration at any regular meeting in writing but no action shall be taken thereon until the next regular meeting when a majority vote will be sufficient to adopt.

A resolution sanctioned for incorporation in the constitution was as follows: The names of all members shall be written in full on the membership roll and during meetings members shall address each other by using their christian name, its abbreviation or the name that they are generally known by, in connection with their surname and it will be the duty of any member to draw the presiding officer's attention to any violation of this rule when the violating member shall be immediately penalized by a fine of 10 cents to be paid to the secretary.

Retailers Buy Advertising Matter

H. E. Mihell, Imperial Varnish & Color Co. Thinks Charging Nominal Price Would Stop Big Annual Loss to Manufacturers Through Waste—Salesmen Say Retailers Receiving Too Much Advertising Matter and "Getting Lazy"—Some Figures Showing Big Annual Depreciation Through Lack of Paint

SOME very interesting statistics indicating the great possibilities for paint trade and some concrete suggestions for developing business this spring were outlined by H. E. Mihell, Imperial Varnish & Color Co., at the meeting of the Toronto Retail Hardware and Paint Club this week.

"We at this time should feel encouraged, not discouraged," said Mr. Mihell, "because we are on the brink of starting something. In regard to the Save the Surface campaign, there are three main reasons for it. Some years ago a few men realized that the consuming public looked upon paint as a decorative commodity which in times of prosperity was all right, but which in times of depression should not be used. Property owners were suffering loss, and the paint trade was also suffering. It was realized that the immense prosperity of war conditions would be followed with depression, and so in times of prosperity the campaign was started, to insure prosperity in this trade in times of depression. Last year was the acid test and the amount of business secured was ample testimony of the fact that it had been worth while. In Canada the campaign has passed through three stages, One was when subscriptions were being taken up, another was making our own salesmen apostles of the campaign. Today as it stands, it is the campaign of the retailers; it is more yours today than before, and we expect that from now on it will become more so.

Nation-wide Scope

"The scope of the campaign is nation-wide; we cannot go into all the localities throughout the country, but we encouraged local organizations such as yours to do this work. The campaign does not attempt to promite civic welfare except insofar as sanitary conditions are concerned. There is no similar co-operative campaign which has done as much for any trade as this. We have heard expressions of envy of the success which we have achieved. The shoe trade is one example of a trade which has envied our success.

"We are frequently faced with the question 'what is there in it for me'? It is difficult for us to define the extent to which the campaign has taken effect, but the broadness of the idea has caused men to sit down and figure out just what it can do for them. Few realize the fact that only one-tenth of the property in the Dominion is properly protected. There are possibilities for four or five times the business in paint which has ever been done, and I think today we are more or less asleep to the possibilities which exist.

"Dealing with the possibilities for paint trade, I would point out that the last assessment return gives Toronto 105,516 buildings. A low estimate of the paint, varnish, etc., which should be used on these buildings would be $15, but at that figure there would be $1,582,740 worth of paint needed in Toronto. This city is in the advantageous position of having a majority of homes occupied by owners who will buy good material to protect their property. There are also 2,412 vacant houses, and 9,325 stores in Toronto.

Possibilities In One City

"There are 54,691 homes occupied by owners in Toronto, which with an expenditure of paint annually amounting to $15, would total $820,345; 33,943 homes occupied by tenants spending $10 on point, totalling $339,430. Vacant homes and stores also at $15 would total $36,-180 and $139,575 respectively, making a grand total at wholesale prices, of $1,-335,850 worth of paint. This, divided by 150 hardware merchants in the city, gives $8,900 worth of business to each.

H. E. MIHELL

Imperial Varnish and Color Co. Toronto, who in addressing the first regular meeting of the Toronto Retail Hardware and Paint Club, gave some interesting facts indicating the vast possibilities for paint business.

"Painters for painting those 100,371 stores and houses in Toronto would get an average of $40, thus giving them $4,014,840, which, spread over four years, would give painters an annual business of $1,003,710.

"We cannot hope to achieve this end in a day, or a year, but let us start something somewhere, even if it is small and let the cumulative effect pile up the total toward the objective we set."

Dealing with the subject of "How are our people spending their money for protection," Mr. Mihell showed that total paint production in 1919, at wholesale prices, was valued at $19,506,653. Of this 60 per cent. was for manufacturing purposes, leaving $7,802,662 used for protection of property. Based on a population of eight and one-half millions, it was evident we were spending 92 cents per capita, or an average of $3.68 per family annually for home protection, through the use of paint, varnish, etc.

Small Amount Spent On Paint

Compared with this the per capita expenditure for fire protection in 1917 was $5.44. We are only spending 15 per cent. of that amount on paint. It should also be borne in mind that loss by depreciation is continuous while fire loss is only accidental.

"Many people will allow property to go year after year without paint, not realizing that they are losing at the rate of 2 per cent. per annum," said Mr. Mihell. "This figures out at a loss of $112 per annum on a $5,600 house, or $448 in four years. Half that amount would paint the property, and if the owner neglects it in regard to paint it is likely he will neglect it from other standpoints. The hardware merchant in inducing more painting is promoting business along many other lines of hardware as well."

Taking the 1911 census as a basis, Mr. Mihell figured the annual depreciation on property through insufficient painting, as follows:

2 per cent on urban homes, totalling $28,000,000 per annum; farm property, $17,849,000; farm implements, $26,000,-154. Totalling $71,850,154. This does not take into consideration depreciation on railroads and other construction.

Fire losses in 1919 were $25,341,240; in 1920, $28,745,590, and in 1921 $45,-015,930. It was pointed out that the highest fire loss for years does not approach the depreciation through lack of paint.

Extent of Depreciation

The value of Toronto property in 1922 was shown to be $723,695,846. Constructed property, which will require paint, was valued at $361,847,923. Depreciation at the rate of 2 per cent. annually on this would amount to $7,236,958, a figure much in excess of the possibilities which Mr. Mihell had formerly outlined as existing for Toronto hardware merchants.

"In view of these figures," continued Mr. Mihell, "you are rendering a service to humanity when you sell paint, apart from the gain in your paint department.

How Are We Going To Get It?

"We can waste gallons of printers' ink in advertising but if it is not backed up with your aggressive selling it is of no avail."

Briefly outlining the progress of advertising, Mr. Mihell traced it back to the stage of bartering, pointing out that advertising has never become anything more than a branch of selling. "When you try to separate the two they both fall," he continued. "You cannot make advertising an alibi for poor salesmanship; you have got to back it up. Adver-

pointing out that one of the weak links tising takes many different forms. All forms have some publicity value, and some forms are better suited to certain problems than are others. The test of your advertising should be 'does it sell goods?'

"Our salesmen hear a good deal about different forms of advertising. We hear about the painted sign on the wall. My personal opinion is that this is not worth anything except as general publicity. We also hear of the retailer who says that he has not got time to 'talk' that particular line. I want to tell you that if you do not want to 'talk' your lines, get out from behind the counter because you are just a waiter. It is not the volume of talk, but the way in which you deliver it, that counts. A woman comes in and buys a mop in the spring. You know that woman is going to house-clean, and it is one of the best occasions for selling paint and varnish. That is the opportunity for talking. By a discreet question you can find out what she is going to do. Practically every woman in this country has in mind some surface in her home which she wants to protect or brighten and it only needs your question to bring her to the brink of buying. Your personal contact with the consuming public is worth much. The manufacturer has not got it. Personal contact puts the sale over.

Contact With Public

"Watching the trend of retailing in the last few years, it is evident that if you, as retailers, do not function along that line, there is going to be something else come between you as retailers and the consuming public. Your function is to apply the advantages of your contact with the public."

In a criticism of advertising from one standpoint, Mr. Mihell stated:

"Salesmen from competing houses state that merchants are receiving too much advertising, and this is making some of them lazy. There was said to have been such a flood of advertising put on the retailer that he is using it as an excuse for selling." Mr. Mihell cited the case of a merchant who bought a hardware store in Eastern Ontario and on coming to the company to look over the stock, asked for a set of paddles. Mr. Mihell explained to him that the man from whom he bought the store had been provided with a set, whereupon the man replied that his predecessor had used the paddles for mixing the chicken mash.

"It is discouraging to the manufacturer to see money wasted in this manner," said Mr. Mihell, referring to the practice of some merchants in using color cards to light the furnace in the fall, and having none on hand in the spring when required.

A Case in Point

"There is a hardware merchant not forty miles from Toronto who ten years ago was given three months to go, and he is today the predominant merchant, and his sales are double those of his competitors combined, in stoves and other lines. This merchant goes among his customers and talks stoves. Another merchant loads a stove and a sewing machine on his wagon each time he goes out through the country, and he seldom comes back with them. Another bought three cars of roofing and sold it in two months by going after every prospect. A department store in this city employed a man who travelled throughout Canings for painting activity during the Fall but to farmers' houses, to stay overnight, and get his meals. He would discuss matters with the farmer, the wife and the hired man. He was finding out what the people of that community needed; he was not selling. He sent his information to his firm and this was used in adapting a mail order catalogue to the needs of that community. You are living right in the community; do you ever go out and size up the situation?

"A young hardware clerk this week was going down street and saw a man sweeping out his store. He inquired if he would be needing paint, and succeeded in selling him half a gallon. He went out to a summer resort and found a Chinaman fixing up a restaurant and sold him $19 worth of paint, varnish, etc. Circulars distributed frequently bring good results. Mathewson Hardware Co. distributed circulars mentioning paint in conjunction with other hardware lines. This circular was not distributed until 5 p.m., and before the store closed six customers had come for goods advertised."

May Sell Advertising Matter

Mr. Mihell dealt briefly with the suggestion that manufacturers sell their advertising matter to retailers, citing the case of a foreign missionary who in dealing with foreigners found that bibles, tracts, etc., secured much more attention when sold at a nominal price than when given away. The value of displaying color panels, enclosing color cards in parcels, etc., was pointed out, and Mr. Mihell suggested that if a merchant has his money invested in these cards that he will not throw them away as casually as is now the case.

"We want you to share a fair amount of the cost of putting across a special paint week in Toronto," concluded Mr. Mihell. "We feel you will take a greater interest in it and you will therefore receive much better returns."

IMPORTANT POINTS OF THIS ARTICLE IN BRIEF

Taking Toronto as an example, Mr. Mihell figured each hardware merchant should this year get $8,900 worth of business.

Per capita expenditure on paint in Canada is 92 cents, or $3.68 for the average family.

Expenditure for protection of property from deterioration, is only 15 per cent. of that spent for fire protection.

Depreciation loss is continuous, fire loss is accidental.

Depreciation loss is $112 per annum on a $5,600 house.

Total depreciation on property in Canada at rate of 2 per cent. per annum due to lack of paint figured at 71 million dollars.

Fire losses, while large, are not half depreciation loss on property.

Necessity for change in retailing methods or some new agency will come between retailer and consumer.

Salesmen report some retailers substituting surplus advertising matter for selling and are getting "lazy."

Must Be More Representative

Vancouver, B.C., (Special.) — The next executive meeting of the Provincial Board R. M. A. of British Columbia is scheduled for March 22, at 2.30 p.m., at Association Headquarters, Vancouver. J. T. Crowder, president of the B. C. Board, has sent out a special appeal to the various locals to send representatives to that executive meeting.

"Demands for service keep coming into this office from different localities," remarked Mr. Crowder to a Hardware and Metal representative the other day, "and owing to our not being in direct personal touch, by having a representative from these places such as Vernon, Prince George, etc., it is extremely difficult to co-operate with these business men. It is therefore imperative that we enlarge our Provincial Board of Directors and have at our regular meetings members from all parts of the Province. It would be quite satisfactory to have members from any or every branch there. In case of outlying districts, if impossible to send a man from every branch, it ought at least to be possible to send a man representing a district embracing several branches. For example, one man might represent the Kootenays, another the Okanagan, another the Northern Interior.

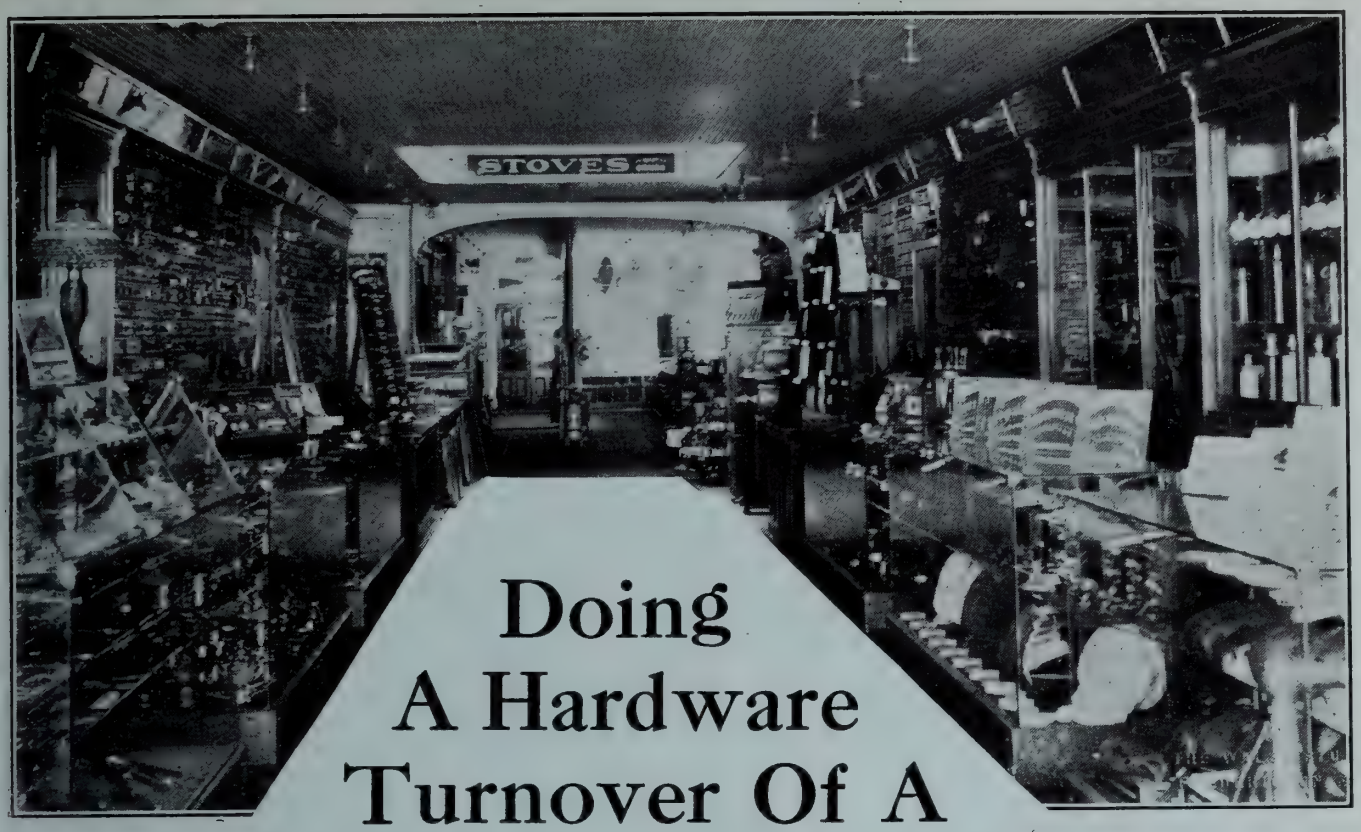
"My experience since last July convinces me that it is impossible for the Province Executive of four men, to attempt to represent the whole Province even partly satisfactorily."

HARDWARE MERCHANTS PLEDGE SUPPORT

(Continued from page 132)

in the chain in connection with any plans this organization had in mind, was securing the co-operation of the retailer. He thought the meeting was an encouraging sign of how this co-operation was now linked up, and expressed the thanks of the club which he represented for the invitation to attend. F. Moore, Benjamin, Moore & Co., Toronto, voiced the same sentiment.

THE distribution of suitable literature embodying seasonable paint suggestions has been found by many merchants to be a distinctive aid in producing more business of this nature. Local advertising is a necessary adjunct to launching a "paint and varnish" campaign with success and through these methods great emphasis can be placed on the last price reductions, and the many suitable openings for painting during the Spring period. Demonstrative helps will promote the desire to paint on the part of the individual, while convincing testimony as to the value of paint in "saving the surface" will result in selling the underlying idea to both the local community and the general public, and with this accomplished, the details of when and how are progressive steps of an economical policy.



Doing A Hardware Turnover Of A Half Million Dollars In One Year

Despite Limited Facilities of Display R. Chestnut & Sons, Fredericton, N.B., Have Developed an Active Trade in Hardware—Special Display Features Provided—Clerks' Sales Checked Daily—How Sporting Goods Trade is Developed—What a Rest Room For Women Has Meant—Method of Tabulating Literature—Securing a Live Prospect List—Periodic Conferences of Staff Are an Advantage

A CLOSE STUDY of retail merchandising methods, particularly as applied to hardware, has been made by the management of R. Chestnut & Sons, Fredericton, N.B., a store which last year boasted a turnover of hardware and plumbing valued at half a million dollars. On a recent visit to the Maritime Provinces, a representative of Hardware and Metal had the opportunity of discussing with some officials of this firm, matters pertaining to present day retail problems, and some interesting and helpful pointers were secured.

This store is an excellent example of what can be achieved in the way of layout and display with limited store front facilities. Though having only 21 feet frontage this store has a floor space of 53,000 sq. ft. and requires the services of over forty employees, including plumbing dept. The store is modern in every respect, having up-to-date floor and wall display cases. An indication of the completeness of the shelf stock and how it is displayed is found in the fact that there are 700 display drawers with samples affixed to the front of each and capable of holding sufficient stock for current requirements. All display cases, both wall and floor, are illuminated with electric lights allowing the stock to be adequately shown after dark or on dull days.

GENERAL VIEW OF STORE

The general view of the hardware store of R. Chestnut and Sons, Fredericton, N. B. as shown above, indicates the effective display which is secured by the use of modern store equipment, and the strategic layout of the goods. Down the left side are seen showcases containing displays of cutlery,silverware,glassware, etc. with the drawers in the rear containing shelf hardware, samples of which are shown on each. On the right hand side are showcases devoted to sporting goods lines and other household goods, with a glass fronted wall cabinet in the rear for clocks, thermos bottles, tools etc. Note the special stands for household goods, thermometers etc.

A valuable feature is the fact that all shelves in the retail section are movable, these being supported on uprights which have holes bored one inch apart and patent lugs provided to support the shelves. In this way waste space is eliminated and a distinct improvement made in appearance. The shelves are set just enough distance apart to carry samples of articles on display.

Another display feature of this store which is worthy of note is the use of a series of display boards built on a revolving base. These are used for displaying roofing and provide the buyer with an easy means of sizing up the various grades. This has been found to be a more effective way to display roofing than to show small samples.

The forward part of the second floor of the store is used for showing seasonable goods and displays of such lines are a regular feature. At the time Hardware and Metal visited the store a display of camp and hunting goods was being made. A model camp was built of cedar boughs, giving a very realistic appearance, and camp equipment was liberally distributed. While such a dis-

play requires considerable attention, it is generally found that it amply repays the time spent upon it.

Sales Lady For Household Goods

The rear part of this floor is devoted to household articles and is in charge of a saleslady. The management is enthusiastic concerning the superior ability of young women to sell certain articles such as are required by women for household use. It is found that women shoppers feel more at home dealing with one of their own sex and the young salesladies have a better appreciation of the various household uses of the articles which they sell. W. T. Chestnut, president of the firm, stated to Hardware and Metal, that previously a number of sales were lost in this department because a woman shopper was backward in dealing with male salesmen in the purchase of household lines. "A girl is always better in offering suggestions for the use of such lines," said Mr. Chestnut.

In the main store, salesladies are employed in the silver and cut glass department. Frequently their sales have exceeded those of male clerks who receive considerably higher remuneration. Of course their value is limited to a certain few departments in the average hardware store.

Check Sales Daily

Each clerk's sales are checked up separately at the end of each day, and a point is adhered to that selling costs must not exceed a certain per cent. of the total volume of sales.

Indicating the faith which this firm has in display as an effective factor in selling, Mr. Chestnut states, "Goods well displayed are half sold," and he proceeds to carry out the most effective plans for display. The floor and wall cases have already been generally described, but to be a little more specific, it was noted that the wall cases are backed with purple velvet and although it takes considerable time to keep this backing clean, Mr. Chestnut is of the opinion that goods displayed in such a high class manner, are more easily sold and bring probably a better price. In this connection an incident was related, of a man who went to the plumbing department and on pricing a mirror he expressed the opinion that it was too expensive. Yet he bought one exactly the same in the hardware department at the same price on the same day, thus proving that the attractive surroundings made the article so appealing in the hardware department that the question of price was subordinated.

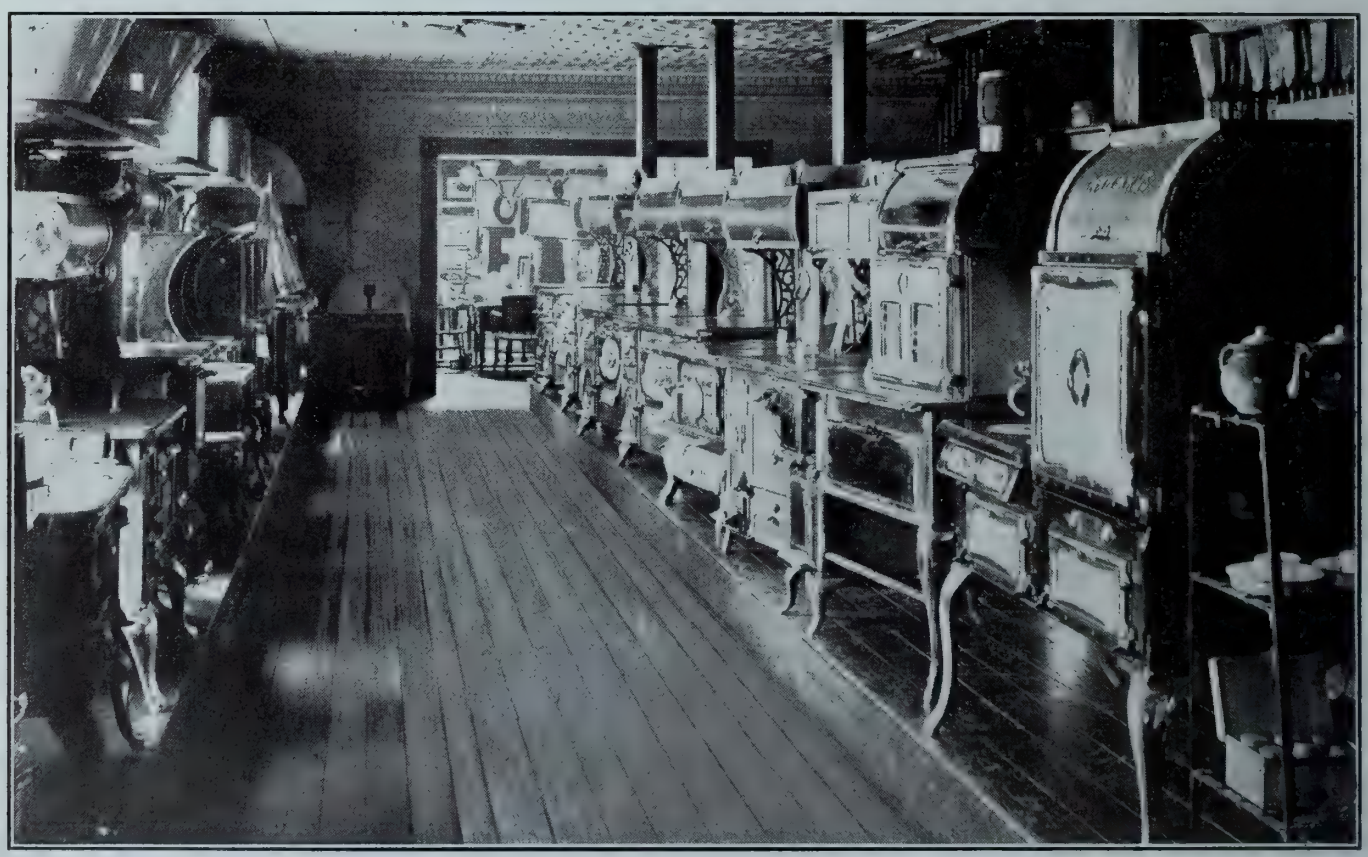
Sporting Goods

Considerable attention is paid to sporting goods in this store, this department being under the capable direction of a man who has had considerable acquaintance with various branches of sport and is well able to discuss sporting goods intelligently. M. Staples who is in charge is an official referee of the New Brunswick Hockey League, a baseball umpire and past president of the local baseball league. Through his wide connection with players he has built up a large sporting goods trade. Last winter 2,000 hockey sticks were sold, and similar large sales are regularly made in seasonable lines. Mr. Staples makes a specialty of catering to high school and university athletic organizations and the securing of such business extends the influence of the store among a large number of prospects. Careful attention is given the question of window displays of such lines.

A feature of note in the general office is a desk affixed to the wall, on which are provided cheque forms on all local banks. This is for the convenience of customers paying their accounts and it is a service which has been much appreciated.

Keeping Track of Literature

A neat and handy system is employed for keeping track of all literature supplied by manufacturers. A case has been constructed and divided into sections with sheets of galvanized iron, each section being numbered. An index is fastened on the inside of the doors so that one can get the circular wanted without having to look all through the stock. This department is in charge of the switchboard operator



A separate department helps to sell stoves, ranges and heaters in the R. Chestnut and Sons store, Fredericton, N. B. This department, as illustrated, enables the stock to be kept spotlessly clean, and here the customer may leisurely examine the various lines without interruption. This department is down the stairway from the main store. Note at the rear a table and chairs provided in which customer and salesman may discuss store matters and make any adjustments needed in comparative private.

The paint department is one of the important sections of the R. Chestnut and Son business in Fredericton, N. B. Care is always taken to keep the stock up to the highest standards of quality and quantity. Various specialty lines are shown toward the rear of the department and special stands are provided to aid display. Furniture polishes, mops, etc., are sold in this department because it is found one helps the other in many cases.

who is held responsible for the filing and finding of literature.

Rest Room

A rest room has been provided for lady shoppers, and this is a feature to which considerable attention has been given. It is fitted with most complete furnishings including easy chairs, rugs, washroom facilities, etc. The latter have been the direct cause of a number of sales of bathroom equipment for the plumbing department through the display effect of the modern equipment shown in actual use. In the rest room an advertisement of silverware is shown on one wall, and on another wall appears an attractive advertisement of the floor varnish handled by this store. Frequently it has been noted that women who have seen these advertisements in the rest room have, upon re-entering the main store, gone to the silverware or varnish department and made a purchase of the line so advertised. It is estimated that approximately one hundred women take advantage of the rest room daily.

More Women Than Men

By actual count it has been found that more women than men visit this store. This was the case before the rest room for women was established, and the proportion of women has latterly increased as a result of the service provided for them. Frequently, as well, men have been drawn to the store for the first time by their wives discriminating in favor of the Chestnut store for shopping because of the conveniences offered.

Store Meetings Held

Store meetings are held for the employees each month (ladies excepted) when cigars are passed and a general discussion of business takes place. No discrimination is made as to the positions held by the employees, but each is given an equal opportunity of discussing store problems and offering suggestions. Many helpful suggestions have been secured by such conferences. If a new line of goods is to be introduced an endeavor is made to have the representative of the manufacturer present to explain all the points of the goods so that the staff will know what they are called upon to sell and what its various uses may be. This method has proved a distinct help in introducing new goods, for it is found when the store salesmen are thoroughly acquainted with the line that they can sell it much more effectively.

A Greeters' Desk

Mr. Chestnut formerly confined himself almost entirely to his office, visiting the store but occasionally. Latterly, however, he has established what he calls his Greeters' Desk at the front of the store where he can meet customers and keep in closer touch with events. If a customer enters the store and the salesmen are all engaged so that quick service cannot be given Mr. Chestnut rings a buzzer which calls up some salesman from another part of the store where they may not be so busy. Mr. Chestnut prides himself on knowing practically all who come to the store. An indication of the extent of his connection is found in the fact that while working on a Victory Loan campaign, he worked a whole week calling upon local people and in that time found only one family with whom he was not already acquainted.

Prospect Lists

At the local exhibition each year a booth is prepared by this firm and souvenirs are given away. Frequently this is used as a means of preparing lists of prospects. For example, at the time of installing the ladies' rest room, a circular was obtained by keeping track of the names and addresses of ladies who accepted souvenirs at the fair. Also this plan resulted in each woman receiving only one souvenir. Last year sifters for the ladies and tops for the children were the souvenirs. The former cost 23½ cents each.

The advertisement dealing with the ladies' rest room was as follows:

"Among the recent improvements we have made to our store is a Ladies' Rest Room, for the convenience and comfort of our lady patrons and friends. In this rest room will be found a desk with stationery, local and long distance phone, easy chairs, papers and magazines, racks for holding parcels and a

fully equipped lavatory adjoining. Most people imagine that a hardware store is more especially a man's store, but we have taken the census of our customers and we find that more ladies than men enter our store. We would be very glad indeed to show any ladies that are interested, through our store. Our housewares department on the second floor is in charge of a saleslady. There can be found a large stock of graniteware, tinware, aluminumware, stoves, kitchen utensils. Call in and see us—you are always welcome."

A four-page leaflet in envelope size was also arranged for enclosure in parcels, to be sent out to the mailing list and for distribution in the store. This leaflet dealt with the ladies' rest room.

Heavy Hardware

The heavy hardware stock is kept in a separate building known as the wholesale department. Here each grade of iron is marked with a different color, painted on the end so it can be seen at a glance. This avoids much confusion and enables selection and shipping to be done much more quickly than would otherwise be the case. A separate building is also used for cement and carbide. The basement of the store is used for the reserve stock of paint, oils, glass and nails. At the rear of the main store building is a room provided to house the bicycles owned by employees, racks for 26 bicycles being provided.

The oil stock was formerly kept at the rear of the store but as the fire risk was thereby greatly increased this line was moved to a separate building which is protected by double fire doors. Gravity system tanks are used and each tank is labelled both at the tap and at the filling hole, as to what it contains.

Wire and rope is handled upstairs where it is kept on reels, built in front of a long runway which facilitates handling and makes measuring much quicker. Belting is handled in a similar manner from the opposite side of the room. Particular attention has been given to labelling and plainly marking all stock in every department of the store.

Plumbing Department and Tinshop

The plumbing department is under the management of H. W. Thorne who is part owner of this branch of the business. The premises are located across the street from the main store and Mr. Thorne lives on the premises in order to handle emergency work which might come in at any hour of the day or night. The plumbing department is modern in every respect and it is under efficient management, Mr. Thorne having had considerable experience of a practical nature. A close study has been made of methods in use in progressive plumbing shops and these have been worked into the plumbing department of the Chestnut store. A tinshop is operated in conjunction and here too, the latest in equipment is to be noted. An electric pipe cutter and threader is used, handling pipe from one to six inches.

You May Find Useful In Your Store

Following, in brief, are some of the features of the R. Chestnut & Sons store, Fredericton, N.B., which help to sell hardware:—

Display boards on revolving base for showing roofing in the roll, more effective than showing samples.

Movable shelves eliminate waste space in display and improve appearance.

Special part of store set aside for artistic arrangements of seasonable lines such as camping, hunting and other sporting scenes.

Salesladies employed to sell household goods to women. Many sales were formerly lost through women being backward in dealing with salesmen.

Many salesladies get higher remuneration than men, on basis of sales.

Sales checked daily, and selling cost must not exceed set percentage of total volume of sales spread over a period.

Purple velvet backings on showcases and wall cabinets well worth while in influencing sales.

Expert and well known sporting man in charge of sporting goods dep't. Sold 2,000 hockey sticks last winter.

Desk provided with pen, ink and cheque forms for convenience of customers.

A case with numbered sections keeps manufacturers' and other literature clean and handy for quick reference. Switchboard operator keeps an index.

Rest room for women provides good opportunity for advertising lines sold in the store as well as providing much appreciated facilities.

More women than men visit this store and their number has increased since the rest room was established.

Store meetings held monthly (ladies excepted) to discuss problems and investigate new lines. Many important selling arguments learned.

Mr. Chestnut has a "greeter's desk" at the front of the store where he can give personal supervision to the needs of customers.

Display at local Fair each year and give samples for purpose of securing a live list of prospects.

Various grades of iron in heavy hardware stock tipped with various color paints to facilitate distinguishing them.

Various steps taken to lower fire risks and better rate secured.

All stock is kept in bins and stocked in sections according to size. Everything is plainly labelled to avoid delay in locating what is required. Business in this department last year totalled over $90,000, which, apart from one job of $12,000 consisted of small medium sized jobs.

A warehouse 150 ft. long is located on the railway siding in which cement and heavy hardware lines are stored.

Lowering Fire Risk

The question of fire risk is one to which considerable attention has been given by this firm. When rates in the province were increased, the rate on the Chestnut store was increased from $2.85 to $3.19. On enquiring of the insurance company how to reduce the rate to a minimum, Mr. Chestnut was informed that he should remove a wood burning furnace from the basement and have the oil stock put in a separate building and a livery stable removed. These suggestions were carried out and the insurance premium has thereby been reduced to $1.27. $160,000 insurance is carried on stock and building.

"This is a point that few merchants consider. They just pay the rate asked and give the matter no further thought. If they were to improve their fire protection the rate would be lower and the risk of fire much less," said Mr. Chestnut.

Historical

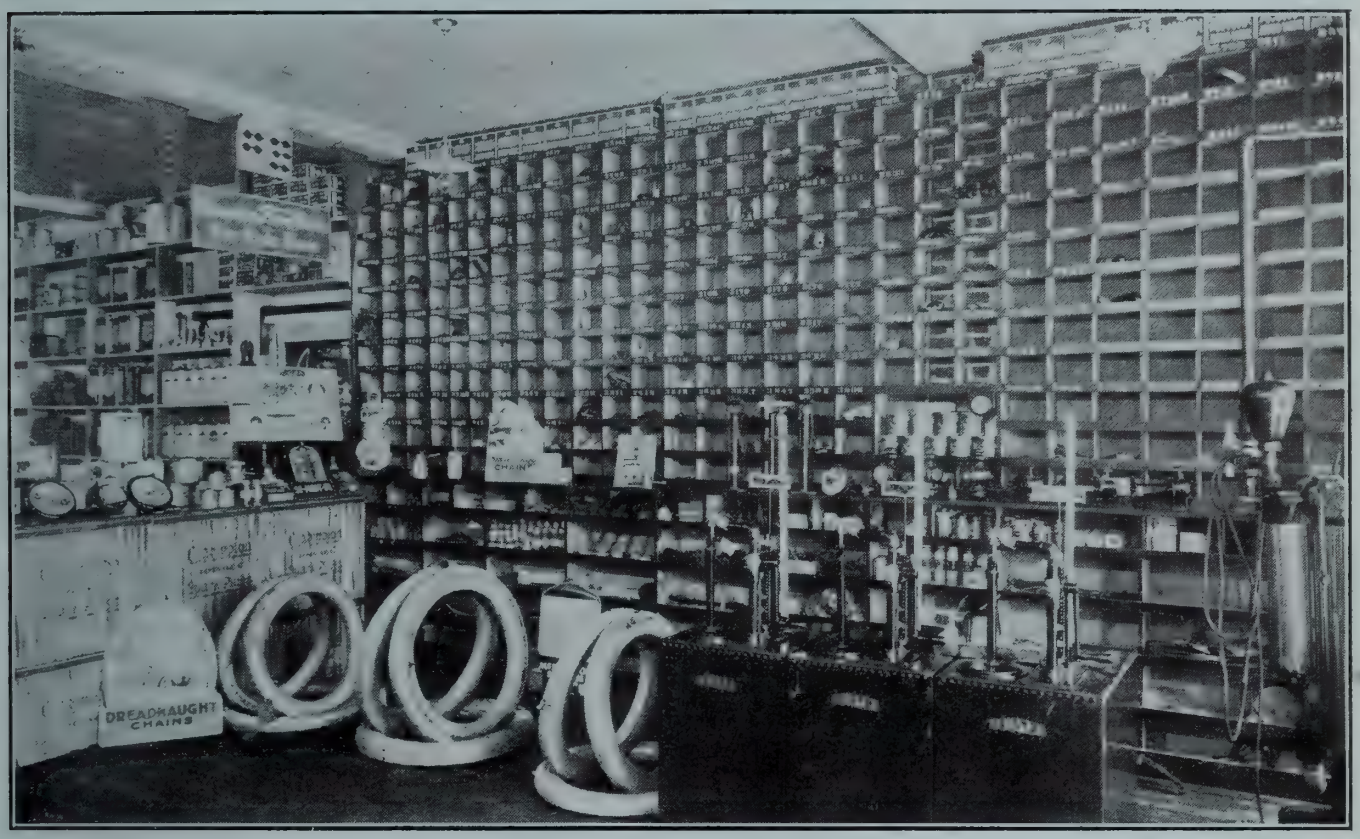
R. Chestnut & Sons, was founded in 1836 by Robert Chestnut, who remained at the head of the firm until his death in 1857, being succeeded by his son Henry. The present head, W. T. Chestnut, has been president since the death of his father in 1908. Under the direction of the latter, the store and buildings have been altered no less than six times with the idea of facilitating the handling of merchandise and improving departments to make the store more attractive.

BRUSH MANUFACTURER BUYS PREMISES

Two large buildings at 158 to 170 Adelaide street west, which formed part of the estate of the late Charles Boeckh, founder of the brush manufacturing company, have been purchased from the estate for a cash price of $165,000 by the Boeckh Company, Limited.

Garage Not Essential For Development of Successful Auto' Accessory Business

A. Goyette & Fils, Montreal, Believe Garage Does Not Harmonize With Hardware Business, But That a Complete Accessory Department Will Get a Large Portion of This Business—Pump Essential Though Profit Small—Giving Service in Selling Accessories



Prominence is given the auto accessory department in the store of Goyette and Fils, Montreal. As shown herewith this department is located near the front of the store and the various accessory lines are displayed so as to be readily accessible to customers. Repair parts for some of the lighter automobiles are kept, and catalogued with various accessory lines in the sections as numbered. These numbers correspond with an index and catalog. This firm has developed a good volume of auto accessory business without any repair shop or garage in connection, by means which are described in this article.

"IT IS NOT necessary to have a repair shop, or a garage, at the rear for the success of a very complete accessory department, in fact I would not consider for a moment the establishment of one. Apart from it requiring an extra man to take charge, and additional help, in my opinion it would not harmonize with our hardware store," was a remark made by Mr. Goyette of A. Goyette & Fils, 803 Laurier Ave., E., Montreal, to Hardware and Metal.

Nevertheless, Mr. Goyette fully believes in a very complete auto accessory department, and has not only proved to himself that it will pay its way, but that it is worthy of half of one side of the store, which it now occupies. Located in what might be termed the choice poistion for display purposes, this section is considered one of the leading departments in the store.

Accessories Given Prominence

Three years ago it was decided that an extension was necessary, and at that time property adjoining the premises was purchased and the floor space doubled. In this newer section accessories and phonographs are displayed at the front, while household goods occupy the rear portion, including stoves, washing machines, oilstoves, etc., on the floor and aluminumware, graniteware and tinware on the shelves at both sides. At the top of both front windows is stencilled, "Auto Accessories and Supplies." This means of advertising, accompanied by the gasoline pump, is sufficient to catch the eye of the car owner in passing. On closer view the department itself is in sight, as the store floor is on a level with the pavement, and a large plate glass window does the rest.

Importance of Service

The most effective advertising campaign, however, in Mr. Goyette's opinion, is "service." Perhaps more so in this department than in any other of the store is service required. It is a service station, and it has been found that if customers—who are generally in their autos with engine running—find that their wants are quickly and satisfactorily administered to, no other advertisement could bring the same results. For this reason, from the spring months until late fall a salesman is kept in the department whose only duties are to take care of this trade.

Steady Growth

Immediately after the first consignment of accessories was received and

placed on the shelves three years ago, it was to be seen that the venture was to be a success from a sales point of view. Custom increased, likewise the interest on Mr. Goyette's part. At the commencement of the second season a new and modern gasoline pump was installed directly at the end of the counter on the inside, with pipe extending over the sidewalk. In this way the salesman could draw the gasoline with very few steps necessary, and still be in charge at the counter.

Last season it was found that lubricating oils should also be placed in a more convienient location. Previously the different grades were kept in barrels, but because of their appearance these were placed at the rear. For the coming season three new tanks are installed alongside the gasoline pump. Besides offering better service these lend a more business-like appearance to the department as a whole.

"Can you handle gasoline at a profit?" was asked.

Gasoline Pump Pays For Itself

"It is hard to determine a direct profit on our sales, but certainly the gasoline pump pays for itself," replied Mr. Goyette.

"Of course we could hardly do without it here as it would not be a complete accessory department without it. However, while we do not perhaps cash in to any extent on gasoline sales direct, I am convinced that it has been the means of selling other commodities."

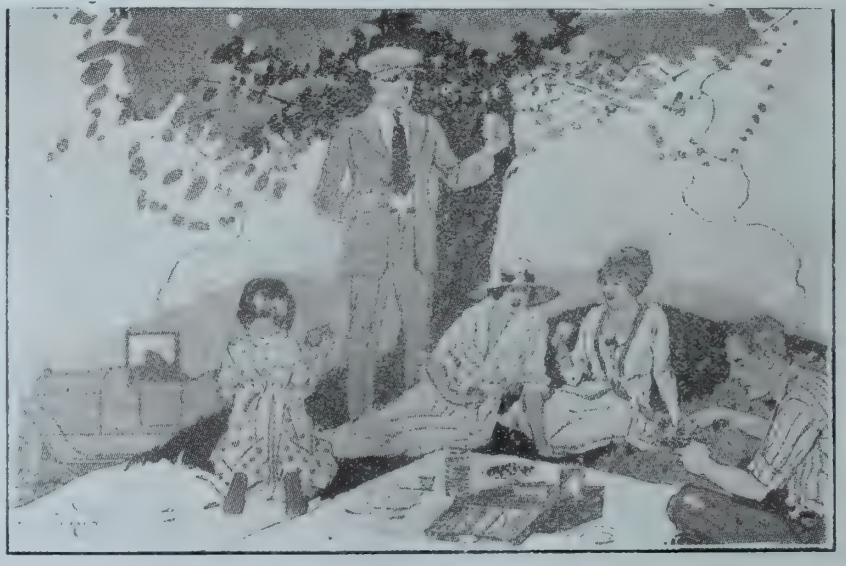
Apart from general accessories, the genuine Ford and Chevrolet parts are carried in stock. These are stocked in bins, numbered according to the numbers in the catalogues. When asked if it was not hard to sell these parts for the reason that a repair shop was not kept in connection, Mr. Goyette replied that only parts for the lighter well-known cars were kept, and in many cases the car owner was his own repair man. There would be no advantage in having a trained mechanic attached to the staff.

Spring Accessories for the Motorist

The selling methods of the Geo. A. McMurtry Hardware of St. Thomas, Ont., are described elsewhere in this issue. As specially applied to the sale of automobile accessories, it is noteworthy that window displays are an important feature. Note this display by this firm showing lines which the motorist will require at this season of the year. Tools, chains, gaskets, vulcanizers, tires, mats, etc., are popular lines at this time and they are well displayed herewith.

WINDOW DISPLAY WHICH SOLD SPORTING GOODS

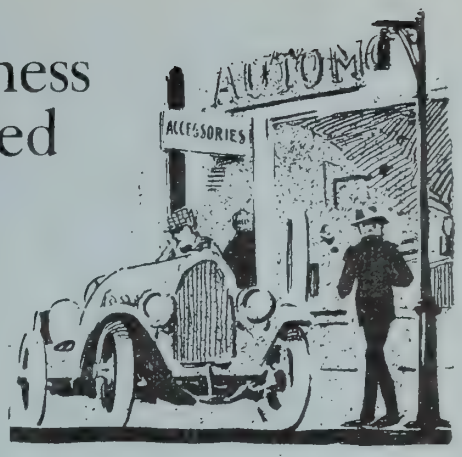
Moncton, N. B.—Sumner Company arranged a special window display with the N. B. championship skating races. A rink occupied the center floor space, the sides were banked with snow, and a race, in which the fastest amateurs in America are contending was shown just finishing. The "cut-out" figures were about 3½ inches high and were from photographs taken of them in action at the recent Canadian championship meet at St. John. Each one was numbered and a "key" furnished. The officials were also shown and the whole lay-out was complete in every detail. Back of this was a large panoramic photo of the 20,000 people on the shore and around the 8 lap course at Lily Lake last month. A very fine collection of medals and trophies won by Chas. H. Smythe, added to the interest which this unique window attracted.



Soon as the cold weather is replaced with the warm days of Spring and early Summer, the motorist and his family, friends and others are quick to take advantage of the opportunity for motor trips to favorite haunts.

Spring and early Summer motoring parties offer the hardware merchant a chance to sell auto accessories and many lines of camping and picnic equipment such as lunch sets, camp chairs, fishing equipment, etc.

Auto' Accessory and Tire Business Overflows—More Space Needed In Hardware Store



Circulars and Selected Mailing List Have Developed Wide Volume of Auto' Accessory and Tire Trade Throughout Ontario for George Potter, Kitchener, Ont.—Record Book for Tires Saves Many Adjustments

GEORGE Potter, hardware merchant of Kitchener, Ont., is another hardware man in Ontario who goes in extensively for the sale of auto accessories in connection with his regular lines. The big end of his accessory business is in the sale of tires and tubes and in this branch of trade has ramifications which include customers all over Western Ontario from Toronto to Sarnia. All of this tire business is entirely on the retail basis. While he considers himself a distributor Mr. Potter adheres rigidly to the retail trade.

Speaking to Hardware and Metal regarding his sales system, Mr. Potter declared that he has built up an ever growing trade, through a reputation for rock bottom prices coupled with a good record of service to customers. He declared that the tire and tube end of his business has grown so rapidly that recently he was forced to abandon certain other departments so that they could be turned into ware-rooms to handle the increasing stock which it is necessary for him to handle

Securing Mailing List

Asked regarding the method he pursued in building up such an extensive trade, Mr. Potter declared that after he once entered the retail tire and tube business he immediately got into touch with the offices throughout this section of the province that were issuing motor licenses. He paid the stenographers in these offices one cent a name for all of the owners in their several districts. In this manner he came into possession of a very valuable mailing list. His next move was to issue circular letters to all owners whose names he had setting forth in the circulars the advantages to be gained by buying tires. Asked what luck he had with replies to these letters he stated that he judged he had at least a 60 per cent. reply to the first and subsequent circulars which he sent out.

POINTERS IN SUCCESS OF AUTO ACCESSORY TRADE IN GEORGE POTTER HARDWARE, KITCHENER, ONT.

Widespread reputation for rock bottom prices combined with good quality and service.

Live prospects on mailing lists receive carefully planned sales letters.

Letters bring replies to the extent of 60%.

Careful buying more important than careful selling.

Record book for tires saves many adjustments.

Hardware and auto accessories work well together. Customers in one are prospects for the other.

Simple window displays emphasizing prices.

As a business-getter he declares the circular cannot be beaten as far as the sale of tires and other accessories is concerned. It was by means of these circulars that he built up a business that now extends throughout Western Ontario. Herewith are shown two samples of circulars sent out.

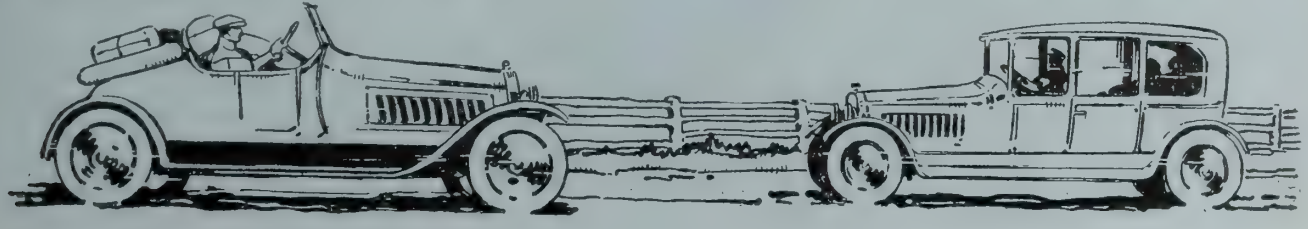
Mr. Potter speaking about his methods emphatically declared that the secret of success lies to a greater extent in buying rather than in selling. He never buys unless in such large quantities that he can in turn sell at a price which makes it worth while for the tire and accessories customer to trade with him. In the simple matter of chains alone, he buys in such quantities as to make it more profitable for local and outside trade to purchase their chains from him.

Record Book for Tires

Another interesting feature of Mr. Potter's system in connection with the handling of tires and tubes is that he keeps the rubber end of the accessory department entirely separate from his hardware business as far as bookkeeping is concerned. The first thing he does in connection with a tire sale is to get the number of each tire sold, t name of the purchaser and the date of the sale. This information he records in an indexed account book. Mr. Potter says that his little book has saved him more money in adjustments than would be at first imagined. He cited the case of a man who came into his store recently asking for an adjustment on two front tires which he claimed did not stand up under a fair test. He stated emphatically that the tires were purchased in the spring and should have been good for many months to come. Mr. Potter took the numbers of the tires in question and referred to his index book. Here he found that the tires were purchased in June. When the customer saw the record, he promptly recalled that the date was correct and declared that he never dreamed it was so long ago that he had purchased the goods. He went away much more satisfied with the deal he made on those tires than when he came in.

Hardware and Accessories Combine Well

Touching on the relation of the accessories department with the regular hardware business, Mr. Potter finds that the two departments in no way interfere. On the contrary he is certain that the one contributes to the other. Association with customers in accessor-



ies has led to the forming of a new line of regular hardware customers. The service which he has been particular to give in the accessories trade has led customers to look for the same service in the hardware line. His business methods work out to the benefit of the accessories trade through regular hardware customers, who finding service the watchword in this department naturally look for the same watchword in the accessories and quite naturally become customers.

The only display which Mr. Potter uses is the lining up of a number of various brands of tires in his window with a large card indicating the prices. This is done whenever Mr. Potter has special bargains and it never fails to draw. He states that the modest window display has drawn better than newspaper advertising. In this connection Mr. Potter claims that it is the price at which he offers his tires that brings the business and he would not be able to offer such prices if it were not for his keen buying methods.

Numbered among Mr. Potter's regular customers are people in every town and city in Western Ontario. He has regular customers in Sarnia, Windsor, London, Toronto, Woodstock, Stratford, and other Western Ontario points who order regularly through the mails. Their orders cover everything in the accessory line. This trade by mail he attributes entirely to the success of his circular system.

FRENCH TARIFF DISCRIMINATES

Discrimination against Canadian goods through French tariff provisions was refered to by the Canadian Manufacturers' Association deputation in Ottawa. The French Government has exempted United States goods from increases applicable under the French general tariff, although not ob'iged by treaty to do so, while it continues to apply those increases against Canadian goods. The result is that on Canadian goods (other than the few lines which, by treaty, are subject to the French minimum tariff rates) France levies double to three times as much du.y as she levies on similar goods imported from the United States.

The following Canadian products, among others, now suffer under this tariff discrimination if shipped to France: Wrought iron, iron bars, steel bars, welded or not, furniture, pianos and organs, phonographs, varnishes, machine tools, locks, many forms of hardware, metallurgical a'loys, valves, brass goods, agricultural implement parts, shafts, screws, bolts, link belting, spark plugs, etc.

The Government was asked to press for the immediate removal of this tariff discrimination against Canadian goods, and the manufacturers were assured that the matter would be taken up with the proper French authorities.

GEO. E. POTTER
DISTRIBUTOR OF
AUTOMOBILE TIRES
29 KING ST. EAST
KITCHENER, ONT.

Mr. Auto Owner:

1921 was sure a great tire season for us.
We are going to make 1922 still greater.

Our adjustments were not one in fifty.
We credit this to the tires we sell.

We carry all sizes of the best make of tires.
8 different makes. 15 different treads.

You are by Law obliged to have lenses on your car.

We have all sizes. Government approved.

We carry in stock a full line of Tubes, Patches, Shoes, Reliners, Oils, Greases, Grease Cups, Radiator Stopleak, Leneogas, Pumps, Horns, Jacks, Cements, Repair Kits, Spark Plugs, Tools, etc.

Buy where you wish

You cannot get the prices or adjustments elsewhere that you can here.

If you cannot call write for prices, giving size of your tire.

Yours truly,

G. E. POTTER

GEO. E. POTTER
DISTRIBUTOR OF
AUTOMOBILE TIRES
29 KING ST. EAST
KITCHENER, ONT.

Mr. Auto Owner:

We want to have a heart to heart talk with you. So here goes.

Every Tire you do not buy here—we lose the profit on it.

Every Tire you do not buy here—you lose money on it.

Bad Business for Both of Us.

We have the Tires—Dominion, Maltese Cross, Goodyear, Goodrich and Dayton Airless.

We have the Price—$14.75 to $125.00.

We have the Stock—200 Tires and 12 different Treads.

We have the Guarantees—3,500 miles to 10,000 miles.

We have the Oils—C. S. Motor, Polarine, Cup Grease.

We have the Accessories—Pumps, Spark Plugs, Interliners, Patches, Wrenches, Oilers, Grease Cups, Sponges, Tire Irons, Etc.

Why not save your dollars when the saving is good?

We want your trade. Won't you give us a call?

G E. POTTER

Two samples of the letters sent out by Geo. E. Potter, hardware merchant of Kitchener, Ont., in connection with automobile accessories. These letters, distributed to a carefully selected mailing list, have brought good response. Note the interesting style and effectiveness which it gives.

Increasing Profits Without Adding to Overhead in the Auto' Accessory Dep't.

Accessories When Properly Merchandised Can be Made Big Profit Producers—Seeing What Each Car Needs and Calling the Owner's Attention Brings Much Business—Average Profit of 33 1-3%

By R. W. SHERMAN, Merchandising Director, Automotive Equipment Association

THE question of increasing profits without adding to overhead is one of tremendous interest the year round.

It has been found that the sale of automotive equipment presents an opportunity for all men in the automotive industry coming in contact with the buying public to accomplish the most desirable feat of increasing profits.

One of the many reasons responsible for this opportunity is the fact that the dealer does not have to hunt for customers. In every other business vast sums are spent for advertising. Eighty per cent. of this advertising expense is undertaken with a view to getting the prospective customer where he can see the merchandise. Department stores spend millions every year in dressing windows, writing letters and in other expensive methods of appealing to the buying public in an effort to get them inside the establishment. The gas pump, air line, etc., bring to the door of the hardware merchant a steady procession of car owners who need and want the products he has for sale. Their need for gasoline, oil and service is a much more effective drawing card than the expensive advertisement of firms in other lines of business. The men with whom the dealer comes in contact are all capable of absorbing this merchandise. All he has to do is "Ask 'em to Buy."

Every Car Owner a Prospect

A second point is the fact that every car owner is a prospect. It is exceedingly doubtful if there is a single car on the road to-day that could not be improved by the addition of at least one article of automotive equipment. A scrutiny of the cars that drive up to the average gas pump will demonstrate conclusively the truth of this statement. Dealers who make an effort to see what each car needs most, and call the owner's attention to the article that will help him most, will find a gratifying increase in their profit at the end of the month.

The sales are easy for two reasons. The usefulness of the article is great and the cost is comparatively small. The purchase of any of the numerous articles of useful equipment is an investment that pays large dividends in comfort, safety, appearance or performance of the owner's car.

A stock costs little. A very complete and representative stock of automotive equipment can be secured for a few hundred dollars. The dealer who has never stocked or sold this merchandise can, for less than two hundred dollars, put in a stock that will turn over rapidly and return him a large profit on his investment in a very short time.

The weather helps sales. There is no particular season for the sale of automotive equipment. Many of these articles are designed to fit seasonal needs. There are articles of equipment to aid the motorist in cold, hot, dry or rainy weather and irrespective of the kind of day it is, there is always some article of automotive equipment that will make a strong appeal to the car owner.

Goods are always ready for delivery. It is never necessary to run out of stock, no needless waiting for goods, no turning back of deposits collected from customers. There is always something that can be sold and delivered at once. In the event of a customer wanting a particular article that the dealer does not have in stock, this can be obtained from the nearest jobber generally within twenty-four hours from the placing of the order.

Special Salesmen Not Necessary

Special salesmen are not necessary. Anybody in the organization can sell automotive equipment from the office boy and stenographers to the manager and the proprietor. All that is necessary is a contact with the car owner, a knowledge of his needs and a knowledge of the article that he requires. A few minutes' explanation of the advantages of applying it to his car, a suggestion that he purchase it and the sale is made.

RAY W. SHERMAN,
Merchandising director Automotive Equipment Association

Competition is not keen. If a man is in the market for a car, for a house or a piano half a dozen salesmen are chasing him in an endeavor to secure the order. Expense accounts are run up and when finally one of the men makes a sale the remainder have to write off their expense accounts to profit and loss. This expense is not necessary ir the sale of automotive equipment. When the prospect has purchased a car, a house or a piano, he is out of the market, when he has purchased an article of automotive equipment he is still in need of many articles and is still a good prospect for the dealer. He never ceases to be a prospect for something.

It can be made largely a cash business. Almost every man who can afford to purchase a car can afford to, and will, pay cash for the automotive equipment he put on it. Getting cash for goods sold is an effective means of increasing profits. Goods sold on time are not so profitable.

Profits are Big

Profits on automotive equipment are greater. The profit, to the dealer, on automotive equipment runs from 25% to 50%. The average profit on a list of six hundred articles of automotive equipment figured out at a shade more than 33 1-3%. The profit on an hour of labor in the shop is a few cents, sometimes nothing. The profit on the sale of a car runs from 15% to 25%. The overhead on the selling of automotive equipment is almost negligible, no extra salesmen, extra time, expensive equipment or costly stock investment are necessary. If developed to the maximum the profits of this department can be made most attractive.

Opportunities for Sales Unlimited

Opportunities for the sale of this merchandise are unlimited. The customers who come to the gas pump all need automotive equipment. The men who bring their cars for slight repairs and service can be sold articles that their cars need. Sales can be made over the telephone. Where a repair shop is also conducted a man brings his car in to have the valves

ground and carbon cleaned. It may be found that his pistons are pumping oil due to faulty rings. Call the owner up, tell him of the condition of his motor and suggest that he have new rings put in which will overcome this trouble. He will appreciate the interest you show in his car and nine cases out of ten will tell you to put in the rings.

Shops catering to storage customers can have their men look over the cars during the night. Test the horns, look for broken headlights, or bad bulbs, see that the spare tires are in good condition and fully inflated. Where a spare rim is found without a tire or with a blown-out tire on it there is an excellent opportunity for the sale of a tire and tube. Dealers who look for the defects in the cars stored with them and suggest to the owner the purchase of the article which will remedy this defect can develop this most profitable department of their business.

No special knowledge is required in order to make sales of this merchandise. Anybody can sell. The following instances will show how easily these sales are made and that it is purely a question of "Ask 'em to Buy."

In looking over the cars that stop at the pump for gas you will frequently find tires that are not inflated to the proper pressure. One dealer found the following conversation brought him a good profit for a moment's conversation.

DEALER: "Your right rear tire looks a little soft. Have you a tire gauge?"

OWNER: "No, I haven't."

DEALER: (Taking bill in payment of gas) "I'll bring one out and test that tire." (Goes for change and brings back gauge, tests tire and inflates it to full pressure). "Running on soft tires breaks down the side walls and shortens the life of your tires. One of these gauges tells you just how much you have. Tires fully inflated deliver maximum mileage. It costs only a dollar and a half and pays for itself fifty times over on the first set of tires."

OWNER: "Dow do you use it?" Dealer shows him, tells him necessary pressures, etc.) "All right, I'll take it."

Another dealer specialized on rainy days. After giving a man gas, he would take a chamois out of his pocket and wipe the windshield.

OWNER: "Oh, don't bother! She'll be all smeared up again in a minute."

DEALER: "Why not let me put on a windshield wiper? You can give it a swing every few minutes and save yourself a lot of inconvenience, possibly avoid an accident."

OWNER: "How much are they?"

DEALER: "Only two dollars, and it may save you a serious accident."

OWNER: "Put it on."

Think it over and try it out. It won't cost anything to try and if tried long enough it will undoubtedly result in larger profits.

The profit on an hour of labor in the shop is small. Furthermore, you know beforehand almost what it is going to be. But you never can tell how great will be the profits in a few minutes of sales conversation with the car owner. Five minutes of sales conversation may bring more profit than hours of shop labor. Try it. "Ask 'em to Buy."

WHAT YOU SHOULD KNOW ABOUT AUTO ACCESSORIES

Anyone can sell accessories, no special salesmen required.

Competition is not as keen as in selling pianos, phonographs, etc.

Every car owner is a prospect for some accessory which will be useful and of small cost.

Average profit on list of 600 lines of accessories is 33 1-3%, and overhead expense is comparatively low in this department.

While 80% of ordinary advertising is spent to get prospects to a place to see the merchandise, the merchant selling auto accessories has the prospects come right to his store.

Accessory stock can be secured at small outlay. Goods always ready for delivery. A cash business. No particular season for business. Weather changes bring active trade in seasonable lines.

WANT CHANGE IN TRANSIENT TRADERS BYLAW

Kingston, Ont.—On the recommendation of the finance committee, the city council at its session on Monday night, passed the following resolution:

"That in regard to the Transient Traders' By-law, there are four distinct classes of Transient Traders to deal with, affecting civic revenues and protecting bona fide resident merchants. First, the trader who comes to the municipality on his own account, rents a vacant store for a short time, under the present maximum fee of $250. This amount should be increased to $500. Second, the trader who comes to stay, leases a store and shows every evidence of permanency, deposits $250 which is returned to him if he becomes a permanent merchant. No change. Third, the trader who comes to a municipality under the auspices of a resident merchant to solicit orders from samples. He should pay a license fee of $250.00. Fourth, the trader who brings a stock of merchandise to a municipality under the auspices of a resident merchant or auctioneer for a short period sale; he should pay a license fee of not less than $500 and the onus of proof of ownership of the goods be with the local merchant involved. That a petition be sent to the Ontario government, asking to have the Act amended so that municipalities may be allowed to pass by-laws to confirm the above, and that a copy of this resolution be sent to the member for Kingston."

Who Is Next?

FOLLOWING the lists of long service employees which have been appearing recently in Hardware and Metal, Thos. Davidson Mfg. Co., Montreal, have provided the following list of employees including executives of the head office and works of this company with twenty years or more of continuous service. T. R. Davidson, vice-president, points out that in addition to this list there are about one hundred with fifteen to twenty years' service and a great many with from ten to fifteen years. Following is the list:

	Years		Years		Years
A. O. Gee	53	J. A. Crevier	31	J. Laporte	24
R. McQuade	50	F. White	31	J. Guerard	24

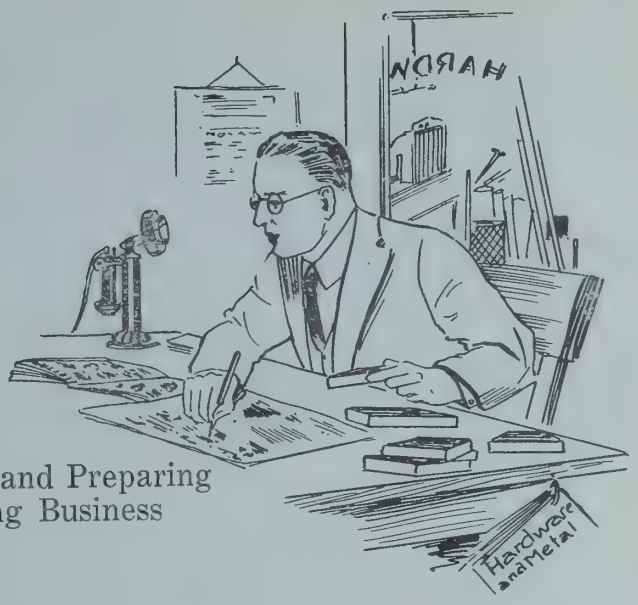
Getting A Spring Atmosphere Into The Advertising



Helps the Hardware Merchant in Laying Out and Preparing "Copy" for Spring Ads. Which Will Bring Business

THE FACT should not be overlooked by retail hardware merchants that judicious local advertising represents one of the strongest sales factors which is available. Especially under conditions now prevailing when the volume of business has declined somewhat and there is more competition for such business as can be done, the value and importance of the advertisement cannot be emphasized too much.

The principles which should be followed in connection with the advertising comprise the securing of illustrations of the lines to be advertised, the ability to briefly but adequately describe these lines, ability to make an attractive layout, all of which should follow only upon a thorough investigation of the effectiveness of the mediums to be used and which in turn should be followed with the linking up of other helpful forces such as window display, etc.

The range of lines which can be treated in connection with Spring advertising is very extensive and these lines lend themselves well to effective display. One outstanding advantage of Spring advertising is that everyone is anxious for the return of warm weather and the outdoor activities after the cold weather, and anything which makes a suggestion of the turn of the seasons is favorably received. It is important to get an "atmosphere" in the Spring advertising, and this when combined with aggressive "copy" will do much to start a buying movement of seasonable lines.

Some effective advertising of Spring lines by hardware merchants in various parts of the country will be briefly described herewith for the guidance of those planning advertising during the next few months.

As the season progresses refrigerator time will again be here. In this connection much effective advertising was done last summer on the grounds that food protection keeps down cost of living. This is an important point in connection with present-day merchandising, for it is a period of economy and everyone will buy where he can buy best. So too he is anxious to save whatever possible in connection with housekeeping expenses and the appeal for food protection and economy through the use of a refrigerator will oftentimes get a favorable hearing where otherwise it would fail. An ad is shown in which it is pointed out that the proper preservation of food goes a long way to reducing the cost of living in addition to making for health in the household in warm weather.

Early Start on Flies

The fly season will also soon be here and some effective advertising done early should result in a big sale of screens and doors. In one of the ads illustrated it is pointed out that it is just as easy to keep the fly out as to swat him once he is in, pointing out that now is the time to have the windows and doors screened. Another firm emphasizes "Screen Early" in all its ads., pointing out that by so doing the disease-infested fly is kept out of the home at the season when he does most damage.

Mechanics' tools for those handy around the house who contemplate some fixing up or new construction might also be advertised. It is noteworthy that in recent years property owners have become large purchasers of tools, realizing the saving effected by making minor repairs on their property.

Selling Spring Motorists.

Spring motorists' needs are many. Different grades of oil and grease are provided for lubricating the motor car in the summer months as compared with the winter and some authoritative advice on this subject might be given in the ad. An advertisement entitled "Scientific Lubrication" is shown herewith outlining some of the scientific developments which have provided a specific lubrication for the purpose required and by the use of which the maximum service is secured. An ad might well be devoted occasionally to such lines and including the wide range of accessories required by the motorist in the spring.

A spring opening was a feature of the Ingram & Davey Ltd., St. Thomas, Ont., store last year and it proved highly successful when conducted in combination with other effort. The setting aside of a particular time at which to announce the Spring Opening makes it stand out more clearly in the prospect's mind that now is the time to think of buying some of the required lines especially applicable to spring needs. In the Spring Opening ad. used by this firm, kitchen utensils are illustrated in view of the usual need for some new equipment along this line after the winter's cooking, brooms, electric appliances, lights, paints, sporting goods, tools, farmers' requirements, seeds, etc., are all dealt with.

Garden Tools

Dealing with garden tools, a recent ad. of a Toronto hardware firm says "Good tools make a big difference. Every gardener, whether amateur or otherwise, likes good tools to work with and will find at this store one of the finest assortments. In our stock is almost every tool, from a trowel or pruning knife to a lawn mower or roller, including spades, shovels, digging forks, rakes, hoes, etc."

A general ad. for Spring by the same firm says: "Now is the time to put your house in order. Repairs around the home which have been neglected all winter should be attended to now without further delay. You will be agreeably surprised to learn how much of this work you can do yourself if you just have a few good tools from our stock."

A special appeal to motorists is made as follows: "Begin right this season. Don't try to get along without a complete set of tools necessary for making minor repairs. You will find many helpful suggestions on visiting our accessory department."

McKelvey & Birch, Limited, Kingston, point out in an ad. entitled "Housecleaning Helpers," that Spring is coming with the open window and housecleaning times. To help in this annual operation paint for outside and inside use, washers, boilers, boards, etc., are illustrated.

An ad. by Mills Hardware Co., Hamilton, deals with step ladders, floor brooms, mops, floor wax, polishing brushes, porch gates, roller skates, kalsomine brushes, roofing, fencing, coping, saws, wall finish, tools, wheel barrows, washing machines, spading forks, lawn and garden rakes, lawn rollers. This represents a wide range of Spring lines, and all are illustrated and described.

Some Special Lines.

After the staple Spring lines are dealt with there are some other lines which might be treated, including for example, serving trays. An ad. on this line by an eastern merchant says "You can always find use for extra serving trays at your social functions and when the warm weather comes they'll be needed for serving ices on the verandah. The pretty oval trays we are showing are in mahogany effect. They are attractive and can be made more so by slipping a doiley under the glass bottoms.

Dealing with lawn requirements, another ad by a hardware merchant says "Keep Your Lawn Beautiful. Nothing so enhances the beauty of your estate, be it large or small, as a well kept lawn with the grass cut at frequent intervals A good lawn mower costs so little that no man should borrow his neighbor's, and with good care one will last almost a lifetime.

For spring and early summer camping trips, another ad reads "Make that trip a real joy with the right equipment. The seasoned camper goes armed with all the comforts he can carry along. It will pay you well to take the petty discomforts out of your trip by choosing at this store some of the following: tents, cook stoves, fishing tackle, thermos bottles, hammocks, axes, compasses, flashlights, auto accessories, outboard motors, etc."

Spring Lines Shown

The advertisements illustrated herewith feature roller skates, coaster waggons and other wheel toys for the children in connection with which it might be pointed out that with the clearing away of the winter snow and

A group of Spring ads dealing with garden tools, outdoor facilities for sport, etc., giving some good ideas for seasonable advertising.

the drying up of the roads the children will be anxious to get out their wagons, coasters, etc. Tools for the spring garden and lawn will soon be called for and due to the increasing tendency in recent years for home gardens to be planted, there will probably be a considerable repeat trade in tools, seeds, etc. Gifts for spring brides are also dealt with in some of the ads shown. The ad by Manville Hardware Co., Prince Albert, B. C., in addition to dealing with lines mentioned devoted a section of the ad. to paints, pointing out that "no other investment you can make will so amply repay in satisfaction and in dollars and cents value as the money spent on painting." Varnish and wall finishes are also dealt with as there is a big spring call for such lines to brighten up the home for the summer season and carry the spring housecleaning to a satisfactory conclusion.

A Western hardware merchant, C. H. Horsley, Castor, Alta., recently had a rather effective ad dealing with spring lines including locks, varnish, brushes, pipes and elbows. Regarding the latter he states, "It is easier to prevent a fire than it is to stop it after once started. See that pipes and elbows are in good shape for the balance of the season—replace the worn out with new pipe."

A range of suitable spring lines was recently shown by Congdon and Marshall, Dunnville, Ont. Dealing with floor varnish and paint, it states, "How about your floors, are they rough? Is it a hard job to keep them looking right. Let us show you how you can make them smooth and attractive at small expense and with little trouble. We have a fine stock of floor paints that will dry hard over night, floor varnishes that will not show heel marks or turn white."

Other items dealt with include alarm clocks, incubators and brooders, ironing boards which stand firm when set up for use and which can be folded away and put into a small space out of sight." Pipe wrenches, "the only kind worth buying are ones with a good grip that will release quickly when required and which have well tempered jaws." Cold solder, butcher knives, kitchen knives, etc., are also dealt with briefly and illustrated.

An ad by Northern Hardware Co., Edmonton, dealing with alarm clocks says, "Get up on time. No need being late for work, trust..... to get you up on time.....rings, runs and stays on time and he sells for....."

Concerning scissors it says, "people who appreciate the fine cutting qualities of real good scissors will buy our guaranteed.....and other well known makes at prices that are decidedly moderate."

Dealing with Spring builders' hardware lines, McAvity's, St. John, N. B., state, "Good tools. Our tools are welcome companions to careful and experienced work men. Particularly when a man has a job requiring very careful attention does he appreciate dependable tools that give real service. Careful workmen are steady customers at this store because they have proved by experience that our tools meet all requirements expected of them. YOU'LL get a lot of tool satisfaction by selecting here."

An ad by the same firm dealing with vacuum bottles says, "The dispenser of comfort that nowadays we can ill-afford to do without. Fruit juices, lemonades, any iced drinks, kept in a vacuum bottle can be poured forth hours later, still cold and dewy. Hot or cold beverages can be carried to work in the lunch kit.

(Continued on page 158)

The Flies are Coming

Be prepared—screen your windows and doors now with well made, close-fitting screens that will keep them out of the house. We are prepared to fill your screen needs with entire satisfaction—window screens and screened doors in the wanted sizes, each one well made, frames of well-seasoned lumber covered with good quality wire netting. We can screen all your windows and doors at small cost.

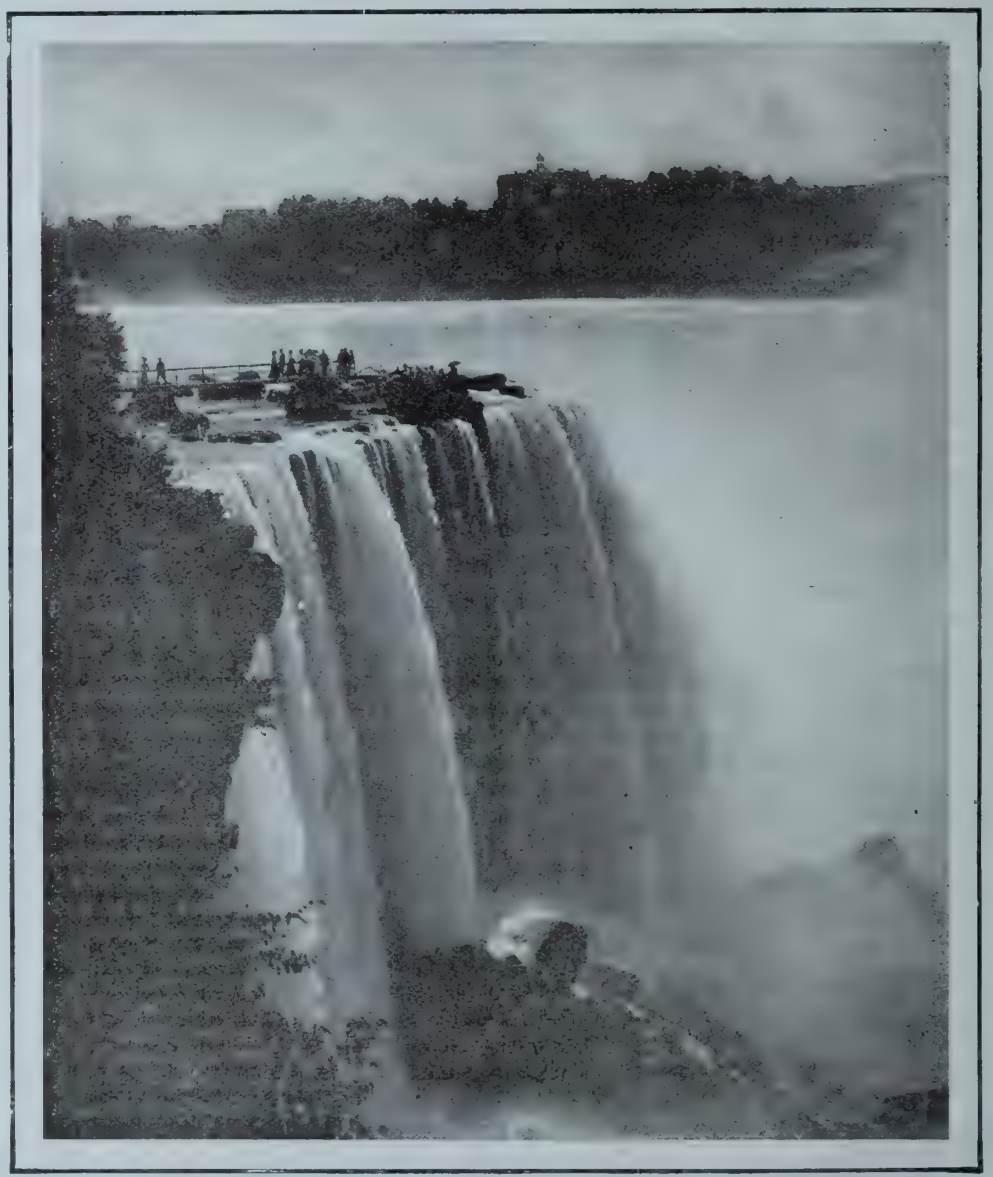
Estimating Electrical Requirements

Estimated That $105,000,000 Will be Spent on Electrical Appliances in Canada in Next Three Years—Setting a Quota for the District and Plans Which Will Help Achieve That Business—Increasing Production of Electrical Energy Throughout Canada and Educational Effort Guarantees Widening the Volume of Business.

IT IS doubtful if any industry has undergone as rapid growth and development in recent years as has the manufacture and distribution of electrical equipment. Nor is there any industry which has better prospects of an ever widening field for future trade. In all provinces of the Dominion the development of electrical power from natural sources such as waterfalls, is proceeding apace. In Ontario the great Niagara, which is illustrated herewith, continues to provide motive power, light and heat for the industries of the province, and recent development of the Chippawa scheme has added greatly to the production of electricity in that section.

The plan suggested for the development of the St. Lawrence river waterways provides that the revenue from the sale of electric power, generated by the vast waterpower of that river, will pay the charges on the capital invested in deepening that river for ocean trafic. Progress is also being made in the prairie provinces and British Columbia, for the harnessing of natural waters to provide the much needed electricity for which an increasing number of uses are being found.

This development, indicates that no fear need be held as to the future volume of electric power to be available. Therefore steps to encourage the wider use of electricity in industrial and home life may be encouraged. A glance at the possibilities in Canada indicate that there is a wide field for the use of electric appliances which are sold by the hardware merchant. It has been estimated that in the next three years Canadian people will spend in the neighborhood of $105,000,000 in electrical appliances including fixtures, irons, lamps, toasters, percolators, vacuum cleaners, etc., but exclusive of wiring and repair work. This figure is said to have been established by authorities who have based their deductions on past and present conditions and average requirements.



The falls at Niagara, below which are the electrical development units which produce the necessary energy for motive power, heating and lighting throughout Ontario.

At the present time the average electrical development per capita in Canada, is second only to Norway, and this country has the greatest available sources of electrical power development in the world. Canada has as high a percentage of wired homes according to population, as any country in the world, and more than well developed countries like the United States. This indicates the range of possibilities in connection with the sale of electrical appliances, as wired homes are prospects for a wide range of electrical goods.

It is estimated that by the middle of this year there will be approximately one million homes in Canada using electricity, and while a fair portion of these homes are enjoying the use of electric current for lighting, there are only about 5 per cent. of these homes which enjoy the advantages of the labor-saving devices.

The figure of $105,000,000 formerly mentioned, was arrived at by estimating that every home must have an average of ten lamps a year, thus, giving

It has often been said that one of the really effective factors in selling electrical appliances is that they carry such a strong appeal both from the standpoint of beauty and facilitating of work. The beauty of a display of electric fixtures, lamps, etc., as illuminated at night is well revealed in this display by Ingram and Davey, Ltd., St. Thomas. This firm has some novel ideas in connection with the sale of electrical appliances as set forth in the article herewith.

30,000,000 lamps required with an average value of $15,000 000 (not including lamps for stores, offices and factories.) Sales of ironers and toasters are estimated at about $2.000,000, based on past requirements. Then there is the vacuum cleaner and the clothes washer, both articles whose popularity is greatly increasing with the housewife who is being educated to the economy of time-saving in house cleaning. The electric range is also expected to have a much larger sale in the next year or two than in the past. In addition to these items there are the fixtures, fans, heaters, etc.

Having in mind this broad list of articles it is not thought to be out of the way to estimate that each wired home will spend $35 per year for the next three years on electrical appliances. This multiplied out gives the total referred to. It is estimated that 100.000 homes how good they are. Both of these ranges and sundries, making a total of $30,000,000; 100,000 homes will spend $200 each for electric washers, fixtures, etc., totalling $20,000,000; 300.000 homes will expend $100 each for vacuum cleaners, fixtures, etc., totalling $30,000.000; 200,000 homes will spend $80 each for fixtures and sundries, totalling $16,000,000; 300,000 homes will spend $30 each for small items, such as lamps, etc., totalling $9,000,000. Grand total $105,000,000, not including wiring and repair work.

Having in mind these huge possibilities, the merchant should be able to size up his local requirements and make plans to get his share of it. He can divide the population of his district proportionately with the totals for Canada, as shown above, and get a fair idea of what his district should be able to produce in the way of electrical trade.

Hardware Merchant Outdistances Hydro Shop in Selling Electric Appliances

Persistent Demand of People in Rural Districts for Electric Power Broadens Field of Trade—Must Take Care Not to Overstock in Certain Lines.

WITH SURVEYS under way for a dozen extensions of hydro radial lines into the district around St. Thomas, Ont., and petitions being forwarded continually asking for the construction of other lines, Ingram and Davey of St. Thomas, Ont., are looking for a steady growth in the big electrical trade they have already built up.

For some time past the St. Thomas hardware firm has been one of the largest distributors of electrical goods in Western Ontario and their special display rooms for electrical equipment on the second floor of their store have come to be regarded by the people for 25 miles around St. Thomas as the headquarters for anything they require. This hardware firm has not only met the local hydro shop and a dozen other firms who are handling electrical lines, but has distanced them and is still making new sales records.

People Are "Sold"

"The people are 'sold' on electricity," said Lawrence Davey to Hardware and Metal. "They know by actual experience that it will do their washing or light their home and perform a dozen other things quickly and efficiently and economically. That is one reason why there is such an enormous demand for power lines from the country districts. The farmers and their wives who are at present without hydro will not rest until they are enjoying the comforts an conveniences that others are having. this offers splendid business opportunities for the merchants who are handling electrcial goods. There is really a double opportunity. The man or the woman who has purchased one or more electrical articles knows from experience what they will do and will not be satisfied until other conveniences are secured. These people are most enthusiastic boosters for electrical equipment. Then there is the person who has no electrical conveniences but who knows from seeing them in other peoples' homes how good they are. Both of these classes of people are real 'live' prospects."

Ingram and Davey have been going after the electrical trade by arranging splendid window and store displays and backing them up with attractive advertising. As may be seen from the illustration one of their big show windows is frequently used for boosting sales of electric lamps and other lines.

A window like the one shown carries a real appeal to every home maker, just as soon as he or she sees it. It makes an excellent display in the day time and an unusually fine display at night when the lamps are lighted. The desire to buy one of those cosy comfortable looking lamps and have it in ones own home is irresistible to scores of men and women who have none and the window displays have been directly responsible for any number of sales.

Other lines are frequently shown and demonstrations of washing machines, vacuum sweepers, electric stoves and other utilities are held regularly and with excellent success.

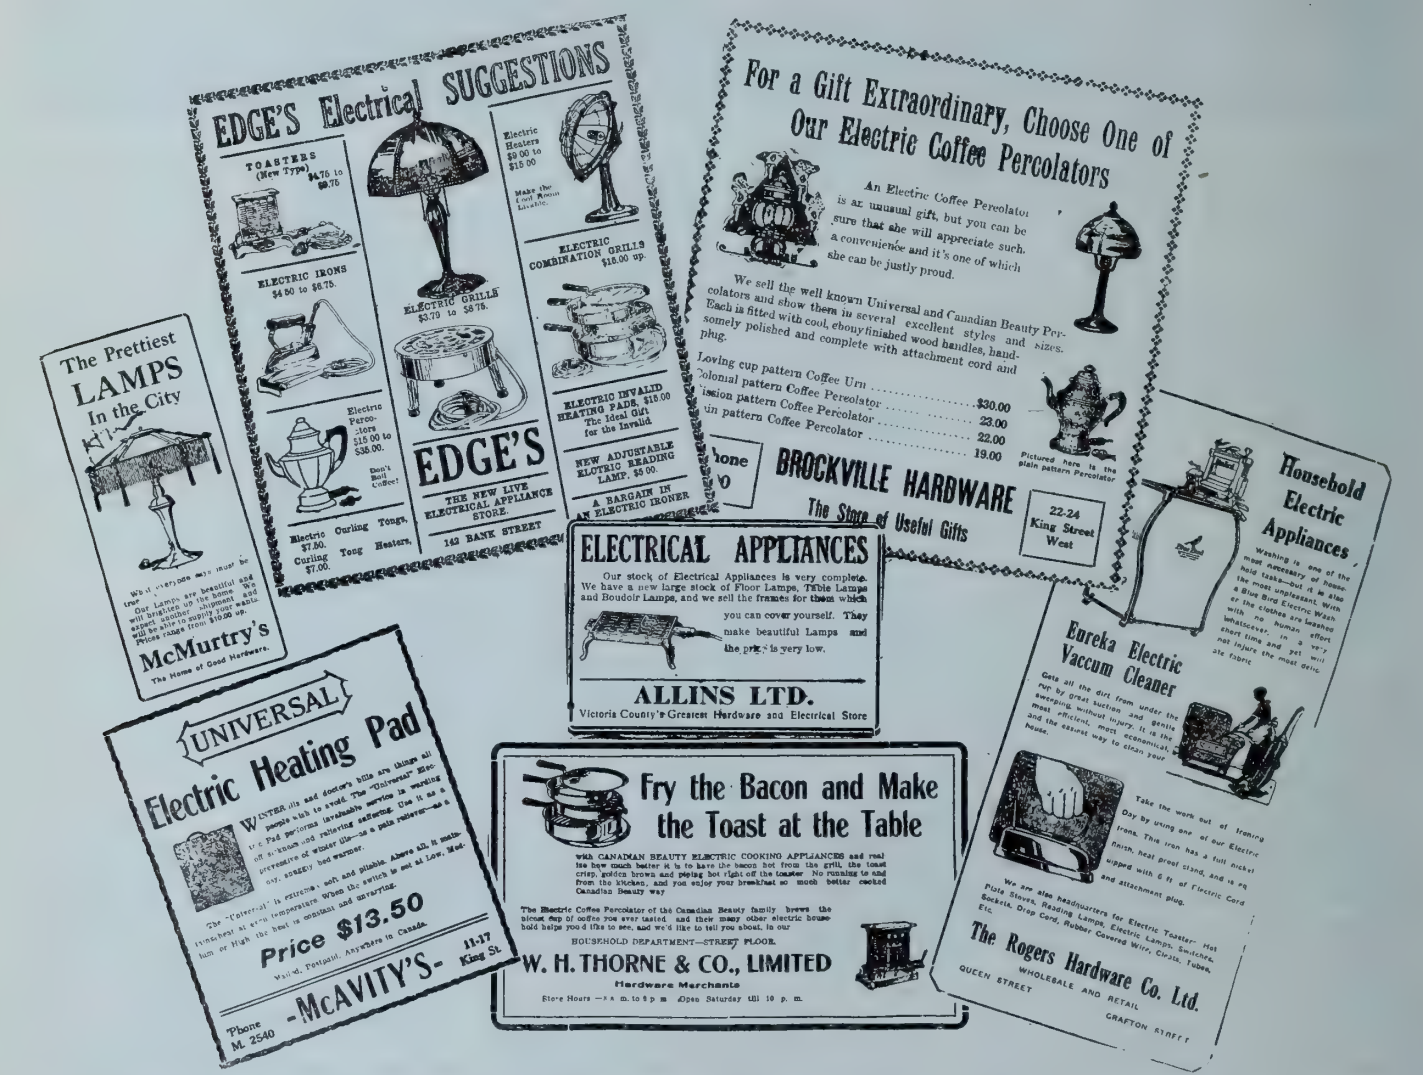
An All Year Line

"One of the beauties of the electrical trade," said Mr. Davey, "is that it is an all year business. There are seasonable lines of course such as electric fans but the demand for stoves, lighting fixtures, sweepers, etc., knows no seasons. We usually sell a large number of electric lamps for Christmas gifts but during the spring and fall wedding periods there is a big call for them also and they make really handsome and serviceable gifts that are appreciated in any home."

The bride who gets a nice electric lamp and an electric iron is not long in wanting an electric washer and an electric sweeper, or a big electric parlour or hall lamp. Then she wants an electric stove and a fan and other equipment and the more she has the more she wants and she tells her friends about them and they want them

(Continued on page 153)

Some Hardware Merchants Electrical Ads.



Some recent advertising of electrical appliances by hardware merchants is indicated in these reproductions. The ad. by G. McMurtry, St. Thomas, Ont., deals with portable reading lamps. A wide range of electrical appliances including toasters, irons, percolators, lamps, grills, heaters, etc., are illustrated in the ad. by W. G. Edge and Company of Ottawa. Brockville Hardware Company, Brockville, Ont., suggest percolators, lamps, etc., as suitable gift lines, and Allins, Ltd., Lindsay, Ont., advertise a very complete stock of appliances. Rogers Hardware Co., Charlottetown, P. E. I., advertise washers, vacuum cleaners, and irons and numerous other lines indicating that as far away as Prince Edward Island the hardware trade is actively selling electrical appliances. The ads by W. H. Thorne and Company and T. McAvity and Sons, St. John, deal with heating pads, grills, toasters, etc., in an attractive and effective manner.

A Lock Display Sells Other "Finishing" Lines

A Lock "Parlor" Which is no "Sitting Room"

Flett's Limited, Vancouver, With Most Complete and Exclusive Range of Lock Sets Have Developed Active Business—Most Other "Finishing" Lines Depend on Lock Satisfaction—Tools Accessible to Customers—Some Pointers for Sporting Departments.

"I WOULD like to see some of your door locks!" In the J. A. Flett store in Vancouver, a request like the above is the cue to be shown into as complete a "lock" parlor as is to be seen in the West.

In a special room, within the store, locks of every size, design, color and finish are displayed mounted on wood. Each lock, and its fittings, is mounted exactly as it would be on the "job" and its bolt action, method of mounting, and completed appearance need not be described, they can be shown and demonstrated.

The three walls are composed of cabinets. On the doors various plates and handles, pulls and stops are mounted, and on further sliding panels within the cabinets, further choices of ornate locks and fixtures are likewise mounted.

Harmonize With Various Woods

Samples of all the usual finishes in woods are shown, with locks in designs and finishes that harmonize, are displayed for ready comparison.

Hardwoods and softwoods, finished in mission, greys, naturals, flemish, rosewood and mahogany, in infinite varieties, serve to demonstrate the many beautiful designs and finishes in which locks, hinges, knockers and letter boxes can be purchased in the store.

Either the prospective homebuilder, or the contractor may find here many suggestions for unique finish, at the same time he is shown the patterns and styles that will suit that finish best.

Every inch of the "lock parlor" as shown above has been utilized to best advantage by Flett's Ltd., Vancouver, in displaying lock sets. A wide range of door plates, knobs, letter boxes, night latches, door chains, etc., is shown, and the tastes of all up to the most exclusive requirements can be met.

Some of the locks are quite patently built for strength; their mechanism is designed to foil the deliberate housebreaker. Others are highly ornamental, and made to meet the demands of the builder with "period" architecture in mind. Whatever the factors that govern the choice of locks, that prospective customer will be seated at an oak table, in a comfortable chair, and locks, hinges and window catches, etc., will be shown to him in any style that he fancies. They are all in full display around him, in seemingly endless variety. Ample lighting makes the examination of all samples a pleasure.

P. D. Gordon, the present proprietor, came from Fort Saskatchewan two years ago, where he sold out his interests in the Gordon & Dubuc business.

Hinges on Lock Satisfaction

Speaking of his lock department, Mr. Gordon said to Hardware and Metal, "All the finishing hardware purchases

hinge on the satisfaction that the buyer gets on locks. All the other odds and edds that go to equip a building, I mean the sundries that the hardwareman sells, are bought in terms of locks. We have as full a range of locks as can be found in almost any city; our sales of finishing hardware respond very creditably to our efforts to show a complete line." A line of theatre fittings, panic-door-bolts, etc., is also shown.

Unlike the business in Fort Saskatchewan, which was a general hardware business, Mr. Gordon is, in the J. A. Flett Ltd. business, specializing in four departments only; finishing hardware, sporting goods, tools and cutlery.

Tools Accessible to Customers

The range and completeness of the tool and precision instrument display may be gauged from the photograph. The feature of this display is, of course, the fact that it is accessible to the purchaser. The mechanic in search of a suitable tool for the particular purpose he has in mind, is not kept back by a counter; he can get as close as he likes to examine the various offerings.

Athletes in Sporting Department

"In the sporting goods department," said Mr. Gordon, "we employ as salesmen only those who have distinguished themselves in athletics. We find it as helpful to have sports to sell sporting goods as we do to have enthusiastic anglers to sell flies, spoons, rods and creels to fishermen."

The fishing tackle is displayed in large show cases devoted to fishermen's supplies. Large show cases show all the sundries that the golfer needs.

Rifles and shotguns are displayed in racks, and various sizes of ammunition suited to the various makes of rifles are neatly displayed above the gun racks.

Among the sporting goods this merchant included the wool sweaters, caps, and sox used in lacrosse, football, hockey, basketball and also baseball suits.

In order to get a reputation for being a headquarters for these garments, a full range of sizes and color combinations for all schools, colleges, university, teams and clubs is maintained at all times.

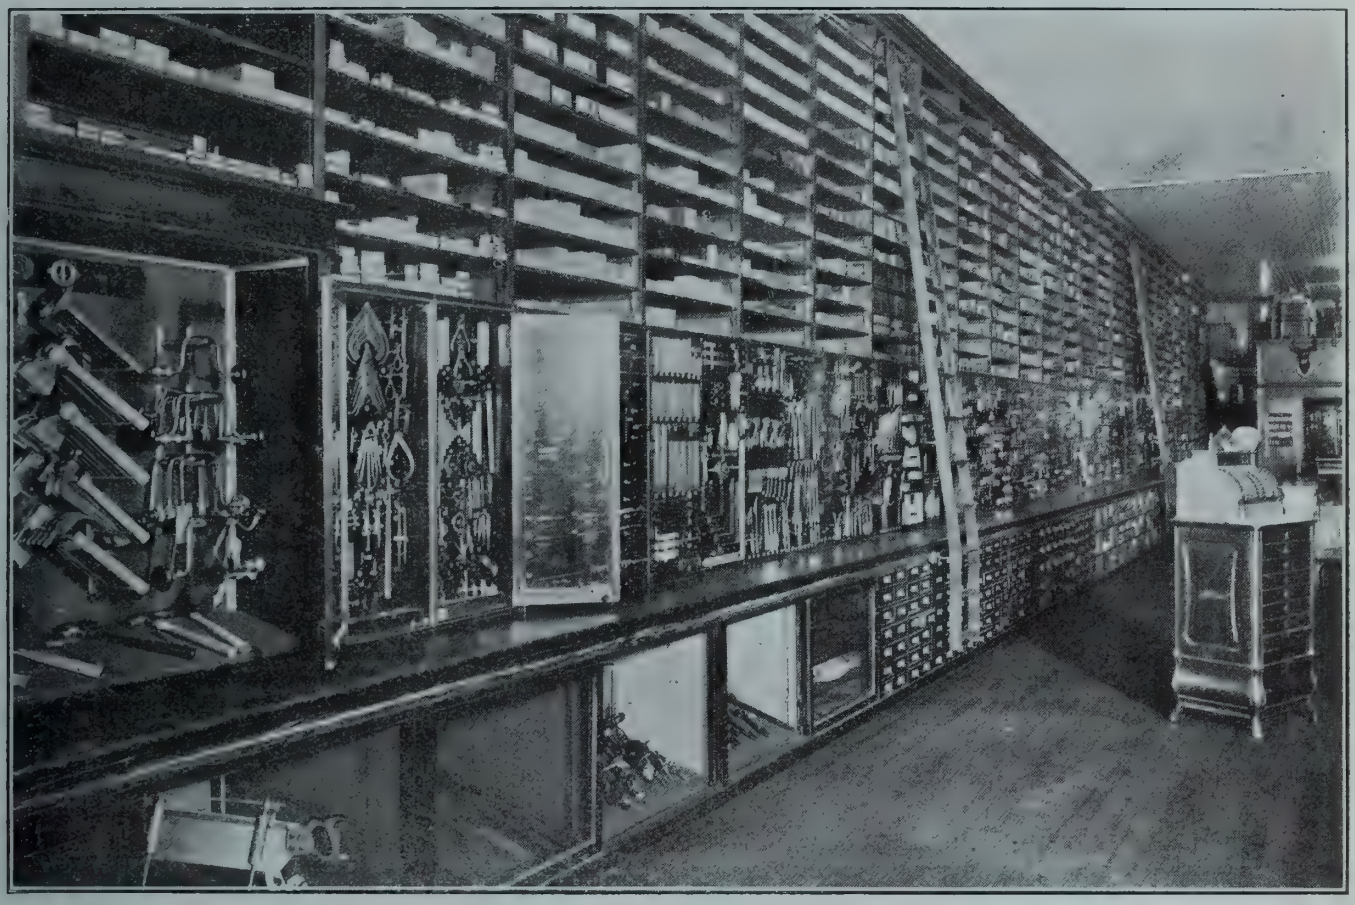
"The trade of athletes and players must be cultivated continually," says Mr. Gordon, "it is not something that you can acquire in a short drive with cut prices. We have found the best scheme to attract the attention of the various athletic bodies, is to donate cups, trophies, medals and prizes at the various track meets, and for league games."

The whole appearance of the Flett store is very fine; the dominant feature, however, that catches the customer's attention, is the de luxe loc room, which scintillates like the "cut-glass parlor" in the metropolitan jewellery store.

Cultivating Trade of Athletes and Sports

Much of the success of the sporting goods department is due to having a complete stock and to cultivating the trade of athletes and local sports. Modern store equipment here reveals attractively, a wide range of sporting goods including rowing machines, baseball bats, footballs, tennis racquets, boxing gloves, fishing supplies, rifles ammunition, baseballs, etc. Note the special racks for baseball bats, and the attractive arrangement of the other lines with reserve stock easily accessible on ***shelves above the displays.***

Tools Easily Accessible To The Customer



Having the tools, precision instruments, etc., handy to the customer to examine closely, has greatly helped the sale of these lines for Flett's Ltd., Vancouver, B. C. A wide range of tools and instruments is here shown, each neatly arranged and displayed to the best advantage in wall cabinets or with samples affixed to wall cases. There is plenty of room for reserve stock on the shelves above and in the drawers below the display. No counters keep the customers from walking right up and handling the prospective purchaser, and this helps greatly in the sale of these lines.

HARDWARE MERCHANTS OUTDISTANCE HYDRO

(Continued from page 150)

too, at least that is the experience of Ingram and Davey.

Mr. Davey regards the firm's window and store displays of electrical goods as one of the best possible advertisements they can have. At all times these goods are kept in their very best conditions. They naturally lend themselves to making an attractive display, but by keeping them spotless at all times, and attractively arranged in the show room an added appeal to the buyer is made.

The firm has developed a nice trade in lamp shades. Two plans are followed in connection with this business. The firm will either sell the prospective buyer a shade all finished and ready to put on, or she can buy the frame and materials and make it herself. Some women like to do this.

"One thing a merchant has to watch in the lamp shade business," said Mr. Davey, "and that is not to get too many of any one kind on hand. The styles change so rapidly that the stock must be kept up to the minute, but they are good sellers and carry a nice profit and we find lamp shades a good line to handle."

A Special Stand

The firm's business in shades has developed to the point where they are warranted in equipping a special section where nothing but shades are shown. These are mounted on a simple and easily constructed display stand and sockets are wired and connected up under the shades so that the prospective buyers can see the lights turned on and judge for themselves just how nice they are going to look in the home.

OWEN SOUND CEMENT MILL BEING DISMANTLED

The Shallow Lake cement mill near Owen Sound is being scrapped. Part of the machinery is being taken to Lakefield by the Canada Cement Company. The plant has been inactive for about 15 years. It was at one time one of the largest cement plants in Canada. The original plant at Shallow Lake was built 38 years ago, to manufacture Portland cement by a process discovered by the late R. J. Doyle. The bottom of Shallow Lake was covered with great deposits of marl. The first plant was destroyed by fire and was replaced by another that was more efficient. Employment was given to from 500 to 600 men at the busiest times.

The marl process was found to be less economical than later methods utilized at Port Colborne, Lakeview, Belleville, etc., and the Shallow Lake plant was closed by the Canada Cement Company soon after the merger was formed.

Plan of Layout of a Sheet Metal Shop

Trend Toward Higher Efficiency in Sheet Metal Industry Emphasizes the Necessity of Most Suitable Layout of the Shop to Save Time and Effect Economies.

Written for Hardware and Metal by O. W. KOTHE, Principal, St. Louis Technical Institute, St. Louis, Mo.

A SHORT time ago a fellow-workman submitted a sketch of a proposed shop, which seems to be quite practical and the sketch is shown.

The great idea with the majority of shops is that so many feel that they have the very best arrangement possible under the conditions, and maybe they have, and maybe they have not.

Industry is trending more and more to higher efficiency; that is to cut out lost motion in going back and forth from one machine to another machine in order to turn out a job.

Just what is required in each case is not an easy matter to set forth in a sheet metal shop because there are such a great variety of conditions that must be met with, and so what may seem a good idea for one person may not be approved by another person. This will be according to the different light of conditions in which the two individuals look at it.

It is thought best among most able employers to bring in the material in one door, preferably at the back of the shop, and thereafter arrange the machines and shop equipment so that the iron can be worked up without hardly any back and forth movement in a continuous progression until it is ready to be taken out of the shop.

So in this plan we have the iron rack and the tin plate bench, both of which may be work benches and also may be only racks, but in this case they are also used for work benches.

Need Assembling Bench

One of the things missing is an assembling bench in the middle of the shop, a bench that is preferably on castors to enable a shifting about.

A bench of this kind is quite important in sectioning along work together as it can be easily shifted in such positions to overcome awkward positions.

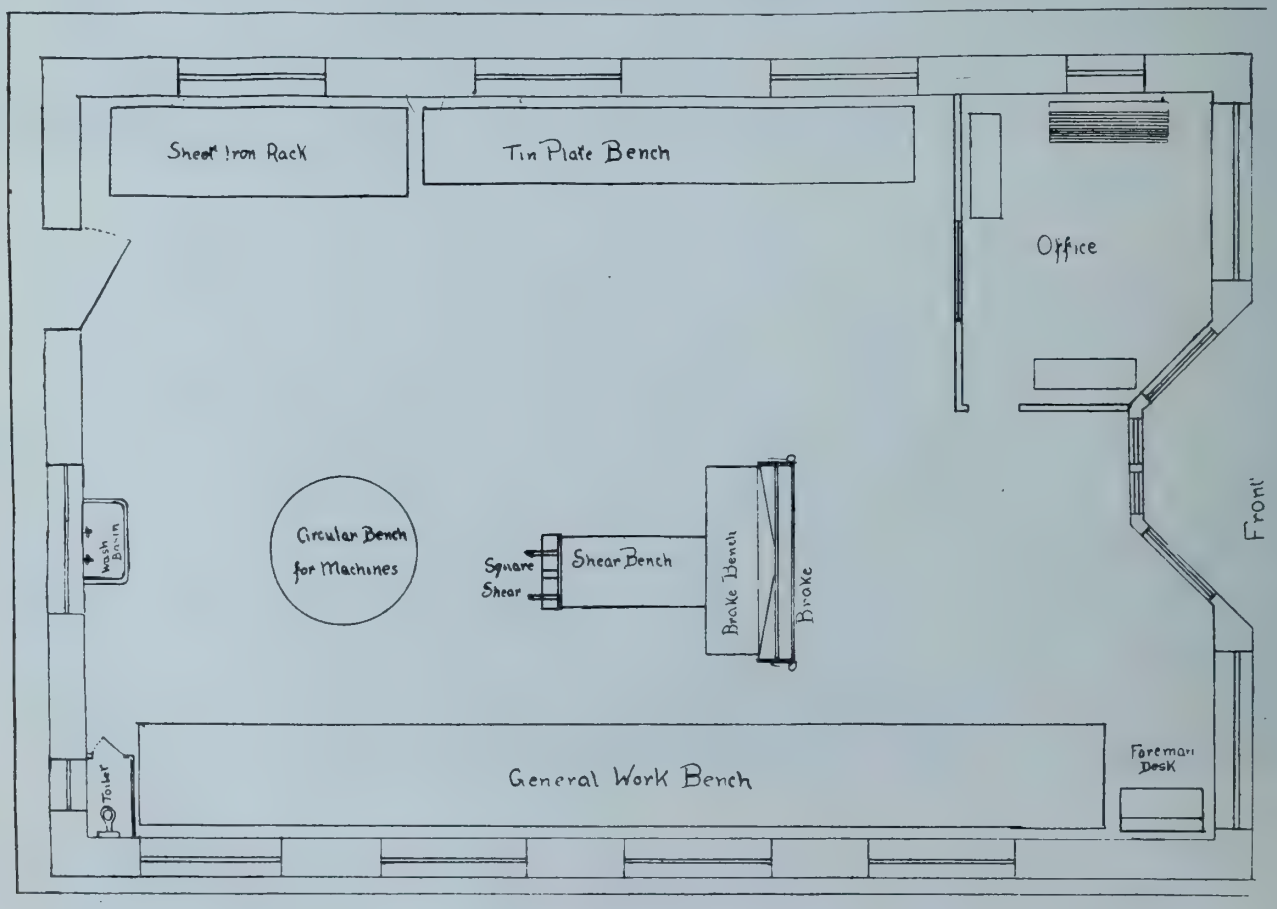
Awkward positions in executing work are a great handicap and consume more profits through labor movements than a person will ordinarily admit.

Other machines as the cornice brake, square shears, and bench, also for smaller machines can be placed preferably close to the sheet iron rack. This enables cutting up the metal and marking it off and forming it up without tearing it all over the shop and then back again in order to get it worked up for assembling.

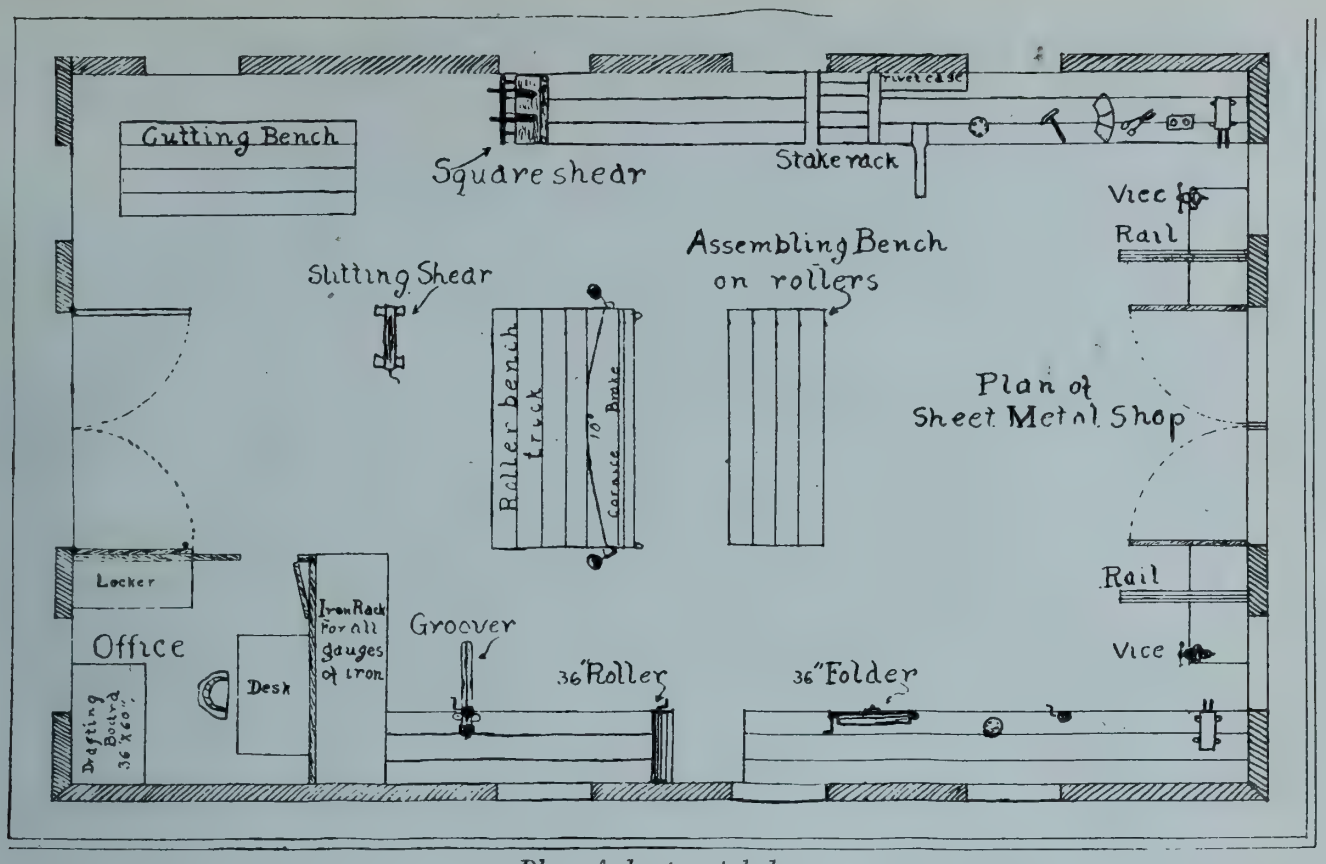
The matter of general work benches rests pretty much with individual opinion, but all in all there is no doubt but what the individual work bench 8 or 10 feet long and 30 or 36 inches wide is the most satisfactory.

On long work benches as this drawing shows workmen are more apt to use it as a store room and several workmen are not as apt to respect one another's rights so that one workman must always clean up and straighten up after the other.

This is a condition that also consumes



Work Shop Design



Plan of sheet metal shop

profits and is not often considered worth while in changing. Where a workman has his own bench, he takes pride in keeping it in shape; he sees that it is not a store room and his tools and equipment are always placed where he can reach them we may say, in the dark.

A work bench is pretty much like a business manager's office desk, and for that matter a warship deck; it should always be clear for action.

There are other things that also enter in the design of the shop, as the office and the forman's nook, and one of the main features is to see that there is plenty of light to reflect throughout the shop. Windows were made to look through and to permit light to fuse inward. To let these windows get all smoked up with fumes and dust is not good policy, especially when every shop has an apprentice and no doubt several helpers at times.

It used to be the duties of the apprentice and the helpers in the old days to keep the shop and tools, machines in place and in shape as well as be on hand when somebody needed help. Too little appreciation has been placed on this important feature in late years and the trade will no doubt be better off the sooner it gets back to progressive and constructive routine.

Another Design

In the second drawing we have another shop design submitted and the artist took considerable pains to show how he wanted the various equipment.

But here we see the iron racks are placed near the doors, but the cutting benches and the shears are placed on the opposite side of the shop.

This, of course, requires carrying the sheets across the shop and marking and cutting them out and then bringing them back to the folders and rollers, and then taking them back to the stake work bench if other assembling is to be done. This makes at least two unnecessary movements back and forth.

It seems to the writer that if the iron rack is placed close to the desk, the cutting bench should be where the roller bench truck is at the brake.

Observe this roller bench truck can be used as a cutting bench or a bench for moving material to the brake for forming up the work.

Under this arrangement the 36-inch folder would be placed on the same bench with the roller and the groover, because you would then have a continuous progressive movement.

The 36-inch folder placed where it is, would require carrying the sheets from the square shears to this holder and then back to the roller.

But with this holder placed between the holders and the groover, it is as convenient for one man to fold there as over there.

Then as the sheets are folded another man can roll them if need be, while still another man groove them if need be, and still one man would not be in another man's way, carrying the material back and forth.

The assembling bench is a splendid addition, since this bench on rollers and the roller bench can often be placed end to end and then used as one long bench.

Many features in the design of the shop are, of course, governed by the work that will be catered to and each man generally has his own individual ideas.

But it is always well to give an eye to efficiency and always leave the subject open for improvement or readjustment, rather than closing the mind against such features.

WILL INCREASE PETROL SUPPLY

One of the most important of recent developments in the oil industry and which also will have an effect on the automotive industry, is a business arrangement between two of the largest factors in the American oil industry, the Standard Oil Company of Indiana, and the Texas Company, whereby production of gasoline may be considerably increased.

The two companies have effected an arrangement whereby each has the right to operate under patents held by the other pertaining to the pressure cracking of crude oil in connection with the manufacture of gasoline and other petroleum products.

The granting of licenses to other companies to use these patented processes, through which the greatest percentage gasoline is produced from crude oil, should result in benefiting the oil industry as a whole and also increase the supply of petroleum products elsewhere for the use of internal-combustion engines. Larger production of gasoline should prove a stimulus to the automo-

Sold Fifty-six Electric Washers in a Year

J. E. Leduc, Hardware Merchant, Montreal, Applies Energy and Twentieth Century Business Methods — Paints, Varnishes and Wall Paper Receive Close Personal Attention

ALMOST any hardware man who when walking along the street noticed a large, covered, bright red motor truck with "Hardware" in prominent letters, would look twice and follow the conveyance with his eyes until he has obtained the name of the merchant who has devised this distinctive means of delivering goods to his customers. A representative of Hardware and Metal noticed a truck of the above description one day recently in Montreal, and proceeding to the address named—Mount Royal, East—found J. E. Leduc's retail hardware store.

Mr. Leduc, with his salesmen, was very busy at the time, for his store was well lined along the counter with customers. Before really getting acquainted the opportunity presented itself of hearing Mr. Leduc "handle" a paint customer. This customer was a woman of middle age, accompanied by a young man of about twenty-five years of age, and it was later determined that this gentleman was the son.

The conversation which followed is here recorded because the success of this store can be largely attributed to just such methods of selling to a customer. Interest and courtesy is shown throughout the period customers are in the store and selling them their requirements by inquiries that are well put and asked at the right time is a noteworthy feature.

Just Inquiring

"We came in just to inquire the price of your varnish stain," was the first statement of the mother.

Realizing that she would want a direct reply to her question, Mr. Leduc now quoted his prices per half pint, pint and quart. "What were you intending to stain?" was the proprietor's first question.

He learned that his customer had four rooms in which burlap had been applied about half way to the ceiling and the strips that were to form panels now had to be stained and varnished. "Are they new wood or have they already been coated?" was asked.

"We have just purchased the strips before coming in."

"Are they hard wood or soft?" was the next inquiry.

"Only of plain soft wood," spoke up the young man this time.

The color chart was now produced and while showing it the explanation was forthcoming that ground color would have to be first applied, two coats, and one or two coats of varnish stain to finish as desired.

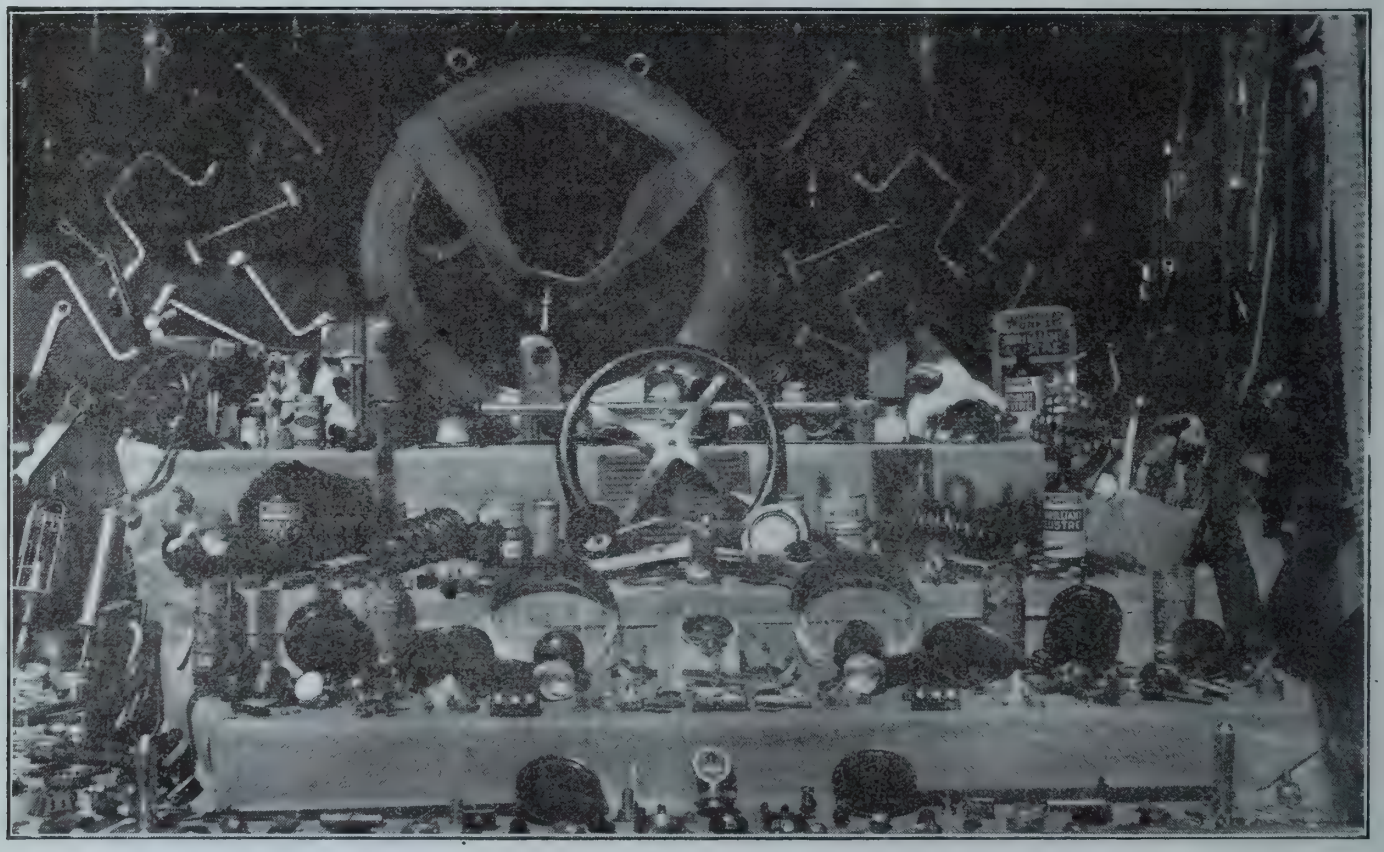
"You will require, I think, about three quarts of ground color and one quart and a pint of varnish stain," said Mr. Leduc.

They agreed to take this amount, and if more was required they could return for it, or if they found they had bought too much an exchange could be made as the job was nearing completion.

"Have you a good varnish brush, madam?" asked Mr. Leduc.

No, she had not, there were old brushes but a good new one would have to be bought for the varnish stain. The brush sale was made.

From the railing at the top of the burlap to the ceiling they decided should be of a dark cream or buff shade and it



This window display of auto accessories denotes the extensive line carried by the Leduc Hardware, Montreal. The increasing use of motor cars in this district brings an increasing demand for accessories. The gasoline pump, hose of which is seen in the picture, brings many motorists into touch with the store salesmen, who then suggest some needed accessory.

Mr. Leduc has learned that his paint shelves should be kept in prominent display, and neatly arranged. This paint stock is kept complete and well assorted and is located right near the store entrance where good light is available. Color cards on the counter are handy for examination by customers.

was the owner of the store who suggested oatmeal paper. The three now proceeded to the wall paper department, but on learning they were newly plastered walls, the agreement (among the three) was to give a coat of wall tinting, rather than papering. Two five-pound packages of wall tint were placed on the counter beside the stain and brush. Other small purchases were made, totalling the account well up to twenty dollars. Mr. Leduc got his money but was not satisfied.

New Customers

These were new customers to the store, and he wanted to see them again in the future. With no hopes nor even thought of selling anything further, he again engaged in conversation, quite casually but in the course of this it was learned that previously all paint, wall paper and sundries were bought from a large mail-order house. In the future, well, the chance could be taken.

The detailed explanations that were given before the above purchases were made are not recorded, but the manner in which these customers were sold, not hurrying their decision, agreeing and disagreeing as to shades and finishes, and ushering them out the door with the same smile as they were greeted with, assured this merchant that he had made satisfied customers, and they would return when their requirements were in the hardware line.

Seven Years' Devotion to Duty

In the meantime the salesmen were continuing to attend the needs of the other men and women who were coming and going through the front door, while Mr. Leduc began his story of how he started in the present stand seven years ago with only a small amount of cash in his pocket, and through close supervision, hard work and a pleasant acquaintance with his community now enjoys a thrifty and profitable business. With attention given the store layout, the formation and location of each department now enables the salesmen to give service and does away with any unnecessary steps.

The Paint Department

Behind the main counter and reasonably near the front door are the paint shelves. From the ceiling to the floor, on neatly arranged shelves, each line is displayed. One noticeable feature is the handiness of the best selling lines; varnish stains, floor paints and sundries are within reach from the floor, while the larger containers are reached by the use of a store ladder. Noticeable also was the manner in which this store had linseed oil and turpentine already bottled. Half pints, pints and quarts were labelled with the price and placed on the first shelf. Running to the basement or warehouse for these two purposes at this season when a good percentage of customers call for either or both, is wasting too much time in Mr. Leduc's opinion.

The Wall Paper Department

Directly opposite the paint shelves and at the rear is the wall paper department, and here is where both attention and money have been spent to obtain a section that supplies both convenience and comfort. When a lady enters and wishes to look at the samples of wall papers, she is shown past the kitchen ware shelving which displays tinware, graniteware, etc., and on the other side of the aisle washing machines, wringers and other articles of interest to the housewife, through to a section set apart by ornamental highly polished wooden posts, connected by a large bronzed coil chain, leaving only a passage to walk through.

On the inside of this railing a plush rug covers the floor and three comfortable chairs are placed for the purchasers. The sample charts are directly in front of the stock bins, and extra light is furnished by three shaded electric lights throwing their full force on the sample books. This department is complete in every detail and has proven many times over that the money spent to furnish was well expended.

The Weighing Counter

For the many lines that require weighing, a counter is placed in front of the paint, and here is where the dry colors, rosin, glue, whiting, putty, insecticides, etc., are kept in drawers. Below the counter are the nail and staple bins, while situated in the centre of this is one of the up-to-date hardware scales.

Fifty-six Electric Washing Machines

Full advantage is taken of any opportunity to specially push seasonable commodities. Through national advertising many articles are brought to the notice of the public and by linking up local effort the dealer gets good results. In the case of electric washing machines this applies. Seeing three of these on the floor of the store, Hardware and Metal asked: "Do you push the sale of these?"

"To be exact, we sold fifty-six electric washers last year," was the reply.

Keeping them well displayed on the floor at all seasons of the year and featuring them in the windows has helped the sales a great deal. However, demonstrations are really the best method of "pushing" electric washing machines, and these are held at least twice or three times a year, and a whole week's demonstration was held in the Leduc store this spring.

Does Delivery Service Pay?

Long and varied discussions have centered around the question of delivering merchandise from the retail store to the customer. Merchants selling all commodities, hardware included, have debated whether the delivery pays, whether it is worthy of its existence. In many cases the delivery wagon or truck is considered a necessary overhead expense, is operated because it "has" to be, and many merchants would gladly dispose of this addition to the staff if it was possible. In many towns throughout the country the hardware merchant has never added the horse and wagon or motor truck (either one requiring an extra hand on the staff of his establishment. However, to those who consider it a necessity the following method used by J. E. Leduc might be interesting:

Mr. Leduc does not own and operate a large general store, but his business is strictly in hardware. Neither is his business house very spacious, being confined to a frontage of about 25 feet and a depth of not over 80 feet. Nevertheless this merchant claims his business requires a delivery service of the first order, and has now added a high-powered covered motor truck, bright red in color, and driven by a driver clad in navy blue. On the side of the truck is the name of the firm in prominent letters, while the chauffeur also bears "J. E. Leduc" across the front of his cap.

From an advertising standpoint alone this merchant claims it is a paying investment, and full worthy of the money that he has expended in the layout. Quite true the upkeep is costly and the weekly salary continues week after week, but in return his name is before the public on the streets six days in the week, saying nothing of the service that is appreciated by his customers.

A very neat section of the store is the wall paper department. Attention has been paid to this section to make it both attractive and comfortable for the women customers. Papers are all within easy reach and samples facilitate the choice of patterns.

GETTING A SPRING ATMOSPHERE INTO THE ADVERTISING

(Continued from page 147)

Every kind of liquid refreshment, hot or cold, can be carried on picnics, outings and auto' trips. Every home should have at least two or three."

An ad by another Toronto firm is entitled, "Housecleaning made easy with these great labor savers," and continues: "Our houshold appliance department will have an added interest these days to those of you who are about to begin your spring housecleaning. In it you will find arranged for easy selection all sorts of labor-saving appliances that will go a long way towards removing the drudgery usually associated with this task. We invite your inspection of the vacuum cleaner, electric washer and carpet sweeper illustrated herewith."

INCREASING IRON AND STEEL BUSINESS, SAYS ROBERT HOBSON

Hamilton, Ont.—Assurances that business was slowly but steadily improving and that normal conditions should be restored by the autumn of this year, were given by Robert Hobson, President of the Steel Company of Canada, and J. A. Norton of the Firestone Tire & Rubber Company of Canada, at the meeting of the Hamilton Commercial Salesmen's Association.

While agreeing in part that the steel and iron industry was a safe barometer of trade, Mr. Hobson said he preferred to look on Wall Street as the safest and most accurate barometer. Looking at the American Stock Exchange, he said he viewed the immediate future with optimism, because Wall Street was reflecting a healthy tone. When Wall Street improved then it followed that conditions were improving throughout the country generally.

"We are not overwhelmed with orders as yet," concluded Mr. Hobson, "but our salesmen report increased business. We have encouraging proof of that. We look for conditions to get much better in the next few months."

J. A. Norton, said he felt safe in saying there was no doubt that the cycle of business was tending toward better times. He predicted that, between November of this year and March of next year, conditions would get very closely to normal. The surest way of avoiding a repetition of the lean years now being experienced was to work ahead and exercise caution when prosperity reached its apex.

A Hardware Romance With Too Frequent Dramatic Ending

Do You Know?

Nine-tenths of retailers are making less than they think.

Cost of doing business varies according to the goods.

Number of stock turns influences margin of percentage for overhead expense.

Departmentizing has overcome problem in some hardware stores.

A RETAIL hardware store in a small Ontario town has been dragging along for several years, supposedly making a profit.

Three different men had gone into partnership with the original owner and after a year or so had withdrawn, leaving a part of their capital behind them as "pay" for the "experience."

The fourth partner was a young accountant who had spent a year in the accounting department, and another year in the selling department of a city store. When he formed the partnership in the country store, he determined to find out just how things stood—though he didn't know the store had already frozen out three partners.

He soon learned that most of the hardware man's profits were imaginary. While the sales ran to a nice figure, the profits were mostly on paper.

His trouble was that while estimating his cost of doing business as a certain percentage of the gross business, which is the selling price, he added this same percentage to the cost price when figuring the selling prices of individual items.

He knew that the percentage of his expenses was figured on the gross business, but he didn't realize that a percentage of the gross business is more than the same percentage of the invoice cost.

If you figure your cost of doing business as a percentage of your gross business, you must, of course, allow that much of your selling price for cost of doing business.

When you sell $1 worth of goods, you say that a certain per cent. of that is profit, a certain per cent. goes for cost of doing business and the balance is for the cost of the goods.

Take some item in your stock and deduct the two percentages from the selling price you have established, and see if you still have the cost price left.

Profits From Dollar Taken In

Your profits and cost of doing business come out of the dollar you take in—not out of the 60 or 70 or 80 cents you pay out for the article.

If you buy an article for $2 and sell it for $3, your profit comes out of the $3—not the $2. The profit can only come out of the selling price.

Get that straight—when the $2 is invested in the article, it is gone. There is no $2 any more. There is no money at all—nothing but the article.

If you don't sell the article, there will never be any profit. But if you do sell it, you have $3 or whatever you sell it for—you never see the $2.

Since you have nothing left but the $3, your profit can only come out of the $3. Nothing can come out of the $2. That goes to pay for the goods. The $1 left after the goods are paid for is a part of the $3.

In the hardware store referred to, goods were marked by adding what was really a percentage of the selling price to the cost price.

This mixing of methods resulted in a loss, except on a few articles which permitted a very high percentage of profit.

Where there was competition on an article, 18 per cent. of the cost price was added for cost of doing business, and 10 per cent. of the cost price was added for profit.

This net profit of 10 per cent. looked good "on paper," but that was the only place it could be found. It wasn't in the cash drawer. It never got into the bank. The manager never saw it in money.

The real cost of doing business was 22 per cent. instead of 18 per cent. Part of the expenses had been figured as investment. Other items had not been included at all.

If you think he could make a profit on that basis, try to figure it out. Add 28 per cent. to $1; then substract 22 per cent. from the selling price it gives you.

Adding 28 per cent. to $1 gives you $1.28; 22 per cent. of $1.28 is 28.2 cents. His real cost of doing business, 22 per cent., taken from the selling price, amounted to more than his 28 per cent. added to the cost price.

In this hardware store they handled a certain kind of stove which was also handled by a competitor. The wholesale price was $9.25, and the freight and cartage were 75 cents, making the stove cost $10, set down in the store.

Competition was very keen on this stove, and it was decided to cut the profit to 10 per cent. net. So 18 per cent. of the cost was added for cost of doing business and 10 per cent. for profit, making the stove sell at $12.80.

The hardware man thought he was making a profit of a $1. Let us see what the new partner, an accountant, showed him:

The Case of a Stove

The real cost of doing business, as already explained, was 22 per cent. instead of 18 per cent., but the accountant figured it first on the 18 per cent. to illustrate the principle.

If the article cost $10 and it was desired to make 28 per cent. gross profit, we must consider the selling price as 100 per cent., and the cost price as 72 per cent., or all of that 100 per cent. except the gross profit of 28 percent.

Now, if $10 is 72 per cent. of the selling price, 100 per cent., or the selling price, must be $13.89.

From this it seems clear that the selling price should have been $1.09 higher than it was, to allow 10 per cent. net profit, after allowing 18 per cent. for cost of doing business.

In reality it took $2.30 of the $2.80 gross profits to cover the 18 per cent. cost of doing business.

Practically all merchants figure their cost of doing business as a percentage of the gross sales, the selling price. Yet a large percentage of them figure as if this were a percentage of the cost price.

Changing the base of figuring is dangerous. It fools retailers into thinking they are getting more profit than they really are. Here is a case which illustrates that point:

A certain clothier, who was figuring for 30 per cent. net profit, planned a special "25 per cent. off" sale. He thought he would still make 5 per cent. net, and could afford to sacrifice part of his profit for advertising purposes.

Suits marked to sell at $20 were reduced 25 per cent., or chopped down $15.

These suits cost $13.50. Twenty per cent. was added for cost of doing busi-

---

A mistake in percentages cost one retailer $500 when he thought he made $150.

Profits and cost of doing business come out of the dollar taken in—not out of 60 or 70 cents paid out for the article.

Many merchants erroneously add what is really a percentage of the selling price to the cost price.

ness and 30 per cent. for profit, making the selling price a fraction over the $20.

Twenty per cent. of doing business on the original marked price ($20) is $4. Adding $4 to $13.50 (cost price) gives us $17.50. So when he sold that suit at $15 he actually lost $2.50.

Lost $500—Thought He Made $150

During the sale he disposed of $3,000 worth of clothing—at a loss of $500 in cash. Yet he thought he was making 5 per cent., or $150.

He was all right as long as he added 50 per cent. to his cost price, though it allowed him less profit above his cost of doing business than he thought, but when he began cutting prices, he ran into unseen danger.

Add 50 per cent. to $13.50. Then deduct 50 per cent. from the new price. You lose $3.38 in the operation.

Apply this to some of your prices.

This method of arriving at selling prices differs slightly from the regular methods of figuring percentages. We have found that, while the regular percentage method is correct, many people fail to remember that a percentage added to the cost of goods is less than the same percentage of the price thus marked.

Adding 10 per cent. to the invoice cost of an article, allows 10 per cent profit on the 70 or 80 cents you pay for the goods and not 10 per cent. of the dollar in the cash drawer.

If it were convenient to arrive at percentages on a basis of the cost price, and to always remember that the per cent. of profit added to the cost price is always a profit on the cost price and not a percentage of the money taken in, then the old percentage method would be fine.

If your profit is to come out of the selling price, and not out of the cost price, it is plain that the percentages should be figured on the selling price.

GASOLINE PUMP ADVERTISING

For sometime, a campaign of advertising has been common in the newspaper press, wherein the makers of a certain type of gasoline pump, generally called a "Visible Pump" have by innuendo, and accusation cast discredit on the honesty of dealers in gasoline and the efficiency of pumps which are not "Visible," according to the National Vigilance Committee, Associated Advertising Clubs of the World.

Makers of the so-called "Blind Pumps" have retaliated from time to time with accusations against the Visible Pump, and a situation which is to be regretted has grown up.

Recently, the authorities of New York State made an announcement that an inspection of gasoline pumps had shown that comparatively few pumps of any kind were absolutely accurate. The makers of certain Visible Pumps, and dealers in them, have taken advantage of this to spread their propaganda to the effect that the Blind Pumps are inaccurate. As a matter of fact, the finding of the New York State authorities was merely that pumps of any type whatever could be made inaccurate if the attempt was deliberately made.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

JOHN OAKEY & SON

The Aikenhead Hardware Company, Toronto.—Can you tell us who are the agents in Canada for Messrs. John Oakey & Son, Birmingham, Eng., who are manufacturers of emery cloth and sand paper?

Answer.—Messrs. Surgeon's Limited, of Richmond Street, Toronto.

"DESOLVO"

Messrs. Rice, Lewis & Sons, Toronto, Ontario. Could you give us the name of the manufacturers of "Desolvo"?

Answer.—The Chamberlain Desolvo Co., 109 Church Street, Toronto ,Ontario.

CASTERS

Kent Garvin & Company, Hamilton, Ont. —Will you please tell us the name of a Canadian manufacturer of casters?

Answer.—Canada Foundries & Forgings Limited, Brockville, Ontario; The Bond Engineering Works, Limited, Toronto, Ontario; Springfield Lock Manufacturing Company, Belleville, Ontario.

How Low Can we Sell Hardware and Still make A Profit?

A SUBJECT of the utmost importance to every hardware merchant—when necessity arises, how low can we afford to sell an article and still make a profit?—came up for discussion at a recent meeting of a hardware dealers' association.

Much has been written on the cost of doing business. Dealers have been told that they should know their operating costs in order to secure the greatest returns from their efforts. This knowledge is undoubtedly valuable, but it will not help the dealer to any great extent if the only cost he knows is one that covers his entire stock. The cost of doing business is not the same for all classes of goods. Nails and linseed oil, for instance, stored in the basement or in a shed, occupy space that is the least valuable. Such stock should not under any circumstances be made to bear as much overhead expense as tools that take up the most valuable space in the front of the store. Some way should be found for dividing overhead expense more evenly over the stock.

If a merchant finds that his cost of doing business is 20 per cent., the question arises whether that same amount should be added to the cost of a stock of screw-drivers that is turned six times during the year and also to a stock of enamel ware that is bought only three times during the same period. Good judgment would say no. The screw-drivers should bear a much less percentage of overhead expense than the enamel ware. Turned six times a year, they cost less to sell. Then again, more time is needed to sell certain items than is necessary with other lines. The following questions should have the attention of every thinking merchant: How can one know exactly what percentage to add to each item in the store? And of what value is it to know the cost of doing business unless it is an accurate cost and one that can be applied in all cases? Must the rule that seems to predominate in so many instances, of charging all the public will stand, be the only rule by which goods should be marked?

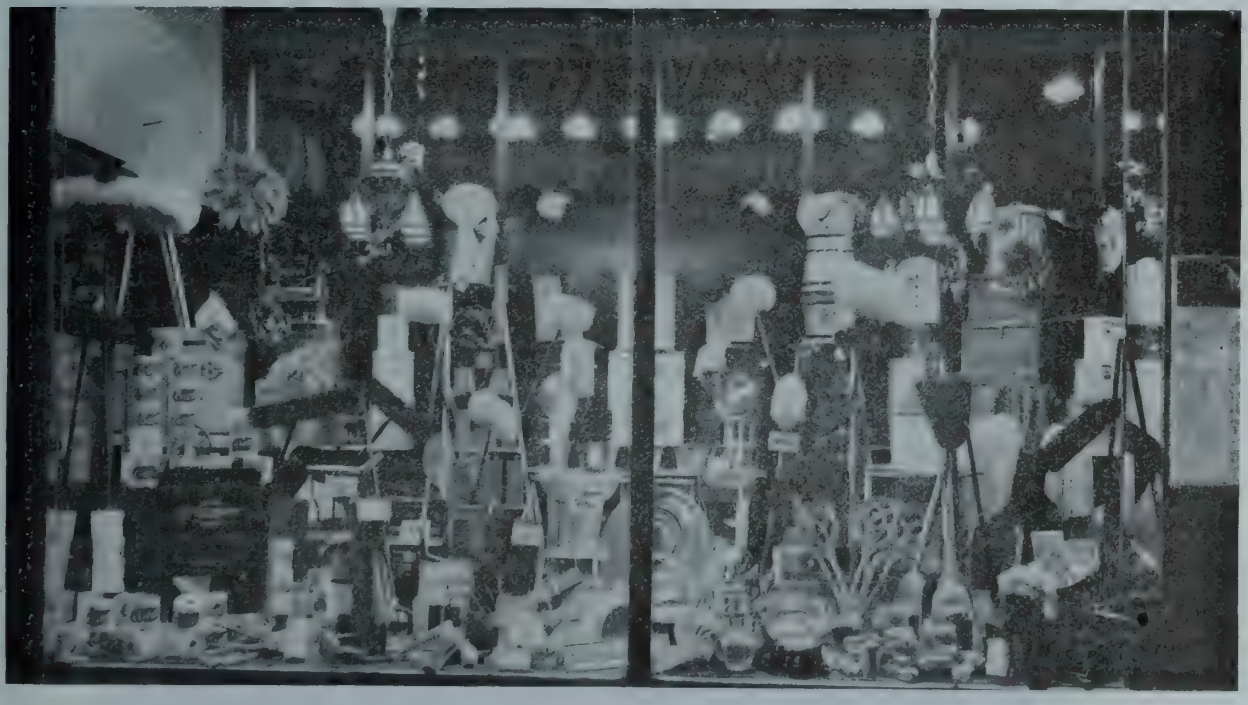
There are instances where articles can easily carry a profit of 100 per cent., or even more. But when competition is so keen on some items that prices must of necessity be very low, how is the dealer to know just how low he can sell and still be safe from actual loss on the transaction?

It is a question that should be studied carefully by every merchant who is interested in running his store on a more systematic basis than his present one. It has been suggested—and the idea has been carried out in some instances—of dividing a store into departments and figuring separate costs, based on the time taken to sell items in the departments, the rate of turnover, and the amount and value of the space occupied by the stock. That gets nearer the solution of the problem than by simply having one cost of doing business cover the entire stock.

There can never be any set of rules for conducting a store. If this were possible, then a laborer with sufficient capital might open a hardware store and run it as successfully, or perhaps more so, as the seasoned merchant. There is no doubt that thought along this line is needed. We must ascertain the proper amount that should be added to the invoice cost of each line of goods or each individual item to really net a profit and find some way of knowing just how much profit is really being made. If this necessitates an elaborate system, then it defeats its own end. Each merchant must solve his own individual problem, but a close study of this subject cannot fail to be of value in ascertaining accurate costs.

Spring Sport and Housecleaning Lines Make Attractive Display

Spring boating and fishing will shortly be under way again for another season, bringing along a seasonable demand for fishing requirements, and other equipment necessary to the comfort of the fishing or boating trip. The baseball season will also be opening very shortly and every boy in your town with a sporting instinct will be interested in your early showing of equipment. Tennis, golfing, etc., will also follow in order and it does no harm to make an early start in showing such lines. Above is an attractive display by W. G. Edge and Co., Ottawa, of suitable lines for spring windows.



A wide range of articles suitable for the spring housecleaning is shown in this window, including mops, brushes, pails, furniture polish, dusters, brooms, ash cans, washing machines, kitchen utensils, etc. The housewife contemplating a thorough clean-up of the home this spring will be interested in such a display. There are lines in which the "group selling" idea can be exploited to the limit as few housewives are acquainted with the multiplicity of lines provided to lighten the labor of spring cleaning.

For the Man Behind the Counter

The Re-Winning of an Old Customer

True Story of How a Winnipeg Hardware Merchant's "Soft Answer Turned Away Wrath"—Re-winning of a Customer Better Than Acquiring a New One—Handling a Difficult Situation With Tact.

Written for Hardware and Metal by C. C. FALCONER, hardware merchant, Winnipeg, Man., based on an actual experience

A MAN WHO had lived in the rural district for some time, had sold everything in the way of household furniture and necessities, and had moved to the city, in a district handy to our store. He was in the market for a new supply of household equipment, much of which could be provided by the average hardware store.

We were fortunate in becoming acquainted with this fact and allotted one store salesman the job of securing this man's business.

Everything, so far as we know, went fine at first. We made a definite appointment for a certain day at 10 a.m. which was about one week after the initial interview. Our prospect not arriving on time, our man proceeded to his place and was surprised to find the house completely furnished with the lines which he had hoped to sell.

Needless to say our man returned to the store somewhat crestfallen for three reasons. Firstly he had lost a sale. Secondly, it was evident a rival had beaten him and; thirdly, he had not even been accorded the courtesy of a reason for such action.

Appointment Genuine

I had helped make the appointment myself and felt it was genuine. I, too, therefore was disappointed but felt like going over to remonstrate with our friend for his breach of faith, but fortunately I was unable to do so at that time. When it was convenient to go I proceeded in a much different frame of mind. In the first place he was a free agent and could go where he wished, regardless of appointments (if he was that kind of a man). Secondly he may have had some genuine reason for his change. Thirdly; he still was a prospect for the future and no one sale can offset a long continuous volume of busineses with a satisfied customer.

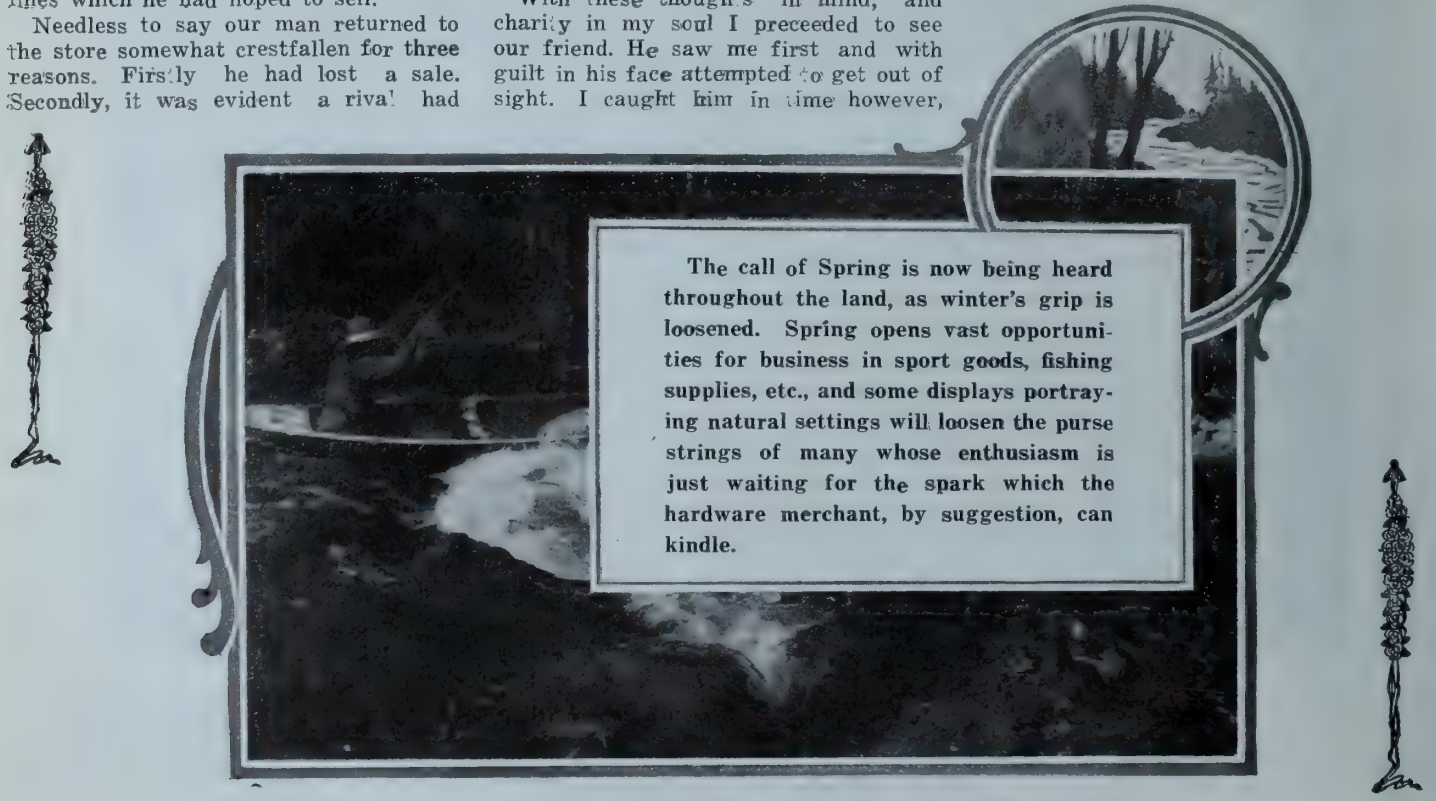
With these thoughts in mind, and charity in my soul I preceeded to see our friend. He saw me first and with guilt in his face attempted to get out of sight. I caught him in time however, and disarmed him with a cheery "good-day." It was immediately effective. My first words were, "Why, that's all right, this is a free country, you had a perfect right to go where you liked, my only idea of coming over was to assure you that so far as we are concerned it is all right. We want you to know that we will be very glad to have you come in and see us any time you wish, and if there is anything more you might want, just drop in and get it at the store."

Apologetic

I got this off before he had a chance to say a word and when he would attempt to speak I would interject with some further assurance that what he did was not offensive to us. Finally I let him talk and he was most apologetic.

To make a long story short and bring out my point, I will explain that he had such pressure brought to bear on him that he could not resist. He was most grateful to me for making it easy for him to meet either myself or any of the staff.

I left him with his further assurance that there was much that he still wanted and that he most assuredly would be in to see us. I left feeling that I had re-won a customer and that this was possibly better than acquiring a new one.



Competition Increases Hardware Sale

Keen Competition From Hydro and Other Merchants Increases Sale of Electric Washers, Etc., Says G. A. McMurtry, St. Thomas, Ont.—Sells 256 Washing Machines in 26 Months—Auto Accessories Bring Other Business—Women's Trade in Paints

Interior view of George A. McMurtry hardware store, St. Thomas, Ont., showing how washing machines, vacuum cleaners, bicycles, etc. are placed in prominent locatons where customers may examine them closely. A complete paint stock with color cards and other helps in special receptacles, encourage a close examination by the customer.

SELLING 256 electrical washing machines in twenty-six months in a city of 18,000 population is a record of which George A. McMurtry, hardware merchant at St. Thomas, Ont., believes he may justly be proud. When it is further considered that he has had to meet the keenest competition not only from several other hardware merchants, but from a Hydro shop with every facility afforded it for obtaining business, the showing stands out even more favorably. And yet he considers that the very keenness of the competition has been one of the most important factors in enabling him to make his turnover.

Good for Business

"Competition is good for business," said this merchant to Hardware and Metal. "This city I believe has had keener competition in the electric washing machine trade than perhaps any other place of its size in the Dominion. It may seem rather peculiar but the result has been to help business very materially. With half a dozen firms going after the washing machine trade, and going after it energetically, the result has been to arouse an interest in washing machines on the part of the women of the district that would not have ordinarily developed. This has meant not only the closing of many sales already but stirring up a real buying interest in hundreds of prospects. The great majority of these women will be "sold" sooner or later. They are "sold" now as far as knowing and appreciating the value of washing machines. They are going to buy and some of us will get the business. We certainly have succeeded in getting our share."

How He Goes After It

After selecting a machine that is thoroughly dependable and which the dealer can stand behind to the limit Mr. McMurtry says the next most important thing is to let people know about it.

"There is no question about the interest the public takes in merchandise," he said. "In hundreds and thousands of homes all over the country there are everyday needs and the men and women who have to do the buying are very keenly interested in knowing where they can get the best value for their money. The best way I have found to reach the largest number of people in the shortest possible time is by advertising. People, and by people I mean those in the country as well as those in the cities, read the papers closely and give particular attention to what merchants are offering.

Does It Systematically

"By advertising I do not mean simply running a brief line or two once a week or once a month such as 'The ——— Hardware, St. Thomas.' That sort of thing is mere waste of time, money and space. To reach people you have got to give them a real message. They want to know what you have to sell. They want to know how much it is going to cost them and they are keenly interested in any details about what the goods you are featuring will do. This applies to paint or roofing or washing machines or anything else. We try to keep season-

able lines well advertised the year round and we have proved time and again by the results in actual turnover that our 'drives' on certain lines have been successful.

No Open Season

"Somebody has said that spring is the open season for selling washing machines. Spring is undoubtedly an excellent time but we have proven that washing machine business can be developed twelve months in the year. Not a few washing machines are sold as Christmas presents. Quite a few are sold for wedding presents and our records show that we have a steady turnover all through the winter months."

This merchant believes that it is a mistaken idea that only women are interested in the buying of washing machines. He finds that in a great many cases the women who come in to get information about them bring their husbands along. This is especially the case with farmers' wives. In about 75 per cent. of the calls he finds that the man of the house is either brought to the store or has to be consulted.

Just What He Wants

This is just what is wanted and Mr. McMurtry proceeds to make the most of the opportunity. He points out that in order to have a happy home it is necessary to have up-to-date equipment. It is not fair, he argues, for the men to have all the machinery that will save labor or speed their work. Washing, he points out, is one of the hardest jobs a woman has to do and Monday morning to many women means nothing but drudgery and gloom and being tired out all the rest of the week. An electric washer he shows is not only a big labor saver but conserves hours of time and in that time the housewife can be busy with other work while her washing is being done by the machine automatically.

Carries Weight

An appeal of this kind always carries weight because in almost every instance the woman has known only too well just what heavy work the washing has been and it was the effort to get away from it and relieve conditions that brought her to the store. He follows up his first arguments by pointing out to the man that it is only fair that his wife should have a chance and that it is foolish to keep her at the wash tub all day when for an investment of a few dollars she can install an electric washer in her home and do away with the heavy work.

This usually brings up the question of price and about this time he arranges to have the prospect busy trying the machine. He connects one up and lets her operate the levers and see how easily it is done. He lets her run the wringer rolls and then reverse them and then throw the gears into neutral. The smooth running motor is shown and the small amount of attention it and the whole machine require is emphasized.

They "Sell" Themselves

This merchant finds it excellent policy to let prospects "sell themselves." They almost invariably do this, especially women who by long experience with old-fashioned wash tub methods know what it means. Very often prospects want a machine sent home to try. They are accommodated as long as everything is known to be all right. St. Thomas is a railway city and several hundred employees only get paid once a month. This often brings up the question of time payments. Very often also women want to buy on credit. Mr. McMurtry finds it good business to accommodate them. Thirty days he considers as cash. Other propositions run $25 down and $10 a month.

This is Important

"Selling is important," said he, "but we find that it is just as important to keep in close touch with the customer afterwards. Our store service in this connection I believe has been a very decided factor in the splendid advertising we have obtained from satisfied customers. We ask all buyers of machines to let us know immediately if anything goes wrong or the machine is not working right. Everytime we get a call from a customer we give it immediate attention. The trouble is usually trifling and easily adjusted in a few minutes. It is a small service but it is one that builds good will and that has resulted in customers sending us many other customers."

Bring Good Results

Next to persistent advertising this merchant has had the best results from store demonstrations. These are held a couple of times a year and are well advertised in advance. Without exception they have produced results. In addition to direct sales, a long list of real prospects is obtained. These are closely followed up and with excellent results.

"Window displays are most important. I believe our display windows are one of our very best advertising forces. They bring results and they bring them quickly. We have proved this repeatedly and as a result we aim to keep our windows in good shape and with a showing of seasonable lines always before the people," said he.

Going After Trade

A drive in the bicycle trade is being made. Sales in other years have been most encouraging and this merchant is confident that this season he can make a new record.

"We are going to sell 100 bicycles this season or know why," he said, "I think we will succeed. If we do not it will not be for want of trying."

From now on bicycles will be kept right at the front of the store. There will be frequent window displays of them and seasonable advertising to back up the window and store displays. By going after the trade aggressively he believes he can get more of it.

Auto Accessories Too

Just across from the display of bicycles and right up at the front on the right as one enters auto accessories are to be found the year round. A silent salesman display and behind that a very attractive wall display are always on view.

"Auto accessories," he said, "have developed into one of our very best departments. Ever since we began handling them the trade has steadily increased. They carry a nice profit and they make a splendid showing . In addition they bring in an appreciable amount of other

This novel window display arrangement showing washing machines was recently arranged by a hardware merchant with good result. The suitable environment to the housewife engaged in washing, attracts the attention of any woman who has washing and ironing to do. A number of the special facilities provided for lightening the labor of washing and ironing, as shown in the display, were sold as result of this arrangement. This grouping of lines has been found effective.

With the opening of Spring the G. A. McMurtry Hardware, St. Thomas, arranges windows of seasonable lines such as vacuum cleaners, carpet sweepers, etc., as outlined in the article.

business. Most car owners are men who need and are in a position to buy a great many things for their homes."

Carries The Stock

The auto accessory department has developed now to the point where a very large stock is carried. He aims to keep everything required for the average car. What is equally important is to let every car owner know that McMurtry's is the place to get what he needs. This is done by persistent advertising and by window displays. Hundreds of car owners have as a result of the service they secured come to regard this store as the place where they know they can get what they need. They not only come themselves but they send their friends and direct tourists here.

Knowing the game is a most important factor in the accessory business says this merchant. A good accessory salesman he believes, must know his stock thoroughly and must also know automobiles.

"The chap who only knows a piston ring as a round iron thing which goes some place into a car can have no intelligent interest in selling a car owner just the ring he needs, but if he knows cars and car problems, and finds out that a customer wants new rings for oil trouble and can supply just the ring required he is rendering the car owner a service that is seldom forgotten and brings him back every time he wants any other accessories."

Pleases Customers

"It pleases a customer who comes in for a storage battery if we can tell him that this battery or one of twice as much voltage is what he really needs and why."

Mr. McMurtry figures out that there are about four flivvers running around the streets for every one of the higher priced cars. He has studied this out and as a result keeps his stock in shape to take care of the requirements of flivver owners. This does not mean that he neglects the others but is merely cited to show that it pays to get down to brass tacks and know just how things stand. A lot of money can be lost by wrong buying and by foolish buying and this applies to all accessories. To the man who is prepared to give service he believes there are few better and few more profitable lines than accessories. Success in any business dependent on the good will of the public can only be lastingly obtained he holds by considering the customers interests first. Comparatively few car owners really know very much about their cars or what they need for them. The accessory dealer who by giving them good service and accurate advice wins their trade is building for himself, he believes, a lasting clientele which no competitor can take away.

Another line in which this merchant sees a big future is electrical goods. Since the restrictions have been removed on hydro he has been doing a steadily growing trade in various lines and especially in electric stoves and grills. He is giving the stoves a very prominent place in his store and they make a splendid showing. The fuel situation has been a big factor in speeding turnover in the stoves he believes although more and more, especially in the city are turning to electricity in view of the shortage of gas and the increasing rates.

Electrical vacuum cleaners have been a most satisfactory labor saver, he says, and his sales have mounted to nice figures with prospects ever growing. In the district around St. Thomas there is an incessant demand on the part of the farmers for extension of the hydro lines into the rural communities. With the completion of the Chippawa power project many of these lines will be built and a splendid trade is forecast.

Good Sales of Paint

As may be seen from the illustration, paints occupy a place of honor in the store and a large trade is done not only by individual customers but by painters who secure their supplies here. While selling paint it is the store policy to always give practical and accurate advice about how to use it.

"Women particularly," said he, "often have the most queer and impractical notions about the application of paints and varnishes. Women's trade is becoming increasingly important and is decidedly worth catering to. This is true not only in the paint and varnish business but in all lines. Paint is an all-year seller with us and one reason for this is that we keep our stock out where everybody can see it. We find that little display tables up at the front with both paints, brushes and auto finishes on them stimulate business.

An Important Field

"A most important field which it pays well to follow up closely is in the country. On almost every farm there are to be found either buildings or implements in need of paint. The argument that painting will improve the appearance of his building does not always carry the same appeal to a farmer that it does to a city property owner. The farmer, however, is just as anxious to save money or avoid loss as anybody else and when a farmer is convinced, and with costs of materials as they are now it is not hard to convince them, that painting means a real and very definite saving they are 'sold.' This is an argument that he can readily understand and it hits him in a most sensitive spot, his pocket. It is easy to show most farmers that they are wrong in thinking that they are saving money by not painting, but on the contrary are losing."

Mr. McMurtry is satisfied that the business future is most satisfactory and he is going steadily along making plans for expanding this and that department and for developing new ones as business dictates. One of his regrets is that his store is not larger. However this is a matter which can be remedied and plans are under way for making improvements that will give more room for stock.

CONTRACTS ON MOUNT ROYAL HOTEL

The following sub-contracts on the new Mount Royal Hotel, Montreal, have been announced:

Crane, Limited, plumbing fixtures.

Garth Co., Montreal, heating and ventilating appliances.

Jas. Walker Hardware Co., pulleys, chains, etc.

Canadian Allis-Chalmers Co., Montreal, cast iron windows and balconies.

Why Hardware Prices are not Lower

Hardware Manufacturers and Distributors All Point to High Freight Rates as Most Important Impediment to Lower Prices—Hardware Prices Have Declined From the Peak to Much Greater Extent Than Freights—How Hardware Prices and Carrying Charges Compare.

SO MUCH has been heard relative to the prevailing cost of hardware and what particular share freight rates have taken in this situation, that an investigation into the comparative cost levels should provide interesting data while at the same time revealing a number of vital facts which can be of direct service to the hardware merchant.

For this purpose, Hardware and Metal has compiled a column-chart which depicts the average range of freight rate and hardware costs for the last nine years. Commencing with 1914 levels as the unit base, the costs prevailing on March 1st, of each successive year are illustrated and the varying increases which became apparent in both hardware prices and transportation charges are easily seen. Such reductions as have taken place during the past few months are also clearly shown, while a careful study of this diagram reveals a number of pertinent cost arguments which are thus available for the merchant when discussing the price-problem with customers.

Rates Slow to Increase

It is noticeable, however, that the effect of the war inflation on freight rates was not apparent so early as in many other phases of industry. The initial increase in transportation charges occurred in July, 1916, and only averaged an advance of 5 per cent. over the then existing rates. It was almost two years later before another upward step was authorized, this later change coming into effect in March, 1918. Inclusive of this change, the total advance up to that time was approximately 21 per cent.

In the meantime, hardware prices began to climb, but while admitting that freight rates did not soar to such dizzy heights as did hardware quotations, yet it should be remembered that the price levels on hardware lines represent the ultimate costs of numerous contributing elements. Besides reflecting the increase in freight rates, there are higher labor charges, increased overhead, inflated distributing and productive costs, as well as additional higher prices on raw materials to take into consideration, which items both individually and collectively all tended to boost hardware quotations another notch higher.

Freight Rates Jump in 1920

Between 1918 and 1920, however, freight rates took a decided jump. Including both the increases granted in August 1918 and again in September 1920, the transportation levels reached the higher mark of 211.32, which is based on the index figure of 100 applied to March, 1914. The figure of 211.32, represents an increase of more than 111 per cent. over pre-war standards.

While these developments were taking place, the average hardware costs soared to greater heights, with each succeeding year. The rise became apparent to some extent in 1915, but assumed more generous proportions during the three following years. However, another important fact with a direct bearing on the current situation is that having registered a larger ratio of inflation, hardware prices have also recorded a much greater degree of decrease. From the price pinnacle represented by the figure of 268 in October, 1920, quotations on the majority of staple lines are now down to 189, which is a most substantial recession. The corresponding decline in freight charges has only been from 211, to the same level of 189, which clearly depicts the advantage which the hardware industry has in a comparison of this nature, and at once supplies another potent argument to retail merchants.

It is surmised in some quarters that as freight rates were among the later factors to be influenced by the war developments, a similar delay may generally be looked for in their ultimate reduction. Such a contention, however, is merely hypothetical.

Await Further Freight Cuts

Current declines that have been registered in hardware lines are the direct result of lower replacement values, attained through easing of costs in raw materials, wages and other similar elements. It has been pointed out that a corresponding recession in freight charges would assist in the present downward movement, although at the same time, the admission is general that the applied differenece on individual goods would naturally be of a very minor nature.

The situation is considered from a collective viewpoint, however, and dealers in heavy commodities would undoubtedly receive the most direct benefit from any future downward freight adjustments. In the steel industry, where the transportation of around five tons of ore is required for the production of one ton of steel, a decrease in freight costs would naturally assume much larger proportions than in other enterprises engaged in the manufacture of small and light articles. It is also a noticeable fact that prices on some heavier goods are still higher in proportion than the majority of other hardware lines, and it is factors of this nature which maintain the current average at higher levels than would otherwise be apparent.

Larger Production in Hardware

Quotations on hardware advanced higher on an actual percentage basis than did freight rates, but being commodities of a manufactured nature,

IMPORTANT POINTS IN COMPARING HARDWARE PRICES AND FREIGHT CHARGES

Hardware prices have declined considerably more during the past year than have freight rates.

Hardware costs not only registered a much higher level, but naturally have had further to recede from that level.

The fact that both hardware prices and freight rates are on a proportionate index basis at present, reflects the greater ratio of reduction in hardware.

The present hardware standards take into consideration a number of other cost elements —in addition to freight rates —which remain considerably above pre-war figures.

Hardware prices still reflect the present high freight rates, while current reductions have been in greater proportion than the easing in production costs.

The percentages covering the rise and fall in freight rates were supplied by the secretary of the Board of Railway Commissioners for Canada. The figures covering hardware were compiled from market reports and file records of Hardware and Metal.

hardware goods reflected not only the direct amount of increase in transportation charges, but also the additional advances in the numerous other production cost elements.

The diagram used in this connection also shows that freight rates have declined approximately 10.71 per cent. from the peak of post-war inflation. For easy figuring, place the scale at a little less than 11 per cent. While on the other hand, hardware quotations have receded something like 41 per cent. during the past sixteen months from the high mark registered in the latter part of 1920.

The cycle of inflation and deflation is presumably a case where "the last should be first and the first should be last." While costs were rising, the movement spread in ever-widening circles. Freight rates were admittedly among the last to come under this influence, while hardware as a class was one of the first to feel its effects. One step in this direction was not only a reflection of its predecessor, but was the direct result of its forebears. Now the direction of the cycle has turned "face about." These same steps must be retraced. But the difference is in their order, or rotation; this, like the entire movement, having been precisely reversed.

"It is evident," stated one manufacturer to Hardware and Metal, "that a certain proportion of our higher productive costs was made up of increased freight charges. This would apply on raw materials, as well as on shipping the finished articles to our various distributing points throughout the country. Present prices, still contain the reflection of that higher element in our cost. All the trimming of overhead, the easing of wage levels, and the reduction in material costs, still leaves us that additional item unaccounted for, and it must continue to be passed along to the ultimate consumer if producers and manufacturers are to remain in business."

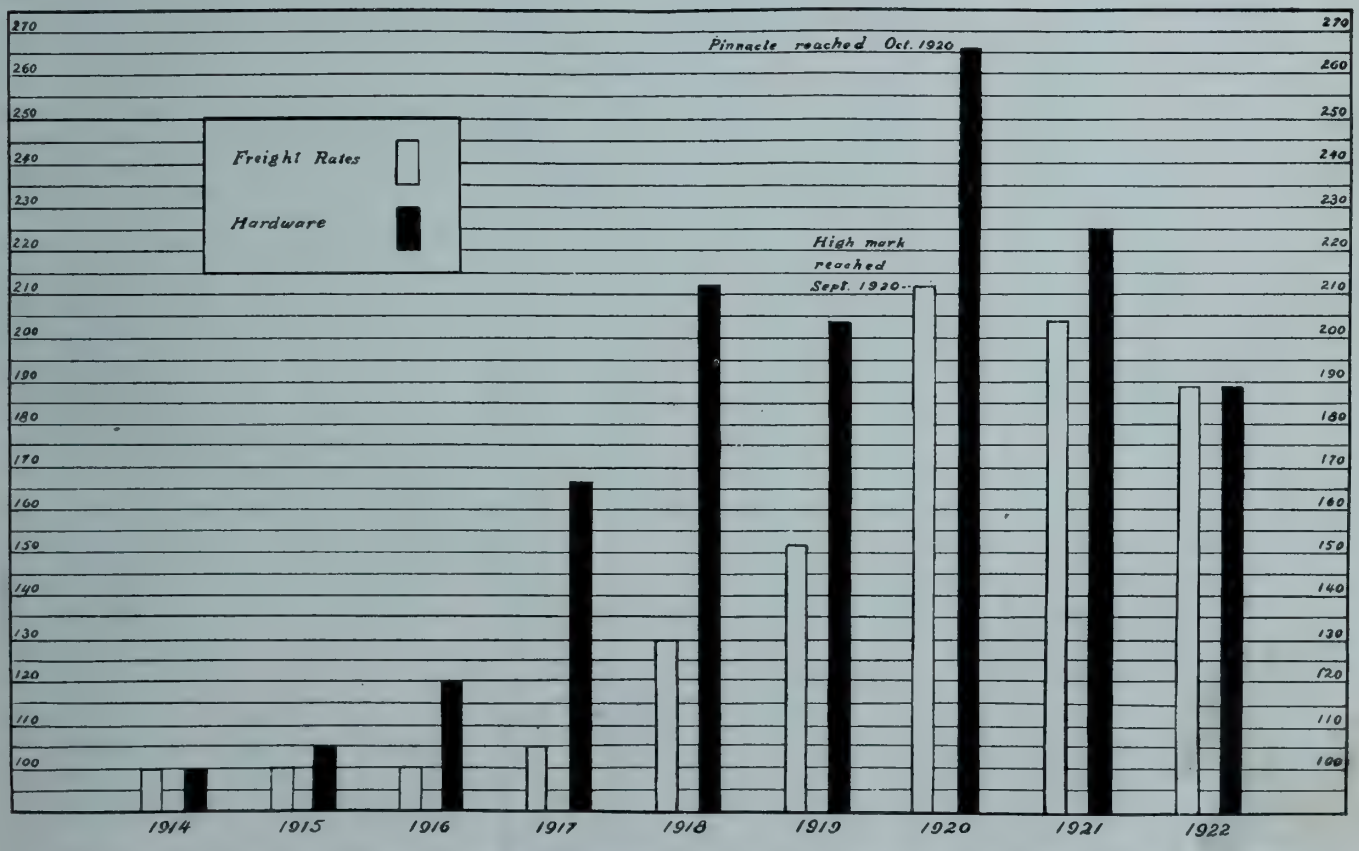
On the other hand, a prominent wholesaler expressed the opinion that freight rates "cut very little ice" in final prices on the majority of small hardware lines.

Where Freight Rates Stand

Date	*Nature of Change*	*Index*
March, 1914		100
July, 1916	Advance of 5 per cent.	105
March, 1918	Increase of 15 per cent.	120.75
August, 1918	Advance of 25 per cent.	150.94
September, 1920	Advance of 40 per cent.	211.32
January, 1921	Reduction of 3.57 per cent.	203.77
December, 1921	Reduction of 7.45 per cent.	188.68

Level of freight rates at present is therefore almost 89 per cent. higher than pre-war standard.

Comparing Freight Rates with Hardware Prices



As a basis for the above diagram, the price levels in effect for both hardware and freight rates on March 1st, 1914, are given the index figure of 100. The corresponding columns indicate the relative rise or fall in such quotations each successive twelve-month period until March, 1922, except in the case of 1920, where the columns show a break at the March 1st level, and are continued higher as representing the peak of inflation in each case recorded later during the same year.

The Public is in the Market Again

"The Consumer is King"—Merchants Must Recognize Changed Conditions—Customers Will Buy and Buy Strongly Whenever Convinced That Prices Are Right—Not in the Interests of Business For Profits to Rise to Unwarranted Percentages

THAT the public is opening its purse and coming back into the purchasing market, is the opinion of Samuel Hopkins Adams as expressed in an article on business conditions in "Leslie's Weekly."

The public, however, says Mr. Adams, is not the "pre-war" public, still less, the "during-the-war" public.

It is so to speak, a hard-boiled public. It is ready to buy; it wants to buy; it is buying. But not on the merchant's terms. On its own. Not what the merchant wants to get rid of but what it wishes to acquire. It used to shop with its eyes. Now it shops with its brain. It used to buy for fun. Now it buys for value. Missouri is its birthplace, and it has got to be shown. If the value is not demonstrable, back goes its purse into its pocket. Business in general is looking up, but there is one important exception; 1922 model gold bricks are going to be a very slow-selling line to the 1922 purchaser.

Consumer is King

"The consumer is king to-day," a leading business economist recently told a convention of merchants. "Your easy reign is over. It has been for quite a while, but many of you haven't waked up yet to the fact. Now you have got to do business your customers' way if you expect to go on doing business at all."

The purchasing public has not reached its present state of hard-boiled sagacity without harsh experience. It had to pay a heavy price for being foolish before it became wise. Now it purposes to recoup on its dear-bought wisdom. Any business man who is unprepared to deal with that psychological condition is likely to cease to be a business man precipitately.

Every exorbitant price displayed in a shop window is an advertisement against the return of good times. While shopping about, I overheard a man with his wife in front of a hat store wherein a crimson-silk-lined velour "soft," luxuriously nested in a high-art environment, marked $20, say to her:

"You see! It's no use trying to buy anything yet. They're still out to rob us."

A typical reaction. Only a block away another store was displaying hats of the same general type at $4; good hats, too, as I can testify, for I had one on at the time. But the disgruntled shopper did not know of that store. What he did know, on the evidence of his eyes, convinced him that he had better keep his money in his pocket. Personally, I feel that I cannot afford to pay $20 for $10 head-gear, when by going around the corner, I can buy for $5 a hat worth that price, the percentages are too much against me.

Jumps on the Retailer

"Everybody jumps on the retailer," complained one troubled merchant in discussing the present situation with me. "People don't stop to think of our difficulties." And he set some of them forth cogently.

That hovering incubus, Overhead, is, it appears, the worst. Thereby hangs a sad tale of poetic justice. In the fat years when everybody bought everything at any price, the shopkeeper, piling up his profits, thought bitterly of the excess profit tax to come, having a regrettable but quite human dislike of paying over his money to the government. Raising wages and salaries struck him as a simple and pleasant way of evading the tax in whole or in part. He raised them all around. Twenty-dollar clerks enjoyed forty and fifty dollar wages; three-thousand-dollar-a-year managers were lifted to five, six, even nine or ten thousand salaries. All of them adjusted themselves joyously to the new standards of living. So far as the business went they were practically the same clerks and managers, for it is a melancholy fact that raising a man's pay does not necessarily or even usually make him a better salesman or executive.

Then came the slump. Logically, wages and salaries should have come down parallel with deteriorating business. But there was a serious obstacle. Although raising a man's pay does not make him more efficient, cutting it does invariably make him less so, an apparent paradox which, however, has its roots ineradicably fixed in erring human nature. And more, not less, efficiency is urgently needed now when about 50 per cent. additional effort is required to sell to the present-day educated public, value-demanding, "show-me" public, as compared with the prehistoric shopper of war days, who demanded a chance only to spend her money as quickly and painlessly as possible. The retailer of to-day is paying salaries and wages approximately double what the returns would logically justify.

Spread is Too Great

To-day "spread" between wholesale and retail is, roughly averaged, 28 per cent. This is too much: though in many stores, even of the heaviest bulk business it is greatly exceeded. Various processes of adjustment and elimination have been put in motion, looking to a reduction of the excess. It is not improbable that this divergence may be reduced to 20 per cent.; the public, of course, profiting by the reduction.

One class of merchant, the foolishly optimistic or stupidly obstinate, is still hopeful of passing all his super-costs on to the public. The public is pretty well educated not to accept the burden, but to insist upon prices reasonably based upon the manufactured cost of the article. That demand, the sagacious merchant is meeting with more efficient methods of salesmanship, shrewder merchandising, sounder advertising, and more careful economies. He is building up a new style trade while his less sapient rival is losing the old style.

There can be but one outcome. The trade-spoiler is going under. He may for a time get the upper frotn of the trade, but a business can no more live on that permanently than a man can live on cake-frosting. The trade-builder is coming back into his own. The stage is set for his success. The public will buy and buy strongly whenever it is convinced that prices are right. The sudden and unexpectedly great rush of holiday shopping proved that. Retailing will never again be the easy-money-for-all game that it once was; the profits will not rise to such absurd and unwarranted percentages. Nor is it to the best interests of business that they should.

For the efficient, honest, fair-dealing business man there will be an increasing patronage of purchasers far more educated to values and expert in judgment than ever before; approaching, perhaps, the shrewdness of the French shopping public, which, in normal times, constitutes the most reliable market in the world. Doing business with such a public will be a more safe and reckonable process, and less of a gamble.

Along that road lies permanent prosperity.

Marked Reduction in Hardware Prices

Diagrams Contain Many Authentic Arguments for Retail Hardware Merchants and Provide Reliable Price Information—Comparisons With Pre-war Levels Show Appreciable Degree of Liquidation in Hardware Industry

DIAGRAMS or charts depicting price comparisons and developments have been of proven worth to the retail merchant in keeping in touch with the basic market tendencies. The various tables compiled by Hardware and Metal, and reproduced in this issue indicate just where hardware quotations stand in relation to pre-war costs and at the same time provide the trade in general with various authentic price arguments when required. Additional charts have been prepared showing the different price trends on such special lines as ready-mixed paint, bar iron and steel while the column-chart depicting the relative fluctuations on field crop and hardware prices since 1914, provides an interesting study.

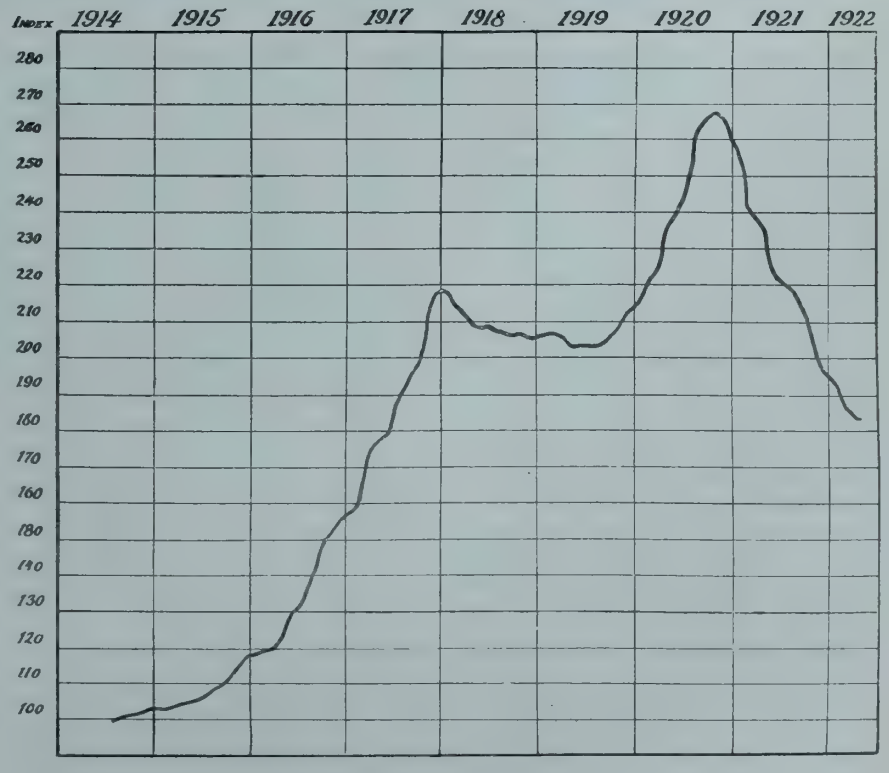
Substantial price recessions have taken place during the past few months, and the chart illustrating the ratio of decline since January, 1921, is of particular interest in this connection. Just how hardware prices on the average compare with the levels of pre-war days, is described in another diagram covering the varying quotations on fifty staple hardware lines during the past nine years. This chart shows the present average to be approximately 85 per cent. higher than August 1914, while at the same time, drawing special significance to the fact that in the short space of fifteen months, the war-period price inflation has been practically cut in half. Towards the latter end of 1920, hardware prices on the average attained a mark of 268. Many individual lines show a greater reduction, and stand easy comparison with pre-war levels. Other prices are temporarily restricted from further immediate lowerings owing to the reflection of railroad freight rates, labor, distributing and other production costs. The base prices on bar iron and steel are indicative in this respect of the marked liquidation in the steel industry in general. In many cases, the price trend in this direction has been looked upon as a barometer governing, or at least indicating, the probable tendency in numerous finished and semi-finished products.

Basic market developments are undoubtedly reflected in comprehensive data of this description, and the consequent price fluctuations offer a guide as to the future normal developments. These facts supply the ready contention that hardwarde prices are not waiting upon other trades in the matter of price reduction, but are taking the lead in this respect. Quotations on hardware have declined according to the necessities and environments of its own particular sphere, combined with the reflected easier levels on basic commodities in the primary markets. Adverse criticism of a price nature levelled at the hardware trade in general, can hardly be credited with any authentic foundation in the face of the solid facts contained in the appended charts.

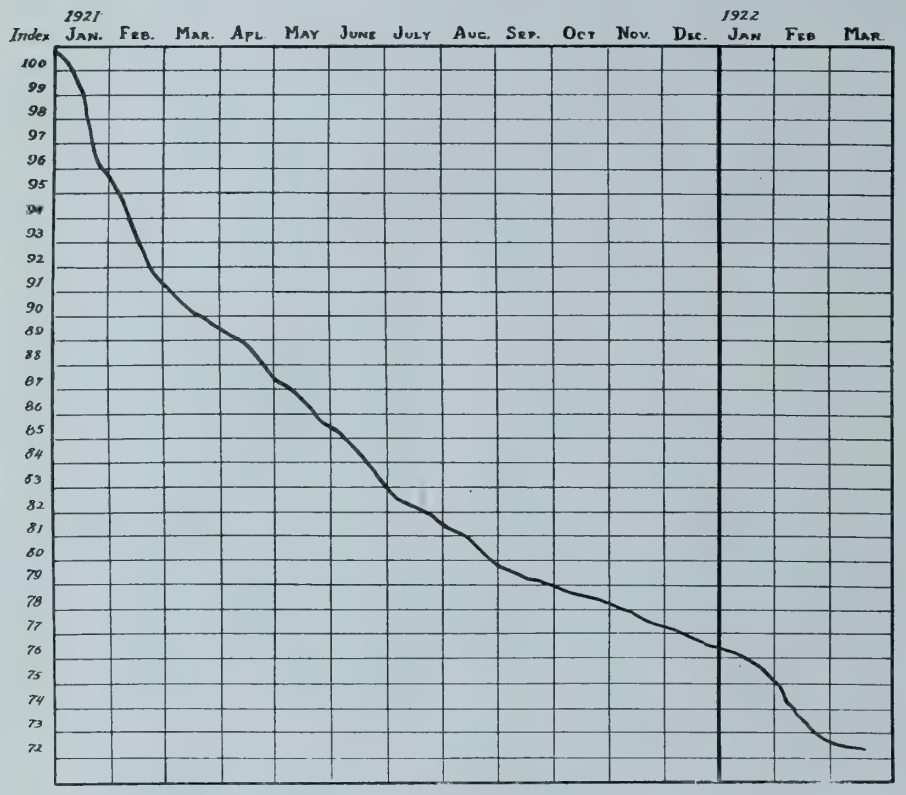
Trend of Hardware Quotations Since 1914

THE STRONG downward tendency which has been recently evident in prices on many hardware lines, can be truly appreciated when supported by the comprehensive table illustrated herewith, depicting the range of average hardware quotations through the last nine years. Prices in effect, August 1914, on fifty staple lines have been taken as the foundation for this chart, and are illustrated by the index figure of 100. The ratio of increase and reduction accurately gauged on the diagram referred to, which gives the comparative range of prices year by year, until March 1922. The fact that the present figure is approximately 185, shows that in taking these commodities as representative of hardware in general, quotations are just about 85 per cent. higher than pre-war levels.

The true significance of this situation, however, is realized when the extent of the decrease since the high peak of prices is measured. Towards the latter end of 1920, prices were in the neighborhood of 268, and since that time, have receded to the level already noted of 185. These facts should serve to remove the erroneous impression, which exists in some quarters that hardware prices soared out of all proportion and are still considerably higher than before the war.



Authentic Price Arguments for Hardwaremen



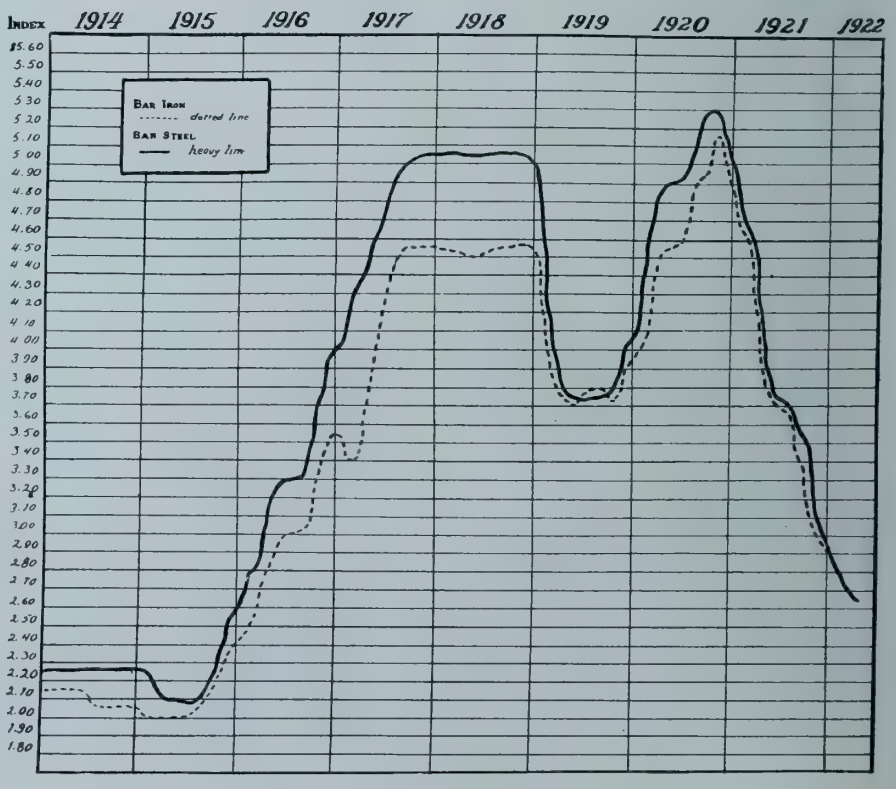
CONVINCING testimony as to the extent of the decline in hardware prices is provided by the chart covering the average quotations on fifty staple hardware lines, reproduced on this page. This diagram illustrates the extent and manner of the composite reductions during the fifteen months from January 1, 1921, until the present. The prices actually in effect on that date are represented by the index figure of 100 and the various announcements of lower quotations which developed during the past year and also in the initial months of the present year, can be clearly followed.

Prices during 1921 dropped approximately twenty-four per cent., when the fifty lines used as the basis for this diagram are considered representative of hardware goods in general. Many recessions have been recorded during January and February of the current year, which now places the average hardware quotation 28 per cent below the level which prevailed in January 1921. This is a most substantial decline, and compares very favorably with any other class of trade. Complete information as to how prices compare with pre-war levels, is contained in another chart in this issue

Iron & Steel Base Prices Over Nine Years

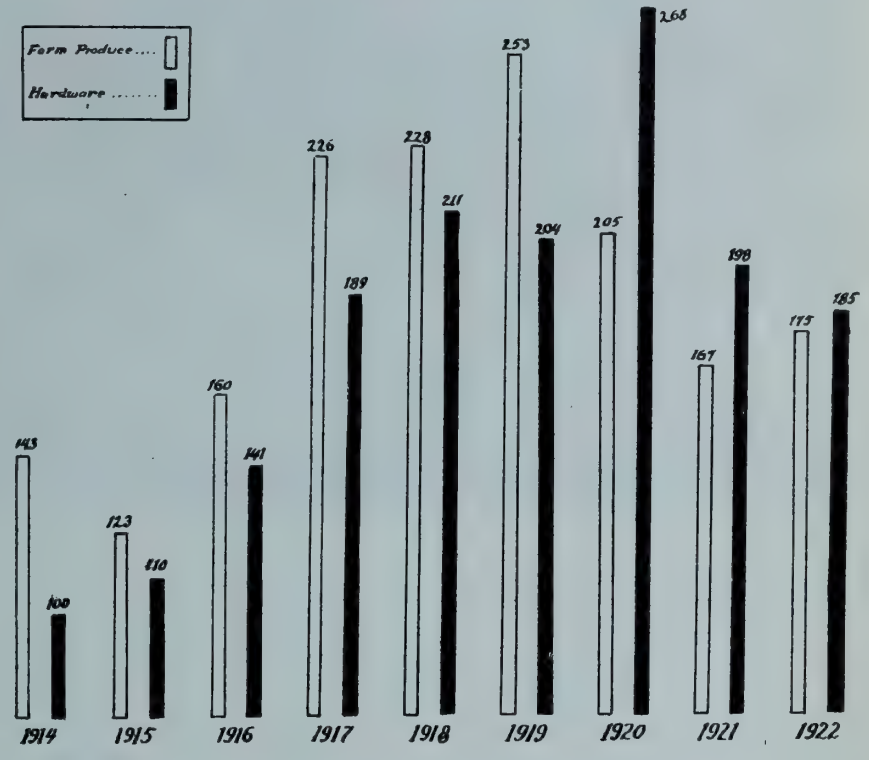
THE TREND of iron and steel trade prices has many times been taken as a gauge governing the average range of hardware prices in general. This is principally attributed to the large percentage of manufactured steel products in the hardware industry. A certain similarity in rise and fall of quotations during the past nine-year period is evident when the average base prices on bar iron and steel are compared with the representative price developments on certain staple hardware lines.

In the chart reproduced herewith, the comparative base prices on bar iron and steel are indicated year by year. The continued line represents the price fluctuations in Canada on bar steel, while the dotted lines indicates the rise and fall of primary base prices on bar iron, on the domestic markets. The index covers the actual prices, and thus the varying changes can be more clearly followed. The existing base price of $2.70, compares very favorably with the level of $2.25 in effect in January 1914. When freight rates, distributing and production costs, and various other elements are taken into consideration, it is readily recognized that the liquidation in steel prices is most thoroughly advanced.

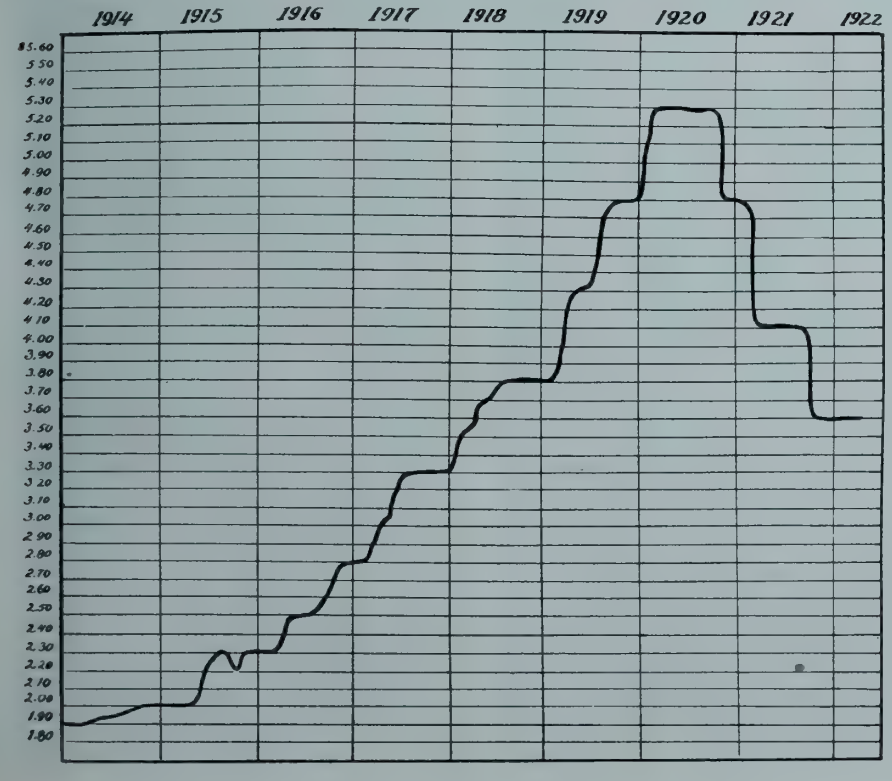


Comparing Hardware and Field Crop Prices

AN INTERESTING comparison is afforded in the chart produced herewith between hardware prices and the quotations on farm produce over a period of years. Commencing with the figures for the year 1914, it is at once seen that field crop prices were 43 per cent. above the average range for the previous five-year period, while quotations on hardware were approximately normal. For six successive years, farm produce prices ranged higher in proportion than did hardware, and showed a greater degree of inflation. Only during the two years, 1920 and 1921, did hardware prices register a higher average in comparison with farm produce, while the comparative average for the nine consecutive years, supplies another substantial price argument in favor of the hardware merchant. Such figures also indicate that in reflecting manufacture costs, hardware products registered a remarkable decline during 1921, a downward movement which has been continued throughout the initial months of the present year. On the other hand, some higher prices on wheat, and the recent increases in flax seed tend to reflect a slightly higher percentage covering field crop prices.



Average Quotations on Ready Mixed Paint



IN STRIVING to make 1922 the greatest paint and varnish year, various price arguments, indicating the rapid and marked decline in paint prices since November 1920, may prove to be of real service to the retail merchant. Any comparison between the prevailing cost of paint products and the high mark recorded on these lines during the post-war inflation period, merely serves to accentuate the extensive reductions which have been announced during the past fifteen months.

A summary of the diagram reveals the fact that there occurred practically no change in paint quotations until June 1915, which was almost one year after the outbreak of hostilities. Further immediate revisions were of a restricted character, and quotations soared as increasing production costs repeatedly forced developments of this nature. The highest level of $5.30, attained in 1920, represents an advance of 165 per cent. over the August, 1914, level. Compared with the prevailing price, which is only 80 per cent. higher than the pre-war basis, another substantial and authentic price argument is thus available to the merchant when discussing paint prices with prospective customers.

Hardware Merchant Pins His Faith on the Adoption of "Save the Surface" Department

Convinced That Coming Season Will Surpass Records of Preceding Years—Sales Have Been Doubled Each Successive Year Since Opening Five Years Ago—Line Cast for Non-Customers Through Mailing Lists—Early Inquiries Promise Well For This Spring's Business

TO HAVE doubled sales of paint and varnish each successive season for the past five years, and to further increase this growth of the department this year is the past accomplishment and future intention of Ravary Limitee, 2115 St. Catherine St., East, Montreal. Commencing in business on the present premises five years ago, sales records show that the turnover at the end of each year has doubled that of the previous season. To again attain this standard, and surpass it, is the objective for 1922, and when in conversation with Mr. Ravary, Hardware and Metal was left in little doubt as to what the records will show in December next. Plans for the year's campaign were commenced in the month of February, and they are plans that should certainly bring results.

"Save the Surface" Department

Where Mr. Ravary pins most of his faith in the business they anticipate this year is in adopting their "Save the Surface" department. From appearances this means a large painted sign directly at the end of the paint shelves, well up to the ceiling, and in full view when entering the front door. Added to this are the now well-known slogans, with the hand drawing the paint brush, wherever they can be conveniently displayed in the paint section. To Mr. Ravary and the salesmen behind the counter the adoption of the new department means something more, and it is realized that it is up to the salesmen to convey the true meaning to the customers. "The sign will do its part and we will finish the job," was the concise way in which the future success was spoken of.

The paint department is both spacious and well balanced, and has been extended twice since the opening of the store. It now occupies almost the entire side of the front store, with a counter of the same length immediately in front of the shelves. The increased business done from year to year has made it necessary for a corresponding growth of shelf space, and with the addition now of the large sign, painted across the rear partition, a very complete appearance is given.

"Customers see the sign immediately upon entering the front door, and invariably a question is asked. If only through curiosity, it gives us the opening, and we lose no time in acquainting them with reasons why it was placed, there, and what it really means," said Mr. Ravary.

Non-Customers on Mailing Lists

It was early in February when Hardware and Metal visited the store, just at a time when the new Spring shipment had arrived, and activity was everywhere apparent in the paint department. Although early for paint sales, preparations for the coming season had already been made in the sending in of the mailing lists. A rather peculiar feature was explained in the compiling of these lists, and it was learned that the same method was adopted each season. A complete revision is made in the names, and rather than forwarding the same list of customers each year, special care is exercised in seeing that parties who are not customers of the store constitute the list for the most part. In doing this a line is cast, not only for paint prospects, but for other lines in the store as well. As Mr. Ravary explained, they can take care of their regular paint customers, because they get in personal touch with them over the counter. It is the ones they cannot reach that are sought through this medium. Past records of the paint department are sufficient proof that this has been a good idea.

Women Customers

Women form a good part of the paint customers, as is the case in nearly all hardware stores. Sales of smaller cans and sundries, including varnishes, stains, wax, polishes, etc., add materially to the sales records. For this reason the Ravary store has found it almost necessary to cater in such a manner as will prove pleasing to this trend of trade. When a lady customer enters and asks for a can of paint or varnish for the inside of her home, in many cases she is in the middle of her house-cleaning duties. There are floors, walls, ceilings, or perhaps furniture which will require a refreshing coat. If paint is required, the chances are there is a room or two that should be re-papered. Wall paper then has proven a good line to work in conjunction with the paint department.

The growth of this department was fully explained when Mr. Ravary stated that for the first year, five years ago, only twenty patterns were stocked. Last year 250 different designs were shown, and for this season, nearly 350 new patterns have been bought. Stocked in bins immediately at the end of the paint shelves, but separated really by a partition, these bins run from ceiling to floor the full length of the rear part of the store. Each bin is numbered according to samples in book which is on a stand facing the paint department.

Earlier Enquiries

"Paint is much cheaper this year, isn't it, Mr. Ravary? Guess I will be able to paint the house this spring,"

The "Save the Surface" department of Ravary, Ltd., Montreal, is prominently named with the familiar sign of the campaign in both English and French. Where customers are already acquainted with the underlying principles of the campaign this linking up of educational effort helps paint business and where the campaign is unknown to customers, an opportunity is presented for fully explaining its meaning. Following up the message given by the signs, the paint salesmen support the arguments surrounding the use of paint, varnish, etc., for protective value and this combination of effort has proved very effective in stimulating business in this store. The paint department has been extended twice since opening the store and has doubled in volume each successive season for the past five years. This is sufficient recommendation for the principles followed.

was not an uncommon remark heard in the store in the early months of the year. Early inquiries, with lower prices now as an inducement, lead Mr. Ravary to believe that a new record would be made this year.

A POOR BRUSH DISCREDITS GOOD PAINT

(Continued from page 177)

the brush. We recommend a good brush, fully realizing that if the completed work does not please, owing to the use of a poor brush, the brush will not get the blame. The failure will be charged to the paint, and the dealer will come in for the blame."

Visualize the Completed Job

A big business has been done already this year in various enamels.

Like the national advertisers, Mr. Noble, the display manager feels that a customer, in considering the purchase of an enamel tries to visualize what the completed job is going to look like. To help them do this, Mr. Noble always shows some piece of furniture like the hair restorer shows your head, "Before and After."

He is always on a still hunt for an old rocker, an old bureau or some other old derelict that will respond to a good coat of enamel. One of the most effective window pieces that he ever used, was an old bureau which looked as if it had camped out all winter. He gave half the bureau a couple of coats of good glossy white enamel.

The handles on the rejuvenated side were all tightened up and bronzed. The resultant piece of furniture was a story without words. The store enjoyed a noticeably large business in enamel.

The fad for bronzing baskets, chairs, floors, fir cones, statuettes, leaves, etc., was given its impetus in Vancouver by the artistic series of windows dressed by Mr. Noble, featuring the effects to be obtained by the use of the various shades of bronzes in combination. A large volume of business in bronzing materials is still maintained.

Personal service and personal interest pay big dividends, states Mr. Henderson. One lady customer dropped in one day, and expressed the desire to get some enamel, "the same color as some furniture in a window down the street." The salesman went with the customer to the window in question, noted the color, mixed some to the desired shade, and Mr. Henderson avers that through that one delighted customer, there have been three or four new customers directed to the store.

To sum up, Mr. Henderson described the manner of building a good brush business as follows: "Study brushes, get a good line, the more it is advertised the better. Display a full range, up near the front of the store. Talk and sell good ones, because a cheap brush reflects no credit on the dealer, and brings discredit on good paint."

TWO "SAVE THE SURFACE" CONTESTS BEING ARRANGED

Two contests are being arranged by the Save the Surface Campaign Committee open to dealers or dealers' clerks. One contest is for window displays, for which prizes as follow will be given;—1st. $50; 2nd. $40 and 3rd. $25. The "Save the Surface" window trim and slogan must be a part of this display, and preference will be given those windows which best illustrate the idea of protection and preservation.

The other contest with prizes of the same value is for newspaper advertisements which must incorporate prominently the "Save the Surface" idea. This contest is open to dealers and dealers' clerks and awards will be based on the use of the "Save the Surface" arguments in the most novel ways to attract attention. Photographs of window trims and copies of newspapers containing ads must be entered at the headquarters of the committee, 509 Royal Trust Chambers. 107 St James St., Montreal, on or before July 1, 1922. The Save the Surface committee will act as judges of both contests and those eligible for the contests may enter one or both.

Farmers Now Are Better Paint Prospects

Recent Higher Prices of Farm Products Will be of Immediate Help in Increasing Farmer's Buying Power—Paint Prices Now Sufficiently Low to Encourage Hesitating Prospects to Action

Written for Hardware and Metal by W. S. FALLIS, Vice-President and Managing Director Sherwin-Williams Co. of Canada

PROGRESS in the paint industry in the opening months of the year, in that increased gallonage over last year is shown, and indications of an active season ahead, were briefly outlined by W. S. Fallis, vice-president and managing director, Sherwin-Williams Co. of Canada, Ltd. Terming the industry as more or less psychological, there were two factors in its favor, apart from any natural advancement in trade generally with the opening of Spring. Unemployment, which is detrimental to business in most lines, was found to be beneficial to an extent in paint sales. Men out of work in many cases found employment around the home, painting and renovating, where otherwise this would not be done. Also, there was still a good amount of painting required for buildings neglected in the years of the war, and those following. Reports from all sections indicate such to be the case, and the majority of people would not allow this condition to prevail all through 1922, when paint is now considerably cheaper.

W. S. FALLIS

Vice president and managing director of Sherwin-Williams Company of Canada, who points to the farmers as better paint prospects now that farm products are bringing higher prices.

West not at all Disappointing

Speaking of conditions in the West as he found them on a visit through the Western provinces earlier this year, Mr. Fallis said that they were far from disappointing, and an improvement, he was convinced, would also be felt with the opening of spring weather. "The recent advance in the price of wheat will help out the farmers more than anything else, as they will now be able to thresh their grain, still in the stock, at a reasonable profit. Last year this was denied them because of the enormous cost of harvesting, and the low level of the wheat market.

"Crops were poor in some sections, but the West is now so vast that a total crop failure is hardly probable. Last season the Southern part of Saskatchewan and Alberta was poor, but the northern part of each province produced fairly well. The same could be said of Manitoba," he continued.

"Business in Ontario and Quebec was usually of a more staple character, and reports from these provinces could always be used as a barometer for trade in general. The Maritime provinces, unfortunately, were a little backward because of labor troubles they had experienced, but a turn for the better was now evident in this quarter."

Aggressiveness Pays in the Paint Business

Immediate Future Holds Much in Store for Business Man Who Analyzes Its Possibilities and Problems—Ebb and Flow of Last Few Years Has Left People Well Provided With Most Everything But Paint

Written for Hardware and Metal by M. F. CHRISTIE, President G. F. Stephens & Co., Ltd., Winnipeg

IT MUST BE frankly admitted that 1922 presents serious problems—the solution of which will call for unusual determination and effort on the part of everyone concerned. Such an admission, far from being a sign of weakness, may be turned into a veritable source of strength, since to recognize the presence of a problem presupposes, on the part of live red-blooded business men at least, a desire not only to solve it, but to make it serve their purpose.

In the present business situation there is one redeeming factor for the paint dealers.—In the flood-tide of prosperity the public bought liberally and in a great many cases, over-indulgently, of not only necessities, but many luxuries while the purchase of paint seemed to have been regarded as something that could be put off, if not indefinitely, for another year or so. The result is, that while many people are well provided and will be for some time, in respect to their household equipment and other needs, their properties are starving for lack of paint.

This is true, not only in regard to the bulk of exterior work, but also in the case of innumerable interior jobs, and the public can quickly be won over to a paint buying frame of mind by concerted action on the part of the paint manufacturers and paint dealers.

An Apt Retort

The attitude that should be adopted at this time by everybody connected with the paint business can best be expressed in the answer of a certain merchant, who, when approached by a business friend and asked the rather sterotyped question, "How do you find business?" promptly retorted, "By going after it."

That the paint manufacturers are alive to the value of this policy is evidenced by the tremendous volume of advertising that has flooded the country during the past two years in connection with the "Save-the-Surface" campaign. It remains for the paint dealer to pluck the fruit, which has been ripened by this warm glare of publicity, by co-operating with the manufacturers to the fullest extent.

In another month spring will be here,

M. F. CHRISTIE

President G. F. Stephens and Co., Ltd., Winnipeg, who gives herewith some good pointers for the paint department in connection with Spring trade.

and the question arises, "What is the hardwareman going to do about it?"—The best answer to that question, will result by prompt action on the part of every dealer in bringing his paint stock to the front, as much as possible during the next few months. No matter how complete the dealer's stock of paint commodities may be, if it is hidden from view, away in some back part of the premises, it is not likely to arouse the buying impulse in the public who enter his store.

Putting Paint to the Front

The fact may be conceded that almost every property owner and householder subconsciously associates the spring season with painting, decorating and cleaning up. That being so, it is up to the paint dealer to clinch the matter from the sales viewpoint by actually visualizing to store visitors what is subconsciously running through their minds at this season.

Right here the dealer can take advantage of the educational propaganda that has been conducted so insistently by the manufacturers of late—and, by making prominent displays of paint, varnish, and allied seasonal lines in the front part of his store featured with attractive show cards inscribed "Our Save-the-Surface Department," he will stand an excellent chance of converting that subconscious thought into a buying reality.

It may be argued that the moving of paint stock from one part of the store to another means extra work—of course it does, but the kind of work that will most certainly result in a greater volume of business—Not only that, but this kind of work has an additional advantage insofar as it encourages and teaches the dealer to look over at regular intervals and keep it fresher and more up-to-date, than would be the case were it constantly and peacefully reposing on the back shelves.

Along with this effort to lay out an attractive "Save-the-Surface" Department, the dealer ought to make free use of the liberal distribution of dealer aids supplied by the paint manufacturers and which too often find a resting place under the counter. Bright snappy looking window trims, color cards, wall and counter displays of samples should all be used in helping to turn prospects into customers. This is what they are intended to do and live dealers have proved that, properly employed, they accomplish their mission.

Paint as a Factor in Coming Prosperity

Canadian Business Conditions Fundamentally Sound and Better Times Are Immediately Ahead —Paint and Varnish Will be Important Factors in Building Sound Prosperity

Written for Hardware and Metal by R. C. MISSON, Manager Sherwin-Williams Co. of Canada, Ltd.

IT IS AN evidence of the fundamental soundness of Canadian business, that it goes through periods of economic and business disturbance with what may be described as the minimum of difficulty, compared with the serious dislocations of industry which take place during similar periods in other countries. I think it is true to say that Canadian business has recovered more quickly from the last three periods of depression—1907, 1914, and the present one—than has been the case anywhere else.

A careful survey of conditions as they now exist, will convince us, I am sure, that we have stemmed the tide of depression, and I firmly believe that Canada is on the eve of a prosperous period of steady and healthy development. In considering the directions which this development will take, and the conditions which will arise through the passing away of the present difficulties, and old difficulties, I prophesy for the paint and varnish industry an ever increasing volume of prosperity.

One of the acute problems of today is the housing shortage—a problem which will have to be solved within the next five years, and the solution of which means a stimulation of building activity, thus directly increasing the use of paint and varnish.

Then there is the industrial revival to be looked forward to as a beneficial factor. Economy is, and has been for the last two years, the principle upon which railways, public service corporations, and industry in general have conducted their businesses. As a result, expenditure for rolling stock, maintenance, upkeep of paint and similar items, has been at the minimum. As soon as conditions definitely brighten, there will be a rush to put plant and equipment of all kinds back on the most efficient basis. Repainting of all kinds will be undertaken to a very large extent by railways, manufacturers, and the private consumer.

R. C. MISSON

Manager Sherwin-Williams Co. of Canada, Ltd., who shows why there is a big paint business to be developed this year.

Save the Surface

As another factor contributing towards increased activity in the paint and varnish business, we have the Save-the-Surface Campaign, which is now at the apex of its productivity, as the result of several years of educational work which have been done. Our industry is an economically sound one,—every dollar's worth of goods used contributes to a very large extent to the national wealth of the country. The use of paints and varnishes is a decided economy. They not only beautify, but they protect and preserve property, thus delaying the necessity for repairing and replacing for an indefinite period. This is the spirit of the Save-the-Surface Campaign—its value is being more and more widely recognized by the trade on this continent, and it is now one of the outstanding examples in educative advertising.

These are a few of the reasons why I look for constantly increasing activity in all lines of trade, and for our own particularly.

I have great confidence in the slogan —"Do it Now;" therefore, I want to say a word in season to every paint and varnish dealer—that is, that no time should be lost in formulating your plans, if they have not already been formulated, to secure the maximum amount of paint and varnish business that the bright prospects for the coming season offer; and to co-operate as fully as you can with the plans which have been made to make these prospects still better.

Canada in my opinion during the period of depression which we hope is finally passed, has shouldered the load, not with a sinking heart, but with buoyancy and much courage—for it really required courage. No greater truth could be spoken when considering the resources of our country than the statement that they are boundless. With its natural wealth backed by the courageous thrift which is characteristic of Canadians, there is bound to be a period of prosperity before us, which we can enjoy to the utmost.

Debentures, nearly all negotiable, to the value of $20,000 and $200 in cash was the loot of robbers who broke into the premises of the Bernier Hardware Company's store, 126 St. Lawrence boulevard, Montreal.

THREE LIVE WIRES

Salesman Merchant Clerk

Written by the
"Save the Surface" Committee
for
Hardware and Metal.

Salesman: This Spring order is a credit to you and there should be no danger of your having to lose any sales on account of your being out of stock.

Merchant: You are right—I found out to my advantage early in the game that a well assorted stock and kept well assorted all during the Spring and Fall helped me build up an ever increasing paint business and that I am constantly getting new customers from at least one of my fellow merchants who is often out of staple lines; the people can't wait for him to order so come to my store and many have been won over as permanent customers.

Salesman: Ship at once?

Merchant: Sure, shoot it along as quick as possible.

Salesman: Say George, you are doing a fine paint and varnish business but I can show you how you can increase the sales and profits of this department 25%.

Merchant: Well Jim, fire away—I have ears as big as a Missouri Mule when it comes to anyone suggesting how I can increase my business.

Salesman: George, I know you are enthusiastic over this "Save the Surface" Campaign—How about it?

Merchant: True as you sit there, Jim—it's the best selling campaign ever put over and believe me I have sold some nice bills of paint and varnish as a result of it.

Salesman: Fine, George, but you have only been the side show so far; it is now up to you to make your store the headquarters or main show of this big campaign.

Merchant: Well, show me the way.

Merchant: (To Chief Clerk) Bill, come here and listen in on this.

Salesman: You are conducting an up-to-date hardware store, and of course every one knows you carry a full line of hardware products, but they don't all know you carry a fine paint stock, so first of all let me suggest that you move your entire stock of paint and varnish from the rear of your store to the front where every customer entering your door will be reminded of the fact that you are prepared to take care of all their paint requirements, and don't forget that the bright labels and advertising features will also make a favorable impression.

Merchant: Yes, that's not a bad idea.

Salesman: Now for the main show—I want you to cash in on this big "Save the Surface" Campaign—First, arrange with your editor to run about six quarter page advertisements during April, May and June, featuring the fine quality of our house paint, also an adv. on floor varnish, one on flat wall paint, one on barn paint, etc., and introduce the "Save the Surface" idea in the copy. For instance, you can illustrate the value of paint as compared with fire insurance; fire destroys in an hour, but rain and snow and sun will destroy just as surely unless the property investment is protected regularly with paint and varnish. There are many other appeals such as home and town pride, increased selling value of well painted property, etc., and use the "Save the Surface" slogan as a part of each advertisement. In this way you will cash in on the big campaign that is being conducted by the manufacturers and to which I am proud to say our firm is a contributor.

Clerk: Can you help us frame up the ads?

Salesman: Sure, if you say the word I will have our advertising department work up a series of six ads. for you—all you have to do is make your contract with the newspaper and tell us the size of the space.

Merchant: Well, Jim, I call that service and just to show you I believe in action, I will call on the editor with you and start something at once.

Clerk: What about the "Save the Surface" window display contest I saw advertised in Hardware and Metal?

Salesman: George, what about letting Bill compete in that contest?

Merchant: Fine! Go to it, Bill—send in at once for the special window trim and also the door front transparency.

Salesman: And ask them to send you two "Save the Surface" trims, one for the window and one for over the paint and varnish stock.

Merchant: Well, I can see where with a small newspaper campaign I can not only increase my paint and varnish sales, but by bringing new customers to my "Save the Surface" department, I will also increase the sales of my hardware department.

Salesman: Well, boys, that's about enough for to-day, but when I am around again in six weeks I will show you how to round out your campaign for bigger and bettter sales and profits. Let's go over to the newspaper office.

A Poor Brush Discredits Good Paint

Instruction in Making of Brushes Given by Hardware Firm to Master Painters to Draw Brush Trade—Making the Store "Brush Headquarters" for Local Painters' and Household Brush Trade—Showcase and Store Card Suggestions—Linking Effort for Both Paints and Brushes

Written for Hardware and Metal by ROY HUNTER

"BRUSHES," said H. Henderson, of the Hunter-Henderson Paint Co., Vancouver, to Hardware and Metal, "are one of the most profitable lines that any hardware dealer handles. When I say that, I am voicing an opinion on which we, in this business, have actually acted upon. We are now specializing on brushes and paints.

"The brushes are, of course, my own particular hobby, if one might describe a business as a hobby. We have gone after two classes of brush trade, the painter, and the householder.

"It might interest you to know," said Mr. Henderson, "the means we took to get closer to the paint trade.

"One evening, not long ago, you might have come past our store on Granville Street, and had you peeked through the drawn blinds, you would have seen eighty Vancouver painters eagerly listening to an address by Mr. Champelovier, of the T. S. Simms Co., on the subject of 'BRUSHES.'

Instruction for Painters

"A screen was hung from the back of the store, and on this screen splendid pictures were thrown, illustrating the various points dealt with in the speaker's address. Every stage of brush manufacture was covered right from the time the various bristles and hairs were adorning the 'persons' of various wild or domesticated animals in every quarter of the globe. All the processes of cleaning, grading, assorting, and assembling the various brush making materials were described and shown in a most entertaining and instructive manner. Even to-day the men are coming in and discussing most interestedly the discussion enjoyed at that 'smoker' several weeks ago. That is one of the ways in which we have cultivated the acquaintance of this class of customers. We carry all the brushes that the professional painters use in their business, and co-operate with them in every way possible.

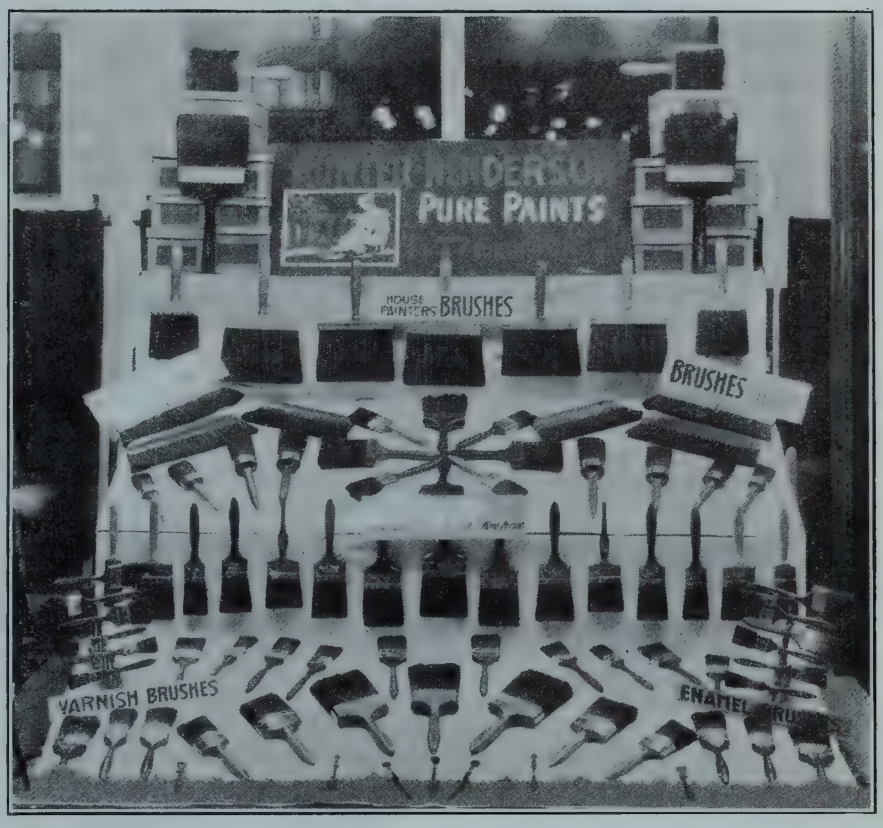
"Then again the householder, as a brush buyer is not generally cultivated as assiduously as the profit in brushes might seem to justify. It astonishes me to find in so many retail hardware stores, that small stock of brushes carried is relegated to some dark corner in the rear of the store.

Qualification of Brush Headquarters

"It is necessary to carry a fairly representative range of sizes and qualities, if a merchant aspires to be considered as 'brush headquarters' in his district. There are an enormous number of uses for brushes around the house and great opportunity to point out to the householder the many jobs in the house that can best be done with a brush.

These uses range from painting the flower pots, and varnishing the floor, to addressing the box of 'Good things,' that has to be shipped to Uncle John's family at Christmas time. We sell little brushes by the gross, and always have a large range of sizes and qualities on the counter nearest the door.

"Frequently the dealer finds that the householder has an idea what size he (or she) is going to use, and likes to pick over the stock, until the right one is found.



Window displays confined to the wide range of brushes for painters and for household use, have been largely responsible for the development of the extensive brush trade of the Hunter-Henderson Paint Co., Vancouver, B.C., as outlined herewith. Attractive cards draw attention to the various types of brushes.

Special Showcase Helps Buyers

"To make it easy to sell to the householder, we designed a special show case for brushes and had it made locally for us. The top panels lift up like the familiar cigar show case top, and the brushes are all arranged in order of size and quality so that the customer can compare, judge, and feel the hair in the brush. The salesman still has a splendid opportunity, as the customer selects, to urge the use of a good brush for a good job.

"This is one point on which we all put great emphasis in this store.

IT IS POSSIBLE TO DO A BAD JOB WITH A GOOD BRUSH, BUT IT IS IMPOSSIBLE TO DO A GOOD JOB WITH A POOR BRUSH

"We all make a point, in selling a brush, of finding out what the brush is needed for. Then we say that if the job is at all particular, that a good brush is essential.

"When we sell paint or varnish to a householder, we always enquire about

Buying Advertising Matter

THE QUESTION of whether or not retailers should be asked by manufacturers to pay a nominal price for advertising matter supplied to them is one which will bring forth many interesting comments from the trade. It is complained by some manufacturers' salesmen that the retailer is getting too much advertising and that he is substituting this matter for real selling. While this may have been the experience in some cases, progressive retailers are the ones who make use of every possible selling help and do not attempt to relax their selling energy because they have a few cards on the counter and a window trim of a certain line. These are not the type of merchant the manufacturer has in mind when he raised this point. As for the other type, it should be borne in mind that the retailer who does not make the best use of such material, providing he is not overloaded, is the one who will be even less interested if called upon to pay for such material. The progressive merchant should not be penalized for the few of the latter type.

34th Annual Spring Number

THE THIRTY-FOURTH Annual Spring Number of Hardware and Metal presented herewith, marks another milepost in the historical record of hardware business in Canada. The thirty-four years during which this annual number has been issued have seen many remarkable developments in this trade, and during that time there have been many ebb and flow movements of the tide of business.

This issue, designed for the purpose of setting forth information to assist in framing an intelligent buying and selling policy for hardware merchants during the spring and early summer months, also indicates what progress has been made in the readjustment process in the past year. These are times of rapidly shifting conditions as the inexorable laws of business logic proceed to make their influence felt irrespective of whom they affect, hence the need for sound consideration of these problems.

There is little doubt that definite progress has been made in the past year in establishing the whole business fabric of the country on a sounder foundation. Hardware has suffered much less than certain other industries, perhaps due to the fact that hardware is more a necessity than a luxury, and also due to the fact that it did not soar to the heights established during prosperous times in other commodities.

During the year past there has been a decline of approximately 24 per cent. in hardware prices, and there has been a substantial decline from the peak of 1920. Careful buying policies are still evident and should continue and a study should be made of plans which will enable the turnover to be increased without adding to the overhead expense.

The trend of business to date this spring has been encouraging, and the early promise of warm weather will undoubtedly stimulate trade in seasonable lines. The adoption of sound merchandising policies should enable the hardware merchant to make considerable further progress during this year. The foundation of this progress will be laid during the spring months, and to this end a study should be made of the articles and advertising appearing in this issue.

The Three Divisions

THE SMALLER number of price developments being recorded in the hardware markets is taken as an indication in certain quarters that the majority of hardware lines have been more or less well liquidated under prevailing conditions, and that a more stabilized price situation may be looked for. The markets, at present, appear to be divided into three classes.

There is the group of commodities on which manufacturers have guaranteed present quotations against further decline until a given date, usually some months ahead. In the second class are noted those products on which the makers have announced substantial reductions, in some cases repeating this move, until present levels represent a well-liquidated basis in anticipation of future spring trade. In the third group are found the various lines where some minor changes have been made from time to time, which gradually tend to seek lower levels in general, but at the same time serve to unsettle the market and destroy the confidence of the buyer. Hesitancy over the price question is not usually seen in reference to the proportion of current business in the first and second groups. In these goods, seasonal trade is reported fairly satisfactory, the usual cautious attitude of purchasers being apparent.

Retailers' Advertising

IN SEEKING reasons for the "spotty" character of hardware trade as reported from various sections of the country, it is quite evident that there is a wide divergence between the business methods employed by hardware merchants throughout the various provinces. For instance take the matter of retail advertising, it is a generally accepted fact that advertising is one of the most important branches of selling. True its importance has not been fully realized yet by all, but its proven value in many cases has usually served as sufficient recommendation to those inclined to doubt its value. But the odd fact, brought to light by a recent survey of the advertising practice of a large number of hardware firms in Canada as conducted by Hardware and Metal, was the wide divergence between policies followed by these firms.

In this issue will be found a few of the policies as outlined to Hardware and Metal. In combination with others they indicate a surprising lack of study of the subject, and a variation of policy which could hardly be credited. It is evident that while some firms spent as high as 8 per cent. of their gross turnover of last year on advertising, and are planning on increasing this to 9 per cent. or more this year, there are other large firms which think they are giving this matter all the attention it deserves when they spend half of one per cent. on advertising. A fair average of this survey would seem to be about 2 per cent. of gross turnover spent on advertising.

Conditions vary according to the location of the store, and different mediums for advertising are required, but the percentage set aside need vary little by the mediums used.

There is no doubt but that the retailer has in his local advertising a most potent factor for developing business under present conditions. The public must be educated to the need for certain lines of hardware, and confidence must be established in present prices. For this reason to stint advertising at this time is to curtail a most important influence. Many of the most progressive firms are those which have always spent a fair proportion of money on advertising, and made it effective. A reading of the article on the subject in this issue will help frame a sound advertising policy.

Mechanics Supply Co. to Erect New Warehouse

Many interesting Developments in Progress of This Firm During Past Forty-Four Years —Group Insurance Scheme For Employees—New Warehouse of Four or Five Storeys to Improve Facilities

THE CONTEMPLATED erection of another four or five storey warehouse, marks another important step forward in the progress of the Mechanics Supply Co., Ltd., Quebec City. The history of this firm during the past forty-four years under the capable guidance of W. H. Wiggs, has many romantic sidelights, and provides an important link in the history of development in the hardware trade of the Dominion of Canada.

Some two years ago a large piece of property was purchased on St. Andrew Street, Quebec, to take care of expected expansion, and the time has now arrived when the firm contemplates the erection of a fine new warehouse to supplement the present facilities.

The history of this firm is of such interest as to warrant a brief summary of the points of outstanding interest.

Forty-four Years in Business

It was in 1878, forty-four years ago, that W. H. Wiggs, as a young man of seventeen years of age, entered the hardware business in his native city of Quebec. After eleven years apprenticeship, an opportunity occurred through the closing up of an old established hardware business to secure certain premises and this gave W. H. Wiggs the chance he desired to start in business life; the name "Mechanics Supply Company," being chosen.

W. H. WIGGS.

President Mechanics Supply Co., Ltd., Quebec City, whose forty-four years of business in the hardware trade is now capped with further progress in the form of enlarged warehouse facilities.

Some of the first members of the staff who are still with the firm, often look back to those early days when modern plumbing, heating and electrical appliances were in their infancy. Among these may be mentioned the names of G. H. Simpson, now vice-president, W. R. Wilkinson, secretary, Messrs. Arthur Matte and A. Morisset, two other directors, and Omer Carrier, the firm's oldest storeman. Around these men have gathered a well trained and competent staff of employees, whose loyalty to the company has been signally recognized on several occasions by the president and his fellow directors, notably last year when a group insurance policy covering their respective years of service was given to each employee over six months with the firm.

Larger Premises Needed

The increasing growth of the business necessitated larger and better equipped premises, and in the year 1903, Mr. Wiggs purchased a piece of property on one of the principal business streets in the wholesale district and erected thereon a very complete hardware establishment. A whole floor on the second storey was devoted to an extensive suite of show rooms in which can be seen the most modern appliances in the plumbing, heating and electric trades.

The ground floor is devoted to the retail store which is equipped with every known device for the convenience of customers. The remaining two storeys and the basement carry other extensive stock. In addition, the firm's three large warehouses in the rear on St. Andrew Street are devoted to the heavier lines of radiators, boilers, pipe and fittings, enamelled ware, etc. A well equipped electrically-driven machine shop for the threading and cutting of pipe up to twelve inches in diameter is located on the first floor.

The year 1911 found the company incorporated under a Provincial Charter with the name and style of the "Mechanics Supply Company Limited." The privilege was given the older members of the staff to acquire capital stock therein. This is said to have been amply justified by the growth of the business since that date. There has been an increase in the staff—then numbering 15—to the present number of 70, all of whom have had a careful training in the various lines of specialties handled by the firm.

In order to take care of a future extension of trade the company some two years ago purchased an additional piece of ground on St. Andrew Street where they propose erecting another four or five storey warehouse. It is contemplated that this will give ample accommodation for future local requirements.

Will Ask Gov't To Restrict Oriental Immigration

Vancouver, B. C. (Special.) — The Provincial Board of the Retail Merchants' Association, B. C. Board, is presenting a special resolution to the government at Ottawa, setting forth the views of the organized merchants on the Pacific Coast, in regard to Oriental immigration. The resolution points out that thousands of returned soldiers and others are unable to find employment, and the Dominion government has recently limited immigration from Great Britain and other European countries by stiffening immigration regulations, and in spite of these facts, immigration from the Orient continues practically unchecked, which if allowed to continue, must by sheer force of numbers alone offer a competition which no Canadian citizen, whether he be engaged in business for himself or as an employee of others, or engaged in any form of agriculture, can successfully meet. It is further contended that it is not in the best interests of Canada to permit the immigration of a people who can never be assimiliated into our national life, as has been proved by the experience of other countries.

AVERAGE ADVERTISING COST TWO PER CENT. OF SALE

(Continued from page 129)

Another Western Ontario hardware merchant states:—

"Our average percentage cost for advertising is .60% which I am frank in saying is not enough, but our advertising is really governed by the time I have to put on it. We, of course, the same as all other merchants, are inflicted with the program advertising, but frankly I am of the opinion that good newspaper publicity is absolutely head and shoulders above anything else.

"We maintain a 6-inch space in both of our local papers, changing with every issue, both daily and weekly, and we endeavor so far as possible not to let one ad appear twice. You can quite appreciate that we are not able to do wonders with an ad this size, and we have found for ourselves that we should have larger advertising but we are faced with the task of getting this advertising ready.

Business Responds to Stimulation

"You asked what we would do during the year if the volume of business is not maintained. I may cite an example of our business during the last two or three months. Business has not been what it was of course a year ago, but we have not wasted our time, we have endeavored to create business and have succeeded to some extent, while at the same time obtaining prospects, and a very valuable list of prospects for future business in our different lines. Of course, we have not been able to stay in the store to do this but we have had to go out and get them.

"We include gifts to charities in our advertising and we think it is quite proper that we should."

An expression of opinion was secured from a number of aggressive Montreal retail hardware firms. One of the largest of these was of the opinion that one-half of one per cent. of gross turnover was a fair average percentage for advertising for a large store. Donations to charity and other gifts are not included in advertising but entered on a separate expense account to be charged to overhead at the end of the year.

Find Bill Boards Helpful in City

Another Montreal merchant stated his turnover last year (wholesale and retail) was $800,000 and they were expending $2,000 on advertising this year, basing the percentage at ¼ of 1%. This he considered sufficient for a city store. Of this amount only $100 will be spent in daily papers under the present plan, the balance on bill boards throughout the city. When asked if this latter form of advertising was not more beneficial to the wholesale end of his business he replied that it had been proven where the retail store had mostly benefited. With regard to the $100 for daily papers, this was used last year at Xmas season for the first time, when holiday gifts, with special prices, were featured. This had shown good results and for this reason he will again spend the same amount next month to feature spring sporting goods, but this idea will not be any further extended.

AN INTERESTING POINT CONCERNING INCOME TAX

On receipt of a recent enquiry from a hardware merchant raising an interesting point in connection with the tax where stock-in-trade is sold at a discount by a firm ceasing to do business, Hardware and Metal has secured the following ruling from R. Breadner, Commissioner of Taxation, Ottawa:

"You are advised that any firm ceasing to carry on business and selling its stock-in-trade to a purchaser at a discount, in so far as the discount results in a profit or loss to the vendor it in no way affects the purchaser. The goods purchased are carried into the books to the purchaser at cost value or the price paid therefor and at the close of the fiscal period the net result from the sale of the goods in relation to their cost, together with overhead expenses, is the profit in respect of which Income Tax is levied.

"If the vender realizes a profit upon the sale of the stock-in-trade although sold in bulk form, it is nevertheless liable to Income Tax if the profits be in excess of the statutory exemption."

(Signed) R. Breadner,
Commissioner of Taxation.

Twenty Years Ago

Following items are reproduced from March 15, 1902, issue of Hardware and Metal:

Nugent & Taylor, tinsmiths, Kingston, Ont., have assigned to R. J. McKelvey.

George E. Smith & Co., wholesale and retail hardware merchants, Halifax, N.S., have admitted Albert W. Smith as partner.

Crowell Bros., hardware, Halifax, N.S., have been burned out. They were insured.

Peaker & Son, hardware, Brampton, Ont., met with loss by an explosion. Wm. Peaker was seriously injured.

John Roger, Atwood, Ont., has taken T. G. Ratcliffe into partnership and they will continue business under the name Roger & Ratcliffe.

Gurney Foundry Co., Ltd., contemplate the erection of a new foundry at Toronto Junction, at a cost of $40,000.

The hardware trade will regret to hear of the death of Mr. Peleg Howland's 19-months old son. It is only three or four weeks ago that Mr. Howland also lost his father.

Hobbs Hardware Co., wholesale hardware merchants, London, Ont., have dissolved, Wm. R. Hobbs retires and Thomas S. Hobbs continues. The company is now applying for incorporation.

Adamson, Hewitt & Sproule, hardware merchants, of Orangeville, Ont., have dissolved on account of the continued ill health of J. J. Hewitt, who has decided to go to the Northwest to engage in ranching. J. B. Adamson and Ed. H. Sproule continue under the style of Adamson & Sproule.

In the House of Commons, Hon. Mr. Blair, Minister of Railways, in reply to a question by A. E. Kemp, Toronto, said that the Intercolonial receives for carrying pig iron from Sydney, N.S., to Montreal and points west of Montreal, $2.95 per ton, and for coal $2.55.

In the House of Commons the question of the imposition of a tax upon commercial travellers in Prince Edward Island was brought up by A. E. Kemp, who characterized the measure as illegal, and the Department of Justice stated that the Act had been allowed to go into force, but its legality had not been determined.

The council of St. Henri, Montreal, recently received a communication from three Chicago capitalists, Messrs. G. M. Ferguson, T. G. McCulloch and F. E. Lyster, in which application was made for a bonus in the event of their starting a linseed oil factory in that city. The proposition was to organize a company with a capital of $500,000 under the style of the International Linseed Oil Co., Limited.

Events in the Trade

BUSINESS CHANGES

Aylmer, Ont.—Ed. Miller, hardware, has sold to Patterson Bros.

FIRE LOSS

Fire was caused by an overheated enamel baking oven in the factory of the Canada Decalcomania Co., Toronto.

Moncton, N. B.—As a result of fire the building on Robinson Street near Main, known as the Minto hotel sample rooms, was totally destroyed and several adjoining buildings were considerably damaged the total estimated loss being about $30,000.

The building destroyed was owned by Carl Doull, who conducted a hardware store on the ground floor. Mr. Doull stated that his loss would reach at least $6,000 on stock alone on which he carried about $3,000 insurance. Loss on the building would reach at least $9,000 this not fully covered by insurance.

PERSONAL

A. Blackburn of the H. & D. Folsom Arms Co., New York, called on the Montreal trade this week.

L. J. Watkins has recently joined the firm of Macdonald Wire Goods Co., Drummondville, Que., and has been appointed factory manager.

W. J. Christie, manager of the Empire Stove and Furnace Co., Owen Sound, Ont., left on a business trip to the Canadian West. He will be gone about a month and during that time will visit all the principal cities from Winnipeg to Vancouver.

Jno. C. Newman, Montreal manager, McClary Mfg., Co., is still confined to the hospital, where he recently underwent an operation for appendicitis. Although improving, it will be a few weeks still before Mr. Newman is again able to resume his duties.

CANADIAN INCORPORATIONS

Delco-Light Co. of Canada, Ltd., has been incorporated with head office in Toronto and capital of $10,000 to manufacture and deal in appliances for the production and use of light by electricity, chemicals, etc. Incorporators include, W. S. Morlock, S. E. Wedd, R. B. Whitehead and B. V. McCrimmon.

O. A. Cole, Ltd., head office Toronto, capital $50,000 to manufacture and deal in paints, oils, varnishes, etc.

Merripep Gas and Gasoline Saver, Ltd., capital $50,000, head office Toronto, to manufacture and deal in gasoline saving devices, auto accessories, etc.

NAIL MANUFACTURER DIES

St. John, N.B.—Frederick E. Marvin aged 73, president and general manager of the Canada Nail and Wire Co., Ltd., died here after a lingering illness.

FULLER BRUSH CO. DISSOLVES

Hamilton, Ont.—Notice appears in the Ontario Gazette of the dissolution and surrender of charter of the Fuller Brush Co., Ltd., from March 20.

ONTARIO INCORPORATIONS

Electric Appliances, Ltd., head office Toronto, capital $40,000 to conduct a general electric supply business.

Warren and Finley, Ltd., head office, Toronto, capital $40,000 to manufacture and deal in steel, iron and hardware, and conduct business as general merchants.

C. G. KNOTT RESIGNS FROM STEEL CO. OF CANADA

After over thirty years' service with the Steel Co., of Canada, in various capacities, C. G. Knott, Sales Representative of the Toronto office is resigning at the end of the present month.

C. G. KNOTT

Who leaves the Steel Co. of Canada, Ltd., Toronto office, after over thirty years' service in various capacities.

Mr. Knott commenced his service in the steel industry with the Canada Screw Co., in 1891. He was located at Hamilton in the capacity of bookkeeper. He later became secretary of the company, and in 1893, when the Canada Screw Co. opened a branch office and warehouse in Toronto, he came to Toronto in the position of local manager. In July, 1910, when the incorporation of the Steel Co., of Canada was announced, and the Canada Screw Co., became merged in the new organization, Mr. Knott assumed the position of Toronto sales representative.

Mr. Knott will become secretary-treasurer of the Holtyrex Gold Mines, Ltd.

MAKES ALUMINUM CASTINGS

Canadian Aluminum & Brass Company, Ltd., has taken over a plant in Windsor. J. P. Carritte, President of the company, has been associated with the General Aluminum and Brass Company, Detroit, for many years. The company proposes to manufacture castings for motor cars. The Windsor company expects to start production this month.

MONTREAL WILL HAVE DAYLIGHT SAVING

At a meeting of the Montreal City Council this week a resolution was adopted whereby Montreal will have daylight saving again this summer from April 30th to October 1st. Although some opposition has been given from different quarters in recent weeks, the Council passed a resolution by a vote of 23 to 10, and the City will now notify the general public of its intention to adopt the new time for the period mentioned.

H. S. HOWLAND & SONS LTD. APPOINT STAFF MEN TO BOARD OF DIRECTORS

The wholesale hardware firm of H. S. Howland & Sons, Ltd., Toronto, has announced that four new men are to be added to the board of directors. These men have been in the employ of the firm for a considerable number of years and this promotion is said to be an award of merit. Those appointed to the board include: T. B. Williamson, now in charge of the purchasing department; D. H. Foster, warehouse manager; C. E. Screaton, sales manager and W. H. Lamont, secretary and financial manager.

ACCESSORIES SHOWN AT ST. JOHN MOTOR SHOW

St. John, N.B.—Sixty-one cars have been entered for the St. John Motor Show, April 3-8, almost double the number ever previously displayed in this province. The accommodation in the immense Drill Hall will be taxed to the limit, in placing these exhibits and finding room as well for the accessory houses that desire to make a showing. Practically every car sold in New Brunswick will be seen, all of them this year's models.

H. R. EMMERSON MANAGER OF RECORD FOUNDRY AND MACHINE CO.

Moncton, N.B.—At the office of the Record Foundry and Machnery Co. Ltd., it was announced that a change has been made in the management board. H. R. Emmerson, Dorchester, has been appointed manager and C. I. Mills, Brookville, has been appointed factory manager.

H. G. Jackson, it is understood, resigned the position of manager some time ago. It is understood that he has accepted a position not far distant from Moncton.

MERCHANTS MEET IN FREDERICTON

Fredericton, N.B.—The monthly meeting of the Fredericton branch of the Retail Merchants' Association was held in the council chambers, with the president, William R. Fraser, in the chair. The speaker of the evening was George S. McBeath, of the office staff of T. McAvity & Sons, St. John, who gave an interesting talk on credits. A discussion of the paper followed. A vote of thanks was tendered to Mr. McBeath at the close of his address. A. H. Milton, provincial organizer of the Retail Merchants' Association, also was present and gave a short address. Other matters of interest to the association were dealt with.

HARDWARE CLERKS HOLD AN OUTING

St. John, N.B.—Under the auspices of the Hardware Clerks' Association about three hundred of the employees of the city hardware stores met at Lily Lake, Rockwood Park, and took part in an afternoon devoted to sport and an evening of entertainment and dancing.

Everybody had a good time and the affair was a splendid success.

After supper the following prizes were presented by H. D. Sullivan, honorary president of the Hardware Clerks' Association.

Handsome silver cup, grand prize for greatest number of points, won by H. Garnett, T. McAvity & Sons, 90 points.

Box cigars, second prize, won by H. Driscoll, Robertson, Foster & Smith, 80 points.

Small silver cup, boys' race, George Stubbs, Emerson & Fisher.

OBITUARY

Harold A. Wilson, president of the Harold A. Wilson Company, Limited, sporting goods dealers, Toronto, passed away very suddenly at Saranac Lake. Mr. Wilson had been in very poor health for the past two years, during which time he had been under treatment at Saranac Lake. He made frequent visits to the city. The firm of which he was the head is one of the oldest sporting goods concerns in Canada.

DEATH OF GORDON McGREGOR

Windsor, Ont.—Gordon McGregor vice-president and general manager of the Ford Motor Company of Canada, died in the Royal Victoria hospital, Montreal, where he had been confined for some days. Death followed an operation for intestinal trouble.

Gordon Morton McGregor was born in Windsor, Ont., January 18, 1873, and was educated in the public schools of Windsor and Winnipeg. In addition to being vice-president, treasurer and general manager of the Ford Motor Company of Canada, Limited, he was a director of the Ideal Fence and Spring Company, Windsor, Ont., director of the children's aid society; director of the Essex health association; director of the Windsor Petroleum and Refining Company; president of the Automotive industries of Canada, Toronto; and chairman of the Essex Border Utilities Commission. He had occupied the position of vice-president, treasurer and general manager of the Ford Motor Company of Canada from 1904 up to the time his death.

Mr. McGregor married Harriet Dodds, daughter of John Dodds, in 1898, and left one son and three daughters.

LATE GORDON McGREGOR
Vice-president and general manager of the Ford Motor Company of Canada, director of Ideal Fence and Spring Co., etc., who died in Royal Victoria Hospital, Montreal.

IMPERIAL OIL CO. GETS CONTRACT

Kingston, Ont.—On the recommendation of the city engineer, the city council accepted the tender of the Imperial Oil Company, to supply the city with asphalt cement at $30.95 per ton, f.o.b. Kingston. The council also accepted the tender of the Dominion Tar and Chemical Company to supply road oil at 15½c an imperial gallon, f.o.b. Kingston.

HIDES NO LONGER TO ENTER U. S. FREE

An import duty of 15 per cent. ad valorem on hides has been voted by U.S. Senate Finance Committee Republicans who are re-writing the Fordney tariff bill. Hides were on the free list under both the Payne-Aldrich and Underwood laws and would have so remained under the Fordney measure.

Senator Gooding, Idaho, chairman of the Agricultural bloc said Senators from the agricultural states were determined to have protection for the farm industry equal to that given other industries, because the farmers had been hit perhaps even harder than the other industries.

PLAN ELECTRIC RANGE IN EVERY WINDSOR HOME

Windsor, Ont.—Planning to instal an electric stove in every Windsor home, the City Council will meet the Hydro-Electric Commission to discuss the feasibility of selling stoves to householders on the instalment plan, payments to be made in monthly light bills.

The resolution averring the plan was introduced by Alderman Strong and A. W. Jackson. The first named asserted that it was one method of fighting the natural gas companies, who were either unwilling or unable to give service to two-thirds of the city.

Ald. Howell, in supporting the resolution, suggested that Hydro-Electric Commission should cut in half the cost of installing stoves.

MOVING SEASONABLE HARDWARE IN KINGSTON

Kingston, Ont.—The mild weather of the past week has resulted in much activity in the sale of automobile accessories. A large number of cars, which were put away for the winter, are now out again, and the roads are in fair condition. Dealers are looking for a brisk business in the sale of automobile tires.

The firm of McKelvey & Birch held a special sale of aluminum ware this week, and devoted one of their windows to a display. Another window was given to electric ranges, electric washers and vacuum cleaners. The firm carried a very attractive advertisement in the newspapers under the heading: "Educating Father. We often read about 'Bringing up Father.' Now we want to educate father to the fact that there are new things required in the kitchen and the home." This firm is also putting forth a very timely article in the form of a fur box, to keep winter furs during the summer. Galvanized iron fur boxes are selling at $7.

OTTAWA AND DISTRICT HARDWARE MERCHANTS GATHER

Ottawa.—A number of retail hardware and paint dealers of Ottawa and vicinity were the guests of the Imperial Varnish & Color Co., Toronto at dinner at the Chateau Laurier. Future business conditions and more aggressive selling methods were discussed. T. F. Monypenny, vice-president, presided, assisted by G. C. McEwen works manager and H. E. Mihell, sales promotion department. Among those present were Alex. Newlands Capital Hardware, Ottawa; J. O. Dalpe, Hull; D. Gosselin, Alex Newlands, Capital Hardware, Ottawa; F. J. Bradley, Stittsville; Messrs Cameron and Leacock of Smiths Falls and Stewart of Pembroke, Ont.

COWAN HARDWARE TO ERECT FINE NEW STORE

London, Ont.—Tenders are being called this week for the new store of the Cowan Hardware Co., which will replace the building recently destroyed by fire. The firm, it is said, plans to make the new building one of the finest hardware stores west of Toronto. It will be four storeys in height with basement, and will have a frontage of 40 feet and a depth of 138 feet. All new modern equipment, show cases and fixtures will be installed and special attention will be given to the display windows.

In addition to this building the Cowan Co. is rushing plans for a new $50,000 warehouse building on Talbot Street, where property has just been purchased. This will be much larger than the old warehouse and will be modern in every respect.

The firm is looking forward to excellent business not only in the coming months but in the coming years, and is building with that aim in view.

BICYCLE TRADES MEET

The general conference of the retail and wholesale bicycle trades in Canada which was held at Toronto, under the direct auspices of the Canadian Bicycle Dealers' Association, was productive of many results. A recommendation was received that the annual Bicycle Week be held in Canada from June 10 to 17.

A substantial fund was placed at the disposal of the Sales Promotion Committee. This Committee will release advis ry circulars to the retail trade at stated intervals on bicycle subjects and a new feature established was a "Question and Answers" Department for the particular benefit of dealers in small towns. Among those present were president George Wenige of London, secretary N. N. Ferries of Hamilton, J. W. Gibson, B. B. Halladay, T. B. McCarthy and J. H. Morrow of the Canada Cycle & Motor Company, Earl Rogerson of the Dunlop Tire & Rubber Goods Company, Toronto, Mr. Saunders of the Goodyear Tire & Rubber Company, Toronto, Herb Rawlinson of Hyslop Bros., Toronto.

Least Pig Iron Production Since 1908

Mineral Production in 1921 Shows Considerable Decline in Value—Increased Fabrication of Copper Into Hardware Offers Good Prospects—Nickel Production Is Low—Increased Production of Lead and Zinc

IN THE preliminary report of mineral production in Canada during the calendar year of 1921, S. J. Cook, B. A., A. I. C., chief of this division, points out that the break in prices of most metals during the last quarter of 1920 foreshadowed low records for the mining industry in Canada in 1921. Despite this, records show an aggregate value of Canadian minerals of $172,000,000 compared with $237,000,000 in 1920. The average premium obtained on New York funds in the year has been taken in arriving at the value of minerals produced.

Towards the close of 1921 mineral markets became more active, prices showed a rising tendency and a gradual absorption of stocks left over from abnormal activities took place.

The mining of asbestos in 1921 declined to less than half the activity of the previous year. Most of the asbestos produced in Canada is exported to the U. S. and thence to Europe. The adverse exchange situation between Europe and the U. S. was responsible for curtailing this production.

Notwithstanding the general decline in prices in the past two years the quantity of lead recovered increased more than 86 per cent compared with 1920 and was valued at almost 20 per cent more. Zinc increased one third in quantity but fell off 17 per cent. in value.

Copper produced, at the average monthly price on the New York market for electrolytic copper of 12,502 cents would be worth in Canadian funds $7,459,780, about half that of 1920. Throughout the twelve months the price of copper was fairly uniform around 12 cents. The increased fabrication of copper products in Canada seems to offer the most attractive prospect at present. Stocks have been considerably reduced, electrification of railways is proceeding, and an increasing consumption of small hardware and electrical supplies, etc., is taking place.

Nickel suffered the most severe decline due to the overstocked condition of the world's nickel markets and the slowness with which the large stocks held by all the warring countries have been absorbed. 1921 production was but 31 per cent. of the production of the previous year.

The average monthly production of pig-iron in Canada was 50,000 tons or less than the average monthly record for any year since 1908. The market was quiet and the suspension of interest in iron was general. Shipments of iron ore from Canadian mines which in 1920 were the lowest on record for twenty years, again decreased by more than 50 per cent. The monthly production of steel ingots and castings was 56,000 tons compared with 92,000 in 1920.

HARRY GRAHAM

The many friends of Mr. Graham will be interested to know of his appointment to the position of general manager of Bond Engineering Works, Toronto. For the past six years Mr. Graham has been with Canadian Vickers Ltd., Montreal, as Purchasing Agent.

WESTERN CANADA NOTES

Strasbourg, Sask.—H. Klein is commencing a hardware business.

Swain & Rae, hardware, Toga, Sask., have dissolved partnership, G. B. Swain continues.

E. T. Musson of Burlington Products Co., Hamilton, Ont., was a business visitor to Winnipeg.

A. E. Michael, hardware merchant, Erskine, Alta., has disposed of his business to A. Festerhaugh of Macklin, Sask. Mr. Michael had been laid up for the last 4 months and he intends to take a trip to the Pacific coast for relief.

PENDERGAST FENCE CO. COMMENCES OPERATION

Sarnia, Ont.—Sarnia's latest industry, the Pendergast Fence Company, Limited, opened its operations in the manufacture of wire fencing, in the latter part of last week, and is now turning out the rolls of fencing for distribution to many parts of Ontario and Eastern Canada. The large and modern loom which steadily transforms the strands of wire into sound fencing, runs ten hours a day turning out something like 2,600 rods in the course of that one shift.

Letters to the Editor

Editor, Hardware and Metal,
Toronto.

Many thanks for your letter and card of Feb. 13th. I certainly feel very proud of myself in securing a place with the prize winners in the recent Christmas Window Dressing Contest. I hope to continue to participate in this contest each year.

(Signed) A. BAILLIE,
Sumner Company,
Moncton, N.B.

H. L. Southall,
Managing Editor,
Hardware and Metal,
Toronto.

Dear Mr. Southall: —

Your kind letter of 10th to hand, and in reply would say we trust many more hardwaremen throughout the Province will adopt the cash system.

We will give you an instance of how it has worked out in another line of trade. Bloomfield is a prosperous village situated five miles west of Picton, and a Mr. H. Y. Cooper runs a saw and grist mill there. After we had run the cash business for a month, reading our locals every week as to its success, he became greatly interested in it, and resolved to make the plunge himself. So he inserted ads. in each of our local papers announcing when the change would take place. He also mailed circulars to each of his customers a week before the date. In fact he followed our procedure to the letter. He was in the store last week buying goods and we asked what success he had had and how he liked it and, like ourselves, he is more than delighted, for it has proved a perfect success from every point of view.

We are mighty pleased with trade results this month, as so far, it has exceeded March of last year by over $700. Last Saturday we waited on 268 customers, an increase of 80 over the corresponding Saturday of a year ago, and the day's sales, $336.32, being an increase of $162.04 over a year ago.

The writer will be in Toronto this coming Wednesday night as he is one of a delegation from the Prince Edward Board of Trade that will meet the Minister of Public Works. If train connections will permit you will surely see me at the office of Hardware and Metal Thursday afternoon.

CARTER BROS.
Picton, Ontario.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

NON-CORROSIVE FLUX

D. H. Jackson, Chesterville, Ont.—Will you please advise where I can secure non-corrosive flax for soldering tinware?

Answer.—We would refer you to the following: Canada Metal Company, Fraser Avenue, Toronto, Ont.; The Chicago Solder Company, Chicago, Ill.

LUBRICATOR GLASSES

Messrs. H. W. Reiner, Steinbach, Man.—Will you please advise where I can secure glasses for oil cups?

Answer.—The James Morrison Brass Mfg. Company, Adelaide Street West, Toronto, Ont., carry in stock a large quantity of these glasses.

CANADA STEEL DAMPERS.

Russell Hardware Co., 126 King Street, E., Toronto, Ont.—Can you tell us who makes the Canada steel dampers?

Answer—The Myers Manufacturing Co., of Dresden, Ont.

KER-BEN FURNACES.

Messrs. Diamond & Hyde, Belleville, Ont.—Would you kindly advise us where we can procure repairs for the Ker-Ben furnace?

Answer—McIntyre & Taylor, Limited, 501 Queen Street West, Toronto, Ont.

COOPERAGE SUPPLIES

The Dresden Hardware Co., Dresden, Ontario—Will you kindly place our name before manufacturer of cooper supplies?

Answer—The Canadian Cooperage Manufacturing Company, of Smith Falls, Ont.

HUMIDIFIERS

Messrs. Hope & Son, Sanitary Engineers, Perth, Ont.—Will you please advise the name of the firm where we may secure the small type of humidifier?

Answer.—These can be secured from C. Ormsby Company, 175 Adelaide Street W., Toronto, Ontario.

SHEET BRASS

H. F. Prelipp, 316 King Street West, Hamilton, Ont.—Please advise where I could obtain a sheet of hard brass, 27 in. by 4 feet 6 inches.

Answer.—This is a special size and the distributors of sheet brass do not usually carry this product in larger sizes than 24 inches by 48 inches. The fact that you want 27 inches wide would necessitate special rolling by the mills. We would refer you to the Brown Rolling Mills, New Toronto, Ontario.

ICE CUTTING MACHINES.

Otto Knechtel, Waterloo, Ont.—Please let me know the name of a firm manufacturing ice cutting and handling machines.

Answer—The Robert Donaldson & Sons, Limited, of 72 St. Henry Street, Montreal, Que.

MAYTAG WASHING MACHINES

The Fraser Hardware Company, Galt, Ontario.—Would you please tell us who are the agents for the Maytag washing machines?

Answer.—Our information is that Whites Limited, of Collingwood, Ont., were at one time the Ontario distributors for the Maytag washing machines.

You could obtain this machine, or repair parts for same from the Maytag Co., of Winnipeg, Man., or direct from their head office at Newton, Iowa, U.S.A.

KLYMAX WASHING MACHINE

The George Taylor Hardware Limited, Timmins, Branch, Ont.—Will you kindly send us the name of any manufacturer of a washing machine that operates on a principle similar to that of the Laundryette?

Answer—The Klymax Electric Washer, made by the Slade Manufacturing Company of Owen Sound, Ontario. The Easy Washer, manufactured by the Easy Washing Machine Co., of Toronto, Ont., is also similar.

VENEER CHAIR SEATS

Messrs. Guiterman, Rosenfeld & Company, 35 South William Street, New York City.—Can you supply us with names of Canadian manufacturers of wood veneer chair seats?

Answer—The Canadian Veneering Company of Acton Vale, Quebec. Other firms we might suggest are: The Owen Sound Chair Company, Owen Sound, Ont., and The North American Bent Chair Co., of Owen Sound.

Hardware Prices At a Glance

Unit	August 1914	High level	Present price
Brass sheets ..... lb.	$0.26	$ 0.60	$ 0.22
Range boilers (30-gal. std.) .... each	5.00	15.00	8.75
Garden hose (½-in. corr.) ..... ft.	0.13½	0.23	0.13¼

Black sheets (28 ga.) ..... cwt.	2.70	10.50	4.25
Corrugated sheets (28 ga.) ..... cwt.	4.00	12.00	6.00
Cotton rope (base) ..... lb.	0.24	0.92½	0.38
Galv. pipe (1 in.) ..... 100 ft.	6.03	17.77	11.05
Tarred felt ..... cwt.	2.10	5.70	3.45
Plumbers' oakum ..... cwt.	3.50	10.00	6.50
Lead pipe ..... lb.	0.07½	0.19	0.12

The above list is self-explanatory, and supplies in a clear-cut and comprehensive manner the information which many merchants have been seeking. It indicates the location of current prices compared with both their pre-war levels and high standards reached in past seasons. The twenty-five lines mentioned in this table are generally indicative of the average price trend in the hardware trade and therefore the comparison is representative.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

HARDWARE market developments include lower quotations on galvanized sheets, copper and brass semi-finished products such as sheets, rods and tubing, solder in various grades, lubricating oils, light general purpose and engineers' wrenches, asbestos wick packing, the Maydole line of hammers, dry arsenate of lead, wire door pulls and tire gauges. Another decline is announced on paris green of seven cents per lb. on the different quantities. Linseed oil and turpentine again feature the paint markets with easier levels.

The reductions on oils cover machine oil, gas engine and cylinder oils, as well as a further downward revision in black oils, both summer and winter grades. Eastern markets record another reduction on all solder grades. The easier prices on sheets and plates affect galvanized, black and annealed, as well as the imported sheet products. Rods, tubing and sheets in copper and brass reflect the easier tone recently apparent in virgin metals. A slight revision is also recorded on the four and six-point barb wire, this being a minor change from the range previously in effect. Bar product markets in iron and steel appear with a slightly firmer undertone, this being attributed to the effort of certain southern producers to eliminate price shading for attractive orders. On the other hand, easier nominal levels are now generally noted on tin plates in certain primary circles. Quiet conditions are still reported in scrap materials, with the recovery in copper prices serving to stem the sagging movement previously recorded on yellow scrap grades. In the ingot metal markets, current conditions continue to provide a series of various minor developments, without any marked changes being featured. Domestic ingot prices are generally steady and unchanged.

The volume of trading in Spring lines is described as fairly satisfactory. While well up to former seasons in point of numbers, commitments are stated to be smaller in quantity due to the cautious buying attitude prevalent throughout the trade. Under the stimulant of favorable weather conditions, brisk activity in seasonable commodities is naturally expected, with repeat orders being depended upon in various lines to achieve improvement over previous records.

Montreal Markets

MONTREAL, March 16.—Lower prices are again announced on solders, this being the second revision in recent weeks. Guaranteed, strictly, commercial and wiping show a reduction of one and one-half cents, and wire solder two cents a pound. The sheet markets again attract attention, Queen's Head galvanized now being quoted 25 cents per 100 lbs. less on all gauges. Barbed wire quotations are revised, but only a minor change on the 4 and 6 point barb is recorded, the range on these being formerly considered too wide. Asbestos wick packing is reduced to 65 cents a pound, and wire door pulls have a new lower price of $1.20 per gross.

Trade in many hardware commodities is now on the increase, and heavier lines, such as bar iron and steel, wrought pipe, corrugated sheets, eavetrough and conductor pipe, are reported as showing an improvement. Jobbing houses also state that the recent milder weather has stimulated the general movement of seasonable lines, and preparations for continued activity is everywhere apparent.

WIRE DOOR PULLS ARE REDUCED IN PRICE

Montreal

A new lower price is announced on wire door pulls, these now being quoted at $1.20 per gross.

FURTHER REDUCTION IN SOLDER QUOTATIONS

Montreal

A further reduction is made in solder quotations, all grades, with the exception of wire solder, being reduced 1½ cents per lb., the latter showing a decline in price of 2 cents per lb. This is the second revision on solders in recent weeks, a reduction of 2 cents per lb. being recorded only two weeks ago. One manufacturer stated that quotations on these products were simply following the trend of metals on primary markets, where in recent weeks tin, copper, lead and spelter have been displaying an easier tendency. There is now, however, a slight stiffening noted in these metals, and it is thought that the downward trend is over, for the present at least. Trade in lead products in general shows a slight improvement, although a further general betterment is anticipated from now on. Following are prevailing quotations, showing the revision in solders:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

SLIGHT REDUCTION IN QUEEN'S HEAD SHEETS

Montreal

Minor reductions continue to feature the local sheet markets, and a slight revision in quotations on Queen's Head galvanized sheets is announced. Easier prices in this direction were anticipated, distributors claiming that while the tone of the market on the other side is little

changed, conditions on this market warranted slightly lower levels to bring these sheets to a competitive basis. This revision again substantiates the prediction of dealers who have for some weeks past expressed the opinion that sheet markets in general would in all probability continue to show a gradual decline, but reductions of any marked proportions were altogether unlikely. There is little change at primary centres in the tone of these products, the improvement being slight up to the present, but with indications of a continued betterment as the weeks pass. Prevailing nominal quotations are as follows:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS

U. S. Standard.

10¾ oz	6 65	7 60
28 gauge	6 25	7 20
26 gauge	5 95	6 85
22-24 gauge	5 80	6 60
20 gauge	5 65	6 45
18 gauge	5 65	6 35
16 gauge	5 50	6 35
14 gauge	5 35	6 35
12 gauge	5 20	6 35
10 gauge	5 10	6 35

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 40	6.35
22 gauge	6 05	5 90
18-20 gauge	5 35	5 75

NOTE.—These prices are full bundles, an extra charge of 25c. to 35c. per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

BRIGHT TIN PLATES

20 x 28 x 100 lb. basis	$16 00
20 x 28 IC, 112s	16 50
20 x 28 IX, 112s	18 50
20 x 28 IXX, 5s	10 50
20 x 28 IXXX, 5s	11 25

18 x 24 x 60s	5 80 box
18 x 24 x 75s	6 10 box

WELSH CANADA PLATES

Polished—

12 x 24 60s	8 00 box
18 x 24 x 52s	7 75 box

EASIER PRICE ON ASBESTOS WICK PACKING

Montreal

A reduction is made in the quotation on asbestos wick packing, and this is now quoted at 65 cents per lb.

BARBED WIRE PRICES ARE REVISED

Montreal

A slight revision is made in the quotations on barbed wire from the reduction announced two weeks ago. The change only affects the 4 and 6 point barb in a minor way, the range between these formerly being too extensive. Following are revised prices:

BARBED WIRE:—In 80 rod reels, per reel, 2 x 5, $3.45; 4 x 6, $3.70; 4 x 4, $4.05. Catch weights, $4.30 per 100 lbs.

CORRUGATED SHEETS ON ROAD TO IMPROVEMENT

Montreal.

Earlier spring trade in corrugated sheets is now commencing, and there is a fairly optimistic tone among dealers for future activities in the following months. With the first indications of a better buying movement appearing comparatively early, it is thought a good season for this product is forthcoming. This opinion is encouraged by reports of considerable building and repair work, especially of the smaller class, contemplated at a later date. There is now a more settled feeling in the market locally, and quotations are steadier than they have been in recent months. Although prices on the heavier gauges are reported as being unsettled in other markets, local distributors claim the movement of these heavier sheets is very slow, due to inactivity in manufacturing circles where the demand is almost entirely confined. Unchanged quotations are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins, 75c a square extra.

EARLY ACTIVITY ANTICIPATED IN GARDEN AND LAWN HOSE

Montreal

The season for active sales in garden and lawn hose is fast approaching, and spring shipments will be made in a few weeks following. Bookings have been comparatively light this season, and jobbers are anticipating a heavy demand at a little later date. Quotations are unchanged since the revision in December last, and following are prevailing prices:

GARDEN HOSE—	Per ft.
½" x 3 ply plain	0 09½
½" x 4 ply plain	0 10½
⅝ x 3 ply plain	0 11
⅝ x 4 ply plain	0 12
⅝ x 5 ply plain	0 13½
¾ x 3 ply plain	0 13
¾ x 4 ply plain	0 14
¾ x 5 ply plain	0 15½
¾ x 6 ply plain	0 17½
½" corrugated	0 13¼
⅝" Corrugated	0 15¼
¾" Corrugated	0 18
1" Corrugated	0 33

A discount of 5 per cent. is allowed on 500 ft. reels of corrugated hose.

BRIGHTER TONE NOTED IN ROPE MARKETS

Montreal

Current trade in rope is described as seasonable, and a brighter aspect is given for future business than has been displayed for some time past. It will be remembered that during the whole of last year rope sales were curtailed, certain factors entering the market as a hindrance to activity. One of these was undoubtedly the desire on the part of the dealer trade to liquidate stocks to the minimum. Stocks are now comparatively small for the commencement of the active season, and already sales are reported larger than in the same period last year. Another factor that is claimed will benefit the situation over the past season is the trend of the market recently, and the tone. New displayed twine is also expected to show an improvement, the lower quotations for the current season no doubt assisting in this direction.

QUOTATIONS ON MOWERS FOR FOLLOWING SEASON

Montreal

With the spring season advancing, lawn mowers will soon be shipped to the dealer trade. Following are quotations on the Taylor-Forbes line for the current season:

LAWN MOWERS—

Daisy—12 inch, $8.65. 14" $9.00, 16" $9.20.
Star—12" $9.90, 14" $10.40, 16" $11.10.
Woodyatt—12" $11.25, 14" $12.00, 16" $12.75, 18" $13.50, 20" $14.25.
Express—12" $14.00 14" $14.70, 16" $15.50, 18" $16.20, 20" $16.90.——Less 20%.

BOILER TUBE SALES DEPEND ON REPAIR WORK

Montreal

With the advancing season, an improvement in the volume of current business in boiler tubes is recorded. This, however, is only slight up to the present, but promises well for the coming weeks when increased business is usually apparent, developing from new construction. In this connection, some dealers offer the opinion that the movement will not be as active as in other years owing to the lack of larger constructive work. The sale of these tubes for some time past has depended almost entirely upon repair work, and it is felt that the future movement will be largely dependent on this, rather than new work. Quotations remain unchanged at the following levels:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

EXPECT STEADIER MARKET ON IRON AND STEEL

Montreal

Bar iron and steel is little changed on the local market. Sales are still limited, although there are indications of a heavier buying movement in the near future, and inquiries are still coming to hand in fair volume. Quotations at former figures with little changes. It was predicted some months ago that buying movement in the spring would tend to stiffen the market, it being recognized at that time that prevailing price levels were well near the bottom in comparison with producers' costs. Since then revisions have been made, but in each case of minor proportion, and to-day existing levels are generally believed to be as low as warranted. Whether the increased activity, which is usual in the following

weeks, will have a tendency to stiffen prices is yet hard to determine, but if the laws of supply and demand are to be recognized, an attempt to higher quotations is not unlikely. Conditions at the mills also point in this direction, quotations in certain independent mills showing a recent slight advance. Following are local quotations:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

CHAMOIS AND SPONGES FOR SPRING TRADE

Montreal

With the Spring and Summer season comes an active demand for chamois and sponges, for automobile and other polishing needs. Quotations on best selling sizes and grades are as follows:

CHAMOIS—

No.	Size	First Quality Per doz.	Per Kip (30 skins)
100	8x10	$1 50	3 50
105	12x16	4 60	10 50
108	14x18	7 50	17 25
110	16x21	10 50	24 00
112	18x24	13 50	30 75
116	24x27	20 25	46 00
		Second Quality	
200	8x10	$1 15	2 65
205	12x16	3 50	8 10
208	14x18	6 50	14 75
210	16x21	9 00	20 50
212	18x24	11 50	26 25
216	24x27	17 25	39 00
		Superior Quality Auto Chamois	
AX1	14x23	11 50	26 25
AX2	16x26	14 75	33 75
AX4	20x32	21 50	48 75
AX6	24x36	29 00	65 75

Subject to discount according to quantity.

SPONGES—

Sheepswool Per lb:—	Original bales	Less than bales
Select packing	5 00	6 50
Medium packing	3 75	5 00
Second packing	2 50	3 50
Velvets—		
First packing	2 50	3 50
Second packing	1 75	2 50

Sheeps wool are generally used for Autos and Carriages, Velvets for Common Use.

EARLY IMPROVEMENT LOOKED FOR IN SOIL PIPE

Montreal

Depending for the greater part on building construction, sales of soil pipe and fittings have been seasonably light for some time past, but increased activity is expected to soon develop as fairly extensive building program is generally promised. Current quotations are remaining unchanged at the last revision in discounts. The opinion in some quarters is expressed that revision in an upward direction would not be surprising when a more active turn in trade becomes evident. Prevailing prices were quoted at a time when competition had to be met. However, for the present there is no definte indication of such a revision, and following are present quotations:

SOIL PIPE—

2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

SCREEN DOOR PRICES FOR CURRENT SEASON

Montreal

It is still a little early for shipment of screen doors and windows to the trade, but booked orders to date have been received in fair proportions. Following are quotations on some of the well known lines of Ham Bros., Co.

SCREEN DOORS— price per dozen

No. 72 $39.80. 68 $31.70. 48 $27.50. 32 $22.60. 20 $18.90.

SCREEN WINDOWS—Price per dozen.

No. 6 $4.40. 8 $5.85 12 $5.35 13 $6.30. 15 $7.35. 16 $8.95.

SALES OF BASEBALL GOODS NOW COMMENCING

Montreal

Earlier orders for baseball goods are now being received, and jobbing houses anticipate an active season for these lines this year, prices being considerably lower than in previous seasons. Following are net quotations on the Reach Line:

BASEBALLS

No. 0, per doz. $18.00. No. 0J $16.20. No. 4A, $8.00. No. 5, $6.00, No. 9X $4.00, No. 11B, $1.32.

FIELDERS' GLOVES, Ea.

CB, $6.00, OBL, $4.70, SW, $4.00, 72 $3.35, 2GL, $2.65, 10G, $1.85, 4G, $1.00, 18C, .70, 19A, 60c.

CATCHERS' MITTS Ea.

12A, $12.00, 6A, $10.00, 30 $6.75, 200, $3.30, 150, $2.70, FP, $2.20, 65X $1.10, 67X .75.

FIRST BASEMEN'S MITTS Ea.

No. D $6.00. 5R $3.30. R $2.65. 3R $1.75. FB $1.10. 7B .75.

BASEBALL BATS

Per Doz.

No. N15B $30.00. 100T $16.75. 82 $10.50. 83B $10.50. 50B $6.00. 87 $4.00.

CATCHERS' MASKS, Each.

No. 20S $4.00. 30S $3.35 40S $2.65 XX $1.75. CM $1.35.

BODY PROTECTORS Ea.

No. SP, $8.00. S6 $6.00. S4 $4.35. 3P $2.35.

SHOE PLATES, Doz. Pr.

No. 1T $4.80. 1H $4.80. 6T $2.00. 6H $2.00.. 5T $4.00.

MAPLE SUGAR INDUSTRY CALLS FOR SUPPLIES

Montreal

The maple sugar season is now well at hand in this province, operations having commenced in earnest this week. Wholesalers report an active movement of supplies, and with favorable weather continuing, an increase in the output of the province is anticipated. Quotations on buckets, cans and spouts are unchanged, and following are prevailing prices:

SAP BUCKETS—

Straight Pattern—Per 100, No. 7, $13.80; No. 8, $15; No. 9, $1.80; No. 12, $18; No. 16, $21.0.

Galvanized straight—No. 9, $23; No. 12, $27; No. 16 $31.

Western (flaring) pattern—6qt., $13.50; 10-qt., $18.

Frontenac—10 qt., $19.

Galvanized Western—10 qt., $27.

Spouts—Sterling, $20; Eureka, $15 per 1000.

Square one gal, syrup cans, $16.75 per hundred.

SEASONABLE DEMAND FOR MOPS AND POLISHES

Montreal

There is an increasing demand for polishing mops and polishes, and while sales are reported smaller than in previous years, the movement of these lines are said to be quite satisfactory for this season. Quotations are remaining steady as follows:

MOPS— per dozen.

O-Cedar polish mop, round and triangular, $16.00. O-Cedar dusting mop, round and triangular $16.00. O-Cedar polish mop, triangular No. 15 $10.00. Liquid Veneer $16.00. Veneer, dry, $16.00. Veneer, Junior, $14.00. Veneer, Victory $12.00.

POLISHES—

O-Cedar Per doz.

4 oz. botles, $2.40. 12 oz. bottles, $4.80. 1 qt. cans $12.00. ½ gal cans $20.00. 1 gal. cans $2800.

Liquid Veneer— Per doz.

4 oz. bottles $2.40. 12 oz. $4.80. 32 oz. $10.00. 64 oz. $16.00 128 oz. $28.00.

QUOTATIONS IN INGOTS PRACTICALLY UNCHANGED

Montreal

The metal markets continue somewhat irregular, but with changes in prices comparatively few. The London market is still influenced by Sterling exchange, which has re-acted during the past week, but generally speaking the situation is quiet. The immediate future does not suggest a marked change in either direction.

TIN.—This metal continues to hover around recent levels in London, and there seems no indication of any immediate change. Tin is always an irregular metal, and while statistics would point to an advance, it is possible that it may act contrary to expectations when the bull party decide the time is right. Locally this metal remains quiet at 34 cents.

COPPER.—Copper is slightly firmer in New York, although it seems unlikely that present prices will advance at the moment. The London market is dominated by exchange, and there are no features of interest there. Local market is described as lifeless at 16¾ cts. for electro and 16½ cts. for casting.

SPELTER.—Both London and East St. Louis are quiet with prices practically unchanged and a fairly even balance between supply and demand. The situation seems fairly firm and the market may gradually work higher. Quotation is unchanged at 7 cents.

LEAD.—The American market remains steady, while London is also practically unchanged. Spring activities may possibly result in a greater demand for this metal. Prices are unchanged at 6¾ cents.

ANTIMONY.—There is nothing new in this metal, domestic demand remaining at a very low ebb. Although present price levels are considered low, a further recession would not be surprising if demand does not improve. Chinese is quoted at 6¾ cts., high grade English at 7¾ cts.

ALUMINUM.—Aluminum fails to attract interest on the market, and sales are very few. Quotations are unchanged at 24 cents.

Toronto Markets

TORONTO, March 16.—Another recession in prices on galvanized sheets, with lower quotations on copper and brass products and easier price levels on lubricating oils, supply the feature changes on the hardware markets this week. The change in sheets and plates affects galvanized, black and annealed, and is generally around twenty-five cents per cwt. The reduction in oil prices include black oil, both summer and winter grades, cylinder, machine and gas engine oils. Copper and brass rods, tubing and sheets reflect the easier tone recently apparent in virgin metals. The manufacturers of light general purpose and engineers' wrenches have also announced a decline in prices on these products. The scrap material markets still report quiet conditions, with the recovery in copper serving to stem the sagging movement previously evident on yellow scrap grades. Conditions in the current ingot metal markets continue to provide a variety of minor developments, with nothing of a startling nature having been recorded. Domestic prices are unchanged. The seasonal demand for Spring goods is now under way, and with favorable weather conditions, brisk activity in many lines is looked for, as stocks are generally considered low.

REDUCED PRICES ON ENGINEERS' WRENCHES

Toronto

A reduction of approximately ten per cent. has been announced by the manufacturers on the Williams line of light general purpose and also engineers' wrenches.

MANY LUBRICATING OILS HAVE LOWER PRICES

Toronto.

Quotations on black oil, in both summer and winter grades, again record an additional reduction. The drop on winter black oil is one and a half cents per gallon, while the recession on summer grade is two cents.

Other lubricating oils also record declines this week, there being a six-cent reduction on Capital cylinder oil, while machine oil is lower four and a half cents per gallon, and gas engine oil, shows a similar revision. These revised quotations are as follows:

OILS

Black oil, (summer)	0 19
Do., (winter)	0 20½
Capital, cylinder	0 69½
Machine oil	0 39
Gas engine oil	0 59

List, less 15 per cent.

BAR PRODUCT MARKET NOW SLIGHTLY FIRMER

Toronto

Definite efforts are now being made to stiffen prices on bar iron and steel in southern primary markets. The recent easier levels which resulted from concessions on particularly attractive orders, have now been withdrawn, and the undertone is described as a little firmer. Competition in the domestic centres is still described as keen, but there has been a moderate revival in buying recently experienced on practically all market centres. Locally, one distributor described the current movement as spasmodic, being fairly bright one week, and a little duller the week following. Orders are still of the small variety, but fairly numerous. The reported efforts to secure higher uniform prices on bar products at southern mills, is referred locally as an attempt to "feel out" the market trend with respect to future stabilization. A precedent in this respect was set last Fall, when sheet producers increased prices. While the average quotations later receded to their former levels, on that occasion they were able to secure a brisk share of current business through this manoeuvre. Following are the average unchanged local quotations on bar products:

IRON AND STEEL—

Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

SHADING TIN PLATES IN SOUTHERN CENTRES

Toronto

Interest in tin plate circles is still described as quite brisk, with the current volume of production providing a special attraction. Some price shading is stated to have developed, but no change in the nominal quotations has been announced. Whether these concessions will result in a generally lower market level, is a factor influencing future commitments. Following are the average local quotations:

PLATES, CANADA—

Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25

PLATES, COKE TIN—

IC, 20 x 28, 112 sheets	13 50
IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 sheets	9 00

PLATES, CHARCOAL TIN—

IX, 20 x 28, 56 sheets	14 00
IXX, 20 x 28, 56 sheets	16 00

PLATES, TERNE—

IC, 14 x 20, 112 sheets	12 00

PRICE REDUCTIONS ON COPPER AND BRASS

Toronto

As outlined in recent market reports, the easier tendency in the basic copper markets has now resulted in similar price changes to correspondingly lower levels on copper and brass products. Such semi-finished lines as sheets, rods and tubing now record varying reductions between one and a half and two cents per lb. This change places quotations on a well-liquidated basis, and according to distributors, is expected to reflect stimulated trade improvement during the ensuing months. Following are the revised price levels on these products:

BRASS

Sheets, base, per lb.	0 21
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 19

COPPER

Rods, base, per lb.	0 27
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

BUSINESS IS QUIET IN CORRUGATED SHEETS

Toronto

Trading in corrugated sheets is described as very quiet, at present, but this condition is usual during the current season of the year. One dealer described the situation in the following words: "All things considered, business is very fair, with the tendency to buy in very small quantities being accentuated in the present season." It was also pointed out that some price developments of a minor nature have been looked for in some quarters as regards Spring prices on corrugated. The tendency of these markets during recent months has undoubtedly been in the downward direction, and several recessions have been recorded. Future changes of this nature are stated as dependent upon primary market developments. Conditions are primarily unchanged from the notations given in the previous market report.

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No., 26 U. S., gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per sq. extra.

SEASONAL DEMAND NOTED FOR WIRE AND CUT NAILS

Toronto

The demand for nails is now quite good, while the current requirements for other wire products are still generally described as moderate. The size and numbers of orders is said to be improving gradually each week, and in respect to nails, both wire and cut are experiencing a better demand. The recent price developments have naturally placed these primary markets on a steadier basis, and a seasonal recovery is evident.

EASIER PRICE LEVELS ON SHEETS AND PLATES

Toronto

An improved interest in sheets from manufacturing consumers is recently manifest, according to distributors, while the undertone to the market generally is described as improving. There has also been more life to recent inquiries, although business is still a little spasmodic in certain quarters. Prices have receded approximately twenty-five cents per 100 lbs. all through the list, this change being attributed to concessions for the more attractive orders tending to result in a lower market level. This downward revision is applicable on galvanized, black and blue annealed. Following are the new prices on sheets:

BLUE ANNEALED—

10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
14 gauge	3 60	4 35
16 gauge	3 65	4 40

BLACK—

18—20 gauge	4 05	4 80
22—24 gauge	4 10	4 85
26 gauge	4 15	4 90
28 gauge	4 25	5 00

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis
28 gauge	7 75	7 25
26 gauge	7 50	7 00
24 gauge	7 10	6 60
22 gauge	6 65	6 15
18 and 20 gauge	6 50	6 00
Premier and Apollo		
10¾ oz.	5 75	6 50
U. S. 28 base	5 35	6 10
U. S., 26 gauge	5 05	5 80
22 and 24	4 90	5 65
18 and 20	4 75	5 50
16	4 60	5 35
12 and 14	4 45	5 20

An extra 40c. per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

EXPECT BRISK TRADE IN BUILDERS' HARDWARE

Toronto

The general impression as regards the subject of builders' hardware is reflected in the expression that "this will be one of the biggest Spring lines in the trade." When pressed for a reason contributing to this effect, this wholesaler referred to the extensive building programs that have been planned in many districts—both city and country—which sooner or later will result in a much improved demand for builders' hardware. The fact that many houses which were commenced last Fall, are now being finished in the early months of the current year, is expected to be one of the factors contributing towards seasonal activity.

FAIR BUSINESS IN LEAD AND ZINC PRODUCTS

Toronto

The market in lead and zinc products remains just about the same as in recent weeks with the exception that the easier tendency recently evident in certain primary metals, now shows signs of recovery. Following the reductions in solder quotations, no further developments as regards prices, have been recorded. Current trade is described as satisfactory for this season of the year, with prospects pointing toward a gradual improvement during the ensuing months. Following are the local quotations:

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.		0 12½
Lead waste pipe, list, per lb.		0 13½
Do., over 8 in., list, per lb.		0 14½
Lead pipe is subjected to a discount of		10%
Lead traps and bends		10%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.		0 09
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, per lb.		0 32½
Do., strictly, lb.		0 22½
Do., commercial, lb.		0 21
Do., guaranteed, lb.		0 24
Do., wiping, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

UNCHANGED DISCOUNTS ON PIPE AND TROUGH

Toronto

"Considering present season of the year," stated one manufacturer to Hardware and Metal, "the current volume of trade in eavestrough and conductor pipe is described as fairly good." It was pointed out that recent weather conditions had hardly been conducive to brisk activity in these products, but with the advent of spring weather, coupled with prospects for renewed building endeavors on a more extensive scale than last season, a marked improvement in general conditions is looked for. Following are unchanged lists and discounts:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth: Per 100 ft.

8 in.	15 98
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 80
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 and 10 per cent.

ELBOWS (Conductor)

2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

EXPECT BRISK ACTIVITY IN CEMENT MARKETS

Toronto.

Current business in cement is described as picking up a little, especially during the last week or two. The marked improvement in demand, however, is not generally looked for until the Spring season is more mature. Prices are still steady at the revised levels announced in January. Production of cement is stated to be on a fairly high ratio of capacity, and distributors naturally anticipate a brisk season in construction activity generally. Following are current quotations:

CEMENT—Car load lots.	Toronto.
Per barrel	$3 70
Per barrel, f.o.b. yard	4 30
Per barrel, delivered	4 50

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

SPRING ATMOSPHERE IN ROPE MARKETS

Toronto

With the approach of Spring, the volume of sales in rope and cordage is reported to be improving. Business in the primary hemp markets is also recorded as fairly good. Large consumers have displayed keener interest due to the firmer reports from the manila markets. Local distributors report improved conditions generally, and prices are being fairly well maintained. Mexican sisal has not fluctuated to the same extent as was previously apparent. Many inquiries are evident, but are not all developing into actual purchasers.

UNCHANGED DISCOUNTS ON SOIL PIPE AND FITTINGS

Toronto.

With the current quotations unchanged on soil pipe and fittings, general interest in this market is attracted to the volume of business now reported, together with the prospects for future improved activity. While some variation in discounts is still noted between local and eastern markets, yet the Montreal freight rates are described as tending to prevent eastern houses from encroaching upon western territory to the detriment of local manufacturers and distributors. With the advent of more staple conditions in these markets, due to improved demand during the ensuing Spring and Summer periods, uniform quotations are looked for in the near future. Following are the local unchanged discounts:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

MORE ACTIVITY RECORDED IN BOILER TUBES

Toronto

More activity is reported in the boiler tube market during recent weeks. Prices are remaining fairly steady, and with the tube season now at hand, it is felt in distributing circles that in view of the restricted volume of trade during recent months, a fair amount of current tube business is now opening up. Prevailing trade is said to show a favorable comparison with this period last year, while an optimistic outlook is generally reported. Following are the average unchanged prices recorded on the domestic markets:

BOILER TUBES—

	Seamless	Lapweld
1 inch	24 75	....
1¼ inch	24 50	....
1½ inch	24 00	....
1¾ inch	26 00	....
2 inch	24 50	20 00
2¼ inch	27 75	23 00
2½ inch	32 50	23 75
3 inch	40 00	30 00
3¼ inch	50 00	32 50
3½ inch	52 50	34 25
4 inch	65 00	43 50

COMPRESSION GOODS AT RECENTLY REVISED LEVELS

Toronto

Quotations on the various lines of compression goods remain at the recently revised levels, with just a moderate volume of trade reported. In these markets, however, a general improvement is looked for in the near future, consequent upon the prospects for increased building activity reflecting a better demand for these products. The undertone of the market has recorded very little variation, although the recent easier tone to certain primary metals, resulted in a softer tendency in some finished products. It is noted, however, that virgin metals have somewhat recovered from this depression. Following are the average quotations on compression goods:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	35%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard	43%
Globe, angle and check valves, standard	25%

Emco gate valves, standard	25%
Do., Do., Do., J. D.	33%
Emco Globe valves, std.	25%

BASIN COCKS—

No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	50%
No. 3623, plain or index handle	34%

MAINTAIN CURRENT LEVELS ON COTTON WASTES

Toronto.

Conditions in the cotton waste markets generally remain unchanged, with the recently revised levels still in effect. The primary markets have recorded some slight fluctuations, but these movements are described as not being of sufficient momentum to reflect in cotton waste quotations. The recent reductions noted in previous issues of Hardware and Metal indicate the trend of basic conditions. Current trade is described as average for this season. Following are the prevailing prices:

Cream, polishing	0 18
White, XXX	0 18
XX	0 16
X	0 15
XC	0 14
XXX, extra	0 16
XX, grand	0 15

No. 17	0 12
No. 1A	0 11
No. 1B	0 10
Fancy,	0 13½
Lion	0 12
Standard	0 10½
Popular	0 09
Keen	0 07½

Above lines subject to trade discount for quantity.

MODERATE ACTIVITY IN PIPE FITTINGS

Toronto.

Trade in pipe fittings is described as better than expected in some quarters, while other distributors state that the total volume is fair, although current orders are of a small nature. A moderate degree of activity is generally recorded, however, with quotations on these products holding unchanged at the recently revised levels. The outlook is stated to be more optimistic, in view of the enlarged program of home buildings now being generally entertained. This is naturally expected to result in a better demand for fittings of all kinds. Following are the current unchanged quotations:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%

Class B	0 20	0 28
Class C	0 13	0 20

QUIET CONDITIONS REMAIN IN SCRAP MATERIALS

Toronto

The waste material markets have been unchanged, consumers buying hand-to-mouth and at low prices.

Scrap rubber is very dull, but red and yellow scrap metals have been a bit more active on recovery of virgin copper, although buying has not been large enough to advance prices. Heavy copper and wire has sold at 10.50 to 11.00c. White metals move slowly, but are steady in price.

In ferrous scrap, cast iron has continued to show some life, but steel grades are very quiet.

The following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 25
Scrap Rubber		
Boots and shoes	2 50	2 75
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

MINOR DEVELOPMENTS IN INGOT MARKETS

Toronto

Conditions in the current ingot metal markets continue to provide a variety of minor developments. Virgin copper has recovered to some extent from the recent depression. Tin continues a see-saw movement, with prices however, showing more reductions than increases. Prices on lead are steady, with the primary conditions continuing firm. Spelter is slightly firmer, with buying restricted owing to the heavy stocks on hand. Antimony is again a little weaker, with aluminum dull and unchanged.

COPPER.—Recent buying of copper on the primary markets has lately been a little more active, with the result that the sagging price movement has recovered to some extent. Southern reports indicate that the export trade to European countries has increased somewhat, a condition which has reflected in the general tone. The domestic markets continue quiet, with both consumers and distributors keeping in close touch with the situation. The average local price of 17½ cents still remains.

TIN.—The tin markets have seemed to continue in a regular see-saw movement with varying fluctuations recorded almost day by day. The fundamental situation, however, shows that the declines have been more drastic than the advances, as prices in the primary stage are now lower than at the corresponding period last month. Local quotations continue around 35½ cents.

LEAD.—This market is practically unchanged, and a firm condition continues in evidence. There is very little new to record, with the general situation unusually steady. Prices are about the same, with the local level at $6.75.

SPELTER.—The spelter market is reported steadier, but buying is still on a somewhat limited scale. Consumers are not purchasing very freely, although the market cannot be described as dull. The conservative attitude is taken as indicating the slowness of recovery in the demand for various manufactured products. Local quotations continue at $7,-00.

ANTIMONY.—The market for prompt is quoted a little easier on account of recent fresh supplies. There has been a slightly better demand, but consumers stocks are generally described as heavy. Quotations on the local market remain unchanged at 8 and 9 cents.

ALUMINUM.—A variety of opinion is again evident with regard to the price trend of aluminum in the near future. Some improvement in demand is looked for in certain quarters, with a consequent slight firming up in quotations. Prevailing prices however, continue unchanged, with no fresh developments recorded. The local quotations is still in the neighborhood of 27 cents, with some easier levels having been noted.

London Markets

LONDON, March 16.—Price revisions on the current hardware markets include lower quotations on the Maydole line of hammers, arsenate of lead, and paris green. Prevailing business in this district is described as seasonably good, with an improved degree of activity noted in many Spring lines. Merchants seem generally well satisfied with the current volume of trade, with average expectations of a substantial increase with the advent of warmer weather prevailing. Reports show collections to be in good shape.

DROP OF EIGHT CENTS PER GALLON ON TURPENTINE

London, Ont.

A reduction of eight cents per gallon has been announced in turpentine prices thus bringing the average quotation down to $1.27 per Imperial gallon in one barrel lots. While the southern markets recorded easier levels also, the change was not to this extent. Following are new local prices:

TURPENTINE—	Imp. Gal.
1 bl. lots	1 27
2 to 4 bbl lots	1 26
5 gal. lots	1 42

EASIER TONE NOTED IN LINSEED MARKETS

London, Ont.

Linseed oil prices at the time of going to press remain unchanged from the previous levels. A slightly easier undertone, however, is noted in the primary markets. A fair demand is noted at the following prevailing levels:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

BETTER MOVEMENT OF WHITE LEAD IN OIL

London

Sales of white lead in oil are described as increasing noticeably each week, as the painting season approaches, with a banner season being looked for in this latter respect. There has been no change in prices, the following levels continuing on the local market:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

SEASON FOR ROLLER SKATES NOW AT HAND

London, Ont.

A brisk sale is generally recorded for roller skates, the prevailing weather conditions being seasonal in this respect. Following are current quotations: No. 3, steel wheel, $1.10 per pair: No. 5, ball bearing, $2,65 per pair.

REDUCED PRICES APPEAR ON FIRE GAUGES

London, Ont.

Revised lower prices have been announced this week on tire testers, or gauges. These products are now priced at the new level of $1.08 each.

EASIER PRICE LEVELS ON MAYDOLE HAMMERS

London, Ont.

A reduction of approximately 12½ per cent. has been announced in prices on the Maydole line of hammers. Following are the revised quotations on some of the easier selling numbers:

MAYDOLE HAMMERS

No. 1—$19.80 doz. No. 1½—18.25 doz. No. 11—$19.80 doz. No. 11½—$18.25 doz. No 12—$17.20 doz No. 13—$15.20 doz.

PARIS GREEN PRICES FOR CURRENT SEASON

London, Ont.

The new season's prices for 1922 on paris green have been announced, and show a reduction of 7 cents per lb. all through the list. The following are the revised quotations:

PARIS GREEN	100-lb. lots
½-lb. paper cartons, per lb.	0 52
1-lb. paper cartons, per lb.	0 50
½-lb. tins, per lb.	0 45
1-lb. tins, per l.	0 45
1-lb. paper cartons ,per lb.	0 43
½-lb. tins, per lb.	0 47
1-lb. tins, per lb.	0 45
25-lb. tins, per lb.	0 41
50 and 100-lb. drums, per lb.	0 39
250-lb. kegs, per lb.	0 37½
610 lb. barrels, per lb.	0 37

F.o.b. Montreal, Toronto, Hamilton, London, Ottawa, Quebec, Moncton, St. John's, and Halifax. Yarmouth and P.E.I. paints ¼c. per lb. extra.

MODERATE INTEREST DISPLAYED IN ROSIN

London, Ont.

The demand for rosin remains of a moderate nature, with current interest being usually quiet at this season of the year. Present local quotations on rosin are as follows:

ROSIN:—Casks, $4.00 per 100 lbs., gross weight. Small lots, 7c. lb.

ENGLISH GARDEN SHEARS REDUCED IN PRICE

London, Ont.

Prices on English garden or hedge shears are now about ten per cent. lower this season. The revised quotations on these products are as follows:

SHEARS—

No. 100 x 8"—$1.55 each. No. 101 x 8"—$1.80 each. No. 100 x 9"—$1.90 each. No. 101 x 9"—$2.15 each. No. 107 x 3—$1.70 each. No. 105 x 9—$4.00. No. 106 x 9—$3.25.

FAIR DEMAND AT PRESENT FOR PUTTY

London

There is generally reported to be a fair demand for putty, with present indications pointing toward a better movement as the season progresses. Quotations on putty remain unchanged at the following levels:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

PRICES REDUCED ON DRY ARSENATE OF LEAD

London, Ont.

New lower prices for the current season have been announced on dry arsenate of lead. These revised levels are approximately nine cents lower on the various list quantities. Following are the new quotations:

DRY ARSENATE OF LEAD

½ lb. pkgs.—37c. lb. 1 lb. pkgs.,—35c lb. 5 lb. tins—32c. lb. 10 lb. tins—31c. lb. 25-lb. Drums—27c. lb. 50 lb. drums 25c. lb. 100 lb. barrels—23c. per pound.

IMPROVEMENT NOTED IN SPRING ROPE SALES

London, Ont.

Sales of rope and cordage continue to improve in volume as the Spring season approaches. There has been no further revision in prices since the following levels were announced:

ROPE—	lb. base
Pure Manilla	23c
Beaver Manila	20c
New Zealand Hemp	20c.
Sisal	18c.

FIRM TENDENCY REMAINS IN WINDOW GLASS

London, Ont.

There remains a good seasonable sale for window glass, with no further revision in prices having been announced. The firm tone remains in primary market circles. The following quotations prevail:

WINDOW GLASS—

Single Diamond, net list
Double Diamond, net list.
Cut Lights, 75 per cent. off light list.

BETTER DEMAND FOR WIRE AND CUT NAILS

London, Ont.

The seasonal demand for both wire and cut nails has been improving during recent weeks. With the prospects for brisk activity in construction circles, a reflection of this factor is naturally expected in the demand for nails generally. The current prices follow:

NAILS	
Wire, base	3 65 per keg
Cut, do.,	4 35 per keg.

SYRUP SUPPLIES MOVE IN SEASONAL FASHION

London

Syrup supplies including sap spiles, tin and galvanized sap buckets, are now moving in seasonal fashion. Following are the current quotations on these products:

SYRUP SUPPLIES—	
Sap Spiles Eureka	15 00
Do., D. M. P.	23 50
I. C. Tin Sap Pails 10 qt. flaring	18 00 per c
Do., 2 gal. straight	18 00 per c
Galvanized Sap Pails, 10 qt. flaring	27 00 doz.
Do., 2 gal. straight	27 00 doz.

Winnipeg Markets

WINNIPEG, March 16.—The number of price developments on the current hardware markets has recently been smaller than during the early months of the year, and this is generally taken as an indication that quotations on many hardware lines are now getting down to a substantial basis for future trade, representing a fair share of liquidation in comparison with prevailing replacement costs. The movement of Spring goods, usually evident at this season of the year, is now commencing, and while present orders are small, yet jobbers report business on the road to improvement and of a fairly satisfactory volume.

SPASMODIC CONDITIONS IN SHEET MARKETS

Winnipeg

The market in sheets and plates is described as spasmodic, with current trade of a moderate nature. Prices are fairly steady on the domestic markets, distributors stating that there has been no exceptional or attractive orders appearing which might influence price shading. However, some easier levels are recorded on other quarters, and it is generally expected that this tendency will be reflected in the local quotations in the near future. Primary markets report that the reductions are only slight, and do not indicate any sign of weakness. On the other hand, recent reports are optimistic and herald a more or less general return of activity, both as regards production and distribution.

STEEL SHEETS, BLACK—	
10 gauge	5 70
12 gauge	5 70
14 gauge	5 80
16 gauge	5 90
18-20 gauge	6 30
22-24 gauge	6 35
26 gauge	6 40
28 gauge	6 65
IRON GALVANIZED—	
Premier; Apollo and "Fleur de Lis"	
10¾ oz. or 28 Eng.	8 20
28 Am. or 26 Eng.	7 80
26 Am. or 24 Eng.	7 20
24	7 05
22	7 05
18 and 20	6 90
16	6 75

MOVEMENT OF SPRING GOODS NOW UNDER WAY

Winnipeg.

The movement of Spring lines is now generally reported as well under way, with wholesalers receiving many requests for shipment of booked goods. Other local jobbing houses report that they have been forced to keep open on the usual Saturday half-holiday, in order to accommodate customers and handle the numerous small shipments required. While the numbers of commitments is described as fairly satisfactory, yet the size of orders is generally of a moderate nature. However, the general feeling in the trade is that the expected movement of Spring goods has now commenced, and with repeat orders anticipated owing to the fact that dealers' stocks are generally in a low condition, a fairly creditable volume of activity is expected to materialize, and a total which will compare favorably with the records of previous seasons.

LOOK FOR IMPROVEMENT IN BUILDERS' HARDWARE

Winnipeg

Brisk trade in builders' hardware lines is generally looked for during the Spring and Summer months, especially in view of the marked increase in the volume of building permits already issued throughout this district. Distributors of builders' hardware point to this as a more or less accurate sign of future activity, and as a large proportion of the expected building will be smaller erections, these products will naturally be in proportionate demand.

SOUTHERN PIPE MARKETS RECORD EASIER TONE

Winnipeg.

While there has been no change in the current quotations on wrought piping, yet an easier tendency is reported from southern primary markets, where price shading between opposing interests has been recorded. This condition, however, has not affected the domestic centres, the point of interest being as to the future trend of price developments. It is claimed that producers are not making profit at present levels, and it is difficult to see where additional recessions can be made. On the other hand, the domestic tendency has closely followed any revision on the southern markets, and for that reason alone, the current developments are outlined.

TRADE IN BUILDING MATERIALS HELPED BY SEASONABLE WEATHER

Winnipeg.

Current trade in many lines, such as eavestrough, conductor pipe, bar iron and steel, corrugated sheets, which depend upon seasonable weather conditions, is still moderately quiet. An improvement in this direction, however, is generally expected with the advent of Spring weather during the ensuing weeks. Similar circumstances surround practically all building materials, as well as many other seasonal lines. With a fairly extensive construction program outlined during the coming months, activity in these products is expected to reach more satisfactory proportions.

Hamilton Markets

HAMILTON, Ont.—During the past few days a decided improvement in the movement of seasonable lines has been generally reported. This primarily includes all early spring requirements. Activity in jobbing circles is becoming more pronounced, and while orders being received are still for small quantities, wholesalers state that they are satisfied that repeats will soon follow, and the fact that the opening spring movement of goods in now under way has given rise to a more confident feeling throughout the trade. Prospects for an early season are receiving keen attention, it being generally recognized that seasonable weather conditions are usually a keen stimulant to trade in this direction. There is an undercurrent of hopeful expression that trade will continue to improve as the spring and summer months materialize. Collections are reported as fair, with recent optimistic expressions regarding the future outlook now being supported by signs of general business recovery. With the employment of labor upon a more expansive basis than has prevailed in some quarters during the winter months, it is expected that the purchasing power of buyers will show an increase in proportion. It is generally believed that March will show a decided increase over February, and when April comes along, the seasonal hardware trade will be in full swing.

Retail stocks of hardware are still regarded as low, for merchants have been purchasing in a more or less restricted manner for some time now. That they are not yet disposed to contract for future requirements is indicated by the size of current orders, a condition which is chiefly attributed to the varying degree of uncertainty of future prices on many lines. It was pointed out, however, that yet another factor in this respect is the curtailment of the buying ability of the average consumer, combined with a certain hesitancy or reluctance in some quarters to purchase at prevailing quotations. The uniform encouragement of the belief that current levels are representative of advanced liquidation in many lines of industry, is described as an encouraging step in the direction of stimulating retail trade.

Increase in Enquiry

Prevailing business in the steel industry is now described as spasmodic in certain quarters, this week being slightly moderated as regards the volume of trade when compared with the previous weekly period. There is, however, more general interest now manifested, and with an increase in inquiry, distributors in general look for continued improvement throughout the ensuing months.

It is apparently difficult to readjust the market to a uniform level, as purchasers have become accustomed to a prevailing nominal price on certain steel goods, with a further slight concession for attractive orders. Dealers state that this condition is gradually being eliminated in some quarters.

Manufacturers of kitchen utensils and similar ware products express the opinion that the industries catering to the hardware trade are becoming more active week by week. Business in general is gradually picking up, while current trade in this specific line is reported as showing an increase of approximately fifty per cent. for the months of January and February over the corresponding periods in 1921. Last year, however, is described as a very bad season in this class of products. Speaking of the February trade, this manufacturer stated that the sales last month represented an improvement of around fifty per cent over those recorded during January. Quotations on kitchen utensils are said to be steady, with certain raw materials stiffening a little in price.

Wholesale distributors of window and plate glass in referring to the recently slightly higher prices on window glass, stated that the domestic product is generally of a superior quality. While it is admitted in certain quarters that cheaper imported glass has appeared on the markets, yet prices on imported glass are also firming up, with prospects of more uniform quotations in the near future. Glass men also point to the fact that in buying glass from Belgium, there are four thousand miles of transportation to be contended with, and as this foreign product is generally cylinder blown, it naturally follows that the breakage is fairly high. This has been figured in certain circumstances to average between 25 and 30 per cent., while in some cases it has been reported higher than that. The percentage of breakage in handling the domestic product is described as remarkably low in comparison. In comparing the present volume of trade in the glass business with records of last year, it is stated that both January and February showed a substantial margin over the respectice periods a twelve-month ago. It was also pointed out that there has been a big reduction in window glass prices since that time.

Pittsburg Markets

PITTSBURG.—The official report of American pig iron production during 1920 has just been issued, making the following comparison, in gross tons: 1913, 30,966,152; 1914, 23,332,244; 1915, 29,916,213; 1916, 39,434,797; 1917, 38,621,216; 1918, 39,054,644; 1919, 31,015,364; 1920, 36,925,987; 1921, 16,688,126.

The particular record made by the 1921 production was that it was the smallest in 13 years, this being by far the greatest backward step, in point of time, ever made. The 1908 production was the smallest in seven years, the 1894 the smallest in six and the 1876 production the smallest in five.

Consumption of pig iron and things made from pig iron was much greater in 1921, as compared with 1920, than indicated by the pig iron production figures. On account of the high prices in 1920, giving the impression that everything was very scarce and might remain scarce, men carried stocks over into 1921 which otherwise they would have made more effort to liquidate in 1920. The high prices tended to discourage consumption in 1921. While pig iron prices fell rapidly, it took more time for the finished wares such as the ultimate consumer buys, to decline.

The conclusion is unavoidable that pig iron production in 1921 was much below a normal relation to the general business conditions existing, even though those conditions were not good, and it seems to follow that it is entirely unlikely that there will be another year with as light production. Even at the present time pig iron is being produced at a rate 30 per cent. above the average rate in 1921.

Steel production.—From the monthly report of the American Iron and Steel Institute of the steel ingot production of 30 companies, it may be estimated that the steel industry as a whole produced steel ingots in February at the rate of about 26,850,000 gross tons a year, against a rate in January of 22,750,000 tons. There was continuous increase in the rate during the two months, from a rate well under 18,000,000 tons at the end of December to a rate of about 29,000,000 tons at the end of February. The 29,000,000 ton rate has remained practically unchanged to this date.

The only question about the steel market is whether the gain has not been too rapid, about 70 per cent. in two months, following the dip in production towards the close of the old year, a reflection of the season of year as well as the annual inventory taking. Compared with the production last autumn the present 29,000,000 ton rate is 25 per cent higher rather a sharp gain when spring has not yet really arrived. Here and there one encounters a prediction, made by men who do not seem to realize what has already occurred, that conditions in the steel industry are now about to improve, but the real point is whether all the gain already experienced can be held. While reports in the different branches of the steel market in the past couple weeks have as a whole been somewhat favorable, there is really some question whether the total of steel buying thus far in March has been at as heavy a rate as obtained in February. It is possible that purchases recently were being swelled by buyers anticipating trouble in getting deliveries after April 1, on account of the prospective suspension at the union bituminous coal mines. Some steel buyers seem to have been alarmed by the prospect, while steel producers are not. The latter have stocks of coal averaging fully one month's requirements and think this will be sufficient, in conjunction with such deliveries as they will still get, even at the worst, from the non-union fields, like the Connellsville region.

Steel Prices. — Bars, shapes and plates, which had reached relatively lower levels than other finished steel products, now face the possibility of a slight stiffening. One of the prominent steel companies, which had been a particularly aggressive seller, has announced an advance in its price to 1.50c, and its competitors estimate that in its sales campaign it accumulated enough business to carry it for 60 days at its present rate of operation. The market remains quotable at 1.35c to 1.40c as formerly, and the advance by this large independent is therefore in essence a withdrawal from the market, but the removal of this particularly strenuous competition seems already to be exercising a somewhat stiffening effect on the market, and 1.40c is now a more common quotation than 1.35c. Other sellers, while very competitive, are indisposed to tie up much tonnage for forward delivery at extreme low prices, preferring, if possible, to work their prices up first.

Sheets continue firm at 3.00c for black and 4.00c for galvanized, where they have been for more than three months. Pipe is being shaded by a considerable margin in some districts, but the shading is not general, and on the whole the pipe market may be regarded as fairly steady.

Mill Operations.—As noted above, the general rate of steel mill operation, as shown by ingot production, has undergone no material change in the past couple of weeks or more. In individual mills there may be slight changes. The pipe mills are running a trifle slacker, at between 50 and 55 per cent. of capacity, while sheet and tin plate mills seem to have gained a little. The Steel Corporation's unfilled obligations at the end of February are reported at 4,141,069 tons, indicating a decrease during February of 100,069 tons, a favorable showing when properly considered as it suggests that some contract tonnage long on books came to life by being converted into actual shipping orders, for the corporation's shipments were about 57 per cent. of capacity in February against 47 per cent. in January. The unfilled obligations decreased by 26,736 tons in January. Comparing shipments and unfilled tonnage it appears that in January the new bookings amounted to about 45 per cent. of capacity while in February they amounted to about 49 per cent.

Connellsville coke for spot or prompt shipment remains quotable at $3.25 to $3.50 for furnace and $4.25 to $4.75 for foundry, thus holding the recent 50 cent advance.

Weekly Paint Markets

Montreal

MONTREAL, March 16.—Price developments in turpentine and window glass feature the paint markets this week. Turpentine shows a reduction of 10 cents per gallon, which is considered quite an extensive price decline considering the undertone of the market at the present time. In primary circles an easier tendency crept into the market a week or so ago, owing to a falling-off in demand. Prices in the South receded in sympathy, but not to the extent as is now recorded locally. The market is again steadier, and importers anticipate little further recession as receipts continue light and demand will increase with the approach of the spring season. Window glass is now quoted in most quarters at a higher list, although some firms have not yet adopted the increased quotations. It is claimed that while higher prices are at present warranted, there is still the unsettled feeling on the local market, and it is questionable whether the adoption of the new list will be uniform. Opening of navigation will also be a factor assisting towards lower import costs, and it is stated that a further revision at a little later date would not be surprising.

Linseed oil quotations are unchanged, with flax seed continuing to fluctuate. There were indications of an easier tendency in oil markets last week, but crushers maintain that increased demand and a recognized shortage of seed crop are sufficent to uphold the situation.

The active spring season is more pronounced from week to week, and such products as paint, varnish and white lead in oil are reported as becoming more active. Manufacturers of these products are satisfied that good painting season is commencing, and smaller dealer stocks should directly reflect on sales. Little or no change can be reported in the market of these products, the undertone continuing steady to firm owing to prevailing costs of raw materials.

TURPENTINE QUOTATIONS REDUCED TEN CENTS

Montreal.

Local quotations on turpentine registter a drop of ten cents per gallon this week, bringing present prices down to $1.22 in one barrel lots. The easier tone in the market, which developed over a week ago, continued in primary circles practically during the whole of the week, but the price decline was not to the same extent as recorded locally. Due to the falling off in demand, prices eased to meet the situation, while the undertone of the market was reported as still fairly firm. That the movement was only a temporary fluctuation is shown by the steadier situation that has again developed in the South. Price leveels for this week show very little variation, and certain reports have the market as remaining firm.

Demand is now improving, and on the local market a decided increase is noted. This condition both locally, and in the South, will be a deciding factor in maintaining a firmer position in this product, and some well informed are convinced that further recessions are unlikely, but that a steady to firm market will prevail. It will be a month to six weeks before the new crop will make its appearance, and in the meantime producers are only meeting present demand with their new supplies. Quotations at the revision, are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	1 22
2 to 4 barrel lots, per gal.	1 20
Broken lots	1 32

LINSEED OIL PRICES STILL UNCHANGED

Montreal

Linseed oil quotations are unchanged locally again this week, with a price, however, of a few cents lower still given in some quarters. The flax seed market continues to fluctuate, and while a slight recession in prices from the recent gains is recorded, crushers anticipate a fairly firm undertone for the following weeks. There is not the same amount of speculation in the market as was evident a few weeks ago, and buying has now sett'ed down to a requirement basis.

Undoubtedly there will not be an abundance of seed available this season, and if oil demands are at all heavy, a shortage at a later date is not at all unlikely. This factor alone would seem sufficient to hold the market in a firm position. There is also the question of the by-products, cake and meal. The season for these is now drawing to a close, and this usually causes a recession in prices, which will also assist in firming oil quotations.

A more active demand for linseed oil is now commencing, and while buyers are still exercising care in their purchases, a good season is looked for. Unchanged local prices are the following:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	1 08	1 10
3 to 5 barrel lots, per gal.	1 06	1 08

Less barrels, add 10 cents per gallon.

NEW WINDOW GLASS LIST APPEARS ON LOCAL MARKET

Montreal

A new higher window glass list is now issued on the local market, increasing quotations on all cuts, and bringing the first cut to $6.00, former price being $5.50. While most distributors have adopted this new selling basis, some firms up to the present have made no change, and it would seem problematic whether the market will now settle on a steady basis at the higher levels. In announcing the revision, one local jobber stated that while higher prices were altogether warranted, it was a question how long and how uniformly they would be adopted. The opening of navigation would be a factor that would have a tendency towards easier prices, this allowing imports to be placed on the local markets much cheaper than at the present time, and there was also the unsettled feeling locally, due to keen competition, that must be overcome. For the present, the following quotations are most general, for ordinary sized orders, with a discount offered for larger business.

WINDOW GLASS

Star	Brackets	D. D.
6 00	25	9 80
7 45	40	12 20
8 10	50	13 30
8 45	60	13 80
8 80	70	14 40
9 30	80	15 15
10 85	84	17 65
11 40	90	18 50
	94	20 65
	100	22 35

Terms: 2 per cent. 10 days; 30 days net.

BOOKING DATE EXTENDED ON WHITE LEAD IN OIL

Montreal

Demand for white lead in oil increases from week to week, witht the approach of the active spring painting season. A continued improvement is anticipated as dealers stocks are undoubtedly low, and booked orders were not placed to the same extent this year. There is also a good painting season expected, which always calls for heavy supplies of this product. The tone of the market is little changed, pig lead remaining steady on the primary markets, this, notwithstanding an easier tendency in almost all other metals, and linseed oil is holding its own at higher figures than were prevailing at the time of the last revision in white lead prices. With these tendencies, little change in price on this product is expected during the approaching busy season. Quotations locally are $12.00 in 5 ton lots; $1..75 in 1 ton lots; and $13.50 in less quantities, with the booking date extended to June 30.

SHELLAC MAINTAINS A FIRM UNDERTONE

Montreal.

A firm undertone continues in shellac, although local quotations remain unchanged. In primary markets slight advances have been recorded and there also, a very firm situation prevails, with further price increases not unlikely. Demand is one of the strongest factors assisting toward a stronger market, and locally sales are increasing from week to week. Unchanged quotations are the following:

SHELLAC—

Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

FURTHER REDUCTION IN PARIS GREEN PRICES

Montreal.

A further revision in quotations on Paris green for the current season is announced, again lowering prices 7 cents per pound in all sized packages. The new season's prices, as announced last week, showed a reduction of 7 cents per lb. from the opening quotations of last year, this further decline bringing a total decrease of 14 cents from prevailing prices announced last Spring. Following are present prices:

PARIS GREEN—

½-lb. paper cartons, per lb.	0 38
1-lb. paper cartons, per lb.	0 36
½-lb. tins, per lb.	0 40
1-lb. tins, per lb.	0 38
25-lb. tins, per lb.	0 34
50 and 100 lb. drums, per lb.	0 32
250-lb. kegs, per lb.	0 29½
600-lb. barrels, per lb.	0 29

F.o.b. Montreal, Toronto, Hamilton, London, Ottawa, Quebec, Moncton, St. John's and Halifax.

Yarmouth and P.E.I. points ¼c. per lb. extra.

Toronto

TORONTO, March 16.—The reduction in linseed oil to the extent of five cents per gallon supplies one of the prominent price developments on the current paint markets. This change is attributed to the easier tone recently evident in these markets, consequent upon the fluctuations in flax seed prices. Demand is also now upon a more moderate basis, the speculative element noted when prices were recently advancing having been generally curtailed. Turpentine quotations are now more uniform, although no revisions of note are recorded this week. The primary markets are fairly steady, with consumers' requirements indicating the cautious attitude of purchases with regard to both current and future commitments. Shellac is quoted with a firm undertone, with prices at the levels nominally recorded.

REDUCE LINSEED OIL FIVE CENTS PER GALLON

Toronto.

A reduction of five cents per gallon in the quotations on linseed oil, provides the outstanding change in the local paint markets this week. This change, while reflecting to some degree, the easier tone in flax seed markets recently noted, is also attributed to price shading between crushers. This now places the average quotation around $1.10 for raw and $1.13 for boiled in one and two barrel lots. It will be recalled that a variety of quotations has recently been apparent among local distributors, and markets have contained the range evident week by week. Prices are therefore, now more uniform, although a slight difference is still noticeable in certain quarters. The current demand is fair with any increase in seasonable requirements expected to tone up the general situation. Following are the revised levels:

LINSEED OIL—

	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 10	1 13
3 to 4 barrel lots	1 09	1 12
6 to 9 barrel lots	1 07	1 10

Less barrels, add 15 cents per gallon.

SPRING PAINT TRADE IN BETTER VOLUME

Toronto

In discussing the prevailing demand for paints and varnishes with a prominent local distributor, the opinion was expressed to Hardware and Metal, that there is nothing disappointing in the current demand for paint products generally. Another manufacturer stated that the volume of Spring trade is now coming along very nicely and the total amount of business is termed satisfactory. While purchases during February were intermittent and irregular, yet a hopeful outlook is adopted, even when admitting that the demand for some lines has, as yet, not been so active as had been looked for. However, this is attributed to the merchants natural cautiousness as regards future commitments, combined with a reluctance on the part of the consumer, which is now evaporating. It is admitted that dealers' stocks of paint were generally low, and while early purchases were of a moderate nature, repeat orders are expected to swe'l the total seasonal distribution. There is little doubt expressed that the vear 1922 will achieve the distinction of being the greatest period in the history of the paint and varnish industry, but it is naturally expected to require a real effort on the part of all those engaged therein. A great deal of interior painting and decorating is being contemplated this season, which combined with brisk activity in the building industry, is expected to register considerable proportions during the ensuing months.

MORE UNIFORM PRICE NOTED ON TURPENTINE

Toronto.

Turpentine prices remain unchanged this week, with the markets having been fairly steady at the prevailing levels. Minor fluctuations have marked the primary southern centres, where consuming requirements continue of a moderate character. Chief interest in the current markets is apparently centred upon the expected proportion of increased demand for turpentine which is looked for during the ensuing weeks. Speculative interests express the opinion that trade this year will represent a larger volume than was recorded a twelve-month ago. Buyers continue to purchase sparingly, however, and generally adhere to a conservative attitude regarding future commitments. Current business on the domestic markets is described as moderate, with supplies ample to take care of prevailing requirements. The variation recently recorded between local prices has now practically vanished, the quotation of $1.27 per Imperial gallon in barrel lots, being quite general. Following are the average price levels:

TURPENTINE—	Imp. gal.
1 barrel lots	1 27
2 to 4 barrel lots	1 26
5 gallon lots	1 42

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon extra.

STEADY TONE REPORTED IN SHELLAC MARKETS

Toronto

A steady tone is found in the shellac markets, with prices generally unchanged at the quotations given below. The opinion was expressed by one distributor that in view of the higher prices obtainable for shellac gum, paint manufacturers would hardly be able to produce shellac at levels which could be appreciably lower than the prices at present prevailing. It is noted, however, that easier quotations have appeared in some quarters, but supplies are described as moderate, and primary markets are fairly firm.

SHELLAC	White	Orange
In bbls.	5 10	4 60
Gal. jugs	5 40	4 90

SEASONAL TRADE NOTED IN PUTTY MARKETS

Toronto.

With the approaching Spring season, the movement of putty is reported to be gradually increasing. While this is not the most active period for this product, consumption for the most part is depending upon the volume of new construction. However, an average season is generally looked for, as a fairly active building programme is outlined this year. Quotations remain unchanged with the undertone of the market fairly firm.

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25

Do., less quantities	6 95	7 45	7 70
1 lb. tins,	11 70	12 20	12 45

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

ANOTHER REDUCTION IN PARIS GREEN QUOTATIONS

Toronto

A further recession of seven cents per lb. has been announced in prices on paris green for the current season. This reduction, added to the change recorded last week, totals a drop of fourteen cents in quotations on the various quantities from the levels of the previous year.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buy ers can frequently make purchases at better prices.

SHER-WILL-LAC
"Save the surface and you save all" Paint & Varnish
The Sherwin-Williams Varnish Stain
IT'S a "Cover The Earth" product and that fact in itself is a definite assurance of guaranteed quality.
For touching up the dingy spots in the interior of the home, for restoring the original good looks of old shabby floors, furniture and interior woodwork of every description, there is nothing more worthy of your recommendation than SHER-WILL-LAC.
Sell and recommend SHER-WILL-LAC Every display you make will serve to swing more of the Sher-Will-Lac demand your way —a demand that is steadily promoted by intensive consumer advertising.
We have a free Sample Plan and a Cumulative discount plan—These are sure to interest you and increase your sales of Varnish Stain through Sherwin-Williams Sher-Will-Lac. Write us and let us tell you about them.

The Sherwin-Williams Standard of Value for Exterior Painting

COST PER GALLON is a false basis from which to measure paint values Far more important to the dealer is the **quality** of the paint he sells, whether it will satisfy the customer on the three all important points by which every paint should be judged—covering capacity, weather resistance and durability

Judge **S.W.P.** on that basis and it is the biggest paint value you can offer your trade **It covers one-third more area** than ordinary paints, **it lasts twice as long**, and therefore represents a real money saving in actual price as well as in labor cost for painting and repainting

Everybody knows S W P It's a "Cover The Earth" product and the Cover The Earth label is everywhere regarded as a guarantee for goodness

Turn this popularity to good account by identifying your paint department with S.W P and the other Sherwin-Williams Products Write to-day for particulars of agency offer and see the money making possibilities it offers you.

RAM

"The Right Paint

THE COMPLETE

Right, because it's properly manufactured all the way through. The materials for the Agate family are selected with greatest care. The finishes shown are in demand by every householder, not only for new work but for refinishing floors, woodwork, radiators, furniture and for other purposes too numerous to mention. Make the famous Agate family work for you.

SAY'S

To Paint Right"

AGATE FAMILY

This year, more than ever, is a time to display your stock of Ramsay's products. It is going to be a building year and merchants all over Canada are planning for it. The men who are ready will get the business. Ramsay's products make good, pulling displays — exhibit your stock prominently and cash in on larger sales.

The Best Salesman

And then—Co-Operation.

You get them both, in unstinted measure, when you handle Martin-Senour 100% Pure Paint and Varnishes.

100% Pure—as perfect a product as human skill and science can produce.

Martin-Senour sales-creating publicity is the most extensive ever offered by any paint company in Canada. Advertisements in newspapers, magazines, farm and religious journals—Poster Showings throughout Canada—Painted Bulletins—Mailing Campaigns, together with many other business producing display features, such as Window Trims, Counter Displays, Lithographed Show Cards, Booklets, etc. All these co-operative selling helps are behind every Martin-Senour dealer-agent and go far towards securing for him the lion's share of the paint and varnish business in his locality.

Would you like to have particulars of this proposition for consideration? If your paint sales are handicapped through lack of Quality or Co-operation write to-day for detailed information.

FLINT EASIFLOW VARNISH STAIN

Every Merchant wants a leader—here is one

The turn of merchandising events occasionally brings a profitable sales opportunity.

Many Jobbers and Retail Merchants have investigated the Flint Easiflow Varnish Stain Proposition, have seen in it an opportunity for large and profitable sales and have placed their orders for immediate delivery. In justice to yourself, Mr. Hardware Merchant, it will be well for you, too, to investigate.

Our proposition includes Color Cards in which the five stains are shown on actual wood chips and also a very handsome Slat Rack which will be a rare addition to your store.

Easiflow is a genuine high grade product at a low price and is rapidly getting onto the shelves of the hardware stores. Now is the time for you to write us for full information.

BRANDRAM'S *Genuine* B.B. WHITE LEAD

In the organic world an evolutionary process is said to be at work, ever developing the good and eliminating the unfit. Time is the great arbiter, the acid test, that infallibly detects the false, leaving the genuine untouched.

Nearly two hundred years ago a White Lead corrosion process was discovered by one of the founders of the House of BRANDRAM. This has been used continuously ever since for the manufacture of a product of superb value, and to-day BRANDRAM'S GENUINE B. B. WHITE LEAD is being made on the original formula, the washing, pressing and grinding processes among others being facilitated, however, by the aid of modern mechanical methods.

In a very few generations the unworthy goes to the wall, but during ten generations BRANDRAM'S GENUINE B. B. WHITE LEAD has earned and still maintains a world wide reputation for its possession of the essential properties of White Lead in oil—excelling as it does in spreading and covering qualities and in durability.

Tested by Science's latest method, the Pfund Cryptometer, an instrument of mathematical precision—BRANDRAM'S GENUINE B. B. WHITE LEAD is proved to have greater hiding power than any other Brand on the market.

The above are reproductions of a few of the advertisements which will appear in leading publications all over Canada this Spring

We're Off— and nothing can stop us!

With the entire Paint and Varnish Industry lined up solidly behind the campaign to make 1922 the Greatest Paint and Varnish Year, nothing can stop us. The public needs the paint and needs the varnish—and needs them badly.

From coast to coast the new "Save the Surface" advertising is being read by millions. It is urging them to protect their property.

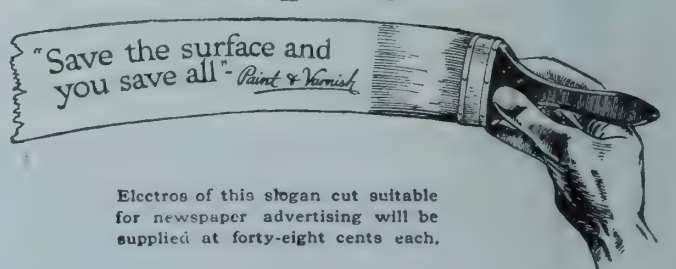
Therefore, now is the time for you to get busy. Don't fail to keep the Save the Surface idea to the front. Every passerby should be reminded when he is in front of your store, to Save the Surface.

Keep a window display in constantly, and in all your newspaper advertising use the million dollar slogan.

75 To-day order a cut of the slogan as shown below.

Save the Surface Campaign

509 Royal Trust Chambers
107 St. James Street
MONTREAL



Electros of this slogan cut suitable for newspaper advertising will be supplied at forty-eight cents each.

Indoor Suggestions "Muresco"

Oftenest Called For---Easiest to Sell

Muresco is making its peak sales just before Spring House-Cleaning time. This is the time to feature Muresco and the Muresco Brush in your Window Displays and local advertising. Suggest the artistic, durable sanitary results of using Muresco to beautify the home indoors.

Muresco has established, and maintains, an enviable record for quality. It will not peel, crack or rub off; it is very economical in use, artistic in appearance, durable and sanitary.

Muresco sales have grown astonishingly. Merchants find it a wonderful seller—consumers who once use it, purchase it again and again.

If your business is not yet enjoying the benefits of Muresco sales—investigate. Muresco is made in white—16 tints—and 16 colors.

Write to-day for color cards, prices and the agency.

How Many Barns Near You?

Systematic selling brings uniformly successful results. Present conditions require a "go-getting" style of selling—a personal effort in salesmanship, because most of the business to-day is outside your store. Go out and get this business. A short drive in the surrounding country will show where and how to push Roofing Paint and make money. List the barns, silos, roofs, bridges and sell the owners Hillcrest Barn Red Paint.

We manufacture "Hillcrest" Barn Red Paint from pure English Oxide of Iron; it will stand any climate, under all weather conditions. Five gallons will cover 1,500 square feet on wood, or 2,000 square feet on iron, with two coats. It dries with a hard, permanent finish.

We Also Manufacture the Following Hillcrest Quality Lines:

Colors in Oil; Colors in Distemper; Colors in Japan; Porcelain White Enamel; Ebony Black; Spanish Enamel; Bath Enamel; Motor Car Enamel; Paste Filler; Crack Filler; Pearcy's Pure Prepared Paints; Barn Red Paint; Outside Gloss White; Inside Flat White; Aluminum Paint; Carriage Paint; California Gold Paint; Graphite Machine Paint Liquid; Orange Shellac; White Shellac; Oil Stain; Varnish Stain; Shingle Stain; Cottage Shingle Stain; Varnishes—all kinds; Pure Lead; Bronzing Liquid.

There's Profit and Prestige in Handling the Complete Johnson Line

YOU'RE in business to make money. Johnson's Artistic Wood Finishes net you a substantial profit on every sale. But in addition Johnson Products are business builders—they make satisfied customers — repeat buyers — the kind that mean a steady, continuous, profitable business to you.

Johnson's Sani-Spar Varnish Stain is a waterproof product which will not turn white. Gives wonderful results on furniture, floors, woodwork and all interior and exterior surfaces. Put up in four sizes and in natural and four shades only, consequently a small investment brings you a complete stock.

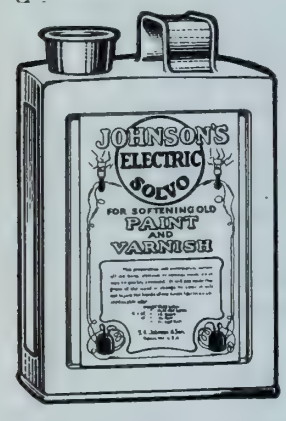
Johnson's Floor Varnish is as good as Johnson's Floor Wax. What more can be said? It gives a beautiful, high gloss which will not mar, blister or scratch white. Dries dust-free in 2 hours and hard over night. Is absolutely waterproof and will stand all reasonable tests.

Advertising

The complete Johnson line will be extensively advertised throughout Canada. The leading magazines will carry the interesting Johnson story right into the homes of the people who are your logical customers. By displaying all the lines in your store and windows you will be the final link in completing the sale.

Sales Helps

And in addition to the advertising there will be attractive sales helps — counter cards, window cards, booklets, folders, envelope stuffers, and many other features that will aid you in building up an interesting and profitable business in Johnson products. When you send in your order specify just what sales helps you need.



Johnson's Is a Quality Line

Only the best grades of raw materials are used in the manufacture of our products and every department is in the hands of experts. This insures a uniform manufactured product of the highest quality. All Johnson Products are well canned—beautifully labeled—well advertised—and allow the dealer a good margin of profit.

Johnson's Car Savers---A Profit-Pulling Auto Accessory Line

No accessory stock complete without Johnson's Car Savers. They have stood the test of time. You can handle them right in connection with the regular Johnson Line without devoting much space to their display or tieing up much of your capital. There's a Johnson Car Saver for every purpose—for removing carbon—mending leaks in radiators—for renewing old tops—for varnishing old cars—for lubricating springs—for removing pits and foreign substance from valves —for patching tubes, casings, etc. The demand is for "Johnson's."

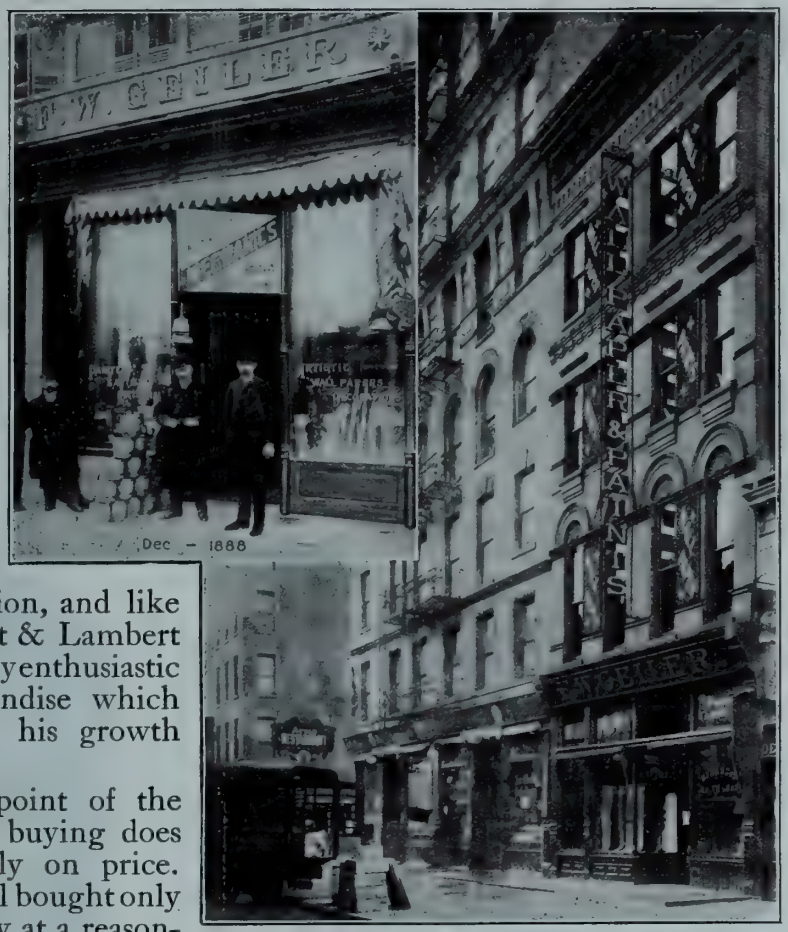
Chose Pratt & Lambert Products for "Leaders" 36 Years Ago!

THIRTY-SIX years ago, in 1886, two years before the small photo was taken, Fred W. Geiler, head of F. W. Geiler, Inc., 2340 8th Ave., New York, chose Pratt & Lambert Varnish Products as "leaders" upon which to build a substantial reputation for high-grade finishes. His success has proven the wisdom of that early selection, and like many another Pratt & Lambert dealer, he is naturally enthusiastic about the merchandise which has contributed to his growth and profits.

From the standpoint of the retailer, successful buying does not hinge primarily on price. Merchandise is well bought only when it sells readily at a reasonable profit.



For 36 years on one block between 125th-126th Sts., New York

Write *today* for particulars of the Pratt & Lambert Dealer Proposition and get some of the business which high-grade national advertising is creating for dealers.

Brushes That Painters Appreciate

The surest way to make your business good this year is to sell good merchandise that gives better service than the lines your competitors sell.

Here's our Peerless Wall Paint Brush. It is a striking example of the good honest quality to be found in all the goods we manufacture.

This is a solid, straight compressed, Rubber-Set brush, and to dealers who are not familiar with this process of making brushes—the bristles of such brushes will not bush or flare.

Sell these brushes and no customer will come back and say "The bristles came out—the ferrules split, or the brush came apart." Canada brushes are made right, work right, stay right and sell right.

Our Line is Complete

These Brushes can be used in any liquid

The Book of Profits

The Meakins Catalogue for 1922 should be alongside your counter. It is an aid to successful selling, just as it is a guide to profit in ordering.

It is a good, friendly book; ready to help the merchant in many ways. It will save you steps and time.

SUPPOSE a customer comes in just now and says he wants a kalsomine brush—isn't just sure what he wants. Reach for your copy of the Meakins 1922 Catalogue; turn up page 30 and several following pages. Talk to him and show him "Grippo," "Canton," "Jewel," "Reno," "Sun," "Perfection," etc. You can discover just what he wants; influence the sales as you like, and save walking to shelves and reaching down many brushes which must later be replaced with the exception of those sold.

The run through the catalogue often leads to additional sales and refreshes the merchant's mind with suggestions of goods to offer

Isn't this the easiest way of selling, both for you and your customers?

Barrett Roofings, Cements Industrial Paints etc.

IT is *repeat* sales, not *first* sales, that keep business going and growing. That's why successful dealers like to handle Barrett products. They know from experience that these products make satisfied customers and that satisfied customers make profits.

Plastic Elastigum Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Plastic Cement of a Thousand Uses." Unequalled for patching holes in roofs, repairing flashings, gutters, etc., etc.

Comes ready for use in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

Plastic Elastigum being applied to make a water-tight joint around a ventilation pipe. It sticks to any surface.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market and the first choice of experienced buyers for all steep-roofed farm and factory buildings. Everlastic is a safe roofing for you to sell and a safe roofing for your customers to buy. It sells at a low price, is easy to lay, and gives unfailing satisfaction.

Everlastic "Rubber" Roofing comes in three weights; light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement for laying are packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out prepared and "rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing, at very small cost.

Put up in all sized packages from 1-pint tins to barrels of 40 gallons.

THE "CYCLE"—

Not the kind we all rode in the palmy days of the "Bike"—but the cycle of prices!

Last year the farmer with his big crop got a low price and a small net return.

He cut his buying "to the bone."

The shopkeeper reduced stocks until every shelf was visible—mostly bare.

The factories in turn suspended work, their employees emulating the squirrels—

Old clothes, old autos, old machinery used to the limit. Then, since there's nothing beyond the bottom—comes the reverse swing—

Each unit in turn gradually joining—cheaper material—cheaper labor—first thing you know prosperity's here again.

Well—Premier Galvanized Steel Sheets are good and ready to go—just half the cost of 1920—

The wise buyer is placing Spring orders now—
All Canadian jobbers gladly quote.

A Convenient 2½ lb. Package

Isn't it better to sell customers just the amount of goods they want and so win their satisfaction and confidence than to force on them more than they need—which will lead to waste.

CHURCH'S COLD WATER

Alabastine

is put up in a special 2½ lb. carton as well as in the 5 lb. packages. Those who have small jobs get just the quantity they want. There is no waste. The cost to the customer is kept at the lowest possible mark. Your profit is 50 cents per case more and your customers feel they are getting a square deal.

The retail price is 40 cents per package.

Use Alabastine not only as a profit-maker but as a builder of good will—of a larger list of satisfied customers and of larger business.

The Alabastine Company, Paris Limited

Paris, Ont. **Winnipeg, Man.**

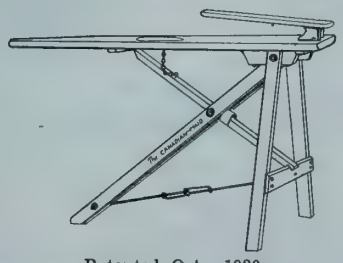
The "Canadian Maid"



Patented Oct., 1920.

is the very latest thing in the way of an Ironing Table.

It is firm as a rock.

Weighs less than 18 lbs. but will support over a half ton.

Simple to operate and the most substantial Ironing Table made.

Folds up into about three inches of space.

Retails at $5.00 and $5.75 if equipped with Sleeve Board.

Liberal discounts to dealers.

Send us your order and if not absolutely satisfied return the goods.

Write today for prices and descriptive literature.

"Use the Bell to Sell" —and to Buy

Hardware dealers carrying small stocks who re-order supplies from wholesalers by Long Distance obtain shipment the same day and are able to give the kind of service that quickly becomes popular.

They do not have to lock up so much capital in stock.

An increasing number of firms credit their customers' accounts with the cost of Long Distance messages when ordering goods. It pays.

Every Bell Telephone is a Long Distance Station

The Question ? ? ?

THERE ARE TWO QUESTIONS THAT HARDWARE MEN ARE ASKING THEMSELVES:

1. How can I meet the reduced prices that are demanded of me when so much of my essential upkeep cannot be reduced? My rent or carrying charges are not coming down and I don't want to cut wages.

2. When I have reduced prices how can I convince my buying public that they are down as far as they can go?

The first question to fit most cases might be, how can I sell more goods? How can I do with less help? How can we get same turnover in a smaller store? To all these questions the answer is:

WALKER WALL CASES, COUNTERS & SHOW CASES.

Save 25% of the space and labor for you and please your buying public by quicker service, clean goods, always on display.

Send your floor plan and ideas for catalog and prices.

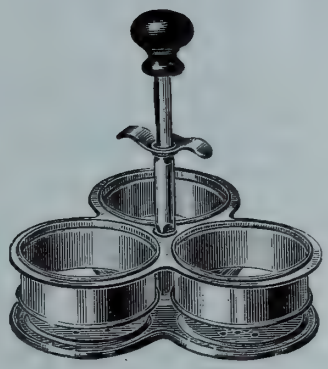
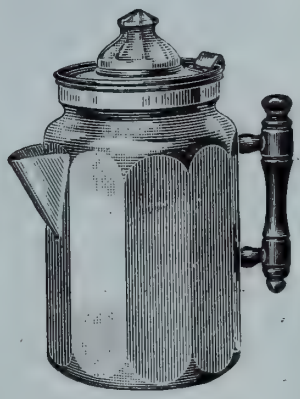
2695—Colonial Tea Pot (With Ball)



2543—Egg Poacher



5431½ Percolator

VIKO

Aluminum Ware

When you display, advertise and push Viko it pays you handsomely.

Plain, strong, heavily tinned, cool, steel handles give satisfactory service and match the durability of the pan itself. Show the sturdy, uncountersunk rivets which firmly grip the utensil. No loosening or pulling out of rivets.

Notice how nicely the inset cover fits into the pot—no wobbling.

Packard Cars at Ford Prices

Is what handling the famous

LOCOMOTIVE ELECTRIC WASHER

now made entirely in BRANTFORD, ONTARIO, is going to mean for every dealer and distributor.

This EIGHT SHEET, ALL METAL, CABINET TYPE electric washer equipped with a HEATER under the flat bottomed copper tub boiling and washing the clothes at one operation has every feature of value of every electric washer made embodied in it in its best form besides many exclusive and superior talking points of merit of its own. To introduce we will send one sample to the first dealer in each district at the jobbers' price of $125.00 less five per cent. for cash with order. Ontario Hydro Official Report No 306 says:—

"Current consumed under severe operating conditions four and one half amperes," or less than the electric iron.

Write or wire for propositions stating territory and number of machines you can sell in a year.

Free to You!

This Money-making Display Cabinet That Sells—

Blue Nose Oak Leather Strips

This makes money for every hardware and general store. It puts it right up to people in your store—reminds them of their need. Show them that "Blue Nose Oak" Leather Strips are cut from the best part of the best packer steer hides, long time tannage in the good old-fashioned way which insures the best wearing qualities—while cut soles, being small, are naturally cut from the more inferior part of the sides.

Point out that "Blue Nose Oak" Strips will cut more economically and wear longer than ordinary cut soles.

Let this extra salesman work for you a short time and you'll soon be ordering strips again—your jobber should carry this line—if not write us direct enclosing us his name.

Lyon's Brook

Read How This Merchant Made Money

February 13th, 1922.

The Logan Tanneries, Ltd.

Dear Sirs:

Your favor of a recent date came to hand in due time. With reference to your leather would say that the different grades of your leather are giving satisfaction; have heard many of our customers give it great praise and none, to my knowledge, has found fault with it. The case in which the leather is put up is an A1 idea and the manner in which it is cut is most convenient to the seller and is practically wasteless to the buyer. In my opinion you are perfectly safe in standing back of "BLUE NOSE OAK."

Yours very truly,
W. J. McDONALD,
Per V. A. McLellan, Manager.

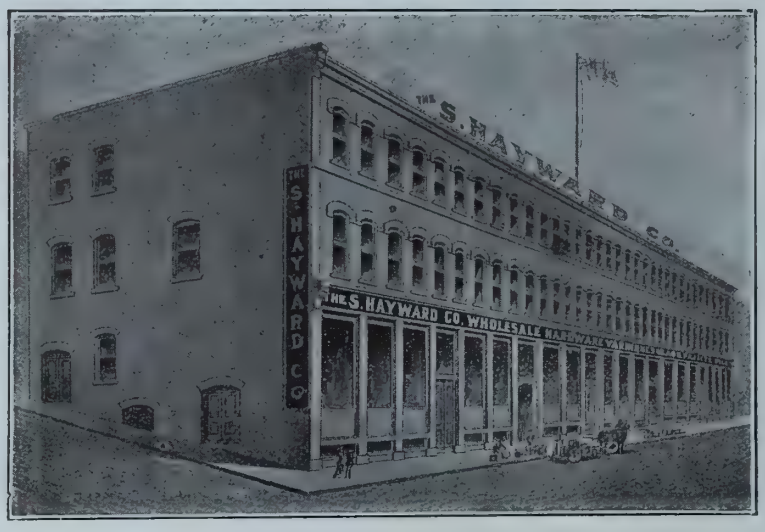
The S. Hayward Co.

(FIFTY YEARS IN BUSINESS)

Hardware Merchants

WHOLESALE EXCLUSIVELY



30-52 Canterbury Street, St. John, N.B.

THE ambitions of the founders of this business were to select the goods of highest quality and most staple demand from the offerings of the markets of the world.

Our one aim has always been—"prompt and efficient service at lowest prices consistent with quality." Our constantly increasing trade bears evidence of our success in this regard. With half a century's experience behind us we are in a better position than ever before to serve the Hardware Trade of the Maritime Provinces.

Send us your order today and prove our claims.

CAMPBELL & FOWLER EDGE TOOLS

Our XXX double bit axe is also made of the very highest grade of Crucible Cast Steel and each bit is separately tempered, which insures them to be of equal temper, as most double bit axes do not contain the same temper point in each bit.
This axe when handled will balance perfectly and each bit will line up true with the handle. Our axes are supplied in any pattern required.

Our XXX single bit axe is made of the very best grade of Crucible Cast Steel, by men WHO KNOW HOW, under the most rigid inspection and therefore we can safely guarantee every axe to give perfect satisfaction. Every XXX axe is ground to a keen cutting edge ready for work, which saves the chopper the usual grinding necessary on other makes. We supply these axes in any pattern required for your trade.

Our Special Hudson Bay Axe is much wider across the eye than the regular pattern, which gives more support on each side of the handle and prevents the handle from getting loose or breaking, which is the case with the old style Hudson Bay Axe. Patent applied for.

A SELECTION of four favorites. Have you these in stock? Campbell and Fowler Edge Tools have been standard for over fifty years.
Don't be modest about displaying these lines. Get 'em into your windows and on your show racks. Our long experience is your guarantee.

We also manufacture:
Socket Firmer Chisels
Framing Chisels
Draw Knives
Boys', Hunter and Bench Axes
Hatchets
Automobile Springs

Campbell & Fowler Ltd.

St. John Sole Makers XXX Tools **N. B.**

Campbell's Patent XXX Hammer Poll Axe is made with a piece of 1¾ in. best cast steel, fitted and welded solidly into the poll of the axe. Cannot break as it is properly welded and tempered. This axe will not flatten out, and has the durability and cutting qualities which have made our XXX Tools famous. Will balance perfectly on the handle; will chop easier than a light poll axe and has a thin, keen edge which it will retain.

Your Customers will Buy

Samuels' Dustless Ash-Sifter

Because It Saves Time, Money, Trouble, Clothes, Annoyance, Fuss and Dirt.

Hardware merchants who have handled the Samuels' Sifter attribute the splendid sales they have enjoyed to the fact that this clean, simple, effective sifter exactly fills a much-felt want.

There is a very real demand for a sifter that is clean and dustless. The Samuels' Sifter has proved itself—in use and in sales.

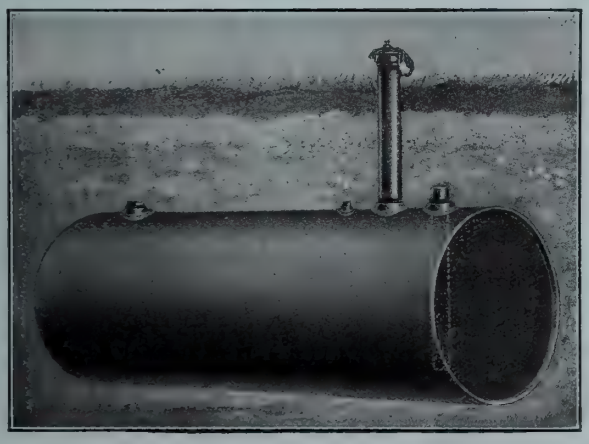
Beath Steel Barrels

Ensure against loss by always insisting upon your liquids being shipped to you in Beath Steel Barrels.

They give many years of service. Made in capacities 5 gals. to 92 gals. in types to suit every kind of product. All joints welded. Will not leak under the hardest usage and ensure safe deliveries without loss. Handle Beath Barrels—once tried always used. Write for catalogues and prices.

Underground Storage Tanks

For Gasoline, Kerosene Lubricating and Fuel Oils



You never wonder whether the Beath Tank is leaking or not when it is out of your sight underground.

It is absolutely leak proof, meeting every requirement of underwriters' Laboratories. Built of best quality open hearth soft steel plates, heavily galvanized, ensuring against possibility of corrosion inside or outside of tank; all flanges and seams are above the liquid and oxy-acetylene welded. After the most careful test (by compressed air) every tank is heavily coated with asphaltum paint and labelled by underwriters.

Built in sizes 54 to 1,000 gallons. Standard fittings for these tanks are supplied if desired—suction pipe, fill pipe with cap, strainer and lock.

Write for full particulars and prices—

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

The Big Feature
Garden Hose Line for 1922

"DUNLOP CORD" HOSE

The popular 12-sided design

The Improved Corrugated design

WHILE Moulded Hose—somewhat similar in appearance to Dunlop Cord Hose—has been on the market a number of years, the new process for making a Moulded Hose, introduced by Dunlop, has revolutionized Hose-making in the same degree as the Dunlop Cord Tire method revolutionized tire-making.

Dunlop Cord Hose is:

Extra Sturdy.
Absolutely Seamless.
Non-Kinkable.
Corrugated and 12-sided Designs.
Light and Flexible.
Inseparably United.
Made in long lengths and the popular 5/8" size. The only hose of its kind made in Canada by an exclusive process.

Other Brands of Dunlop easy-to-sell Garden Hose are:—"Dunlop Extra," "Peerless," "Ideal Kant Kink," and "Banner."

With this fine Hose line-up and a little extra attention to Hose Sales this year, you should be able to realize a nice tidy profit.

You are invited to write our Hose Service Department for full particulars and prices.

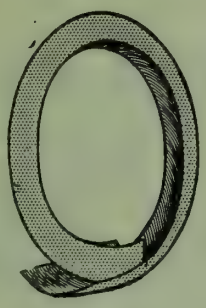
When a Motorist is in Trouble—He is too mad to put up with any poor quality in Accessories

Bear in mind that you must sell the BEST, for if accessories go wrong, your reputation as a reliable dealer suffers. Make things safe for all concerned—

Sell ("Gutta Percha") Accessories

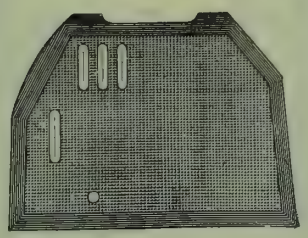
RELINERS

They make it safe for old casings about to shoot a blow-out. Gutta Percha Reliners should be in every tourist's kit.



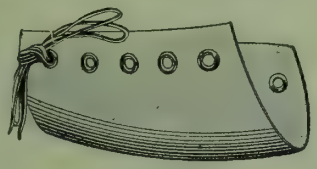
Wind and Heat Proof Mats for FORD CARS

These patented mats prevent hot air from the engine pushing up into the driver's place. Keeps feet cool and keeps out engine odors.



LACE-ON BOOTS

Many a man has been thankful for a lace-on boot when he had to protect a soft spot in a casing that would make travel impossible but for this protection.



Sealtite Patches for Tube Repairs

Repairs punctures in tubes in a few moments. You simply can't go motoring without Sealtite patches.

Another Motorist "Compares the Wear"

"I, the undersigned, take great pleasure in testifying that I have been using, and I venture to say abusing, Ames Holden Tires during the last year on my Chevrolet car with the greatest satisfaction.

"After driving on one of these Ames Holden Tires over ten thousand miles, one could easily notice the excellent quality of the rubber even in the deeper layers of it, which is proof in itself that only first-class material has been used in their manufacture, and I have no doubt that the economical wear and tear must be attributed to this fact."

(Signed) C. H. Grunert.

Mr. Grunert is a prominent Veterinary Surgeon at Fort Saskatchewan, Alberta.

It is no idle claim that AUTO-SHOES "cost less per mile."

Chart of Recommendations

(Abbreviated Edition)

How to Read the Chart:

THE correct grades of Gargoyle Mobiloils for engine lubrication of both passenger and commercial cars are specified in the Chart below.

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendations should be followed during the entire period when freezing temperatures may be experienced.

The recommendations for prominent makes of engines used in many cars are listed separately for convenience.

The Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

A Thought On Turnover

Figures which will Interest You

Based on data carefully collected and compiled by a responsible farm publication, Canadian automobile owners alone annually buy 275,000 pliers, 137,500 hammers, 742,500 wrenches and 178,750 screw-drivers.

These interesting figures are all on goods with a comparatively slow turnover. Even a hard-used hammer or screw-driver certainly lasts a year. Pliers and wrenches seldom wear out before many months have passed.

Contrast with this the fact that Gargoyle Mobiloil is an everyday necessity to every automobile and get a correct idea of the profit possibilities and the rapid turnover of Gargoyle Mobiloil.

Further, the sale of Gargoyle Mobiloil, as specified by our Chart of Recommendations, helps you build up your entire trade in automobile accessories. It will add life to many of your slow-moving hardware items.

GARGOYLE

Mobiloil

Make the chart your guide

Note; Ask our Salesmen for Chart of Recommendations for your wall.

Here's the fastest selling, best shooting .22 Repeating Rifle ever made,

The wonderful new

Marlin

MODEL No. 38

The *Marlin* *will sell on its exclusive features*

It has the simplest take-down—compare it with any other and see its superiority.

Every Marlin is a side-ejector. It's a safe gun. We make three fine styles of .22 caliber repeaters, all beauties, and quick sellers.

- .22 Hammerless, Slide Action Model 38
- .22 Visible Hammer, Slide Action Model 20
- .22 Lever Action, Pistol Grip Model 39

All have modern Solid-Top, Side-ejecting construction. All are *Take-Down* rifles. Action parts removable with the fingers. All use, without change or adjustment, .22 shorts .22 longs and .22 long-rifle cartridges.

Our 1922 Advertising is now in preparation. Watch for it.

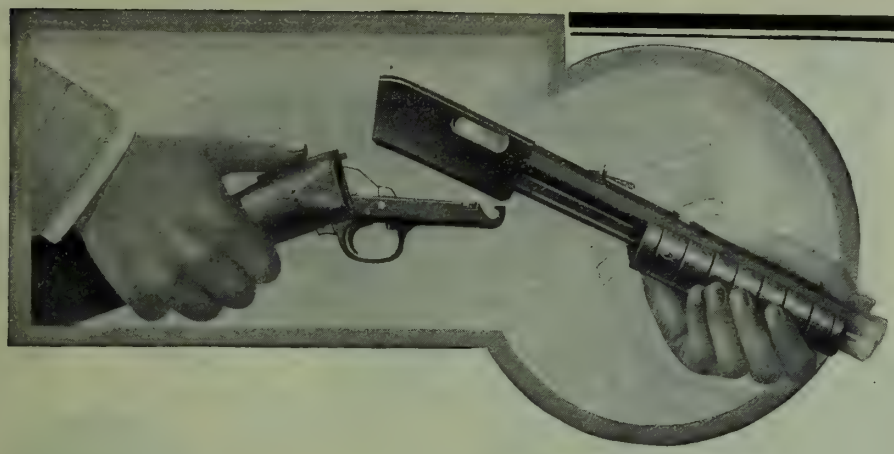
Your Jobber is now ready to send you a sample Marlin like the one shown. Write him today.

Model No. 38

The Marlin Firearms Corporation

NEW HAVEN, CONN.

If interested tear out this page and place with letters to be answered.

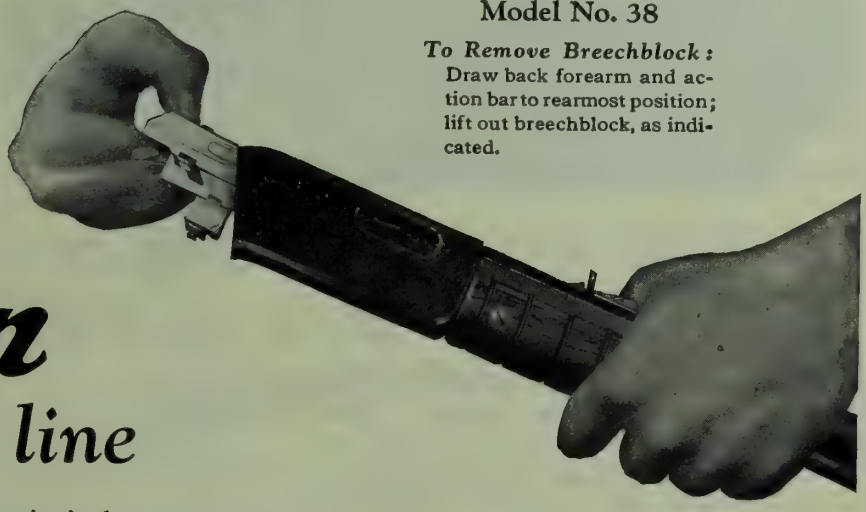


Model No. 38

To Take Down: Just draw back take-down latch button; tip forward barrel portion, and disconnect.

Model No. 38

To Remove Breechblock: Draw back forearm and action bar to rearmost position; lift out breechblock, as indicated.



The Marlin

The complete line

Not a gun in the Marlin line that isn't the most modern thing of its kind. We dropped the out-of-date top-ejecting style of rifle 33 years ago.

Marlin modern side-ejecting, repeating firearms are made in

Small Game Repeating Rifles:

.22 caliber (3 models)
.22 Rim Fire
.25-20 caliber
.32-20 caliber

Big Game Repeating Rifles:

.30-30 caliber
.32 Special caliber
.32-40 caliber
.38-55 caliber

Repeating shotguns in

12 gauge visible hammer
12 gauge hammerless and
20 gauge hammerless.

Marlin Firearms

Combine more good selling points than any other line on the market. You cannot go wrong in pushing the Marlin. In the past fifty years over a million Marlins have found satisfied users.

Canadian Sales Representatives:

DOMINION CARTRIDGE CO., Limited, MONTREAL

Your Jobber handles the Marlin and will be glad to ship you a sample on request. Or write

DOMINION CARTRIDGE CO., LTD., TRANSPORTATION BLDG., MONTREAL.

Selling more hardware with the aid of a pump

Ever stop to consider how a curb gasoline pump can help you sell more hardware? Here is the way it works out.

A gasoline pump on the curb in front of your store will stop its share of passing motorists. While you, or one of your assistants, are filling the tank, make a few suggestions to the driver about his need for a new saw, or fence wire, or some other item in which he might be interested.

If you handle automobile accessories, suggest the need of some of them. You will be surprised at the amount of goods in addition to gasoline which you can sell to drivers of automobiles.

A Wayne Honest Measure Gasoline Pump will attract trade to your store. Wayne Pumps serve the car owner quickly and give him the exact amount of filtered, water-free gasoline which he pays for.

Most motorists already know the good qualities of Wayne Honest Measure Pumps. And many more are learning about them from our national advertising and through their own satisfactory experiences. A Wayne Pump will help you get their trade.

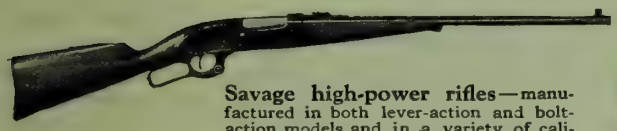
The most complete line of Firearms on the market

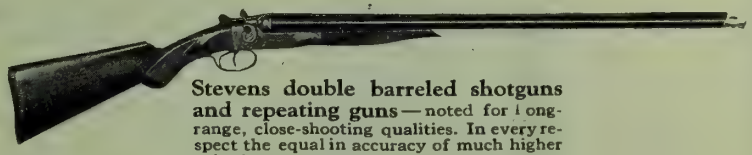
YOU have known Savage as a leader in the field of sporting rifles, repeating shotguns, and automatic pistols.

You have known Stevens as the maker of time-proved shotguns, small-bore rifles, and target pistols.

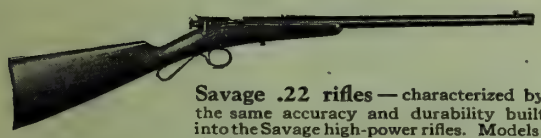
Now know the Savage-Stevens complete line—the most complete line of firearms on the market.



Savage high-power rifles—manufactured in both lever-action and bolt-action models and in a variety of calibers to meet every need of the big game hunter. Accurate and powerful.

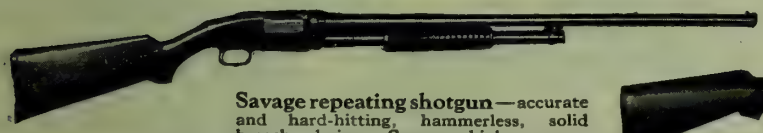


Stevens double barreled shotguns and repeating guns—noted for long-range, close-shooting qualities. In every respect the equal in accuracy of much higher priced guns.



Savage .22 rifles—characterized by the same accuracy and durability built into the Savage high-power rifles. Models: single-shot, repeating and N. R. A. target.

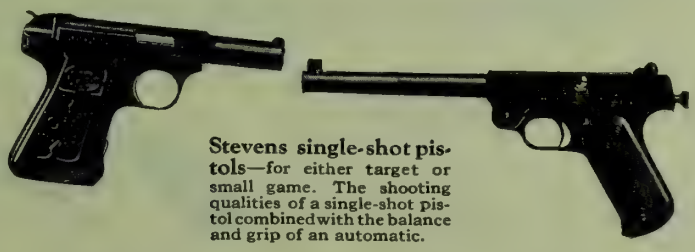
Stevens small bore rifles—at once the most economical and accurate rifles on the market. Stevens barrels are famous for straight shooting.



Savage repeating shotgun—accurate and hard-hitting, hammerless, solid breech design; Savage high-pressure, smokeless barrel.

Stevens single barreled shotguns—the most complete line of single guns manufactured by one firm. Stevens accuracy and durability throughout.

Savage automatic pistols—"Aims as easy as pointing the finger." A ten-shot, self-loading arm, made to fit the hand.



Stevens single-shot pistols—for either target or small game. The shooting qualities of a single-shot pistol combined with the balance and grip of an automatic.

A complete line of firearms means more sales, more profits for you.

The Savage and Stevens lines will continue to be handled exclusively through the regular jobbing channels.

The feature that sells Iver Johnson revolvers all over the world

The Iver Johnson, as you know, is essentially a revolver to be kept in the home for self-protection.

And so it is of vital importance that such a revolver be accident-proof. The Iver Johnson is known throughout the world as the "Hammer the Hammer" revolver—the one that can be thumped, bumped, dropped, jolted without fear of accidental discharge.

Many years of continuous and powerful national advertising have familiarized the public with the safety of the Iver Johnson.

And so today, when a man decides to secure a revolver for the protection of his life and property, the Iver Johnson is his logical choice.

Dealers who carry the Iver Johnson line find that this revolver sells with a minimum of time and effort on their part.

Are you stocked on the Iver Johnson line? Some rich territories are still without adequate dealer representation.

Stock the entire line—22, 32, 32 special and 38 calibres. Hammer and Hammerless models with Regular, Perfect Rubber and Western Walnut grips.

Why not stock Iver Johnson shotguns? There are none better. Then you will secure the benefit of the entire line of Iver Johnson firearms.

FREE! Three interesting booklets, also complete dealer information. Send at once for one or all of these booklets.

Made and Used by Canadian Hands

SUCCESS

Depends on Your Ability to Grasp Opportunity

70% of the Athletic Supplies used are purchased by the younger generation. Did you ever consider catering to this class of trade?

In addition to making a substantial margin of profit you secure the good will and patronage of these young people, who, in time, will become a potent factor in the successful continuation of your business due to the fact that they eventually become the purchasing power of the community.

Are you doing anything to secure this trade which is essential to your success, or are you content to allow Mail Order Houses and competitors to reap in the present profit and future good will of these citizens in the making?

The majority of athletics prefer Reach equipment because of its superior quality and unequalled practical features.

AN OPPORTUNITY to become a Reach dealer is right here. Your inquiry does not obligate you in any way.

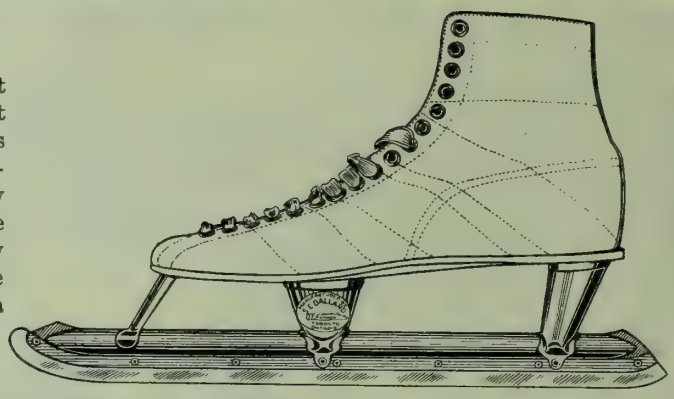
The Ballard Hy-grade Tube Skates

This is a new line that will make an assured hit with the hockey players and skaters in your locality. There are so many good qualities about these skates that you have only to display and advertise them locally to make a whole flock of sales.



Point out in your show cards and advertising that the best known players in Canada are now using these skates. This helps materially to make them popular with others.
We would suggest that before considering your next stock of skates you write us and let us show you how it will pay you to handle the Ballard line.

The Ballard "Combination" Speed Skate, Rivetted to a Kangaroo Racing Shoe of Approved Pattern.

The Wallace Barnes Co. Limited

Hamilton Ontario

A Quality Fire Pot

The No. 71 Fire Pot with Improved Double Needle Burner generates the highest degree of heat, burns gasoline or kerosene and gives the user the maximum service. The consumption of fuel and cost for upkeep is reduced to the minimum. The C. & L. patented Double Needle Burner overcomes 60% of all Burner troubles caused by the old style sharp pointed Needle. Both Needles are blunt, making it impossible to enlarge the orifice and ruin the Burner. Short Needle cleans, long Needle regulates. The best and most efficient Fire Pot made. Jobbers supply at factory prices. Send for a catalog.

No. 71 Fire Pot. List Price Each $27.20. Ask for Discount.

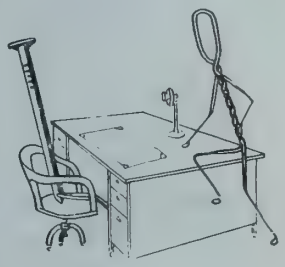
LAIDLAW'S WIRE BOYS

Their Chat No. 22

Surprising Wire-Using Canada



1. "Did you ever sit down, B. T., and figure out how many classes of manufacturers use wire of various kinds? You will surprise yourself, but you will surprise wire-using Canada more when you tell them that a firm in Canada can and do make any kind of wire they could possibly use. The Laidlaw people back this statement with the actual goods, B. T. No grade of wire is too difficult for Laidlaw's."

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada town there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have fifteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing fifteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company have been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they need it in their business and because they study it each week for news

of the trade, new goods, market information and for additional information regarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The hardware trade is undergoing rapid changes. With each succeeding year come new developments. It is our business to keep in close touch with the trade. We have a vast amount of information on almost every imaginable phase of the hardware trade. You may think your line is one that cannot be advertised. We may think differently. It will cost you nothing to secure our views. Drop us a line and our representative will call, or if you prefer it, we will, after making an investigation of the possibilities of advertising your lines, submit our proposition in writing.

PEERLESS FENCE

DEALERS NEED NOT KEEP CUSTOMERS WAITING

An order delivered is worth two that are not. Keeping customers waiting gives you a reputation for poor service and you lose trade.

The Peerless dealer need not lose business this way. He is sure of prompt shipments that will keep his stock up to his needs and his customers satisfied.

Peerless dealers are sure of prompt factory service for three reasons:

We maintain an ample stock of all styles of fence ready for immediate shipment.

We have unexcelled shipping facilities by boat and rail.

We realize that the dealer's business is our business and so make every effort to help him.

Peerless dealers have another important advantage too. They are handling a good fence, a fence that is strong and lasts a lifetime.

Write to-day for our dealer's proposition

Building Prospects Look Bright

We see indications everywhere that building activities this year will be revived in earnest. This will mean that great quantities of glass will be needed.

The building revival will mean good business for you and you should lose no time in bringing your glass stocks up to meet all requirements.

The merchant who orders now will be in an excellent position to get the lion's share of the glass business in his community this Spring and Summer and we urge that you size up the situation now and get in touch with us.

We are specially equipped to give your orders quick attention. Shipments can be made immediately from our very complete stocks of all kinds of glass.

We handle glass of practically every kind that you will need to close all your sales: window glass, plate, figured, mirror glass, stained, wire bent and ornamental glass. Let us supply you with prices and quotations.

Toronto Plate Glass Importing Company, Limited

Don Roadway **Toronto, Canada**

— Cooking Utensil Insurance Without Cost —

All Canadian and a Yard Wide

"Ideal" pure Aluminum Ware must measure up BECAUSE every utensil bearing the "Ideal" trade mark is positively **GUARANTEED**

For 25 Years
